Skills to be acquired in this module

Students get to know selected concepts of organisation and management. Their respective objectives, instruments and methods are discussed and their use in everyday business is critically reflected. Students learn to deal with different management concepts in a conscious and critical way, especially through case studies and discussions.

Upon completion of the module, students will:
- be familiar with the emergence, development, and content of various management concepts;
- be able to convey key findings of the various management concepts to practical issues in the field of organisation and management;
- develop skills of self-reflection (supported by the technical and didactical concepts).

Module contents

Students receive deeper insights into concepts of organisation and management, including:
- Lean Management
- Change Management
- Quality Management
- Business Process Reengineering

The presentations and discussions within the seminars also offer possibilities to deepen and broaden these topics according to the student’s interest and current developments in theory and practice, e.g. Balanced Scorecard, Learning Organisation, Organisational Culture, Worker Participation, Networks, Diversity Management, Management by Objectives.

Literaturempfehlungen

Further literature will be announced during the semester according to the particular lecture/seminar content.

### Prerequisites
The aim of the course is to provide students with a deep and thorough knowledge regarding
- Tax accounting law
- Taxation procedures.

### Module contents
The course provides a deep insight into
- Tax accounting law
- Basics of tax accounting law
- Principal values (cost of purchase/cost of manufacture, going concern value, fair market value)
- Depreciation, subsidy regulations
- Transfer of hidden reserves
- Leasing
- Provisions
- Taxation procedures
- Overview about general fiscal law (AO) and tax court code (FGO)
- Tax determination and taxing procedures
- Types of taxing
- Deadlines and extent of balances and tax assessments corrections
- Interest yield

### Literatureempfehlungen
- Falterbaum, Hermann (aktuelle Fassung): Buchführung und Bilanz
- Rose, Gerd & Watrin, Christoph (aktuelle Fassung): Abgabenordnung; mit Finanzgerichtsordnung

It is worth mentioning, that due to the fast-changing tax law, further recommendations regarding the literature cannot be made yet, but are rather given during the course. Required are:
- A collection of the most important tax laws (e.g. NWB-publisher) in current form
- A loose-leaf collection of the tax regulations (e.g. Beck-publisher)

Prerequisites
Skills to be acquired in this module
With successful completion of the course, students shall:
- be aware of and be able to evaluate advanced methods of multivariate data analysis.
- be able to select adequate methods in relevant fields of application, like prediction, classification, and segmentation analysis.
- be able to run computer-aided analyses and to interpret the results properly.

Module contents
Various methods of quantitative data analysis such as:
- Linear Regression,
- Logistic Regression,
- Linear Discriminant Analysis,
- Principal Component Analysis,
- Feature selection and evaluation methods.

Skills to be acquired in this module

Building on the existing knowledge of the participants, the course will deepen knowledge of European and international law, whereby emphasis will be laid on those areas in which the dividing line between state intervention (public law) and market rights (private law) has become blurred. Students will be able to analyze contemporary regulatory techniques inherent in the multilevel system of governance and to assess them from an interdisciplinary (economic and legal) perspective.

Module contents

The module comprises two courses, one of which will be taught by PD Dr. Meyerholt, and the other together with Prof. Godt.

The first course deals with selected issues in environmental law. With the general structure of environmental law as a point of departure, the course content will be taught in a holistic manner that will also incorporate the leading decisions of the higher courts. The second course takes into consideration intra-disciplinary environmental law as situated between public and private economic law, whereby special focus will be laid on the European and international dimensions.

- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule UF - Recht

**Zuständige Personen**
- Godt, Christine (Module responsibility)
- Lehrenden, Die im Modul (Prüfungsberechtigt)

**Prerequisites**

**Skills to be acquired in this module**
- Students will be able to describe European and international legal-economic interdependencies
- apply international and European legal norms and legal issues
- have a command of English legal terminology.

**Module contents**
The module consists of two lectures which deal with changes in policies and institutions of international economic law. One lecture focuses on economic law and institutions as shaped by international law, while the other class is dedicated to EU foreign trade law. A basic knowledge of the institutions of international and EU economic law (WTO, IMF, World Bank, European Commission) is a prerequisite for attending this module. The focus lies in helping students understand the processes of internationalization and Europeanization that inform the current interactions between the different actors on the international plane (companies, states and parastatals). In this module, public and private economic law will be presented as a single unit. The international law part of the module focuses on the rationale and regulation of the major free trade agreements, including dispute settlement. Other topics to be addressed include the conflict of laws and the UN Convention (CISG). The EU law focuses on competition and foreign trade law, including procurement and taxation law.

Prerequisites:

Skills to be acquired in this module:
- Understanding of exchange rates as strategic prices in open economies.
- Understanding of the interdependence of balance-of-payments constraints and exchange rates.
- Capability to discuss different models of exchange rate determination.
- Ability to research data and evaluate the literature on specific aspects of financial market globalization and strategies of exchange-rate policy.
- Understanding of the history of fixed-exchange-rate systems.
- Ability to relate the importance of historical experience in international monetary and financial economics.

Module contents:
The lectures address the following issues:
- exchange rates and the balance of payments,
- open-economy macroeconomics,
- exchange rate determination,
- international financial markets,
- fixed-exchange-rate systems,
- currency crises,
- optimum currency areas and monetary integration,
- choice of exchange rate regime,
- financial market regulation.

In the seminar students will present papers on general and topical issues (theoretical models, policy strategies, case studies) in the fields of financial market globalization and exchange-rate policy.

Literatureempfehlungen:
Selected chapters from:

And other specific readings for the seminar papers.

Zuständige Personen
- Rott, Peter (Module responsibility)
- Lehrenden, Die im Modul (Module counselling)
- Lehrenden, Die im Modul (Prüfungsberechtigt)

Prerequisites
Upon completion of the module, students will be able to:
- demonstrate a knowledge of the basics of insolvency law and insolvency proceedings law as well as the basics of banking law and capital market law.
- classify insolvency law with its functions as enforcement law, restructuring law, and the right to alter a relationship in business life.
- demonstrate a knowledge of the positions of the groups involved (creditors, debtors, the responsible bodies of legal persons) in the insolvency proceedings, including the rights and obligations of the groups involved in the process and in the run-up to the crisis, as well as the discharge of residual debt as a rehabilitation option for natural persons.
- demonstrate a familiarity with the principles of the legitimacy verification pursuant to the general tax code, money laundering, bank secrecy, and the information requirements of credit institutions.
- identify the functions of banking and capital market law as well as modern insolvency law.
- use these functions in practical examples.
- assess the progress of insolvency proceedings, including their requirements on creditors and debtors.

Module contents
The module deals with banking and capital market law as well as insolvency and insolvency proceedings law within two separate lectures.

The main focus of the lecture in banking and capital market law is banking law. After an introduction to general banking law, the most important legal questions regarding collateralisation of loans are discussed. Additionally, the topics of the legitimacy verification pursuant to the general tax code, money laundering, bank secrecy, and the information requirements of credit institutions are discussed. Subsequently, the basic principles of securities law are discussed. Their legal basis and the economic background are analysed. Where possible, the interrelations between the various securities and the events of the financial market crisis will be discussed.

The lecture Insolvency Law deals with the basics of debt enforcement and insolvency law. Procedures will be shown and explained. The first part deals with company insolvency law, the second part with consumer insolvency and residual debt relief law.

Literaturempfehlungen
Current literature references are given in the events.

Prerequisites:
keine

Skills to be acquired in this module:
Students
- understand the importance of incentive systems for economic processes and can analyze the effects of incentive systems;
- have a firm knowledge in game theory and contract theory, and can address questions in the context of scientific discussion;
- are able to apply methods from game theory and contract theory largely independently to the analysis of situations in which agents interact strategically;
- are able to design incentive schemes – on their own and in teams – and to acquire knowledge on their own for this purpose and, to present their results, and to defend them in the scientific discourse.

Module contents:
The first part of the module covers game theory. Game theory is an important method in economics to analyze strategic interactions of agents, e.g., on markets, in organizations or in bargaining situations.
The second part of the module covers contract theory that – according to the Nobel laureate Kenneth Arrow – has been „the most important development in economics in the last forty years“. We work out the fundamentals of screenings, signaling and moral hazard and apply them to different topics, e.g., from labor economics, economic organization and management, law and economics as well as industrial economics.
In both parts, there is a tutorial. Here students largely independently apply the acquired knowledge to different situations of strategic interaction in economics and present their results.

No

### Skills to be Acquired in this Module:
The aim of the course is to acquire an understanding of key issues of competition theory and competition policy. This comprises the fundamentals of industrial economics, the tradeoff between market power and efficiency, and the practice of competition policy in Europe.

### Module Contents:
The module consists of two courses. Course A deals with the theory of monopoly, the theory of oligopoly, cartels and market entry and the welfare analysis of market structure. Course B deals with topics in international regulatory and competition policy, especially monopoly regulation, economies of scale vs. market power in transnational markets, aims and instruments of European regulatory and competition policy.

### Literature:

Prerequisites

Skills to be acquired in this module

The students should...

- know and understand basic concepts, instruments and theories in the context of corporate social responsibility and corporate sustainability
- be able to apply conceptual frameworks to analyze and critically question the sustainability of companies
- develop options to improve the sustainability of companies and derive recommendations for their implementation in practice

Module contents

The module "CSR" provides an overview of the debates on the social responsibility of firms. The first session will briefly introduce the historical debate on Corporate Social Responsibility and Corporate Sustainability and delineate important concepts. The following sessions will use concrete company case studies as a basis for a critical discussion of central questions in the context of corporate social responsibility and sustainability. Questions that will be discussed are, amongst others:

- How can one determine whether a firm acts in a socially and ecologically sustainable way
- Which factors drive and hinder the diffusion of socially and ecologically superior solutions and companies in the market?
- In how far is there a conflict between firm and market growth on the one hand and sustainability on the other hand?
- Which possibilities does a company have to deal with conflicts between social/ecological and economic goals?
- How can existing firms and value chains be transformed toward sustainability?
- What is the role of managers and boards of directors for organizational change toward sustainability?
- How does the ownership and financial structure of firms influence their strategy toward sustainability?
- In how far can cooperation and partnerships between organizations help integrate social and ecological aspects in firms?

In addition to discussing these questions by drawing on company case studies, students will be introduced to the corresponding theoretical concepts and frameworks in the academic literature. Also, students will be given the opportunity to test different strategies for implementing sustainability in organizations during a simulation, which allows them to gain first-hand insights into the emerging challenges. Toward the end of the course, students will apply and deepen the knowledge they have gathered over the semester by writing a seminar thesis.

In today's highly dynamic business environment, innovation is the key to the success of most firms. Moreover, technological and organizational innovations represent valuable instruments for achieving progress toward sustainable development. Against this background, this module familiarizes students with the tools and processes for managing innovation and for developing overall more innovative firms. The module comprises a lecture and a seminar. In the lecture, students become acquainted with the drivers to and role of innovation; they learn about designing innovative firms and developing innovation strategies; they get to know the different sources of innovation; they familiarize themselves with the methods for choosing between alternative planned innovations; they learn how innovation is implemented; and they understand how innovation benefits are exploited. The accompanying seminar is supposed to familiarize the students with select advanced topics surrounding the management of innovation. Moreover, the students train their skills in working in teams, in working with scientific literature, in academic writing, and in presenting in front of a large audience.

**Module contents**

Organizational change, creative destruction, ambidexterity, exploration, exploitation, absorptive capacity, sustainability transitions, innovation models, innovation networks, innovation strategy, innovation ecosystems, diffusion of innovations, organizational routines, entrepreneurship, new ventures, etc.

### Zuständige Personen
Lehrenden, Die im Modul (Prüfungsberechtigt)

Hoppmann, Jörn (Module responsibility)

### Prerequisites
**Skills to be acquired in this module**
The students should:
- know basic definitions, trends and application areas of digitalization
- be able to assess the economic effects of digitalization
- understand corporate strategies and business models in the context of digital transformation
- know how companies should design processes and structures to promote digitalization in organizations
- have an overview of social, legal and ethical aspects of digitalization
- assess the environmental impact of digitalization
- evaluate digital products, services and business models using ethical and sustainable guidelines
- independently develop proposals for the integration of ethical, social and ecological criteria in digitalization projects and processes

### Module contents
The module "Digital Strategy and Sustainability" provides insights into the role digitalization for companies and the associated social discourse. The digital transformation leads to the emergence of new business models, markets and forms of interaction. This requires comprehensive changes in strategic orientation as well as in business processes and structures. In addition, new regulations and standards are required at the societal level in order to meet the ethical, ecological, and societal challenges posed by digitization.

In the first part of the seminar, students are familiarized with the basics and application areas of digitalization as well as the economic, social, and ecological implications. Toward this end, important questions in the context of digital transformation will be raised and discussed drawing on company case studies. Exemplary questions that will be dealt with in this context are:
- What are the technological drivers of digitalization and what trends can be observed?
- What is the impact of digital transformation on industries and companies?
- How can companies design strategies, business models, processes and structures to address the digital transformation?
- What are the consequences of digitalization on a societal and legal level?
- How does the digital transformation affect the natural environment?
- How can social, ethical, and ecological aspects be integrated into digital products, services and business models?

In the second part of the course, students will develop digital business models in teams under the guidance of experienced coaches, taking into account economic, ecological and social/ethical criteria. The results are presented to the other students and company representatives and will be summarized in a term paper. An important part of the term paper is the critical reflection of current methods used to develop digital business models with regard to sustainability criteria.

**Skills to be acquired in this module**
- Knowledge on the basic concepts and strategies of sustainability management related to corporate practice:
  * Sustainability: Basic concepts, strategies,
  * Domestic and international challenges for business,
  * Business case for sustainable development,
  * Integrative concepts of sustainable corporations,
  * Sustainable strategies,
  * Management instruments
- Discussing topics of international sustainability management with students from different scientific disciplines.
- Ability to present and evaluate different concepts and instruments of international sustainability management

**Module contents**
This module consists of a one lecture and one seminar (2 weekly contact hours per lecture/seminar) dealing with basic concepts and strategies of sustainability management related to corporate practice. Both, lecture and seminar give an overview of current sustainability strategies for companies and present a variety of instruments to integrate and initiate sustainable development within corporations. While the lecture focuses more on theoretical approaches and introduces basic concepts of corporate sustainability management, the seminar provides a variety of case studies and business cases to demonstrate different concepts and instruments of sustainability management. The seminar provides the possibilities for inter- and transdisciplinary exchange and discussions.

- Methods of project management
- Introduction into the methods of qualitative empirical research
- Introduction into approaches to time management
- Identification of individual or team projects in sustainability management (case studies, empirical studies, marketing concepts)
- Self organized work on individual or team projects
- Mid-term and final presentation of project results

#### Module contents
This module consists of two seminars (2 weekly contact hours per seminar) dealing with several topics from the broad field of sustainability, economics and management during term.

The module's intention is to integrate current research activities of the University from the research areas of sustainability, economics and management into teaching activities. The Module provides students the possibility to actively participate in current research at Oldenburg University. The module's seminars each year deal with different projects and are thus designed each year by a different group of Oldenburg located researchers.

This teaching concept provides the interface between theory and application of scientific theories into research practise. Thus, this module also introduces research work at universities in general.

**Prerequisites**

Learning about sustainability, economics and management in different scientific contexts.

Understanding the complexity of sustainability, economics and management.

Discussing topics of sustainability, economics and management with students from different scientific disciplines.

Ability to present and evaluate different concepts of sustainability, economics and management

**Module contents**

This module consists of two seminars (2 weekly contact hours per seminar) dealing with selected topics from the broad field of sustainability, economics and management. Out of a variety of several seminars the student can choose two most suitable seminars depending on individual choices. The seminars and the seminar contents vary each semester to provide topics relevant for current discussions within the broad field of sustainability, economics and management. Intentionally seminars from several research fields and faculties are offered to also combine different point of views and to bring students from different scientific backgrounds together. The seminars provide the possibilities for inter- and transdisciplinary exchange and discussions.

**Zuständige Personen**
- Busse, Christian (Module responsibility)
- Lehrenden, Die im Modul (Prüfungsberechtigt)
  - Busse, Christian (Module counselling)

**Prerequisites**
- By focusing on sustainability from an intra-, and inter-organizational perspective, this module aims to equip students with an in-depth knowledge of the sustainability-related challenges and problems within supply chain management and suggests some tools for managing the same. It further seeks to capacitate students to understand and analyze the trade-offs and conflicts of targets within sustainable supply chain management. The content is closely linked to the latest research in the field, providing a theoretical understanding (within the lecture) while using real-world case examples (within the seminar) to develop a practical understanding simultaneously. Students will be able to connect theory with practice and get a taste of real-life corporate scenarios or lay a foundation for possible master theses. Further, working in groups will help students brush up their team management skills, and the final report shall accustom them to the intricacies of scientific writing.

**Module contents**

This masters-level module focuses on how firms could practically manage sustainability in its supply chains. Two broader perspectives, as detailed below, guide the coursework:

1) The material flow perspective approaches SSCM with sustainably managing physical flows and processes within a firm’s operations and upstream (and downstream) supply chain links. Individual (lecture) sessions are built around the following topics: Introduction to Sustainability and Supply Chain Management; Introduction to Sustainable Supply Chain Management; Sustainable Product Development & Lean and Green; Workplace Health and Safety; Sustainable Transportation; Sustainable Warehousing & Sustainable Packaging; and Closed-Loop Supply Chain Management

2) The relationship perspective further adopts a more direct managerial viewpoint on inter-firm relations. Individual (lecture) sessions discuss the following topics: Stakeholder Management; Legitimacy, Decoupling & Greenwashing; Supply Chain Sustainability Risks; Sustainable Supplier Management; and Supply Chain Sustainability Dilemmas

Some of the theoretical perspectives discussed within the lecture sessions will be prepared by case studies of well-known companies such as Walmart, DHL, HP, Volkswagen, Lidl, and Apple.

**Literaturempfehlungen**

The lecture content has been developed from various research publications, rather than a textbook. Students are encouraged to read some of the original publications as amendments to the lecture. The case studies will mostly be based on professionally written cases. Scholarly publications/articles, as well as the case study documents, will be provided and discussed throughout the sessions.

No

**Skills to be acquired in this module**
- Learning about sustainability, economics and management in different scientific contexts.
- Understanding the complexity of sustainability, economics and management.
- Discussing advanced topics of sustainability, economics and management with students from different scientific disciplines.
- Ability to present and evaluate different concepts of sustainability, economics and management.

**Module contents**
This module consists of two seminars (2 weekly contact hours per seminar) dealing with selected topics from the broad field of sustainability, economics and management. Out of a variety of several seminars the student can choose two most suitable seminars depending on individual choices. The seminars and the seminar contents vary each semester to provide topics relevant for current discussions within the broad field of sustainability, economics and management. Intentionally seminars from several research fields and faculties are offered to also combine different point of views and to bring students from different scientific backgrounds together. The seminars provide the possibilities for inter- and transdisciplinary exchange and discussions.

**Literaturempfehlungen**
Depending on the topic and content of each seminar

Lehrenden, Die im Modul (Prüfungsberechtigt)
Fichter, Klaus (Module responsibility)

Prerequisites:
none

Skills to be acquired in this module:
The main target of the "Eco-Venturing" module is to develop entrepreneurial skills for the development and implementation of environmental innovations and sustainable business ideas. These include:
- the ability to identify new solution needs in the context of sustainable development and the sustainable development goals set by the United Nations,
- Knowledge and skills for the entrepreneurial development and implementation of innovative solutions,
- Knowledge and skills for systematically combining economic (Eco-nomical) and ecological (Eco-logical) objectives and
- the ability to strategically develop "green" business areas and markets.
- The entrepreneurial development and implementation of environmental innovations can relate both to the establishment of new companies and organisations and to the development of new solutions and business ideas within the framework of established companies and organisations (corporate venturing).

Module contents:
The main focus of the Eco-Venturing module is the development of new or established business start-up concepts. Under the guidance of their lecturer, participants will work together with selected regional business partners who are both economically successful and contribute to the protection of the environment and the climate, to promote such start-up concepts. What these concepts have in common is that they address the issue of sustainability.

Reference text:
The module "Eco-Venturing" is part of the Master's programme "Sustainability Economics and Management (SEM)" and focuses on "Eco-Entrepreneurship". The module "Eco-Venturing" can be taken either individually or in combination with the two other modules of the study focus "Eco-Entrepreneurship" ("wir 920: Advanced Entrepreneurship", "wir 832: Innovation Management"). Two of the three modules must be taken in order to be recognised as a specialisation. The Eco-Venturing module is mandatory (cf. examination regulations for the Master's programme SEM, § 4, para. 4).

The module Eco-Venturing is also available for students of the Master's programme WiRe in the ManECo area and can be credited as the module Advanced Entrepreneurship (wir849 Advanced Entrepreneurship). The same applies to students of the Master's programme in Business Informatics. Here it can also be proven as wir849 Advanced Entrepreneurship

Zuständige Personen

Meyerholt, Ulrich (Module counselling)
Godt, Christine (Module responsibility)

Lehrenden, Die im Modul (Prüfungsberechtigt)

Prerequisites

Skills to be acquired in this module
Building on the existing knowledge of the participants, the course will deepen knowledge of European and international law, whereby emphasis will be laid on those areas in which the dividing line between state intervention (public law) and market rights (private law) has become blurred. Students will be able to analyze contemporary regulatory techniques inherent in the multilevel system of governance and to assess them from an interdisciplinary (economic and legal) perspective.

Module contents
The module comprises two courses, one of which will be taught by PD Dr. Meyerholt, and the other together with Prof. Godt. The first course deals with selected issues in environmental law. With the general structure of environmental law as a point of departure, the course content will be taught in a holistic manner that will also incorporate the leading decisions of the higher courts. The second course takes into consideration intra-disciplinary environmental law as situated between public and private economic law, whereby special focus will be laid on the European and international dimensions.

### Prerequisites
- none

### Skills to be acquired in this module

- This course aims at giving students an understanding of reasons, goals and instruments for climate policy, as well as implied complications due to the long term characteristics and the international dimension of climate change. Students first learn basics about the natural science of climate change and the main statements of climate research about the anthropogenic contribution to climate change. The economic interpretation of high pollution as a symptom of a market failure then leads to the treatment of policy instruments, and the understanding of economic efficiency as a prerequisite for effective climate policy. Game theoretic analysis of international negotiations and agreements provides key insights about the international dimension of the problem. By means of practical examples students then see in detail the functionality and pitfalls of selected implemented (or currently discussed) policies, e.g. the EU-ETS. With successful completion of the course, students shall be able to judge climate policy issues on an informed scientific basis (natural science and economics).

### Module contents

- Natural science of climate change: greenhouse effect; measures, causes and impacts of climate change. Economics of climate change: market failures (public goods, externalities); game theory of international agreements (prisoner’s dilemma, chicken game, assurance game, repeated games, continuous choice); environmental policy instruments (especially taxes, tradable permits).
- Climate policy in practice: EU-ETS (pitfalls: market segmentation, conditional grandfathering, lobbying); emission taxes and the EU-ETS; interaction between black and green quotas; embodied carbon tariffs.

Verwendbarkeit des Moduls
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule NM - interdisziplinär
- Master's Programme Business Informatics (Master) > Akzentsetzungsmodulle der Informatik
- Master's Programme Computing Science (Master) > Angewandte Informatik
- Master's Programme Environmental Modelling (Master) > Mastermodule
- Master's Programme Sustainability Economics and Management (Master) > Additional Modules

Zuständige Personen
Marx Gomez, Jorge (Module responsibility)
Lehrenden, Die im Modul (Prüfungsberechtigt)

Prerequisites
This module completes the knowledge and abilities gained in the field of Environmental Informatics and it creates a strong reference to up to date topics in the field of sustainability. The content taught in this module can directly be applied in an upcoming study and professional career.

Professional competence
The students:
- are able to classify and explain the sustainability paradigm
- are aware of the current status of sustainability reporting
- are able to define and to model material flows
- have obtained know-how in the field of corporate environmental management information systems (CEMIS)

Methodological competence
The students:
- implement CEMIS
- apply different techniques and methods to case studies
- develop new case studies in teams

Social competence
The students:
- are supposed to work in teams and therefore have to identify working packages and have to take on responsibility for the jobs assigned to them
- present and discuss their own results with the team and the other members of the course

Self-competence
The students:
- learn about their own limitations and learn to accept criticism in order to strengthen their own abilities

Module contents
This course teaches methods, approaches and techniques in the field of information processing in order to support solutions to problems that arise from companies' impact on the environment. In particular, ICT supported approaches of production-integrated environmental protection, environmental controlling and reporting are introduced and discussed. In order to enable the integration of such approaches into environmental protection, environmental management and its systems are taught as well.

The content in detail:
- environmental management as a basis for sustainability
- sustainability and material flow management
- strategic environmental management
- eco-controlling life cycle
- characteristics and system architectures of CEMIS
- standard software systems
• environmental accounting systems

Module contents

A strong social pressure forces enterprises to question their current way of implementing their business and to include different aspects of sustainability into their strategies and operational actions. Such a rethinking of one's business is supported by corporate environmental management information systems. Such systems aim at optimising the energy and resource usage, emission and waste minimisation as well as production integrated environmental protection. Of course they support the fulfillment of legal requirements such as waste management or hazardous material handling.

The module will cover:

- recent and emerging research questions and topics related to the field of CEMIS as well as Business Environmental Informatics.
- discussion and hands-on experience of standard software systems and newly established solutions.
- applying the knowledge obtained to the definition of new as well as on solving new case studies.

Prerequisites

Skills to be acquired in this module
- Achieving basic knowledge about audit practises
- Achieving broad knowledge about the audit profession and structuring of audit processes
- Achieving competences in evaluating the possibilities and limits of audit techniques
- Application of audit techniques while using case studies and focusing on certain audit areas.

Module contents

In this course, audit basic principles, audit methods and audit techniques will be presented while emphasizing on large corporates. In addition, an overview about audit processes and audit techniques in the context of the control, information and accreditation function as well as legal specifications is given. Working in groups, case studies will strengthen the achieved knowledge. In addition, the focus will be on international financial reporting standards (IFRS) and international auditing standards (IAS) for proving the financial statements as well as testing the internal risk management.

**Prerequisites**

Skills to be acquired in this module

The course provides insights into the empirical analysis of firms' financing and investment decisions. We discuss theoretical foundations of long-term financing, capital structure choice, cost of capital determination, capital market efficiency, and corporate takeover decisions as well as respective empirical findings. Moreover, you will learn how to build financial models, handle financial data, and conduct financial analyses using the statistical software R.

**Module contents**

The course covers key concepts of modern corporate finance in theory and practice. In particular, we focus on how investment and financing decisions affect the value of the firm. Among the topics discussed are:
- Fundamental analysis and capital market efficiency.
- Cost of debt and equity capital.
- Business valuation models based on dividends, cash flows, and (abnormal) earnings.
- Capital structure and dividend policy.
- Advanced valuation issues.

Prerequisites

none

Skills to be acquired in this module

By the end of the course students should have answers to the following questions:
- How are fundamental values (or “intrinsic values”) estimated?
- What are business strategies analyzed in order to understand the value they create?
- What business activities determine value?
- How is “value created for shareholders” identified?
- How does ratio analysis help in valuing?
- How does profitability tie into valuation?
- What is growth? How does one analyze growth? How does one value a growth firm?
- How does one deal with the accounting methods used in financial statements?
- How is financial analysis developed for strategy and planning?
- What determines a firm’s P/E ratio? How does one calculate what the P/E should be?
- How does one evaluate risk? For equity? For debt?
- How does one analyze an equity research report?
- How does one trade on fundamental information?

Module contents

With a stock market bubble and a financial crisis in our recent history, there have been increasing calls to “return to fundamentals.” This is a course on fundamental analysis. The primary emphasis is on equity (share) valuation, with a focus on developing and applying methods for valuing firms using financial statement analysis.

The course has a very practical focus. The methods of fundamental analysis will be examined in detail and applied in cases and projects involving listed companies. Topics include models of shareholder value, a comparison of accrual accounting and discounted cash flow approaches to valuation, the analysis of profitability, growth and valuation generation in a firm, diagnosing accounting quality, forecasting earnings and cash flows, pro-forma analysis for strategy and planning, and the determination of price/earnings (P/E) and market-to-book (P/B) ratios.

The course involves the study of the methods of fundamental analysis. The course is intended for students who are interested in understanding how to analyze companies and make investment decisions. The course is designed to be practical and to provide students with the tools they need to make informed investment decisions.

Most importantly, we learn how to handle accounting and financial reports in valuation. We see that valuation is really a matter of appropriate accounting for value. The course combines accounting principles and investment principles to answer the question: How do I account for value so that I can challenge stock prices with some confidence?

The course will be taught from the perspective of designing techniques to be used in an (independent) equity research department or firm. Accordingly, the material is pertinent to the security analyst – particularly the equity analyst – who must issue a buy, hold or sell recommendations on stocks. However, much of the material covered in the course is also relevant to the corporate financial analyst for evaluating acquisitions, restructurings and other investments, and for calculating the value generated by strategic scenarios. By the end of the course, the student should feel competent in writing a thorough, credible equity research report or investment analysis that meets the highest standards of professionalism.

The course is of interest to those contemplating careers in investment banking (particularly in equity research), security analysis, consulting, public accounting, and corporate finance. And it will also help with personal investing.

Prerequisites
Skills to be acquired in this module
Students have to understand the theoretical orientation and the institutional structure of financial accounting and standard setting. Many important standards, such as fair value accounting, financial instruments, reserve recognition accounting, management discussion and analysis, employee stock options, impairment tests, hedge accounting, derecognition, consolidation, and comprehensive income, will be analyzed and critically evaluated from students.
This course aims to provide students with an in-depth understanding of the underlying accounting concepts and accounting standards governing the preparation of financial statements under International Financial Reporting Standards (IFRS) for external users. Furthermore it develop students' conceptual skills and professional competence in financial accounting in compliance with the regulatory and financial framework under IFRS.

Module contents
- Accounting Under Ideal Conditions
- The Decision Usefulness Approach to Financial Reporting
- Efficient Securities Markets
- The Value Relevance of Accounting Information
- The Measurement Approach to Decision Usefulness
- Measurement Applications
- The Efficient Contracting Approach to Decision Usefulness
- An Analysis of Conflict
- Executive Compensation
- Earnings Management
- Standard Setting: Economic Issues
- Standard Setting: Political Issues

**Prerequisites**

Upon completion of the module students will be able to explain the role financial institutions play in financial markets based on economic theory. They will have a sound knowledge of institutional and regulatory conditions under which financial institutions operate today, and they will be able to critically assess respective developments in the financial sector. Moreover, they will have developed a sound understanding of how banks are managed in a competitive environment.

**Module contents**

We will discuss theoretical foundations of financial intermediation in general, and of banking in particular as well as the economic, institutional, and regulatory context in which financial institutions operate today. Moreover, we will cover selected topics in the area of bank management and bank accounting.

**Literatureempfehlungen**

The aim of the course is to provide students with a thorough knowledge of how to identify, classify, measure, and manage different types of financial business risks. In particular, we will discuss the properties and potential applications of derivatives in financial risk management. Upon completion of this module students
• will have a sound understanding of the concept of risk management, and will be able to distinguish different types of financial risks and risk management approaches;
• will be able to devise hedging strategies, arbitrage strategies, and speculative strategies using financial derivatives such as futures contracts, forward contracts, options, and swaps;
• will be able to consistently apply valuation models to determine theoretical prices of financial derivatives.
• will be able to assess limitations of financial derivatives in risk management.

The course provides insights into the theory and practice of modern financial business risk management, including:
• the concept of risk, types of financial risks, and approaches to risk measurement;
• the mechanics of financial markets, including derivatives markets;
• the properties of selected financial instruments, including financial derivatives such as forwards, futures, options, and swaps;
• tools and techniques for managing financial risks.

Highly recommended readings:
• John C. Hull, Options, Futures, And Other Derivatives, current edition, Pearson.
Optional readings:
Further readings may be announced during the course.

Students are required to actively participate in the course by preparing classes, by performing follow-up coursework, and/or by giving presentations according to the rules defined by the lecturer in the first session.

**Skills to be acquired in this module**
The aim of the course is to provide insights into the state-of-the-art of academic research in selected areas of accounting and auditing, finance, and taxation. Upon completion of the module, students will be able to place typical research questions and research designs in the aforementioned areas within a broader context of academic research, and to assess selected contributions' significance.

**Module contents**
The course involves reading and discussing cornerstone journal articles as well as contemporary articles and working papers in accounting/auditing, finance, and/or taxation. Particular emphasis will be placed on the evaluation of the respective studies with respect to their research questions, the methodologies used, and their contributions to the literature.

**Literaturempfehlungen**
Will be announced at the beginning of the course.

Dittmer, Jochen (Module responsibility)

Prerequisites

Skills to be acquired in this module
The aim of the course is to provide students with a deep and thorough knowledge regarding
- Tax accounting law and
- Taxation procedures.

Module contents
The course provides a deep insight into
Tax accounting law
- Basics of tax accounting law
- Principal values (cost of purchase/cost of manufacture, going concern value, fair market value)
- Depreciation, subsidy regulations
- Transfer of hidden reserves
- Leasing
- Provisions
Taxation procedures
- Overview about general fiscal law (AO) and tax court code (FGO)
- Tax determination and taxing procedures
- Types of taxing
- Deadlines and extent of balances and tax assessments corrections
- Interest yield

Literaturempfehlungen
- Falterbaum, Hermann (aktuelle Fassung): Buchführung und Bilanz
- Rose, Gerd & Watrin, Christoph (aktuelle Fassung): Abgabenordnung; mit Finanzgerichtsordnung
It is worth mentioning, that due to the fast-changing tax law, further recommendations regarding the literature cannot be made yet, but are rather given during the course. Required are:
- A collection of the most important tax laws (e.g. NWB-publisher) in current form
- A loose-leaf collection of the tax regulations (e.g. Beck-publisher)

Modulkürzel: wir835

Credit points: 6.0 KP

Workload: 180 h

Verwendbarkeit des Moduls:
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunkt "Accounting, Finance, Taxation" (AFT) (MPO2020)
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule AFT - Recht
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule RdW - Recht

Zuständige Personen:
Dittmer, Jochen (Module responsibility)

Prerequisites:
-

Skills to be acquired in this module:
The aim of the course is to provide students with a deep and thorough knowledge regarding • Mergers & Acquisition tax and • International taxation

Module contents:
The course provides a deep insight into Merger & acquisition tax • Taxation of sale of company shares • Admittance of a shareholder • Insertion of operations, partial operations and partner shares in corporate enterprises • Transformation of corporate enterprises into business partnerships • Merger of corporate enterprises • Separation of corporate enterprises and business partnerships International taxation • Taxation of transnational operations in form of direct businesses, permanent establishments and corporate enterprise subsidiaries • Possibilities and limitations regarding the prevention of international double taxation • Profit deferral and problems regarding transfer prices • Problems in the prevention of international low taxation

Literaturempfehlungen:
• Brähler, Gernot (aktuelle Fassung): Umwandlungssteuerrecht: Grundlagen für Studium und Steuerberaterprüfung • Schaumburg, Harald (aktuelle Fassung): Internationales Steuerrecht: Außensteuerrecht, Doppelbesteuerungsrecht It is worth mentioning, that due to the fast-changing tax law, further recommendations regarding the literature cannot be made yet, but are rather given during the course. Required are: • a collection of the most important tax laws (e.g. NWB-publisher) in current form. • a loose-leaf collection of the tax regulations (e.g. Beck-publisher)

Links:
- German

Duration (semesters): 2 Semester

Module capacity: unlimited

Reference text:
Due to a change in the frequency in which the "Mergers & Acquisition Tax" and the "International Taxation" sections are offered starting with the winter semester 2020/21, it is recommended for the winter semester 2019/20, in addition to the module wir 807 "Taxation and Tax Law I", to study the "Mergers & Acquisition Tax" section of the module wir835 at the same time and that the examination on both sections is taken in the summer semester 2020. The course "Mergers & Acquisition Tax" will otherwise only be offered again in the summer semester 2021.

From the summer semester 2021 onward it is recommended to study the part "Mergers & Acquisition Tax" of the module wir835 in the 2nd semester and the part "International Taxation" in the 3rd semester. At the end of the 3rd semester, the written exam should cover the entire content of the module.

The module deals with banking and capital market law as well as insolvency and insolvency proceedings law within two separate lectures.

The main focus of the lecture in banking and capital market law is banking law. After an introduction to general banking law, the most important legal questions regarding collateralisation of loans are discussed. Additionally, the topics of the legitimacy verification pursuant to the general tax code, money laundering, bank secrecy, and the information requirements of credit institutions are discussed. Subsequently, the basic principles of securities law are discussed. Their legal basis and the economic background are analysed. Where possible, the interrelations between the various securities and the events of the financial market crisis will be discussed.

The lecture Insolvency Law deals with the basics of debt enforcement and insolvency law. Procedures will be shown and explained. The first part deals with company insolvency law, the second part with consumer insolvency and residual debt relief law.

Current literature references are given in the events.

**Prerequisites**

- Skills to be acquired in this module
  - Understanding of exchange rates as strategic prices in open economies.
  - Understanding of the interdependence of balance-of-payments constraints and exchange rates.
  - Capability to discuss different models of exchange rate determination.
  - Ability to research data and evaluate the literature on specific aspects of financial market globalization and strategies of exchange-rate policy.
  - Understanding of the history of fixed-exchange-rate systems.
  - Ability to relate the importance of historical experience in international monetary and financial economics.

**Module contents**

The lectures address the following issues:

- exchange rates and the balance of payments,
- open-economy macroeconomics,
- exchange rate determination,
- international financial markets,
- fixed-exchange-rate systems,
- currency crises,
- optimum currency areas and monetary integration,
- choice of exchange rate regime,
- financial market regulation.

In the seminar students will present papers on general and topical issues (theoretical models, policy strategies, case studies) in the fields of financial market globalization and exchange-rate policy.

Skills to be acquired in this module

- Know advanced theoretical concepts, research streams, and frameworks of in the field of Strategic Management
- Understand the links between different theories and are able to critically question them
- Can apply theories to understand and interpret organizational dynamics in daily life
- Are able to develop solutions for concrete practical challenges in companies in the context of Strategic Management based on the concepts and frameworks they have learned
- Can put the newly acquired knowledge into a broader context, so it can be deepened in the further professional life

Module contents

The course offers an overview of advanced concepts and frameworks in the field of Strategic Management. At the beginning, the course will provide a brief introduction into the historical development, goals, and research streams of the field. In this context, important terms, methods, and philosophical approaches of (management) research will be clarified. Subsequently, students form groups to analyze selected scientific articles with regard to their theoretical relevance and practical implications. Theoretical topics that will be covered in depth are:

1. Top Management Teams, Upper Echelons und Corporate Governance
2. Resource- and Capability-based Approaches
4. Institutional Theory, Institutional Work/Entrepreneurship and Social Movements
5. Organizational Cognition, Identity, and Framing
6. Organizational Learning and Ambidexterity
7. Organizational networks and ecosystems

The results of the analysis will be summarized in a seminar thesis, presented in class, and discussed with the other students. The main goal of the course is to equip students with advanced concepts, which allow them to understand organizational dynamics, question established practices in firms, and develop new solutions that go beyond the application of standard instruments.

### Prerequisites

**Skills to be acquired in this module**

- The students should be enabled to adapt the marketing concept to sectoral, functional and institutional specifics,
- to apply specific concepts and methods of marketing in a problem-oriented way and to be able to reflect their conditions and limitations,
- to develop and present your own conceptual designs in a team.

### Module contents

Marketing initially started as a producer-oriented concept and in recent years has developed as universal approach to influence market transactions. Against this background institutional, functional and sectoral fields of application inspired the formulation of sophisticated marketing approaches, like e.g. marketing of non-profit organisations, strategic marketing, or service marketing. The course presents the specific nature of the different fields of application and relevant consequences for marketing planning. Given the recent inflation of "hyphenated conceptions" of marketing, a reasoned diagnosis as to marketing's core identity is put forth. To this end, perspectives of transfer and integration between the approaches will be developed, that measure up to state-of-the-art theoretical as well as practical demands towards marketing as a universal market-oriented way of managing businesses. This course is divided into a preparatory seminar and an educational workshop towards the end of the term. The latter unit allows case study and role play as well as the presentation student work and boosts social competences irrespective of subject matter.

**Skills to be acquired in this module**
Upon completion of the module, students will be able to:
- apply specific competences to strategic research in marketing
- classify research strategies in marketing according to their meta-theoretical considerations
- estimate research strategies' claims to knowledge and their limitations
- formulate interdisciplinary research strategies aligning competences of empirical methods with the application of theory
- develop own conceptual sketches within teams and to present them

**Module contents**
How is knowledge generated within the scholarly discipline of marketing? This question confronts the field of marketing with central paradigmatic assumptions. The course begins to solve this puzzle on the basis of a historical analysis of the marketing concept's development. Different scientific standpoints in marketing theory and empirical investigation are evaluated against the light of recent developments in markets and society. The current paradigms of consumption research and marketing research's basic standing in the philosophy of science are intensely treated. This also entails reflecting on the opportunities that alternative trends, e.g. a humanistic paradigm, hold in store for marketing research. The course is divided into a preparatory seminar and an educational workshop towards the end of the term. The latter unit allows case study and role play as well as the presentation student work and boosts social competences irrespective of subject matter.

In today's highly dynamic business environment, innovation is the key to the success of most firms. Moreover, technological and organizational innovations represent valuable instruments for achieving progress toward sustainable development. Against this background, this module familiarizes students with the tools and processes for managing innovation and for developing overall more innovative firms. The module comprises a lecture and a seminar. In the lecture, students become acquainted with the drivers to and role of innovation; they learn about designing innovative firms and developing innovation strategies; they get to know the different sources of innovation; they familiarize themselves with the methods for choosing between alternative planned innovations; they learn how innovation is implemented; and they understand how innovation benefits are exploited. The accompanying seminar is supposed to familiarize the students with select advanced topics surrounding the management of innovation. Moreover, the students train their skills in working in teams, in working with scientific literature, in academic writing, and in presenting in front of a large audience.

**Module contents**

- Organizational change, creative destruction, ambidexterity, exploration, exploitation, absorptive capacity, sustainability transitions, innovation models, innovation networks, innovation strategy, innovation ecosystems, diffusion of innovations, organizational routines, entrepreneurship, new ventures, etc.

Prerequisites
None

Skills to be acquired in this module

After participation in the seminar

- the students know different methods and techniques of scientific work and can apply them successfully;
- the students are able to work in a research-oriented way;
- know the importance of theory building in the scientific process and can work independently with it;
- the students have in-depth knowledge of the project topic dealt with in each case with reference to organization and/or personnel;
- the students have the ability to establish a relationship between theory and practice, to critically examine it and to work out solutions;
- are able to place a specific question in the context of the scientific discussion in the field of organization and human resources and to situate, reflect and evaluate it accordingly;
- know the basics of empirical work and are able to independently collect qualitative/quantitative data, evaluate them, present the results and discuss them critically;
- are able to present their own research results, to document their findings in a scientific report according to the accepted rules of scientific work and to represent a point of view in the scientific debate in these subject areas;
- the students are able to find their way in complex learning situations and to work in a problem-oriented manner;
- the students are able to carry out independent research work in a team situation together with other students.

Module contents

The module consists of four project courses and starts in the summer semester. Initially, the lecturers provide a (changing) framework topic from the field of management, organization and personnel (e.g., cooperation and company networks, flexibilization of working conditions, corporate health management). Topics of current research projects of the chair are also included. The individual topics within the framework question are then the subject of student participation. In concrete terms, this means that the lecturers give the students suggestions and initiate topic-finding processes, e.g., by means of metaphor-supported moderation. Work is done alternately in plenary sessions and in small groups under the supervision of the teachers. The project topics are worked on in greater depth in the small student groups.

For methodological-didactic reasons, it is essential that the module runs over two semesters. In the first semester, the theoretical-conceptual basics are worked out, main topics are explored, the basics of empirical work are taught and the course is set for the empirical element to be worked on in small groups. First (especially theoretical-conceptual) results as well as concretizations of the empirical project are presented by the students. The second semester is used to deepen the knowledge and application of empirical work, to work on the empirical part and to write a final scientific report. The results are also presented to the plenary session.

The project module is dominated by forms of active, non-receptive learning. The teachers have primarily a supporting function of information transfer, moderation, consultation and coordination.

- Breisig, Thomas (Module responsibility)

**Prerequisites**

**Skills to be acquired in this module**
Students get to know central theories of organisation and human resources (HR). They are empowered to apply theories in order to explain practical phenomena and to solve practical problems. The ability to put on different "theory glasses" while observing and analysing various organisational and HR practices is fostered. Students learn to deal with different theories in a conscious and critical way, especially through case studies, group work and discussions.

Upon completion of the module, students will:
- be able to explain various classic and modern theories of organisation and human resource theories, differentiate them and reflect them critically;
- be able to apply the theoretical and abstract ways of thinking and perception so as to transfer them on operational decisions;
- develop skills of self-reflection (supported by the technical and didactical concepts).

**Module contents**
Students receive deeper insights into classical and modern theories of organisation and human resource, including:
- Weber's theory of bureaucracy
- Taylor’s principles of Scientific Management
- Human Relations approach
- Behavioural decision theory
- Situational approach
- Micro-political approaches
- New Institutional Economics
- Theories of motivation
- Theories of leadership

The presentations and discussions within the seminars also offer possibilities to deepen and broaden these topics according to the student's interest and latest developments in theory and practice.

**Literaturempfehlungen**

Further literature will be announced during the semester according to the particular lecture/seminar content.

**Skills to be acquired in this module**
The students will learn the fundamentals of the topic Entrepreneurship, including the challenges of founding enterprises and entrepreneurial action in established companies.

**Module contents**
This module deals with the development of business ideas and its realization in business models as well as its perception and evaluation. The content of the lecture further includes issues relating to team-building, resources, and finance, as well as establishing a business plan, the question of the appropriate legal form of an organization, and the specific challenges in the growth stage. Particular aspects will be amplified by guest lecturers from companies.

**Zuständige Personen**
Junker-Michel, Mareike (Module responsibility)

**Prerequisites**
keine

**Skills to be acquired in this module**
The module consists of lecture as well as seminar elements which interlink with each other on a technical and didactical level. By alternating lectures, discussions, and training elements, students get to know the theoretical basics as well as the practical relevance of the module topics. They get the chance to integrate themselves, their theoretical knowledge and practical experiences, and to exchange views with the other students and the lecturer. Different teaching and learning methods support the student’s professional, methodological, social-communicative, and personal competences, e. g. via station learning, role plays and debates, thesis discussions and case study analysis. They work within the entire group as well as small groups.

Attending the course, students
- develop a solid knowledge of this broad subject and are able to relate the various scientific and practical findings with each other and also understand them on a macro-level;
- understand the complex issues, challenges and fields of action in International Management;
- are able to analyse, interpret and manage international economic and business issues within heterogeneous (above all cultural) fields of stakeholders and environments;
- can effectively analyse and apply the strategic, structural and cultural instruments in International Management according to the specific practical context;
- develop skills of self-reflection (supported by the technical and didactical concepts) and are able to press their point within the scientific discussion;

- are able to locate a specific research question within the scientific discussion in the field of International Management and to interlink, reflect and evaluate it accordingly.

**Module contents**
Students gain theoretical as well as practical insights in the backgrounds and specific characteristics of International Management. A specific focus will (as a last point) be laid on international Human Resource Management as it provides notably relevant issues in international business administration.

Students deal with foundations, challenges and possible fields of action within the following topics:

- Economic internationalisation and the international firm
  - Characteristics, development and relevance
  - Terminological differentiation and attribution
  - Research and explanatory approaches
- Environment and orientation of international corporations
  - Culture and management
  - Fields and forms of strategy
  - Organisation by structure and processes
  - Responsibility and public affairs
- Relevance of and fields in international Human Resource Management
  - Requirements and organisation of the central HR areas
  - Recruitment and selection
  - Expatriation of employees
  - Intercultural management
  - Social management

The presentations and discussions also offer possibilities to deepen and broaden these topics according to the students interests and latest developments in theory and practice.

**Literaturempfehlungen**
Further literature will be announced during the semester according to the particular lecture/seminar content.

**Zuständige Personen**

Lehrenden, Die im Modul (Prüfungsberechtigt)

Hoppmann, Jörn (Module responsibility)

**Prerequisites**

Skills to be acquired in this module

- The students should:
  - know basic definitions, trends and application areas of digitalization
  - be able to assess the economic effects of digitalization
  - understand corporate strategies and business models in the context of digital transformation
  - know how companies should design processes and structures to promote digitalization in organizations
  - have an overview of social, legal and ethical aspects of digitalization
  - assess the environmental impact of digitalization
  - evaluate digital products, services and business models using ethical and sustainable guidelines
  - independently develop proposals for the integration of ethical, social and ecological criteria in digitalization projects and processes

**Module contents**

The module "Digital Strategy and Sustainability" provides insights into the role digitalization for companies and the associated social discourse. The digital transformation leads to the emergence of new business models, markets and forms of interaction. This requires comprehensive changes in strategic orientation as well as in business processes and structures. In addition, new regulations and standards are required at the societal level in order to meet the ethical, ecological, and societal challenges posed by digitization.

In the first part of the seminar, students are familiarized with the basics and application areas of digitalization as well as the economic, social, and ecological implications. Toward this end, important questions in the context of digital transformation will be raised and discussed drawing on company case studies. Exemplary questions that will be dealt with in this context are:

- What are the technological drivers of digitalization and what trends can be observed?
- What is the impact of digital transformation on industries and companies?
- How can companies design strategies, business models, processes and structures to address the digital transformation?
- What are the consequences of digitalization on a societal and legal level?
- How does the digital transformation affect the natural environment?
- How can social, ethical, and ecological aspects be integrated into digital products, services and business models?

In the second part of the course, students will develop digital business models in teams under the guidance of experienced coaches, taking into account economic, ecological and social/ethical criteria. The results are presented to the other students and company representatives and will be summarized in a term paper. An important part of the term paper is the critical reflection of current methods used to develop digital business models with regard to sustainability criteria.

wir899 - Supply Chain Management

Module label: Supply Chain Management

Modulkürzel: wir899

Credit points: 6.0 KP

Workload: 180 h

Verwendbarkeit des Moduls:
- Master Applied Economics and Data Science (Master) > Specialization
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunkt Führung von Unternehmen und gesellschaftliche Organisation (FUGO) (MPO2020)
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule RdW - BWL

Zuständige Personen:
- Busse, Christian (Module responsibility)
- Lehrenden, Die im Modul (Prüfungsberechtigt)

Prerequisites:

Skills to be acquired in this module:
In der zum Modul gehörigen Vorlesung werden vor allem formalanalytische Modelle erarbeitet, mit denen Probleme in Wertschöpfungsketten beschrieben und im Rahmen der Modellannahmen optimiert werden können. Hiermit sollen die Studierenden eine Kompetenz zur unternehmensübergreifenden Analyse der gesamten Wertschöpfungskette (Supply Chain) erwerben, mit Hilfe derer sie diese nicht nur verstehen, sondern idealerweise auch verbessern können. Im begleitenden Seminar werden mithilfe von in Gruppen verfassten Hausarbeiten aktuelle Fragestellungen und Diskussionen im Supply Chain Management aufgearbeitet und bewertet. Das Seminar baut ergänzend zur Vorlesung auf konzeptioneller und empirischer Forschung auf. Hiermit lernen die Studierenden wissenschaftliche Diskurse zu praktisch relevanten und nur schwer modellierbaren Herausforderungen des Supply Chain Managements kennen. Ferner werden die Fähigkeiten zum wissenschaftlichen Arbeiten, zur Teamarbeit und zum Präsentieren vor großen Gruppen trainiert.

Module contents:
Die Vorlesung behandelt voraussichtlich folgende Themen: Grundlagen der Supply Chain, Strategischer Fit, Netzwerk- und Standortplanung, Bestandsmanagement, Produkt- und Prozessdesign, Supply-Chain-Koordination, Vertragsdesign, Transport in der Supply Chain, Nachhaltiges Supply Chain Management

**Skills to be acquired in this module**

- verstehen Grundlagen und Verschränkungen von Wettbewerbsrecht und Geistigem Eigentum
- analysieren und beantworten Rechtsfragen im Schnittfeld von Wettbewerb und Geistigem Eigentum
- beherrschen einschlägige Rechtsprechung und können neue Fragen entsprechend einordnen

**Module contents**

Das Modul enthält zwei Veranstaltungen (wahlweise Vorlesung mit Seminar oder zwei Vorlesungen) und richtet sich an Masterstudierende mit Interesse an Innovation und dynamischem Wettbewerb (zwischen Unternehmen, aber auch zwischen Staaten). Aufbauend auf zuvor vermittelte Grundstrukturen des Europäischen Markordnungsrechts, stehen Themen auf der Schnittfläche von Wettbewerb und Geistigen Eigentums (Kartell- und Lauterkeitsrecht) im Zentrum der Veranstaltung.

Lehrziele sind einerseits die akademische Durchdringung, andererseits die Einordnung und Beantwortung praktischer Fallgestaltungen, Themen generieren sich aus der betriebswirtschaftlichen Praxis (u.a. etwa Zugang zu ‘standardessentiellen Patente’, Schutzrechte als Voraussetzung von Unternehmenskooperationen) wie aus volkswirtschaftlichen Fragen (Einfluss des Schutzstandards für Geistiges Eigentum auf Innovation und Direktinvestitionen; Schutzrechte als Marktzugangsbedingungen). Die Studierenden lernen, Geistiges Eigentum und Wettbewerbsrecht als zwei miteinander verschränkte Rechtsgebiete zu analysieren.

**Zuständige Personen**
Godt, Christine (Module responsibility)

**Prerequisites**
- Students will be able to describe European and international legal-economic interdependencies
- apply international and European legal norms and legal issues
- have a command of English legal terminology.

**Module contents**
The module consists of two lectures which deal with changes in policies and institutions of international economic law. One lecture focuses on economic law and institutions as shaped by international law, while the other class is dedicated to EU foreign trade law. A basic knowledge of the institutions of international and EU economic law (WTO, IMF, World Bank, European Commission) is a prerequisite for attending this module. The focus lies in helping students understand the processes of internationalization and Europeanization that inform the current interactions between the different actors on the international plane (companies, states and parastatals). In this module, public and private economic law will be presented as a single unit. The international law part of the module focuses on the rationale and regulation of the major free trade agreements, including dispute settlement. Other topics to be addressed include the conflict of laws and the UN Convention (CISG). The EU law focuses on competition and foreign trade law, including procurement and taxation law.

**Verwendbarkeit des Moduls**
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule RdW - Recht
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule UF - Recht

**Zuständige Personen**
- Boehme-Neßler, Volker (Module responsibility)
- Lehrende, Die im Modul (Prüfungsberechtigt)

**Prerequisites**
Basic knowledge, B.A. with law parts

**Skills to be acquired in this module**
- Participants will understand how digitization affects society and the law. They will learn from selected examples how the law is adapting to digitalization - and where the law reaches its limits.
- The module is theory-, method- and application-oriented.
- The module is interdisciplinary: social science, technological and economic issues are integrated into the module alongside legal content.
- Students develop the ability to see law in its social, economic and technological context. They learn to analyze the interactions of law with digitalization

**Module contents**
- Fundamentals: Digitization as a technological and a cultural development.
- Characteristics of digitization
- Challenge of law through digitization
- Limits of law in the digitized world: selected areas of law as examples

**Literaturempfehlungen**
- Volker Boehme-Neßler, Digitising Democracy. Heidelberg 2020

**Zuständige Personen**

Boehme-Neßler, Volker (Module responsibility)

Lehrenden, Die im Modul (Prüfungsberechtigt)

**Prerequisites**

Skills to be acquired in this module

The students:

- have in-depth insights into the economic conditions of media production, distribution and exploitation.
- know the legal basis and framework conditions of media production, media presentation and mediation (e.g. copyrights, performance rights, distribution of media).
- bring together economic and legal dimensions of media work.
- know the economic and legal framework conditions of media institutions (e.g. television, radio, media mediation).

**Module contents**

This module is about making a connection of the theoretical and practical acquired aesthetic competences with the economic and legal framework conditions. In the sense of professionalisation, prospective media producers and mediators should learn to assess their own future activities under economic and legal conditions.

**Literaturempfehlungen**

Current case law and:

**Zuständige Personen**
- Rott, Peter (Module responsibility)
- Lehrenden, Die im Modul (Module counselling)
- Lehrenden, Die im Modul (Prüfungsberechtigt)

**Prerequisites**
- Upon completion of the module, students will be able to:
  - demonstrate a knowledge of the basics of insolvency law and insolvency proceedings law as well as the basics of banking law and capital market law.
  - classify insolvency law with its functions as enforcement law, restructuring law, and the right to alter a relationship in business life.
  - demonstrate a knowledge of the positions of the groups involved (creditors, debtors, the responsible bodies of legal persons) in the insolvency proceedings, including the rights and obligations of the groups involved in the process and in the run-up to the crisis, as well as the discharge of residual debt as a rehabilitation option for natural persons.
  - demonstrate a familiarity with the principles of the legitimacy verification pursuant to the general tax code, money laundering, bank secrecy, and the information requirements of credit institutions.
  - identify the functions of banking and capital market law as well as modern insolvency law.
  - use these functions in practical examples.
  - assess the progress of insolvency proceedings, including their requirements on creditors and debtors.

**Module contents**
- The module deals with banking and capital market law as well as insolvency and insolvency proceedings law within two separate lectures.
- The main focus of the lecture in banking and capital market law is banking law. After an introduction to general banking law, the most important legal questions regarding collateralisation of loans are discussed. Additionally, the topics of the legitimacy verification pursuant to the general tax code, money laundering, bank secrecy, and the information requirements of credit institutions are discussed. Subsequently, the basic principles of securities law are discussed. Their legal basis and the economic background are analysed. Where possible, the interrelations between the various securities and the events of the financial market crisis will be discussed.
- The lecture Insolvency Law deals with the basics of debt enforcement and insolvency law. Procedures will be shown and explained. The first part deals with company insolvency law, the second part with consumer insolvency and residual debt relief law.

**Literaturempfehlungen**
- Current literature references are given in the events.

wir860 - Data Protection Law

Module label: Data Protection Law
Modulkürzel: wir860
Credit points: 6.0 KP
Workload: 180 h

Verwendbarkeit des Moduls:
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule UF - Recht
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunkt "Recht der Wirtschaft" (RdW) (MPC2020)
- Master's Programme Business Informatics (Master) > Module der Wirtschafts- und Rechtswissenschaften (Master)
- Master's Programme Computing Science (Master) > Nicht Informatik

Zuständige Personen:
Lehrenden, Die im Modul (Prüfungsberechtigt)
Louven, Sebastian (Module counselling)
Rott, Peter (Module responsibility)

Prerequisites:
Skills to be acquired in this module:
Upon completion of the module, students will be able to:
- recognize simple data protection incidents.
- apply existing protection mechanisms.
- implement projects in accordance with the law.
- discuss and defend their plans in front of others.

Module contents:
The module gives an overview on data protection laws. Basic knowledge of data protection regulations (DSGVO; BDSG) and existing protection mechanisms is imparted. Within the framework of the seminar, the discussed topics will be deepened with the help of seminar papers and individual aspects will be discussed in more detail. The event will highlight the new informational structures in modern society and their effects on data protection and data security. Questions concerning general personal rights, freedom of information, IT security and relevant criminal law regulations will be discussed on the basis of examples and legally provided protection mechanisms as well as the tasks of supervisory authorities will be discussed. In particular, the most important decisions on data protection will be covered in detail during the seminar. At the seminar, students will have the opportunity to prepare in-depth seminar papers on the various topics, which will then be discussed with all participants.

Literatureempfehlungen:
Kühling/Klar/Sackmann, Datenschutzrecht, 2018.
Further literature references will be given in the lecture.

| Skills to be acquired in this module | The aim of the course is to acquire an understanding of key issues of competition theory and competition policy. This comprises the fundamentals of industrial economics, the tradeoff between market power and efficiency, and the practice of competition policy in Europe. |
| Module contents | The module consists of two courses. Course A deals with the theory of monopoly, the theory of oligopoly, cartels and market entry and the welfare analysis of market structure. Course B deals with topics in international regulatory and competition policy, especially monopoly regulation, economies of scale vs. market power in transnational markets, aims and instruments of European regulatory and competition policy. |

Hoppmann, Jörn (Module responsibility)
Lehrenden, Die im Modul (Prüfungsberechtigt)

Prerequisites

Keine

Skills to be acquired in this module

- Know advanced theoretical concepts, research streams, and frameworks of the field of Strategic Management
- Understand the links between different theories and are able to critically question them
- Can apply theories to understand and interpret organizational dynamics in daily life
- Are able to develop solutions for concrete practical challenges in companies in the context of Strategic Management based on the concepts and frameworks they have learned
- Can put the newly acquired knowledge into a broader context, so it can be deepened in the further professional life

Module contents

The course offers an overview of advanced concepts and frameworks in the field of Strategic Management. At the beginning, the course will provide a brief introduction into the historical development, goals, and research streams of the field. In this context, important terms, methods, and philosophical approaches of (management) research will be clarified. Subsequently, students form groups to analyze selected scientific articles with regard to their theoretical relevance and practical implications. Theoretical topics that will be covered in depth are:

1. Top Management Teams, Upper Echelons and Corporate Governance
2. Ressource- and Capability-based Approaches
4. Institutional Theory, Institutional Work/Entrepreneurship and Social Movements
5. Organizational Cognition, Identity, and Framing
6. Organizational Learning and Ambidexterity
7. Organizational networks and ecosystems

The results of the analysis will be summarized in a seminar thesis, presented in class, and discussed with the other students. The main goal of the course is to equip students with advanced concepts, which allow them to understand organizational dynamics, question established practices in firms, and develop new solutions that go beyond the application of standard instruments.

- Master's Programme Sustainability Economics and Management (Master) > Additional Modules

**Zuständige Personen**
Lehrenden, Die im Modul (Prüfungsberechtigt)
Raabe, Thorsten (Module responsibility)

**Prerequisites**
The students should be enabled
- to adapt the marketing concept to sectoral, functional and institutional specifics,
- to apply specific concepts and methods of marketing in a problem-oriented way and to be able to reflect their conditions and limitations,
- to develop and present your own conceptual designs in a team.

**Module contents**
Marketing initially started as a producer-oriented concept and in recent years has developed as universal approach to influence market transactions. Against this background institutional, functional and sectoral fields of application inspired the formulation of sophisticated marketing approaches, like e.g. marketing of non-profit-organisations, strategic marketing, or service marketing. The course presents the specific nature of the different fields of application and relevant consequences for marketing planning. Given the recent inflation of "hyphenated conceptions" of marketing, a reasoned diagnosis as to marketing's core identity is put forth. To this end, perspectives of transfer and integration between the approaches will be developed, that measure up to state-of-the-art theoretical as well as practical demands towards marketing as a universal market-oriented way of managing businesses. This course is divided into a preparatory seminar and an educational workshop towards the end of the term. The latter unit allows case study and role play as well as the presentation student work and boosts social competences irrespective of subject matter.

Module label: Development directions in Marketing Research

Modulkürzel: wir829

Credit points: 6.0 KP

Workload: 180 h

Verwendbarkeit des Moduls:
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunkt Führung von Unternehmen und gesellschaftliche Organisation (FUGO) (MPO2020)
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule RoW - BWL
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule UF - BWL
- Master's Programme Sustainability Economics and Management (Master) > Additional Modules

Zuständige Personen:
- Raabe, Thorsten (Module responsibility)
- Lehrenden, Die im Modul (Prüfungsberechtigt)

Prerequisites:
Successful completion of the entrance examination

Skills to be acquired in this module:
Upon completion of the module, students will be able to:
- apply specific competences to strategic research in marketing
- classify research strategies in marketing according to their meta-theoretical considerations
- estimate research strategies' claims to knowledge and their limitations
- formulate interdisciplinary research strategies aligning competences of empirical methods with the application of theory
- develop own conceptual sketches within teams and to present them

Module contents:
How is knowledge generated within the scholarly discipline of marketing? This question confronts the field of marketing with central paradigmatic assumptions. The course begins to solve this puzzle on the basis of a historical analysis of the marketing concept's development. Different scientific standpoints in marketing theory and empirical investigation are evaluated against the light of recent developments in markets and society. The current paradigms of consumption research and marketing research's basic standing in the philosophy of science are intensely treated. This also entails reflecting on the opportunities that alternative trends, e.g. a humanistic paradigm, hold in store for marketing research. The course is divided into a preparatory seminar and an educational workshop towards the end of the term. The latter unit allows case study and role play as well as the presentation student work and boosts social competences irrespective of subject matter.

Literaturempfehlungen:
- Further literature to be announced at the start of the term.

Lehrenden, Die im Modul (Prüfungsberechtigt)

Prerequisites:

Skills to be acquired in this module:
The students should...

- know and understand basic concepts, instruments and theories in the context of corporate social responsibility and corporate sustainability
- be able to apply conceptual frameworks to analyze and critically question the sustainability of companies
- develop options to improve the sustainability of companies and derive recommendations for their implementation in practice

Module contents:
The module "CSR" provides an overview of the debates on the social responsibility of firms. The first session will briefly introduce the historical debate on Corporate Social Responsibility and Corporate Sustainability and delineate important concepts. The following sessions will use concrete company case studies as a basis for a critical discussion of central questions in the context of corporate social responsibility and sustainability. Questions that will be discussed are, amongst others:

- How can one determine whether a firm acts in a socially and ecologically sustainable way
- Which factors drive and hinder the diffusion of socially and ecologically superior solutions and companies in the market?
- In how far is there a conflict between firm and market growth on the one hand and sustainability on the other hand?
- Which possibilities does a company have to deal with conflicts between social/ecological and economic goals?
- How can existing firms and value chains be transformed toward sustainability?
- What is the role of managers and boards of directors for organizational change toward sustainability?
- How does the ownership and financial structure of firms influence their strategy toward sustainability?
- In how far can cooperation and partnerships between organizations help integrate social and ecological aspects in firms?

In addition to discussing these questions by drawing on company case studies, students will be introduced to the corresponding theoretical concepts and frameworks in the academic literature. Also, students will be given the opportunity to test different strategies for implementing sustainability in organizations during a simulation, which allows them to gain first-hand insights into the emerging challenges. Toward the end of the course, students will apply and deepen the knowledge they have gathered over the semester by writing a seminar thesis.

In today's highly dynamic business environment, innovation is the key to the success of most firms. Moreover, technological and organizational innovations represent valuable instruments for achieving progress toward sustainable development. Against this background, this module familiarizes students with the tools and processes for managing innovation and for developing overall more innovative firms. The module comprises a lecture and a seminar. In the lecture, students become acquainted with the drivers to and role of innovation; they learn about designing innovative firms and developing innovation strategies; they get to know the different sources of innovation; they familiarize themselves with the methods for choosing between alternative planned innovations; they learn how innovation is implemented; and they understand how innovation benefits are exploited. The accompanying seminar is supposed to familiarize the students with select advanced topics surrounding the management of innovation. Moreover, the students train their skills in working in teams, in working with scientific literature, in academic writing, and in presenting in front of a large audience.

Module contents
- Organizational change, creative destruction, ambidexterity, exploration, exploitation, absorptive capacity, sustainability transitions, innovation models, innovation networks, innovation strategy, innovation ecosystems, diffusion of innovations, organizational routines, entrepreneurship, new ventures, etc.

**Prerequisites**
- Achieving basic knowledge about audit practises
- Achieving broad knowledge about the audit profession and structuring of audit processes
- Achieving competences in evaluating the possibilities and limits of audit techniques
- Application of audit techniques while using case studies and focusing on certain audit areas.

**Module contents**
In this course, audit basic principles, audit methods and audit techniques will be presented while emphasizing on large corporates. In addition, an overview about audit processes and audit techniques in the context of the control, information and accreditation function as well as legal specifications is given. Working in groups, case studies will strengthen the achieved knowledge. In addition, the focus will be on international financial reporting standards (IFRS) and international auditing standards (IAS) for proving the financial statements as well as testing the internal risk management.

The course provides insights into the empirical analysis of firms' financing and investment decisions. We discuss theoretical foundations of long-term financing, capital structure choice, cost of capital determination, capital market efficiency, and corporate takeover decisions as well as respective empirical findings. Moreover, you will learn how to build financial models, handle financial data, and conduct financial analyses using the statistical software R.

The course covers key concepts of modern corporate finance in theory and practice. In particular, we focus on how investment and financing decisions affect the value of the firm. Among the topics discussed are: • Fundamental analysis and capital market efficiency. • Cost of debt and equity capital. • Business valuation models based on dividends, cash flows, and (abnormal) earnings. • Capital structure and dividend policy. • Advanced valuation issues.

Further readings may be announced during the course.

**Skills to be acquired in this module**
By the end of the course students should have answers to the following questions:
- How are fundamental values (or “intrinsic values”) estimated?
- How are business strategies analyzed in order to understand the value they create?
- What business activities determine value?
- How is “value created for shareholders” identified?
- How does ratio analysis help in valuation?
- How does profitability tie into valuation?
- What is growth? How does one analyze growth? How does one value a growth firm?
- How does one deal with the accounting methods used in financial statements?
- How is financial analysis developed for strategy and planning?
- What determines a firm's P/E ratio? How does one calculate what the P/E should be?
- What determines a firm’s market-to-book (P/B) ratio? How does one calculate what the P/B should be?
- How does one evaluate risk? For equity? For debt?
- How does one evaluate an equity research report?
- How does one trade on fundamental information?

**Module contents**
With a stock market bubble and a financial crisis in our recent history, there have been increasing calls to “return to fundamentals.” This is a course on fundamental analysis. The primary emphasis is on equity (share) valuation, with a focus on developing and applying methods for valuing firms using financial statement analysis.

The course has a very practical focus. The methods of fundamental analysis will be examined in detail and applied in cases and projects involving listed companies. Topics include models of shareholder value, a comparison of accrual accounting and discounted cash flow approaches to valuation, the analysis of profitability, growth and valuation generation in a firm, diagnosing accounting quality, forecasting earnings and cash flows, pro-forma analysis for strategy and planning, and the determination of price-earnings (P/E) and market-to-book (P/B) ratios.

The course does not assume “market efficiency”. Rather, it develops the techniques for challenging traded prices in order to assess whether investments are appropriately priced. It adopts the philosophy that one of the risks in investing is the risk of paying too much. The course is one for the active investor.

Most importantly, we learn how to handle accounting and financial reports in valuation. We see that valuation is really a matter of appropriate accounting for value. The course combines accounting principles and investment principles to answer the question: How do I account for value so that I can challenge stock prices with some confidence?

The course will be taught from the perspective of designing techniques to be used in an (independent) equity research department or firm. Accordingly, the material is pertinent to the security analyst – particularly the equity analyst – who must issue a buy, hold or sell recommendations on stocks. However, much of the material covered in the course is also relevant to the corporate financial analyst for evaluating acquisitions, restructurings and other investments, and for calculating the value generated by strategic scenarios. By the end of the course, the student should feel competent in writing a thorough, credible equity research report or investment analysis that meets the highest standards of professionalism.

The course is of interest to those contemplating careers in investment banking (particularly in equity research), security analysis, consulting, public accounting, and corporate finance. And it will also help with personal investing.

**Prerequisites**
Students have to understand the theoretical orientation and the institutional structure of financial accounting and standard setting. Many important standards, such as fair value accounting, financial instruments, reserve recognition accounting, management discussion and analysis, employee stock options, impairment tests, hedge accounting, derecognition, consolidation, and comprehensive income, will be analyzed and critically evaluated from students.
This course aims to provide students with an in-depth understanding of the underlying accounting concepts and accounting standards governing the preparation of financial statements under International Financial Reporting Standards (IFRS) for external users. Furthermore it develop students' conceptual skills and professional competence in financial accounting in compliance with the regulatory and financial framework under IFRS.

**Module contents**
- Accounting Under Ideal Conditions
- The Decision Usefulness Approach to Financial Reporting
- Efficient Securities Markets
- The Value Relevance of Accounting Information
- The Measurement Approach to Decision Usefulness
- Measurement Applications
- The Efficient Contracting Approach to Decision Usefulness
- An Analysis of Conflict
- Executive Compensation
- Earnings Management
- Standard Setting: Economic Issues
- Standard Setting: Political Issues

### Prerequisites

**Skills to be acquired in this module**

Upon completion of the module students will be able to explain the role financial institutions play in financial markets based on economic theory. They will have a sound knowledge of institutional and regulatory conditions under which financial institutions operate today, and they will be able to critically assess respective developments in the financial sector. Moreover, they will have developed a sound understanding of how banks are managed in a competitive environment.

**Module contents**

We will discuss theoretical foundations of financial intermediation in general, and of banking in particular as well as the economic, institutional, and regulatory context in which financial institutions operate today. Moreover, we will cover selected topics in the area of bank management and bank accounting.

**Skills to be acquired in this module**
The aim of the course is to provide students with a thorough knowledge of how to identify, classify, measure, and manage different types of financial business risks. In particular, we will discuss the properties and potential applications of derivatives in financial risk management. Upon completion of this module students
- will have a sound understanding of the concept of risk management, and will be able to distinguish different types of financial risks and risk management approaches;
- will be able to devise hedging strategies, arbitrage strategies, and speculative strategies using financial derivatives such as futures contracts, forward contracts, options, and swaps;
- will be able to consistently apply valuation models to determine theoretical prices of financial derivatives.
- will be able to assess limitations of financial derivatives in risk management.

**Module contents**
The course provides insights into the theory and practice of modern financial business risk management, including:
- the concept of risk, types of financial risks, and approaches to risk measurement;
- the mechanics of financial markets, including derivatives markets;
- the properties of selected financial instruments, including financial derivatives such as forwards, futures, options, and swaps;
- tools and techniques for managing financial risks.

</tr>
<tr>
<td></td>
<td>• the students are able to carry out independent research work in a team situation together with other students.</td>
</tr>
<tr>
<td>Module contents</td>
<td>The module consists of four project courses and starts in the summer semester. Initially, the lecturers provide a (changing) framework topic from the field of management, organization and personnel (e.g. cooperation and company networks, flexibilization of working conditions, corporate health management). Topics of current research projects of the chair are also included. The individual topics within the framework question are then the subject of student participation. In concrete terms, this means that the lecturers give the students suggestions and initiate topic-finding processes, e.g. by means of metaphor-supported moderation. Work is done alternately in plenary sessions and in small groups under the supervision of the teachers. The project topics are worked on in greater depth in the small student groups.</td>
</tr>
<tr>
<td></td>
<td>For methodological-didactic reasons, it is essential that the module runs over two semesters. In the first semester, the theoretical-conceptual basics are worked out, main topics are explored, the basics of empirical work are taught and the course is set for the empirical element to be worked on in small groups. First (especially theoretical-conceptual) results as well as concretizations of the empirical project are presented by the students. The second semester is used to deepen the knowledge and application of empirical work, to work on the empirical part and to write a final scientific report. The results are also presented to the plenary session.</td>
</tr>
<tr>
<td></td>
<td>The project module is dominated by forms of active, non-receptive learning. The teachers have primarily a supporting function of information transfer, moderation, consultation and coordination.</td>

The aim of the course is to provide students with a deep knowledge of the theory and concepts in managerial accounting.

**Module contents**

- Theory and concept of managerial accounting
- Profit planning
- Budgeting
- Ratios and financial analysis
- Operating performance measures
- Cash flow and segment reporting
- Paper discussion on current and special issues.

**Zuständige Personen**
- Gilbert, Jonathan (Module counselling)
- Breisig, Thomas (Prüfungsberechtigt)
- Gilbert, Jonathan (Prüfungsberechtigt)
- Breisig, Thomas (Module responsibility)

**Prerequisites**
- Skills to be acquired in this module
  - Students get to know central theories of organisation and human resources (HR). They are empowered to apply theories in order to explain practical phenomena and to solve practical problems. The ability to put on different "theory glasses" while observing and analysing various organisational and HR practices is fostered. Students learn to deal with different theories in a conscious and critical way, especially through case studies, group work and discussions.

Upon completion of the module, students will:
- be able to explain various classic and modern theories of organisation and human resource theories, differentiate them and reflect them critically;
- be able to apply the theoretical and abstract ways of thinking and perception so as to transfer them on operational decisions;
- develop skills of self-reflection (supported by the technical and didactical concepts).

**Module contents**
- Students receive deeper insights into classical and modern theories of organisation and human resource, including:
  - Weber's theory of bureaucracy
  - Taylor’s principles of Scientific Management
  - Human Relations approach
  - Behavioural decision theory
  - Situational approach
  - Micro-political approaches
  - New Institutional Economics
  - Theories of motivation
  - Theories of leadership

The presentations and discussions within the seminars also offer possibilities to deepen and broaden these topics according to the student’s interest and latest developments in theory and practice.

**Literaturempfehlungen**

Further literature will be announced during the semester according to the particular lecture/seminar content.

**skills to be acquired in this module**

The module consists of lecture as well as seminar elements which interlink with each other on a technical and didactical level. By alternating lectures, discussions, and training elements, students get to know the theoretical basics as well as the practical relevance of the module topics. They get the chance to integrate themselves, their theoretical knowledge and practical experiences, and to exchange views with the other students and the lecturers. Different teaching and learning methods support the student’s professional, methodological, social-communistic, and personal competences, e. g. via station learning, role plays and debates, thesis discussions and case study analysis. They work within the entire group as well as small groups.

Attending the course, students
- develop a solid knowledge of this broad subject and are able to relate the various scientific and practical findings with each other and also understand them on a macro-level;
- understand the complex issues, challenges and fields of action in International Management;
- are able to analyse, interpret and manage international economic and business issues within heterogeneous (above all cultural) fields of stakeholders and environments;
- can effectively analyse and apply the strategic, structural and cultural instruments in International Management according to the specific practical context;
- develop skills of self-reflection (supported by the technical and didactical concepts) and are able to press their point within the scientific discussion;

- are able to locate a specific research question within the scientific discussion in the field of International Management and to interlink, reflect and evaluate it accordingly.

**module contents**

Students gain theoretical as well as practical insights in the backgrounds and specific characteristics of International Management. A specific focus will (as a last point) be laid on international Human Resource Management as it provides notably relevant issues in international business administration.

Students deal with foundations, challenges and possible fields of action within the following topics:

- Economic internationalisation and the international firm
  - Characteristics, development and relevance
  - Terminological differentiation and attribution
  - Research and explanatory approaches
- Environment and orientation of international corporations
  - Culture and management
  - Fields and forms of strategy
  - Organization by structure and processes
  - Responsibility and public affairs
- Relevance of and fields in international Human Resource Management
  - Requirements and organisation of the central HR areas
  - Recruitment and selection
  - Expatriation of employees
  - Intercultural management
  - Social management

The presentations and discussions also offer possibilities to deepen and broaden these topics according to the students interests and latest developments in theory and practice.

**literature recommendations**

Further literature will be announced during the semester according to the particular lecture/seminar content.

- Master's Programme Sustainability Economics and Management (Master) > Additional Modules

### Zuständige Personen
Lehrende, Die im Modul (Prüfungsberechtigt)
- Hoppmann, Jörn (Module responsibility)

### Prerequisites
**Skills to be acquired in this module**
- know basic definitions, trends and application areas of digitalization
- be able to assess the economic effects of digitalization
- understand corporate strategies and business models in the context of digital transformation
- know how companies should design processes and structures to promote digitalization in organizations
- have an overview of social, legal and ethical aspects of digitalization
- assess the environmental impact of digitalization
- evaluate digital products, services and business models using ethical and sustainable guidelines
- independently develop proposals for the integration of ethical, social and ecological criteria in digitalization projects and processes

### Module contents
The module "Digital Strategy and Sustainability" provides insights into the role digitalization for companies and the associated social discourse. The digital transformation leads to the emergence of new business models, markets and forms of interaction. This requires comprehensive changes in strategic orientation as well as in business processes and structures. In addition, new regulations and standards are required at the societal level in order to meet the ethical, ecological, and societal challenges posed by digitalization.

In the first part of the seminar, students are familiarized with the basics and application areas of digitalization as well as the economic, social, and ecological implications. Toward this end, important questions in the context of digital transformation will be raised and discussed drawing on company case studies. Exemplary questions that will be dealt with in this context are:
- What are the technological drivers of digitalization and what trends can be observed?
- What is the impact of digital transformation on industries and companies?
- How can companies design strategies, processes and structures to address the digital transformation?
- What is the impact of digital transformation on industries and companies?
- How can social, ethical, and ecological aspects be integrated into digital products, services and business models?

In the second part of the course, students will develop digital business models in teams under the guidance of experienced coaches, taking into account economic, ecological and social/ethical criteria. The results are presented to the other students and company representatives and will be summarized in a term paper. An important part of the term paper is the critical reflection of current methods used to develop digital business models with regard to sustainability criteria.

Skills to be acquired in this module | In der zum Modul gehörigen Vorlesung werden vor allem formalanalytische Modelle erarbeitet, mit denen Produktionsprobleme beschrieben und im Rahmen der Modellannahmen optimiert werden können. Hiermit sollen die Studierenden eine Kompetenz zur Analyse realer Produktionsprozesse erwerben, mit Hilfe derer sie diese nicht nur verstehen, sondern idealerweise auch verbessern können. Im begleitenden Seminar werden mithilfe von in Gruppen verfassten Hausarbeiten aktuelle Fragestellungen und Konzepte zu den formalanalytischen Modellen aufgearbeitet und bewertet. Das Seminar baut ergänzend zur Vorlesung auf konzeptioneller und empirischer Forschung auf. Hiermit lernen die Studierenden wissenschaftliche Diskurse zu praktisch relevanten und nur schwer modellierbaren Herausforderungen des Operations Managements kennen. Ferner werden die Fähigkeiten zum wissenschaftlichen Arbeiten, zur Teamarbeit und zum Präsentieren vor großen Gruppen trainiert.  
Module contents | Die Vorlesung behandelt voraussichtlich folgende Themen: Nachfrageprognose, Prozessmanagement, Produktionsplanung, Ablaufplanung, Revenue Management, Behavioral Operations Management

Prerequisites
Skills to be acquired in this module
In der zum Modul gehörigen Vorlesung werden vor allem formalanalytische Modelle erarbeitet, mit denen Probleme in Wertschöpfungsketten beschrieben und im Rahmen der Modellannahmen optimiert werden können. Hiermit sollen die Studierenden eine Kompetenz zur unternehmensübergreifenden Analyse der gesamten Wertschöpfungskette (Supply Chain) erwerben, mit Hilfe derer sie diese nicht nur verstehen, sondern idealerweise auch verbessern können. Im begleitenden Seminar werden mithilfe von in Gruppen verfassten Hausarbeiten aktuelle Fragestellungen und Diskussionen im Supply Chain Management aufgearbeitet und bewertet. Das Seminar baut ergänzend zur Vorlesung auf konzeptioneller und empirischer Forschung auf. Hiermit lernen die Studierenden wissenschaftliche Diskurse zu praktisch relevanten und nur schwer modellierbaren Herausforderungen des Supply Chain Managements kennen. Ferner werden die Fähigkeiten zum wissenschaftlichen Arbeiten, zur Teamarbeit und zum Präsentieren vor großen Gruppen trainiert.

Module contents
Die Vorlesung behandelt voraussichtlich folgende Themen: Grundlagen der Supply Chain, Strategischer Fit, Netzwerk- und Standortplanung, Bestandsmanagement, Produkt- und Prozessdesign, Supply-Chain-Koordination, Vertragsdesign, Transport in der Supply Chain, Nachhaltiges Supply Chain Management

**Prerequisites**
No

**Skills to be acquired in this module**
- Knowledge on the basic concepts and strategies of sustainability management related to corporate practice:
  * Sustainability: Basic concepts, strategies,
  * Domestic and international challenges for business,
  * Business case for sustainable development,
  * Integrative concepts of sustainable corporations,
  * Sustainable strategies,
  * Management instruments
- Discussing topics of international sustainability management with students from different scientific disciplines.
- Ability to present and evaluate different concepts and instruments of international sustainability management

**Module contents**
This module consists of a one lecture and one seminar (2 weekly contact hours per lecture/seminar) dealing with basic concepts and strategies of sustainability management within corporations. Both, lecture and seminar give an overview of current sustainability strategies for companies and present a variety of instruments to integrate and initiate sustainable development within corporations. While the lecture focuses more on theoretical approaches and introduces basic concepts of corporate sustainability management, the seminar provides a variety of case studies and business cases to demonstrate different concepts and instruments of sustainability management. The seminar provides the possibilities for inter- and transdisciplinary exchange and discussions.

- Introduction into the methods of qualitative empirical research
- Introduction into approaches to time management
- Identification of individual or team projects in sustainability management (case studies, empirical studies, marketing concepts)
- Self organized work on individual or team projects
- Mid-term and final presentation of project results

**Module contents**
This module consists of two seminars (2 weekly contact hours per seminar) dealing with several topics from the broad field of sustainability, economics and management during term.

The module’s intention is to integrate current research activities of the University from the research areas of sustainability, economics and management into teaching activities. The Module provides students the possibility to actively participate in current research at Oldenburg University. The module's seminars each year deal with different projects and are thus designed each year by a different group of Oldenburg located researchers. This teaching concept provides the interface between theory and application of scientific theories into research practise. Thus, this module also introduces research work at universities in general.

**Module contents**

This masters-level module focuses on how firms could practically manage sustainability in its supply chains. Two broader perspectives, as detailed below, guide the coursework:

1) The material flow perspective approaches SSCM with sustainably managing physical flows and processes within a firm's operations and upstream (and downstream) supply chain links. Individual (lecture) sessions are built around the following topics: Introduction to Sustainability and Supply Chain Management; Introduction to Sustainable Supply Chain Management; Sustainable Product Development & Lean and Green; Workplace Health and Safety; Sustainable Transportation; Sustainable Warehousing & Sustainable Packaging; and Closed-Loop Supply Chain Management.

2) The relationship perspective further adopts a more direct managerial viewpoint on inter-firm relations. Individual (lecture) sessions discuss the following topics: Stakeholder Management; Legitimacy, Decoupling & Greenwashing; Supply Chain Sustainability Risks; Sustainable Supplier Management; and Supply Chain Sustainability Dilemmas.

Some of the theoretical perspectives discussed within the lecture sessions will be prepared by case studies of well-known companies such as Walmart, DHL, HP, Volkswagen, Lidl, and Apple.

**Literatureempfehlungen**

The lecture content has been developed from various research publications, rather than a textbook. Students are encouraged to read some of the original publications as amendments to the lecture. The case studies will mostly be based on professionally written cases. Scholarly publications/articles, as well as the case study documents, will be provided and discussed throughout the sessions.

Lehrenden, Die im Modul (Prüfungsberechtigt)

Fichter, Klaus (Module responsibility)

**Prerequisites**

none

**Skills to be acquired in this module**

- The main target of the "Eco-Venturing" module is to develop entrepreneurial skills for the development and implementation of environmental innovations and sustainable business ideas. These include:
  - the ability to identify new solution needs in the context of sustainable development and the sustainable development goals set by the United Nations,
  - Knowledge and skills for the entrepreneurial development and implementation of innovative solutions,
  - Knowledge and skills for systematically combining economic (Eco-nomical) and ecological (Eco-logical) objectives and
  - the ability to strategically develop "green" business areas and markets.
  - The entrepreneurial development and implementation of environmental innovations can relate both to the establishment of new companies and organisations and to the development of new solutions and business ideas within the framework of established companies and organisations (corporate venturing).

**Module contents**

The main focus of the Eco-Venturing module is the development of new or established business start-up concepts. Under guidance of their lecturer, participants will work together with selected regional business partners who are both economically successful and contribute to the protection of the environment and the climate, to promote such start-up concepts. What these concepts have in common is that they address the issue of sustainability.

**Reference text**

The module "Eco-Venturing" is part of the Master's programme "Sustainability Economics and Management (SEM)" and focuses on "Eco-Entrepreneurship". The module "Eco-Venturing" can be taken either individually or in combination with the two other modules of the study focus "Eco-Entrepreneurship" ("wir 920: Advanced Entrepreneurship", "wir 832: Innovation Management"). Two of the three modules must be taken in order to be recognised as a specialisation. The Eco-Venturing module is mandatory (cf. examination regulations for the Master's programme SEM, § 4, para. 4).

The module Eco-Venturing is also available for students of the Master's programme WiRe in the ManECo area and can be credited as the module Advanced Entrepreneurship (wir849 Advanced Entrepreneurship). The same applies to students of the Master's programme in Business Informatics. Here it can also be proven as wir849 Advanced Entrepreneurship

**Zuständige Personen**
- Dittmer, Jochen (Module responsibility)

**Prerequisites**
- The aim of the course is to provide students with a deep and thorough knowledge regarding
  - Tax accounting law
  - Taxation procedures.

**Module contents**
- The course provides a deep insight into
  - Tax accounting law
  - Basics of tax accounting law
  - Principal values (cost of purchase/cost of manufacture, going concern value, fair market value)
  - Depreciation, subsidy regulations
  - Transfer of hidden reserves
  - Leasing
  - Provisions
  - Taxation procedures
  - Overview about general fiscal law (AO) and tax court code (FGO)
  - Tax determination and taxing procedures
  - Types of taxing
  - Deadlines and extent of balances and tax assessments corrections
  - Interest yield

**Literaturempfehlungen**
- Falterbaum, Hermann (aktuelle Fassung): Buchführung und Bilanz
- Rose, Gerd & Watrin, Christoph (aktuelle Fassung): Abgabenordnung; mit Finanzgerichtsordnung
- It is worth mentioning, that due to the fast-changing tax law, further recommendations regarding the literature cannot be made yet, but are rather given during the course. Required are:
  - A collection of the most important tax laws (e.g. NWB-publisher) in current form
  - A loose-leaf collection of the tax regulations (e.g. Beck-publisher)

### Zuständige Personen
- Meyerholt, Ulrich (Module counselling)
- Godt, Christine (Module responsibility)
- Lehrenden, Die im Modul (Prüfungsberechtigt)

### Prerequisites
**Skills to be acquired in this module**
Building on the existing knowledge of the participants, the course will deepen knowledge of European and international law, whereby emphasis will be laid on those areas in which the dividing line between state intervention (public law) and market rights (private law) has become blurred. Students will be able to analyze contemporary regulatory techniques inherent in the multilevel system of governance and to assess them from an interdisciplinary (economic and legal) perspective.

### Module contents
The module comprises two courses, one of which will be taught by PD Dr. Meyerholt, and the other together with Prof. Godt. The first course deals with selected issues in environmental law. With the general structure of environmental law as a point of departure, the course content will be taught in a holistic manner that will also incorporate the leading decisions of the higher courts. The second course takes into consideration intra-disciplinary environmental law as situated between public and private economic law, whereby special focus will be laid on the European and international dimensions.

**Skills to be acquired in this module**

Die Studierenden

- verstehen Grundlagen und Verschränkungen von Wettbewerbsrecht und Geistigem Eigentum
- analysieren und beantworten Rechtsfragen im Schnittfeld von Wettbewerb und Geistigem Eigentum
- beherrschen einschlägige Rechtsprechung und können neue Fragen entsprechend einordnen

**Module contents**

Das Modul enthält zwei Veranstaltungen (wahlweise Vorlesung mit Seminar oder zwei Vorlesungen) und richtet sich an Masterstudierende mit Interesse an Innovation und dynamischem Wettbewerb (zwischen Unternehmen, aber auch zwischen Staaten). Aufbauend auf zuvor vermittelte Grundstrukturen des Europäischen Markordnungsrchts, stehen Themen auf der Schnittfläche von Wettbewerb und Geistigen Eigentums (Kartell- und Lauterkeitsrecht) im Zentrum der Veranstaltung.

Lehrziele sind einerseits die akademische Durchdringung, andererseits die Einordnung und Beantwortung praktischer Fallgestaltungen. Themen generieren sich aus der betriebswirtschaftlichen Praxis (u.a. etwa Zugang zu 'standardessentiellen Patente'; Schutzrechte als Voraussetzung von Unternehmenskooperationen wie aus volkswirtschaftlichen Fragen (Einfluss des Schutzstandards für Geistiges Eigentum auf Innovation und Direktinvestitionen; Schutzrechte als Marktzugangsbedingungen). Die Studierenden lernen, Geistiges Eigentum und Wettbewerbsrecht als zwei miteinander verschrankte Rechtsgebiete zu analysieren.

wir815 - Modern Transformations of International and EU Economic Law

Module label: Modern Transformations of International and EU Economic Law

Modulkürzel: wir815

Credit points: 6.0 KP

Workload: 180 h

Verwendbarkeit des Moduls
- Master's Programme Business Administration, Economics and Law (Master) > Basismodule
- Master's Programme Business Administration, Economics and Law (Master) > Kernmodule CHI
- Master's Programme Business Administration, Economics and Law (Master) > Mantelmodule (MPO2020)
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule RdW - Recht
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule UF - Recht

Zuständige Personen
- Godt, Christine (Module responsibility)
- Lehrenden, Die im Modul (Prüfungsberechtigt)

Prerequisites
- Students will be able
  - to describe European and international legal-economic interdependencies
  - apply international and European legal norms and legal issues
  - have a command of English legal terminology.

Module contents
The module consists of two lectures which deal with changes in policies and institutions of international economic law. One lecture focuses on economic law and institutions as shaped by international law, while the other class is dedicated to EU foreign trade law. A basic knowledge of the institutions of international and EU economic law (WTO, IMF, World Bank, European Commission) is a prerequisite for attending this module. The focus lies in helping students understand the processes of internationalization and Europeanization that inform the current interactions between the different actors on the international plane (companies, states and parastatals). In this module, public and private economic law will be presented as a single unit.

The international law part of the module focuses on the rationale and regulation of the major free trade agreements, including dispute settlement. Other topics to be addressed include the conflict of laws and the UN Convention (CISG). The EU law focuses on competition and foreign trade law, including procurement and taxation law.

Module label: Digitalisation and Law - Deepening

Modulkürzel: wir816

Credit points: 6.0 KP

Workload: 180 h

Verwendbarkeit des Moduls:
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule RdW - Recht
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule UF - Recht

Zuständige Personen:
- Boehme-Neßler, Volker (Module responsibility)
- Lehrende, Die im Modul (Prüfungsberechtigt)

Prerequisites:
Basic knowledge, B.A. with law parts

Skills to be acquired in this module:
- Participants will understand how digitization affects society and the law. They will learn from selected examples how the law is adapting to digitalization - and where the law reaches its limits.
- The module is theory-, method- and application-oriented.
- The module is interdisciplinary: social science, technological and economic issues are integrated into the module alongside legal content.
- Students develop the ability to see law in its social, economic and technological context. They learn to analyze the interactions of law with digitalization

Module contents:
- Fundamentals: Digitization as a technological and a cultural development.
- Characteristics of digitization
- Challenge of law through digitization
- Limits of law in the digitized world: selected areas of law as examples

Literatureempfehlungen:
- Volker Boehme-Neßler, Digitising Democracy. Heidelberg 2020

Reference text:
Due to a change in the frequency in which the "Mergers & Acquisition Tax" and the "International Taxation" sections are offered starting with the winter semester 2020/21, it is recommended for the winter semester 2019/20, in addition to the module wir 807 "Taxation and Tax Law I", to study the "Mergers & Acquisition Tax" section of the module wir835 at the same time and that the examination on both sections is taken in the summer semester 2020. The course "Mergers & Acquisition Tax" will otherwise only be offered again in the summer semester 2021. From the summer semester 2021 onward it is recommended to study the part "Mergers & Acquisition Tax” of the module wir835 in the 2nd semester and the part "International Taxation” in the 3rd semester. At the end of the 3rd semester, the written exam should cover the entire content of the module.

Zuständige Personen

Rott, Peter (Module responsibility)
Lehrenden, Die im Modul (Module counselling)
Lehrenden, Die im Modul (Prüfungsberechtigt)

Prerequisites

Upon completion of the module, students will be able to:

- demonstrate a knowledge of the basics of insolvency law and insolvency proceedings law as well as the basics of banking law and capital market law.
- classify insolvency law with its functions as enforcement law, restructuring law, and the right to alter a relationship in business life.
- demonstrate a knowledge of the positions of the groups involved (creditors, debtors, the responsible bodies of legal persons) in the insolvency proceedings, including the rights and obligations of the groups involved in the process and in the run-up to the crisis, as well as the discharge of residual debt as a rehabilitation option for natural persons.
- demonstrate a familiarity with the principles of the legitimacy verification pursuant to the general tax code, money laundering, bank secrecy, and the information requirements of credit institutions.
- identify the functions of banking and capital market law as well as modern insolvency law.
- use these functions in practical examples.
- assess the progress of insolvency proceedings, including their requirements on creditors and debtors.

Module contents

The module deals with banking and capital market law as well as insolvency and insolvency proceedings law within two separate lectures.

The main focus of the lecture in banking and capital market law is banking law. After an introduction to general banking law, the most important legal questions regarding collateralisation of loans are discussed. Additionally, the topics of the legitimacy verification pursuant to the general tax code, money laundering, bank secrecy, and the information requirements of credit institutions are discussed. Subsequently, the basic principles of securities law are discussed. Their legal basis and the economic background are analysed. Where possible, the interrelations between the various securities and the events of the financial market crisis will be discussed.

The lecture Insolvency Law deals with the basics of debt enforcement and insolvency law. Procedures will be shown and explained. The first part deals with company insolvency law, the second part with consumer insolvency and residual debt relief law.

Literaturempfehlungen

Current literature references are given in the events.

### Verwendbarkeit des Moduls
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule RdW - Recht
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule UF - Recht
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunkt "Recht der Wirtschaft" (RdW) (MPO2020)
- Master's Programme Business Informatics (Master) > Module der Wirtschafts- und Rechtswissenschaften (Master)
- Master's Programme Computing Science (Master) > Nicht Informatik

### Zuständige Personen
Lehrenden, Die im Modul (Prüfungsberechtigt)
- Louven, Sebastian (Module counselling)
- Rott, Peter (Module responsibility)

### Prerequisites
Skills to be acquired in this module
Upon completion of the module, students will be able to:
- recognize simple data protection incidents.
- apply existing protection mechanisms.
- implement projects in accordance with the law.
- discuss and defend their plans in front of others.

### Module contents
The module gives an overview on data protection laws. Basic knowledge of data protection regulations (DSGVO; BDSG) and existing protection mechanisms is imparted. Within the framework of the seminar, the discussed topics will be deepened with the help of seminar papers and individual aspects will be discussed in more detail.

The event will highlight the new informational structures in modern society and their effects on data protection and data security. Questions concerning general personal rights, freedom of information, IT security and relevant criminal law regulations will be discussed on the basis of examples and legally provided protection mechanisms as well as the tasks of supervisory authorities will be discussed. In particular, the most important decisions on data protection will be covered in detail during the seminar.

At the seminar, students will have the opportunity to prepare in-depth seminar papers on the various topics, which will then be discussed with all participants.

### Literatureempfehlungen

  - verstehen die Rechtsgenese und Rechtsdurchsetzung im Europäischen Mehrebenensystem,
  - analysieren und beantworten Rechtsfragen im Europäischen Binnenmarktrecht,
  - beherrschen englische Rechtsterminologie.

**Module contents**
- In dem Modul werden aktuelle Themen des Europäischen Wirtschaftsrechts auf Masterniveau angegangen. Lehrziel ist die Erfassung und die Analyse sich stellender Probleme auf den verschrankten Rechtsebenen Europas. Die Studierenden lernen, die Texte systematisch zusammenzustellen und Antworten auf Fragestellungen aus Kontext und Grundprinzipien zu entwickeln. Damit bereiten sich die Studierenden auf die Berufspraxis im sich vertiefenden Binnenmarkt mit seinen Außenbezügen vor. Das Modul wird vorzugsweise in englischer Sprache gehalten.

- englische Sprachkenntnisse

Skills to be acquired in this module
Die Studierenden

verstehen internationale, europäische und nationale themenbezogene Rechtsnormen und
Rechtsfragen.

wenden internationale, nationale und europäische themenbezogene Rechtsnormen an.
erlernen die englische Rechtsterminologie.

Module contents
Das Modul richtet sich an Studierende, die bereits eine wissenschaftliche Vorbildung haben.
Studierende sollen in das neue Recht der Forschung und Nutzung von Pflanzen eingeführt
werden, das sie sowohl als angehende Wissenschaftler als auch als Mitarbeiter in der Industrie
oder Verwaltung brauchen. Im Prinzip hatte bereits die Konvention über die Biologische
Vielfalt (1992) den Grundsatz zum freien Zugang zu biologischen und genetischen Ressourcen
völkerrechtlich aufgehoben. Durch die Umsetzung in Europa (2014) und den
Ressourcenstaaten sind diese Regeln nun aber bindend geworden. Das hat weitreichende
Konsequenzen für den Forschungsalltag und die Produktentwicklung. Diese neuartigen Regeln,
in denen die internationale Kooperation schon zu Beginn der akademischen und kommerziellen
Forschung zur Pflicht geworden ist, werden den Studierenden nahegebracht. Inhaltlich sind die
folgenden Themengebiete für die Lehrveranstaltungen relevant:

- Internationale Rahmenbedingungen für den Zugang zu genetischen Ressourcen und Vorteilsausgleich
- EU-Recht und ausfüllende mitgliedstaatliche Regeln zur biologischen Forschung an und Nutzung von
genetischen Ressourcen, Traditionellem Wissen und Technologietransfer
- Nationale Vorschriften der Ressourcenstaaten für das Aufsuchen genetischer Ressourcen bei
wissenschaftlichen Feldstudien und kommerzieller Bioprospektion (z.B. Genehmigungspflichten; Prior
  Informed Consent; Mutually Agreed Terms; Due Diligence)
- Recht der verschiedenen kommerziellen, gesetzlichen und akademischen Ex-situ-Sammlungen
  genetischer Ressourcen (Practices of databases / Prinzipien und Praktiken der Datenbanken)
- Code of Conduct der deutschen Forschungseinrichtungen (vor allem DFG)
- Genetische Ressourcen und Geistiges Eigentum
- Good practices / Bewährte Verfahren (selected ex situ collections)
- ABS agreements ("Mutual Agreed Terms")/ Verträge
- Legislative options / Legislative Optionen

wir884 - Transnational Health Law

Module label: Transnational Health Law
Modulkürzel: wir884
Credit points: 6.0 KP
Workload: 180 h

Verwendbarkeit des Moduls:
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule
  - RdW - Recht
  - Master's Programme Business Administration, Economics and Law (Master) > Schwerpunkt "Transnational Economics and Law" (TEL) (MPO2020)

Zuständige Personen:
Chege, Victoria (Module counselling)
Godt, Christine (Module responsibility)
Lehrenden, Die im Modul (Prüfungsberechtigt)

Prerequisites:
Skills to be acquired in this module:
- Die Studierenden erkennen und analysieren europäische und internationale Regelungsmaterie des transnationalen Gesundheitsrechts
- kennen Anwendungsbeispiele und lösen Problemfälle
- verfügen über anwendungsbezogenes Wissen zur Lösung aktuell anstehender europäischen und transnationalen Fragestellungen.

Module contents:
Das Modul besteht aus zwei aufeinander aufbauenden Teilen: Der erste Teil behandelt theoretische und praktische Fragen zur Wechselwirkung zwischen EU- Gesundheitspolitik und nationalem Gesundheitsrecht wie auch zwischen EU-Gesundheitsrecht und anderen Bereichen des EU-Rechts und stellt europäisches Gesundheitsrecht als ein sich entwickelndes, eigenständiges Gebiet dar. Der zweite Teil setzt sich mit den nationalen und internationalen Regelwerken im Bereich des Gesundheitsrechts (WHO, WTO, EU, nationales Recht und Selbstregulierung) und Fragen bezüglich globalen Handels mit Arzneimitteln auseinander. Beide Teile können entweder innerhalb einer oder in zwei Veranstaltungen behandelt werden. Insbesondere werden die folgenden Themen behandelt:
- Menschenrechte, Ethik, globales Gesundheitsrecht;
- EU und transnationale Regulierung von Arzneimitteln (Marktzugang, Good Manufacturing Practice, Good Clinical Practice, Pharmakovigilanz; gefälschte Arzneimittel);
- Regulierung von klinischer Forschung im EU- und transnationalen Recht;
- Datenschutz, Produkthaftung und Gesundheitsversorgung;
- Gesundheitsversorgung, Wettbewerbsrecht, und geistiges Eigentum.

**Prerequisites**
keine

**Skills to be acquired in this module**
Students get to know selected concepts of organisation and management. Their respective objectives, instruments and methods are discussed and their use in everyday business is critically reflected. Students learn to deal with different management concepts in a conscious and critical way, especially through case studies and discussions.

Upon completion of the module, students will:
- be familiar with the emergence, development, and content of various management concepts;
- be able to convey key findings of the various management concepts to practical issues in the field of organisation and management;
- develop skills of self-reflection (supported by the technical and didactical concepts).

**Module contents**
Students receive deeper insights into concepts of organisation and management, including:
- Lean Management
- Change Management
- Quality Management
- Business Process Reengineering

The presentations and discussions within the seminars also offer possibilities to deepen and broaden these topics according to the student's interest and current developments in theory and practice, e. g. Balanced Scorecard, Learning Organisation, Organisational Culture, Worker Participation, Networks, Diversity Management, Management by Objectives.

**Literaturempfehlungen**
Further literature will be announced during the semester according to the particular lecture/seminar content.

Zuständige Personen
- Godt, Christine (Module responsibility)
- Lehrenden, Die im Modul (Prüfungsberechtigt)
- Chege, Victoria (Module counselling)

Prerequisites
(For WiRe recommended): wir815

Skills to be acquired in this module
- Understand the basic principles and regulations of competition law and intellectual property
- Analyze and answer legal questions in the intersection of competition and intellectual property
- Master the relevant legal decisions and can classify new questions accordingly

Module contents
The module consists of two sessions (either lecture with seminar or two lectures) and is designed for master students with interest in innovation and dynamic competition (between companies, but also between states). Building on previously presented basic legal structures of European competition law, topics on the intersection of competition and intellectual property (cartel and integrity law) are at the center of the module.

Learning goals include a deep academic understanding, as well as classification and answering practical case studies on competition law and intellectual property (e.g., 'standard essential patents'; protection rights as preconditions for cooperation between companies) and economic questions (influence of the protection standard for intellectual property on innovation and direct investments; protection rights as market entry conditions). Students learn to analyze intellectual property and competition law as two interconnected legal fields.

- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule UF - Recht

Zuständige Personen:
Godt, Christine (Module responsibility)

Prerequisites:
Skills to be acquired in this module:
- Students will be able to describe European and international legal-economic interdependencies
- apply international and European legal norms and legal issues
- have a command of English legal terminology.

Module contents:
The module consists of two lectures which deal with changes in policies and institutions of international economic law. One lecture focuses on economic law and institutions as shaped by international law, while the other class is dedicated to EU foreign trade law. A basic knowledge of the institutions of international and EU economic law (WTO, IMF, World Bank, European Commission) is a prerequisite for attending this module. The focus lies in helping students understand the processes of internationalization and Europeanization that inform the current interactions between the different actors on the international plane (companies, states and parastatals). In this module, public and private economic law will be presented as a single unit. The international law part of the module focuses on the rationale and regulation of the major free trade agreements, including dispute settlement. Other topics to be addressed include the conflict of laws and the UN Convention (CISG). The EU law focuses on competition and foreign trade law, including procurement and taxation law.

Prerequisites
- keine

Skills to be acquired in this module
- Understanding of trade relations, international factor movements and corresponding balance-of-payments mechanisms.
- Capability to discuss structural change in global trade and productions in terms of formal models and case studies.
- Understanding of the causes and alternative strategies of economic integration in regional blocs.
- Understanding of the causes and alternative strategies of economic transformation in emerging markets.
- Ability to research data and evaluate the literature on specific aspects of international trade, production and structural change.

Module contents
- The lectures and seminar papers address issues in the following subfields:
  - international trade,
  - international trade policies and regimes,
  - geographical economics,
  - foreign direct investment,
  - labour migration,
  - fragmentation of production,
  - regulations of international trade and factor movements,
  - development strategies,
  - regional integration.

Literaturempfehlungen
- Further references to specific topics and current literature will be given in the events.

Prerequisites

Skills to be acquired in this module

The students should...

- know and understand basic concepts, instruments and theories in the context of corporate social responsibility and corporate sustainability
- be able to apply conceptual frameworks to analyze and critically question the sustainability of companies
- develop options to improve the sustainability of companies and derive recommendations for their implementation in practice

Module contents

The module "CSR" provides an overview of the debates on the social responsibility of firms. The first session will briefly introduce the historical debate on Corporate Social Responsibility and Corporate Sustainability and delineate important concepts. The following sessions will use concrete company case studies as a basis for a critical discussion of central questions in the context of corporate social responsibility and sustainability. Questions that will be discussed are, amongst others:

- How can one determine whether a firm acts in a socially and ecologically sustainable way
- Which factors drive and hinder the diffusion of socially and ecologically superior solutions and companies in the market?
- In how far is there a conflict between firm and market growth on the one hand and sustainability on the other hand?
- Which possibilities does a company have to deal with conflicts between social/ecological and economic goals?
- How can existing firms and value chains be transformed toward sustainability?
- What is the role of managers and boards of directors for organizational change toward sustainability?
- How does the ownership and financial structure of firms influence their strategy toward sustainability?
- In how far can cooperation and partnerships between organizations help integrate social and ecological aspects in firms?

In addition to discussing these questions by drawing on company case studies, students will be introduced to the corresponding theoretical concepts and frameworks in the academic literature. Also, students will be given the opportunity to test different strategies for implementing sustainability in organizations during a simulation, which allows them to gain first-hand insights into the emerging challenges. Toward the end of the course, students will apply and deepen the knowledge they have gathered over the semester by writing a seminar thesis.

- Trautwein, Hans-Michael (Module responsibility)

### Prerequisites
- Skills to be acquired in this module
  - At the end of the course, successful students:
    - communicate in everyday life and work environments,
    - recognize and understand 200 characters and words,
    - understand frequently used expressions,
    - understand simple meanings in familiar contexts, clear instructions, standard questions and informations when pronounced slowly and clearly,
    - pose and answer questions in familiar contexts,
    - provide personal information in spoken and written form,
    - write about themselves in simple meanings.

### Module contents
- Thematic vocabulary concerning personal information, basics of everyday life, shopping, simple standard transactions etc.
- Reading: simple dialogues and texts from everyday life
- Listening: short and simple dialogues from everyday life
- Speaking: short dialogues in everyday life situations
- Writing: short texts on personal information, questionnaires and forms
- Self-learning: work with the portfolio, individual training

**Skills to be acquired in this module**
- Students
  - understand the importance of incentive systems for economic processes and can analyze the effects of incentive systems;
  - have a firm knowledge in game theory and contract theory, and can address questions in the context of scientific discussion;
  - are able to apply methods from game theory and contract theory largely independently to the analysis of situations in which agents interact strategically;
  - are able to design incentive schemes – on their own and in teams – and to acquire knowledge on their own for this purpose and, to present their results, and to defend them in the scientific discourse.

**Module contents**
The first part of the module covers game theory. Game theory is an important method in economics to analyze strategic interactions of agents, e.g., on markets, in organizations or in bargaining situations. The second part of the module covers contract theory that – according to the Nobel laureate Kenneth Arrow – has been „the most important development in economics in the last forty years“. We work out the fundamentals of screenings, signaling and moral hazard and apply them to different topics, e.g., from labor economics, economic organization and management, law and economics as well as industrial economics. In both parts, there is a tutorial. Here students largely independently apply the acquired knowledge to different situations of strategic interaction in economics and present their results.

Prerequisites

Skills to be acquired in this module

- At the end of the course, successful students:
  - understand the export-led growth strategy after China’s opening up,
  - are informed about sectoral and regional patterns of development in FDI, trade and employment,
  - analyse the balance of payments mechanisms in China’s flows of international trade and capital,
  - understand the effects of China’s integration into the world economy,
  - assess the economic cooperations and conflicts between the PR China and other countries,
  - make use of salient terms and concepts in Chinese language.

Module contents

- Strategies of export-led and unbalanced growth
- FDI and cluster formation
- Employment effects of international trade
- China and the WTO
- Exchange-rate policies and financial markets in China

Literaturempfehlungen

- Text modules developed together with the University of Wuhan

Further recommendations are made on a topic-specific basis.

Reference text

This module is a project that students in the China focus carry out during the term that they spend at a partner university in China. The project topic is selected and researched under intensive online-supervision from Oldenburg in collaboration with colleagues at the partner universities. A kick-off meeting in Oldenburg and regular (online) consultations during and after the stay in China are required. A report in the shape of a 20+ pages study concludes the project.

- Breisig, Thomas (Module counselling)
- Lehrenden, Die im Modul (Prüfungsberechtigt)

**Prerequisites**

**Skills to be acquired in this module**
- Die Studierenden sollen breite Perspektiven für die kaufmännischen Geschäfte in China erkennen können
- Die Studierenden sollen die Techniken der Bilanzierung nach dem chinesischen Handelsrecht grundsätzlich erfassen können
- Die Studierenden sollen Marketing- und Managementstrategien hinsichtlich der Besonderheiten des chinesischen Marktes entwickeln können
- Die Studierenden sollen mit den rechtlichen und finanziellen Bedingungen für die Gründung eines Unternehmens in China vertraut werden.

**Module contents**
Dieses Modul beinhaltet zum Beispiel folgende Punkte:
- Rechtsgrundlagen und Gründungsmanagement der Wholly Foreign-Owned Enterprise (WFOE)
- Rechtsgrundlagen und Gründungsmanagement eines Joint-ventures
- Die Struktur der chinesischen Industriekontenrahmen und Erstellung der Handelsbilanz
- Theoretische Ansätze für personalwirtschaftliche und organisatorische Fragestellungen
- Marktorientierte Unternehmensführung anhand konkreter Beispielaufgaben

Da dieses Modul an verschiedenen Partnerhochschulen in China belegt werden kann und auch von den individuellen Sprachkenntnissen der Studierenden abhängt, ob Lehrangebote in chinesischer oder englischer Sprache belegt werden können, weichen die Inhalte, Literaturgrundlagen und Prüfungsformen der einzelnen Modulangebote unter Umständen stark voneinander ab. Auf Vergleichbarkeit und Kompetenzerreichung wird bei der Zuteilung der Studienplätze und Anerkennung der Leistungen geachtet.

Breisig, Thomas (Module responsibility)  
Trautwein, Hans-Michael (Module responsibility) |
| Prerequisites         | Attending the module, students  
• gain first work experiences and are able to relate and reflect them on the basis of their study contents;  
• reflect and concretize their professional motivation and career choices;  
• have the competences to plan their ongoing studies (e. g. master’s thesis) as well as further master studies and their career entry;  
• have deeper knowledge in the specific professional field they chose and have tested their professional competences in practice;  
• enhance their social and methodological competences and prove them in the chosen organization;  
• are familiar with the application process and able to reflect their own procedure accordingly so as to develop strategies for work search in the future;  
• gain intercultural competences in a practical environment. |
| Module contents       | The module contents are separated into the placement itself (including the report) and the seminar.  
Contents of the placement (including report)  
• The work placement has to have an explicit relation to the student’s fields of study. The student’s work tasks therefore have to include aspects of economics, business administration and law or sustainability economics. Duration of at least four weeks or ca. 160 working hours is compulsory for this work placement.  
• The report shall present the organization, work tasks, relations to the student’s fields of study and reflection on the student’s experiences and cognitions. It shall be of 12-15 pages in length. The certificate about the placement and its duration needs to be attached. The report is to be submitted to the “Servicestelle Praktikum”. |

**wir801 - Concepts of Organisation and Management**

- **Module label**: Concepts of Organisation and Management
- **Modulkürzel**: wir801
- **Credit points**: 6.0 KP
- **Workload**: 180 h

**Verwendbarkeit des Moduls**
- Master's Programme Business Administration, Economics and Law (Master) > Basismodule
- Master's Programme Business Administration, Economics and Law (Master) > Kernmodule CHI
- Master's Programme Business Administration, Economics and Law (Master) > Mantelmodule (MPO2020)
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunkt "China - Wirtschaft und Sprache" (CHI) - Kernmodule (MPO2020)
- Master's Programme Business Informatics (Master) > Module der Wirtschafts- und Rechtswissenschaften (Master)
- Master's Programme Management Consulting (Master) > Mastermodule

**Zuständige Personen**
- Breisig, Thomas (Module responsibility)
- Lehrenden, Die im Modul (Prüfungsberechtigt)
- Wengelowski, Peter (Module counselling)
- Gilbert, Jonathan (Module counselling)
- Breisig, Thomas (Module counselling)

**Prerequisites**
- keine

**Skills to be acquired in this module**
- Students get to know selected concepts of organisation and management. Their respective objectives, instruments and methods are discussed and their use in everyday business is critically reflected. Students learn to deal with different management concepts in a conscious and critical way, especially through case studies and discussions.

- Upon completion of the module, students will:
  - be familiar with the emergence, development, and content of various management concepts;
  - be able to convey key findings of the various management concepts to practical issues in the field of organisation and management;
  - develop skills of self-reflection (supported by the technical and didactical concepts).

**Module contents**
- Students receive deeper insights into concepts of organisation and management, including:
  - Lean Management
  - Change Management
  - Quality Management
  - Business Process Reengineering

- The presentations and discussions within the seminars also offer possibilities to deepen and broaden these topics according to the student’s interest and current developments in theory and practice, e. g. Balanced Scorecard, Learning Organisation, Organisational Culture, Worker Participation, Networks, Diversity Management, Management by Objectives.

**Literaturempfehlungen**

- Further literature will be announced during the semester according to the particular lecture/seminar content.

**Prerequisites**
- Understanding of the interdependence of goods markets, labour markets and financial markets in the economy
- Ability to assess controversial views of the causes of output fluctuations (business cycles), inflation and unemployment
- Ability to present and evaluate different concepts of macroeconomic stabilization by way of fiscal and monetary policies
- Ability to describe and handle (simple) dynamic models of output, price-level and employment fluctuations and economic growth

**Module contents**
The lectures address the following issues:
- the development of macroeconomic thinking,
- output fluctuations, inflation and unemployment,
- statics and dynamics in macroeconomic theories,
- open economy macroeconomics,
- business cycles,
- economic growth and innovations,
- microfoundations of macroeconomics,
- policy rules.

**Zuständige Personen**
- Dittmer, Jochen (Module responsibility)

**Prerequisites**
- Skills to be acquired in this module
  - The aim of the course is to provide students with a deep and thorough knowledge regarding
    - Tax accounting law and
    - Taxation procedures.

**Module contents**
- The course provides a deep insight into
  - Tax accounting law
    - Basics of tax accounting law
    - Principal values (cost of purchase/cost of manufacture, going concern value, fair market value)
    - Depreciation, subsidy regulations
    - Transfer of hidden reserves
    - Leasing
    - Provisions
  - Taxation procedures
    - Overview about general fiscal law (AO) and tax court code (FGO)
    - Tax determination and taxing procedures
    - Types of taxing
    - Deadlines and extent of balances and tax assessments corrections
    - Interest yield

**Literaturempfehlungen**
- Falterbaum, Hermann (aktuelle Fassung): Buchführung und Bilanz
- Rose, Gerd & Watrin, Christoph (aktuelle Fassung): Abgabenordnung; mit Finanzgerichtsordnung

It is worth mentioning, that due to the fast-changing tax law, further recommendations regarding the literature cannot be made yet, but are rather given during the course. Required are:
- A collection of the most important tax laws (e.g. NWB-publisher) in current form
- A loose-leaf collection of the tax regulations (e.g. Beck-publisher)

Zuständige Personen:
Stecking, Ralf Werner (Module responsibility)
Lehrende, Die im Modul (Prüfungsberechtigt)

Prerequisites:
Skills to be acquired in this module:
With successful completion of the course, students shall:
- be aware of and be able to evaluate advanced methods of multivariate data analysis.
- be able to select adequate methods in relevant fields of application, like prediction, classification, and segmentation analysis.
- be able to run computer-aided analyses and to interpret the results properly.

Module contents:
Various methods of quantitative data analysis such as:
- Linear Regression,
- Logistic Regression,
- Linear Discriminant Analysis,
- Principal Component Analysis,
- Feature selection and evaluation methods.

**Skills to be acquired in this module**
The students are able to:
- apply the basic econometric methods,
- follow, evaluate and interpret basic empirical studies,
- apply basic econometric methods in empirical studies,
- use the econometric software STATA,

**Module contents**
The module consists of a lecture and an exercise. In the module the basic statistical principles are recapitulated, deepens the knowledge of the multiple regression and introduce the students to the advanced topics of panel econometrics, binary dependent variables, instrumental variable estimation and time series econometrics.

Zuständige Personen
- Meyerholt, Ulrich (Module counselling)
- Godt, Christine (Module responsibility)
- Lehrenden, Die im Modul (Prüfungsberechtigt)

Prerequisites
Skills to be acquired in this module
Building on the existing knowledge of the participants, the course will deepen knowledge of European and international law, whereby emphasis will be laid on those areas in which the dividing line between state intervention (public law) and market rights (private law) has become blurred. Students will be able to analyze contemporary regulatory techniques inherent in the multilevel system of governance and to assess them from an interdisciplinary (economic and legal) perspective.

Module contents
The module comprises two courses, one of which will be taught by PD Dr. Meyerholt, and the other together with Prof. Godt. The first course deals with selected issues in environmental law. With the general structure of environmental law as a point of departure, the course content will be taught in a holistic manner that will also incorporate the leading decisions of the higher courts. The second course takes into consideration intra-disciplinary environmental law as situated between public and private economic law, whereby special focus will be laid on the European and international dimensions.

Skills to be acquired in this module
Students...
- Know advanced theoretical concepts, research streams, and frameworks of in the field of Strategic Management
- Understand the links between different theories and are able to critically question them
- Can apply theories to understand and interpret organizational dynamics in daily life
- Are able to develop solutions for concrete practical challenges in companies in the context of Strategic Management based on the concepts and frameworks they have learned
- Can put the newly acquired knowledge into a broader context, so it can be deepened in the further professional life

Module contents
The course offers an overview of advanced concepts and frameworks in the field of Strategic Management. At the beginning, the course will provide a brief introduction into the historical development, goals, and research streams of the field. In this context, important terms, methods, and philosophical approaches of (management) research will be clarified. Subsequently, students form groups to analyze selected scientific articles with regard to their theoretical relevance and practical implications. Theoretical topics that will be covered in depth are:

1. Top Management Teams, Upper Echelons und Corporate Governance
2. Ressource- and Capability-based Approaches
4. Institutional Theory, Institutional Work/Entrepreneurship and Social Movements
5. Organizational Cognition, Identity, and Framing
6. Organizational Learning and Ambidexterity
7. Organizational networks and ecosystems

The results of the analysis will be summarized in a seminar thesis, presented in class, and discussed with the other students. The main goal of the course is to equip students with advanced concepts, which allow them to understand organizational dynamics, question established practices in firms, and develop new solutions that go beyond the application of standard instruments.

Prerequisites
Skills to be acquired in this module
The aim of the course is to provide students with a deep knowledge of the theory and concepts in managerial accounting.

Module contents
- Theory and concept of managerial accounting
- Profit planning
- Budgeting
- Ratios and financial analysis
- Operating performance measures
- Cash flow and segment reporting
- Paper discussion on current and special issues.

wir858 - Capital market law, insolvency law

Module label: Capital market law, insolvency law
Modulkürzel: wir858
Credit points: 6.0 KP
Workload: 180 h

Verwendbarkeit des Moduls:
- Master's Programme Business Administration, Economics and Law (Master) > Basismodule
- Master's Programme Business Administration, Economics and Law (Master) > Mantelmodule (MPO2020)
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule AFT - Recht
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule RdW - Recht
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule UF - Recht
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunkt "Recht der Wirtschaft" (RdW) (MPO2020)

Zuständige Personen:
- Rott, Peter (Module responsibility)
- Lehrenden, Die im Modul (Module counselling)
- Lehrenden, Die im Modul (Prüfungsberechtigt)

Prerequisites:
Upon completion of the module, students will be able to:
- demonstrate a knowledge of the basics of insolvency law and insolvency proceedings law as well as the basics of banking law and capital market law.
- classify insolvency law with its functions as enforcement law, restructuring law, and the right to alter a relationship in business life.
- demonstrate a knowledge of the positions of the groups involved (creditors, debtors, the responsible bodies of legal persons) in the insolvency proceedings, including the rights and obligations of the groups involved in the process and in the run-up to the crisis, as well as the discharge of residual debt as a rehabilitation option for natural persons.
- demonstrate a familiarity with the principles of the legitimacy verification pursuant to the general tax code, money laundering, bank secrecy, and the information requirements of credit institutions.
- identify the functions of banking and capital market law as well as modern insolvency law.
- use these functions in practical examples.
- assess the progress of insolvency proceedings, including their requirements on creditors and debtors.

Module contents:
The module deals with banking and capital market law as well as insolvency and insolvency proceedings law within two separate lectures.

The main focus of the lecture in banking and capital market law is banking law. After an introduction to general banking law, the most important legal questions regarding collateralisation of loans are discussed. Additionally, the topics of the legitimacy verification pursuant to the general tax code, money laundering, bank secrecy, and the information requirements of credit institutions are discussed. Subsequently, the basic principles of securities law are discussed. Their legal basis and the economic background are analysed. Where possible, the interrelations between the various securities and the events of the financial market crisis will be discussed.

The lecture Insolvency Law deals with the basics of debt enforcement and insolvency law. Procedures will be shown and explained. The first part deals with company insolvency law, the second part with consumer insolvency and residual debt relief law.

Literaturempfehlungen:
Current literature references are given in the events.

Skills to be acquired in this module:
- Students understand the importance of incentive systems for economic processes and can analyze the effects of incentive systems;
- have a firm knowledge in game theory and contract theory, and can address questions in the context of scientific discussion;
- are able to apply methods from game theory and contract theory largely independently to the analysis of situations in which agents interact strategically;
- are able to design incentive schemes – on their own and in teams – and to acquire knowledge on their own for this purpose and, to present their results, and to defend them in the scientific discourse.

Module contents:
The first part of the module covers game theory. Game theory is an important method in economics to analyze strategic interactions of agents, e.g., on markets, in organizations or in bargaining situations. The second part of the module covers contract theory that – according to the Nobel laureate Kenneth Arrow – has been „the most important development in economics in the last forty years“. We work out the fundamentals of screenings, signaling and moral hazard and apply them to different topics, e.g., from labor economics, economic organization and management, law and economics as well as industrial economics. In both parts, there is a tutorial. Here students largely independently apply the acquired knowledge to different situations of strategic interaction in economics and present their results.

- Master's Programme Business Administration, Economics and Law (Master) > Mantelmodule RdW - Recht
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule UF - Recht

#### Zuständige Personen
Godt, Christine (Module responsibility)
Lehrenden, Die im Modul (Prüfungsberechtigt)

#### Prerequisites
- Students will be able
  - to describe European and international legal-economic interdependencies
  - apply international and European legal norms and legal issues
  - have a command of English legal terminology.

#### Module contents
The module consists of two lectures which deal with changes in policies and institutions of international economic law. One lecture focuses on economic law and institutions as shaped by international law, while the other class is dedicated to EU foreign trade law. A basic knowledge of the institutions of international and EU economic law (WTO, IMF, World Bank, European Commission) is a prerequisite for attending this module. The focus lies in helping students understand the processes of internationalization and Europeanization that inform the current interactions between the different actors on the international plane (companies, states and parastatals). In this module, public and private economic law will be presented as a single unit. The international law part of the module focuses on the rationale and regulation of the major free trade agreements, including dispute settlement. Other topics to be addressed include the conflict of laws and the UN Convention (CISG). The EU law focuses on competition and foreign trade law, including procurement and taxation law.

Zuständige Personen:
- Trautwein, Hans-Michael (Module responsibility)
- Trautwein, Hans-Michael (Prüfungsberechtigt)
- Trautwein, Hans-Michael (Module counselling)

Prerequisites:
Skills to be acquired in this module:
- Understanding of exchange rates as strategic prices in open economies.
- Understanding of the interdependence of balance-of-payments constraints and exchange rates.
- Capability to discuss different models of exchange rate determination.
- Ability to research data and evaluate the literature on specific aspects of financial market globalization and strategies of exchange-rate policy.
- Understanding of the history of fixed-exchange-rate systems.
- Ability to relate the importance of historical experience in international monetary and financial economics.

Module contents:
The lectures address the following issues:
- exchange rates and the balance of payments,
- open-economy macroeconomics,
- exchange rate determination,
- international financial markets,
- fixed-exchange-rate systems,
- currency crises,
- optimum currency areas and monetary integration,
- choice of exchange rate regime,
- financial market regulation.

In the seminar students will present papers on general and topical issues (theoretical models, policy strategies, case studies) in the fields of financial market globalization and exchange-rate policy.

Literatureempfehlungen:

- Godt, Christine (Module responsibility)
- Lehrenden, Die im Modul (Prüfungsberechtigt)

**Prerequisites**

**Skills to be acquired in this module**
- erkennen und analysieren europäische und internationale Regelungsmaterie des transnationalen Gesundheitsrechts
- kennen Anwendungsbeweisbeispiele und lösen Problemfälle
- verfügen über anwendungsbezogenes Wissen zur Lösung aktuell anstehender europäischen und transnationalen Fragestellungen.

**Module contents**
Das Modul besteht aus zwei aufeinander aufbauenden Teilen: Der erste Teil behandelt theoretische und praktische Fragen zur Wechselwirkung zwischen EU- Gesundheitspolitik und nationalen Gesundheitsrecht wie auch zwischen EU-Gesundheitsrecht und anderen Bereichen des EU-Rechts und stellt europäisches Gesundheitsrecht als ein sich entwickelndes, eigenständiges Gebiet dar. Der zweite Teil setzt sich mit den nationalen und internationalen Regelwerken im Bereich des Gesundheitsrechts (WHO, WTO, EU, nationales Recht und Selbstregulierung) und Fragen bezüglich globalen Handels mit Arzneimitteln auseinander. Beide Teile können entweder innerhalb einer oder in zwei Veranstaltungen behandelt werden. Insbesondere werden die folgenden Themen behandelt:

- Menschenrechte, Ethik, globales Gesundheitsrecht;
- EU und transnationale Regulierung von Arzneimitteln (Marktzugang, Good Manufacturing Practice, Good Clinical Practice, Pharmakovigilanz; gefälschte Arzneimittel);
- Regulierung von klinischer Forschung im EU- und transnationalen Recht;
- Datenschutz, Produkthaftung und Gesundheitsversorgung;
- Gesundheitsversorgung, Wettbewerbsrecht, und geistiges Eigentum.

Prerequisites
(for WiRe empfohlen): wir815

Skills to be acquired in this module
- Die Studierenden verstehen Grundlagen und Verschränkungen von Wettbewerbsrecht und Geistigem Eigentum
- analysieren und beantworten Rechtsfragen im Schnittfeld von Wettbewerb und Geistigem Eigentum
- beherrschen einschlägige Rechtsprechung und können neue Fragen entsprechend einordnen

Module contents
Das Modul enthält zwei Veranstaltungen (wahliweise Vorlesung mit Seminar oder zwei Vorlesungen) und richtet sich an Masterstudierende mit Interesse an Innovation und dynamischem Wettbewerb (zwischen Unternehmen, aber auch zwischen Staaten). Aufbauend auf zuvor vermittelte Grundstrukturen des Europäischen Marktordnungsgesetzes, stehen Themen auf der Schnittfläche von Wettbewerb und Geistigem Eigentum (Kartell- und Lauterkeitsrecht) im Zentrum der Veranstaltung.

Lehrziele sind einerseits die akademische Durchdringung, andererseits die Einordnung und Beantwortung praktischer Fallgestaltungen. Themen generieren sich aus der betriebswirtschaftlichen Praxis (u.a. etwa Zugang zu ‘standardessentiellen Patente’; Schutzrechte als Voraussetzung von Unternehmenskooperationen) wie aus volkswirtschaftlichen Fragen (Einfluss des Schutzstandards für Geistiges Eigentum auf Innovation und Direktinvestitionen; Schutzrechte als Marktzugangsbedingungen). Die Studierenden lernen, Geistiges Eigentum und Wettbewerbsrecht als zwei miteinander verschränkte Rechtsgebiete zu analysieren.

### Module Information:

**Module label**: Sectoral, Functional and Institutional Approaches to Marketing

**Modulkürzel**: wir826

**Credit points**: 6.0 KP

**Workload**: 180 h

**Verwendbarkeit des Moduls**
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunkt Führung von Unternehmen und gesellschaftliche Organisation (FUGO) (MPO2020)
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule RdW - BWL
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule UF - BWL
- Master's Programme Sustainability Economics and Management (Master) > Additional Modules

**Zuständige Personen**
- Lehrenden, Die im Modul (Prüfungsberechtigt)
- Raabe, Thorsten (Module responsibility)

**Prerequisites**
- The students should be enabled
  - to adapt the marketing concept to sectoral, functional and institutional specifics,
  - to apply specific concepts and methods of marketing in a problem-oriented way and to be able to reflect their conditions and limitations,
  - to develop and present your own conceptual designs in a team.

**Module contents**
- Marketing initially started as a producer-oriented concept and in recent years has developed as universal approach to influence market transactions. Against this background institutional, functional and sectoral fields of application inspired the formulation of sophisticated marketing approaches, like e.g. marketing of non-profit organisations, strategic marketing, or service marketing. The course presents the specific nature of the different fields of application and relevant consequences for marketing planning. Given the recent inflation of "hyphenated conceptions" of marketing, a reasoned diagnosis as to marketing's core identity is put forth. To this end, perspectives of transfer and integration between the approaches will be developed, that measure up to state-of-the-art theoretical as well as practical demands towards marketing as a universal market-oriented way of managing businesses. This course is divided into a preparatory seminar and an educational workshop towards the end of the term. The latter unit allows case study and role play as well as the presentation student work and boosts social competences irrespective of subject matter.

**Prerequisites**

Skills to be acquired in this module

- Have an overview of the most important societal trends, such as digitization, globalization, demographic change, gender equality, income inequality, and resource depletion
- Know important theoretical approaches that help understand societal change from a firm perspective
- Are able to analyze societal trends and critically evaluate their pros and cons
- Understand the impact of societal change on businesses as well as the role of businesses as drivers of societal change
- Are able to derive recommendations for firms and policy makers based on a thorough analysis of trends

**Module contents**

The course centers on the questions of how societal change affects firms and how firms, in turn, contribute to societal change. Toward this end, the first part of the course introduces several important theoretical approaches that help understand societal change from a business perspective, such as Institutional Entrepreneurship or Corporate Political Activity. In addition, students will get to know tools firms use to analyze societal trends. In the second part of the course, students will then form groups to analyze the dynamics, drivers, and consequences of important societal trends with a focus on the role of and implications for firms. Trends, which will be covered in this context, are digitization, automation, mediatization, connectivity, globalization, urbanization, individualism, democratization, social inclusion, gender equality, commercialism, privatization, materialism, income inequality, demographic change, climate change, and resource depletion. The results of the analysis will be presented in class, discussed with the other students, and summarized in a seminar thesis. The main goal of the course is to allow students to derive strategic recommendations for managers and policy makers based on a sound analysis of societal developments.

### Development directions in Marketing Research

**Module label**: Development directions in Marketing Research  
**Modulkürzel**: wir829  
**Credit points**: 6.0 KP  
**Workload**: 180 h

**Verwendbarkeit des Moduls**
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunkt Führung von Unternehmen und gesellschaftliche Organisation (FUGO) (MPO2020)
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule RdW - BWL
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule UF - BWL
- Master's Programme Sustainability Economics and Management (Master) > Additional Modules

**Zuständige Personen**
- Raabe, Thorsten (Module responsibility)

**Prerequisites**
Successful completion of the entrance examination

**Skills to be acquired in this module**
Upon completion of the module, students will be able to:
- apply specific competences to strategic research in marketing
- classify research strategies in marketing according to their meta-theoretical considerations
- estimate research strategies’ claims to knowledge and their limitations
- formulate interdisciplinary research strategies aligning competences of empirical methods with the application of theory
- develop own conceptual sketches within teams and to present them

**Module contents**
How is knowledge generated within the scholarly discipline of marketing? This question confronts the field of marketing with central paradigmatic assumptions. The course begins to solve this puzzle on the basis of a historical analysis of the marketing concept's development. Different scientific standpoints in marketing theory and empirical investigation are evaluated against the light of recent developments in markets and society. The current paradigms of consumption research and marketing research's basic standing in the philosophy of science are intensely treated. This also entails reflecting on the opportunities that alternative trends, e.g. a humanistic paradigm, hold in store for marketing research. The course is divided into a preparatory seminar and an educational workshop towards the end of the term. The latter unit allows case study and role play as well as the presentation student work and boosts social competences irrespective of subject matter.

**Zuständige Personen**

Hoppmann, Jörn (Module responsibility)

Lehrenden, Die im Modul (Prüfungsberechtigt)

**Prerequisites**

**Skills to be acquired in this module**

The students should...

- know and understand basic concepts, instruments and theories in the context of corporate social responsibility and corporate sustainability
- be able to apply conceptual frameworks to analyze and critically question the sustainability of companies
- develop options to improve the sustainability of companies and derive recommendations for their implementation in practice

**Module contents**

The module "CSR" provides an overview of the debates on the social responsibility of firms. The first session will briefly introduce the historical debate on Corporate Social Responsibility and Corporate Sustainability and delineate important concepts. The following sessions will use concrete company case studies as a basis for a critical discussion of central questions in the context of corporate social responsibility and sustainability. Questions that will be discussed are, amongst others:

- How can one determine whether a firm acts in a socially and ecologically sustainable way
- Which factors drive and hinder the diffusion of socially and ecologically superior solutions and companies in the market?
- In how far is there a conflict between firm and market growth on the one hand and sustainability on the other hand?
- Which possibilities does a company have to deal with conflicts between social/ecological and economic goals?
- How can existing firms and value chains be transformed toward sustainability?
- What is the role of managers and boards of directors for organizational change toward sustainability?
- How does the ownership and financial structure of firms influence their strategy toward sustainability?
- In how far can cooperation and partnerships between organizations help integrate social and ecological aspects in firms?

In addition to discussing these questions by drawing on company case studies, students will be introduced to the corresponding theoretical concepts and frameworks in the academic literature. Also, students will be given the opportunity to test different strategies for implementing sustainability in organizations during a simulation, which allows them to gain first-hand insights into the emerging challenges. Toward the end of the course, students will apply and deepen the knowledge they have gathered over the semester by writing a seminar thesis.

Prerequisites:
Skills to be acquired in this module:
The lecture pertaining to the module focuses on the development and critical discussion of formal analytical models for modelling and optimizing problems in operations and supply chain management. The aim is to provide students with the skills they need to analyze value-added processes in reality and not only to understand them, but ideally also improve them. The accompanying seminar, held in English, serves to deepen and critically examine the topics from the lecture. Supplementary to the lecture, the seminar deals with conceptual and empirical research and cases. Hereby, students get to know scientific discourses on practically relevant issues that are difficult to model. Furthermore, there will be ample training in scientific work, in team work and in presentations in front of large groups.

Module contents:
Introduction to Operations Management; Demand Forecasting; Location Planning; Process Design; Inventory Management; Production Planning; Scheduling; Supply Chain Management; Revenue Management; Behavioral Operations Management

In today's highly dynamic business environment, innovation is the key to the success of most firms. Moreover, technological and organizational innovations represent valuable instruments for achieving progress toward sustainable development. Against this background, this module familiarizes students with the tools and processes for managing innovation and for developing overall more innovative firms. The module comprises a lecture and a seminar. In the lecture, students become acquainted with the drivers to and role of innovation; they learn about designing innovative firms and developing innovation strategies; they get to know the different sources of innovation; they familiarize themselves with the methods for choosing between alternative planned innovations; they learn how innovation is implemented; and they understand how innovation benefits are exploited. The accompanying seminar is supposed to familiarize the students with select advanced topics surrounding the management of innovation. Moreover, the students train their skills in working in teams, in working with scientific literature, in academic writing, and in presenting in front of a large audience.

Module contents
Organizational change, creative destruction, ambidexterity, exploration, exploitation, absorptive capacity, sustainability transitions, innovation models, innovation networks, innovation strategy, innovation ecosystems, diffusion of innovations, organizational routines, entrepreneurship, new ventures, etc.

**Zuständige Personen**
Lehrenden, Die im Modul (Prüfungsberechtigt)
- Hoppmann, Jörn (Module responsibility)

**Prerequisites**
- The students should:
  - know basic definitions, trends and application areas of digitalization
  - be able to assess the economic effects of digitalization
  - understand corporate strategies and business models in the context of digital transformation
  - know how companies should design processes and structures to promote digitalization in organizations
  - have an overview of social, legal and ethical aspects of digitalization
  - assess the environmental impact of digitalization
  - evaluate digital products, services and business models using ethical and sustainable guidelines
  - independently develop proposals for the integration of ethical, social and ecological criteria in digitalization projects and processes

**Module contents**
The module “Digital Strategy and Sustainability” provides insights into the role digitalization for companies and the associated social discourse. The digital transformation leads to the emergence of new business models, markets and forms of interaction. This requires comprehensive changes in strategic orientation as well as in business processes and structures. In addition, new regulations and standards are required at the societal level in order to meet the ethical, ecological, and societal challenges posed by digitization.

In the first part of the seminar, students are familiarized with the basics and application areas of digitalization as well as the economic, social, and ecological implications. Toward this end, important questions in the context of digital transformation will be raised and discussed drawing on company case studies. Exemplary questions that will be dealt with in this context are:
- What are the technological drivers of digitalization and what trends can be observed?
- What is the impact of digital transformation on industries and companies?
- How can companies design strategies, business models, processes and structures to address the digital transformation?
- What are the consequences of digitalization on a societal and legal level?
- How does the digital transformation affect the natural environment?
- How can social, ethical, and ecological aspects be integrated into digital products, services and business models?

In the second part of the course, students will develop digital business models in teams under the guidance of experienced coaches, taking into account economic, ecological and social/ethical criteria. The results are presented to the other students and company representatives and will be summarized in a term paper. An important part of the term paper is the critical reflection of current methods used to develop digital business models with regard to sustainability criteria.

**Prerequisites**

**Skills to be acquired in this module**
In der zum Modul gehörigen Vorlesung werden vor allem formalanalytische Modelle erarbeitet, mit denen Probleme in Wertschöpfungsketten beschrieben und im Rahmen der Modellannahmen optimiert werden können. Hiermit sollen die Studierenden eine Kompetenz zur unternehmensübergreifenden Analyse der gesamten Wertschöpfungskette (Supply Chain) erwerben, mit Hilfe derer sie diese nicht nur verstehen, sondern idealerweise auch verbessern können. Im begleitenden Seminar werden mithilfe von in Gruppen verfassten Hausarbeiten aktuelle Fragestellungen und Diskussionen im Supply Chain Management aufgearbeitet und bewertet. Das Seminar baut ergänzend zur Vorlesung auf konzeptioneller und empirischer Forschung auf. Hiermit lernen die Studierenden wissenschaftliche Diskurse zu praktisch relevanten und nur schwer modellierbaren Herausforderungen des Supply Chain Managements kennen. Ferner werden die Fähigkeiten zum wissenschaftlichen Arbeiten, zur Teamarbeit und zum Präsentieren vor großen Gruppen trainiert.

**Module contents**
Die Vorlesung behandelt voraussichtlich folgende Themen: Grundlagen der Supply Chain, Strategischer Fit, Netzwerk- und Standortplanung, Bestandsmanagement, Produkt- und Prozessdesign, Supply-Chain-Koordination, Vertragsdesign, Transport in der Supply Chain, Nachhaltiges Supply Chain Management

**Prerequisites**

- Achieving basic knowledge about audit practices
- Achieving broad knowledge about the audit profession and structuring of audit processes
- Achieving competences in evaluating the possibilities and limits of audit techniques
- Application of audit techniques while using case studies and focusing on certain audit areas.

**Module contents**

In this course, audit basic principles, audit methods and audit techniques will be presented while emphasizing on large corporates. In addition, an overview about audit processes and audit techniques in the context of the control, information and accreditation function as well as legal specifications is given. Working in groups, case studies will strengthen the achieved knowledge. In addition, the focus will be on international financial reporting standards (IFRS) and international auditing standards (IAS) for proving the financial statements as well as testing the internal risk management.

Skills to be acquired in this module
By the end of the course students should have answers to the following questions:
• How are fundamental values (or “intrinsic values”) estimated?
• How are business strategies analyzed in order to understand the value they create?
• What business activities determine value?
• How is “value created for shareholders” identified?
• How does one pull apart the financial statements to get at the relevant information for valuing equities?
• What is the relevance of cash-flows? Of dividends? Of earnings? Of book values?
• How does ratio analysis help in valuation?
• How does profitability tie into valuation?
• What is growth? How does one analyze growth? How does one value a growth firm?
• How does one deal with the accounting methods used in financial statements?
• How is financial analysis developed for strategy and planning?
• What determines a firm’s P/E ratio? How does one calculate what the P/E should be?
• What determines a firm’s market-to-book (P/B) ratio? How does one calculate what the P/B should be?
• How does one evaluate risk? For equity? For debt?
• How does one evaluate an equity research report?
• How does one trade on fundamental information?

Module contents
With a stock market bubble and a financial crisis in our recent history, there have been increasing calls to “return to fundamentals.” This is a course on fundamental analysis. The primary emphasis is on equity (share) valuation, with a focus on developing and applying methods for valuing firms using financial statement analysis.

The course has a very practical focus. The methods of fundamental analysis will be examined in detail and applied in cases and projects involving listed companies. Topics include models of shareholder value, a comparison of accrual accounting and discounted cash flow approaches to valuation, the analysis of profitability, growth and valuation generation in a firm, diagnosing accounting quality, forecasting earnings and cash flows, pro-forma analysis for strategy and planning, and the determination of price/earnings (P/E) and market-to-book (P/B) ratios.

The course does not assume “market efficiency”. Rather, it develops the techniques for challenging traded prices in order to assess whether investments are appropriately priced. It adopts the philosophy that one of the risks in investing is the risk of paying too much. The course is one for the active investor.

Most importantly, we learn how to handle accounting and financial reports in valuation. We see that valuation is really a matter of appropriate accounting for value. The course combines accounting principles and investment principles to answer the question: How do I account for value so that I can challenge stock prices with some confidence?

The course will be taught from the perspective of designing techniques to be used in an (independent) equity research department or firm. Accordingly, the material is pertinent to the security analyst – particularly the equity analyst – who must issue a buy, hold or sell recommendations on stocks. However, much of the material covered in the course is also relevant to the corporate financial analyst for evaluating acquisitions, restructurings and other investments, and for calculating the value generated by strategic scenarios. By the end of the course, the student should feel competent in writing a thorough, credible equity research report or investment analysis that meets the highest standards of professionalism.

The course is of interest to those contemplating careers in investment banking (particularly in equity research), security analysis, consulting, public accounting, and corporate finance. And it will also help with personal investing.

**Zuständige Personen**  
Lehrenden, Die im Modul (Prüfungsberechtigt)  
Hombach, Katharina (Module responsibility)  

**Prerequisites**  
Skills to be acquired in this module  
Students have to understand the theoretical orientation and the institutional structure of financial accounting and standard setting. Many important standards, such as fair value accounting, financial instruments, reserve recognition accounting, management discussion and analysis, employee stock options, impairment tests, hedge accounting, derecognition, consolidation, and comprehensive income, will be analyzed and critically evaluated from students. This course aims to provide students with an in-depth understanding of the underlying accounting concepts and accounting standards governing the preparation of financial statements under International Financial Reporting Standards (IFRS) for external users. Furthermore it develop students' conceptual skills and professional competence in financial accounting in compliance with the regulatory and financial framework under IFRS.  

**Module contents**  
- Accounting Under Ideal Conditions  
- The Decision Usefulness Approach to Financial Reporting  
- Efficient Securities Markets  
- The Value Relevance of Accounting Information  
- The Measurement Approach to Decision Usefulness  
- Measurement Applications  
- The Efficient Contracting Approach to Decision Usefulness  
- An Analysis of Conflict  
- Executive Compensation  
- Earnings Management  
- Standard Setting: Economic Issues  
- Standard Setting: Political Issues

**Prerequisites**

**Skills to be acquired in this module**
Upon completion of the module students will be able to explain the role financial institutions play in financial markets based on economic theory. They will have a sound knowledge of institutional and regulatory conditions under which financial institutions operate today, and they will be able to critically assess respective developments in the financial sector. Moreover, they will have developed a sound understanding of how banks are managed in a competitive environment.

**Module contents**
We will discuss theoretical foundations of financial intermediation in general, and of banking in particular as well as the economic, institutional, and regulatory context in which financial institutions operate today. Moreover, we will cover selected topics in the area of bank management and bank accounting.

**Literaturempfehlungen**
- Berger / Molyneux / Wilson (Eds.): The Oxford Handbook of Banking, latest edition, Oxford University Press
- Tolkmitt: Neue Bankbetriebslehre, latest edition, Gabler

Further readings may be announced during the course.

**Zuständige Personen**
- Lehrenden, Die im Modul (Prüfungsberechtigt)
  - Prokop, Jörg (Module responsibility)

**Prerequisites**
- The aim of the course is to provide students with a thorough knowledge of how to identify, classify, measure, and manage different types of financial business risks. In particular, we will discuss the properties and potential applications of derivatives in financial risk management. Upon completion of this module students
  - will have a sound understanding of the concept of risk management, and will be able to distinguish different types of financial risks and risk management approaches;
  - will be able to devise hedging strategies, arbitrage strategies, and speculative strategies using financial derivatives such as futures contracts, forward contracts, options, and swaps;
  - will be able to consistently apply valuation models to determine theoretical prices of financial derivatives.
  - will be able to assess limitations of financial derivatives in risk management.

**Module contents**
- The course provides insights into the theory and practice of modern financial business risk management, including:
  - the concept of risk, types of financial risks, and approaches to risk measurement;
  - the mechanics of financial markets, including derivatives markets;
  - the properties of selected financial instruments, including financial derivatives such as forwards, futures, options, and swaps;
  - tools and techniques for managing financial risks.

**Literaturempfehlungen**
- Highly recommended readings:
  - Optional readings:
  - Further readings may be announced during the course.

Zuständige Personen
Prokop, Jörg (Module responsibility)
Lehrenden, Die im Modul (Prüfungsberechtigt)
Dittmer, Jochen (Module counselling)
Hombach, Katharina (Module counselling)
Lorenz, Johannes (Module counselling)

Prerequisites
Students are required to actively participate in the course by preparing classes, by performing follow-up coursework, and/or by giving presentations according to the rules defined by the lecturer in the first session.

Skills to be acquired in this module
The aim of the course is to provide insights into the state-of-the-art of academic research in selected areas of accounting and auditing, finance, and taxation. Upon completion of the module, students will be able to place typical research questions and research designs in the aforementioned areas within a broader context of academic research, and to assess selected contributions' significance.

Module contents
The course involves reading and discussing cornerstone journal articles as well as contemporary articles and working papers in accounting/auditing, finance, and/or taxation. Particular emphasis will be placed on the evaluation of the respective studies with respect to their research questions, the methodologies used, and their contributions to the literature.

Literaturempfehlungen
Will be announced at the beginning of the course.

**Zuständige Personen**
- Gilbert, Jonathan (Module counselling)
- Breisig, Thomas (Prüfungsberechtigt)
- Gilbert, Jonathan (Prüfungsberechtigt)
- Breisig, Thomas (Module responsibility)

**Prerequisites**

**Skills to be acquired in this module**

Students get to know central theories of organisation and human resources (HR). They are empowered to apply theories in order to explain practical phenomena and to solve practical problems. The ability to put on different "theory glasses" while observing and analysing various organisational and HR practices is fostered. Students learn to deal with different theories in a conscious and critical way, especially through case studies, group work and discussions.

Upon completion of the module, students will:
- be able to explain various classic and modern theories of organisation and human resource theories, differentiate them and reflect them critically;
- be able to apply the theoretical and abstract ways of thinking and perception so as to transfer them on operational decisions;
- develop skills of self-reflection (supported by the technical and didactical concepts).

**Module contents**

Students receive deeper insights into classical and modern theories of organisation and human resource, including:
- Weber’s theory of bureaucracy
- Taylor’s principles of Scientific Management
- Human Relations approach
- Behavioural decision theory
- Situational approach
- Micro-political approaches
- New Institutional Economics
- Theories of motivation
- Theories of leadership

The presentations and discussions within the seminars also offer possibilities to deepen and broaden these topics according to the student’s interest and latest developments in theory and practice.

**Literaturempfehlungen**

Further literature will be announced during the semester according to the particular lecture/seminar content.

**Skills to be acquired in this module**
By the end of the course students should develop and understand the basic concepts, analytical techniques, instruments and systems to control sustainable corporate success. The students further identify the theoretical background of corporate governance and how corporate governance mechanisms work. Moreover, they develop an up-to-date and mainly practitioner-oriented profile of corporate governance and control systems. They are aware of a controller’s relevance as a corporate conscience and the meaning of controlling as a corporate service. In addition, students identify strategic, operational and department-specific characteristics of corporate control. They argue how to ensure the quality of data and the development of decision-making relevant information. Paper discussions further complement the students’ profile by highlighting current and special issues in the field of corporate governance and control. In summary, students link economic, methodological, and cultural aspects to their personal profile and assess whether an activity as a controller fits to their personal plan for future employment. They further strengthen their ability to develop sustainable solutions for comprehensive and specific economic issues.

**Module contents**
In the beginning, the course provides an overview of the historic development as well as conceptions of corporate governance and control in the literature and in practice. It further embeds the role of corporate governance and control within strategic and operational corporate management. The course is further separated in different parts to ensure students’ ability to identify and understand decision-making, coordination and monitoring aspects of corporate governance and control. As such, students analyse corporate actions via the following instruments:
- SWOT-Analysis
- Porter’s Five Forces Model
- Portfolio Analysis
- Strategic Cost Management
- Linear Programming
- Break-Even Analysis
- Value Based Management
- Ratio Analysis
- Balanced Scorecard
- Variance Analysis

Skills to be acquired in this module
The module consists of lecture as well as seminar elements which interlink with each other on a technical and didactical level. By alternating lectures, discussions, and training elements, students get to know the theoretical basics as well as the practical relevance of the module topics. They get the chance to integrate themselves, their theoretical knowledge and practical experiences, and to exchange views with the other students and the lecturer. Different teaching and learning methods support the student’s professional, methodological, social-communicative, and personal competences, e.g. via station learning, role plays and debates, thesis discussions and case study analysis. They work within the entire group as well as small groups.

- attending the course, students
  develop a solid knowledge of this broad subject and are able to relate the various scientific and practical findings with each other and also understand them on a macro-level;
  understand the complex issues, challenges and fields of action in International Management;
- are able to analyse, interpret and manage international economic and business issues within heterogeneous (above all cultural) fields of stakeholders and environments;
- can effectively analyse and apply the strategic, structural and cultural instruments in International Management according to the specific practical context;
- develop skills of self-reflection (supported by the technical and didactical concepts) and are able to press their point within the scientific discussion;
- are able to locate a specific research question within the scientific discussion in the field of International Management and to interlink, reflect and evaluate it accordingly.

Module contents
Students gain theoretical as well as practical insights in the backgrounds and specific characteristics of International Management. A specific focus will (as a last point) be laid on international Human Resource Management as it provides notably relevant issues in international business administration.

Students deal with foundations, challenges and possible fields of action within the following topics:

- Economic internationalisation and the international firm
  - Characteristics, development and relevance
  - Terminological differentiation and attribution
  - Research and explanatory approaches
- Environment and orientation of international corporations
  - Culture and management
  - Fields and forms of strategy
  - Organisation by structure and processes
  - Responsibility and public affairs
- Relevance of and fields in international Human Resource Management
  - Requirements and organisation of the central HR areas
  - Recruitment and selection
  - Expatriation of employees
  - Intercultural management
  - Social management

The presentations and discussions also offer possibilities to deepen and broaden these topics according to the students interests and latest developments in theory and practice.

Literaturempfehlungen
Further literature will be announced during the semester according to the particular lecture/seminar content.

Breisig, Thomas (Module responsibility)

Prerequisites: keine

Skills to be acquired in this module: Attending the course, students
- are familiar with the different methods and techniques in academic research and writing and are able to apply them successfully;
- are able to organise themselves and work problem-oriented within complex learning environments;
- know how to carry out research-oriented work;
- interlink theory and practice in a critical and solution-oriented way;
- know the relevance of theory construction within a scientific process and are able to work herein independently;
- gain deeper knowledge within the specific project topic they work on with emphasis on organisation and/or human resource management;
- are competent to work with others on scientific empirical research in a team situation and are able to develop and document their findings according to scientific standards.

Furthermore, the students are able:
- to locate a specific research question within the scientific discussion in this research areas and to interlink, reflect and evaluate it accordingly
- to press their point within the scientific discussion in this research area..

Module contents: The module consists of two project parts, one per semester, and starts with each summer term. In the beginning, the lecturers present (varying) guiding topics from the field of management, organisation, and human resources (e.g. cooperation and business networks, the flexibilisation of work conditions, workplace health management). Topics from the chair’s current research projects are further integrated. The topics are further specialised by small student groups who work together on them. This means that the lecturers provide suggestions and support (e.g. via different moderation methods) so as to initiate the student’s decisions on their project’s specific topic. Students work in plenary as well as small groups. The specific project topics are further cemented within each of the student’s project group.

For methodological and didactical reasons, it is necessary to stretch the module over two semesters. In the first semester (summer term), students work on the theoretical and conceptual basics, solidify their research topics, and prepare for the empirical project work. The students present their first (in particular theoretical) results as well as their empirical planning and design. During the second semester (winter term), students work intensively on the empirical research part and complete the project by finishing their scientific report. They present their findings within the whole plenary group.

Active (non-receptive) forms of learning are dominating this module. The lecturers are primarily acting in the role of moderators, coaches, coordinators and providers for information.

Prerequisites:
Skills to be acquired in this module:
- Students have to understand the theoretical orientation and the institutional structure of financial accounting and standard setting. Many important standards, such as fair value accounting, financial instruments, reserve recognition accounting, management discussion and analysis, employee stock options, impairment tests, hedge accounting, derecognition, consolidation, and comprehensive income, will be analyzed and critically evaluated from students.
- This course aims to provide students with an in-depth understanding of the underlying accounting concepts and accounting standards governing the preparation of financial statements under International Financial Reporting Standards (IFRS) for external users. Furthermore, it develops students' conceptual skills and professional competence in financial accounting in compliance with the regulatory and financial framework under IFRS.

Module contents:
- Accounting Under Ideal Conditions
- The Decision Usefulness Approach to Financial Reporting
- Efficient Securities Markets
- The Value Relevance of Accounting Information
- The Measurement Approach to Decision Usefulness
- Measurement Applications
- The Efficient Contracting Approach to Decision Usefulness
- An Analysis of Conflict
- Executive Compensation
- Earnings Management
- Standard Setting: Economic Issues
- Standard Setting: Political Issues

#### Prerequisites
Students are required to actively participate in the course by preparing classes, by performing follow-up coursework, and/or by giving presentations according to the rules defined by the lecturer in the first session.

#### Skills to be acquired in this module
The aim of the course is to provide insights into the state-of-the-art of academic research in selected areas of accounting and auditing, finance, and taxation. Upon completion of the module, students will be able to place typical research questions and research designs in the aforementioned areas within a broader context of academic research, and to assess selected contributions' significance.

#### Module contents
The course involves reading and discussing cornerstone journal articles as well as contemporary articles and working papers in accounting/auditing, finance, and/or taxation. Particular emphasis will be placed on the evaluation of the respective studies with respect to their research questions, the methodologies used, and their contributions to the literature.

#### Literatureempfehlungen
Will be announced at the beginning of the course.

**Skills to be acquired in this module**

After participation in the seminar
- the students know different methods and techniques of scientific work and can apply them successfully;
- the students are able to work in a research-oriented way;
- know the importance of theory building in the scientific process and can work independently with it;
- the students have in-depth knowledge of the project topic dealt with in each case with reference to organization and/or personnel;
- the students have the ability to establish a relationship between theory and practice, to critically examine it and to work out solutions;
- are able to place a specific question in the context of the scientific discussion in the field of organization and human resources and to situate, reflect and evaluate it accordingly;
- know the basics of empirical work and are able to independently collect qualitative/quantitative data, evaluate them, present the results and discuss them critically;
- are able to present their own research results, to document their findings in a scientific report according to the accepted rules of scientific work and to represent a point of view in the scientific debate in these subject areas.
- the students are able to find their way in complex learning situations and to work in a problem-oriented manner;
- the students are able to carry out independent research work in a team situation together with other students.

**Module contents**

The module consists of four project courses and starts in the summer semester. Initially, the lecturers provide a (changing) framework topic from the field of management, organization and personnel (e.g. cooperation and company networks, flexibilization of working conditions, corporate health management). Topics of current research projects of the chair are also included. The individual topics within the framework question are then the subject of student participation. In concrete terms, this means that the lecturers give the students suggestions and initiate topic-finding processes, e.g. by means of metaphor-supported moderation. Work is done alternately in plenary sessions and in small groups under the supervision of the teachers. The project topics are worked on in greater depth in the small student groups.

For methodological-didactic reasons, it is essential that the module runs over two semesters. In the first semester, the theoretical-conceptual basics are worked out, main topics are explored, the basics of empirical work are taught and the course is set for the empirical element to be worked on in small groups. First (especially theoretical-conceptual) results as well as concretizations of the empirical project are presented by the students. The second semester is used to deepen the knowledge and application of empirical work, to work on the empirical part and to write a final scientific report. The results are also presented to the plenary session.

The project module is dominated by forms of active, non-receptive learning. The teachers have primarily a supporting function of information transfer, moderation, consultation and coordination.

Prerequisites
Skills to be acquired in this module
The aim of the course is to provide insights into the economics of accounting, finance, and/or taxation from the perspective of a quantitative researcher. Upon completion of the module, students will be familiar with typical quantitative models and research approaches in the respective field and will be able to develop their own research designs.

Module contents
The course involves reading and discussing empirical research in accounting, finance, and/or taxation, and working with quantitative models in at least one of these areas.

Literaturempfehlungen
Will be announced at the beginning of the course.

Codetermination Act

Module label: Codetermination Act
Modulkürzel: wir856
Credit points: 6.0 KP
Workload: 180 h

Verwendbarkeit des Moduls:
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule RdW - Recht
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunkt "Recht der Wirtschaft" (RdW) (MPO2020)

Zuständige Personen:
- Brors, Christiane (Module responsibility)
- Lehrenden, Die im Modul (Prüfungsberechtigt)

Prerequisites:
Skills to be acquired in this module:
- Based on the modul „Employment Law“ the students will in the context of Employment Law and Collective Bargaining Law understand - the special legal problems concerning the rights of the Betriebsrat - the procedure of problem solving (Einigungsstelle, procedure of court).

Module contents:
- Rights of the Betriebsrat, Einigungsstellenverfahren, procedure of court, rights of the members of the Betriebsrat, Organisation of the Betriebsrat, duties and rights of the employer.

Literatureempfehlungen:
- Literature will be announced in the lecture

**Zuständige Personen**
Boehme-Neßler, Volker (Module responsibility)
Lehrenden, Die im Modul (Prüfungsberechtigt)

**Prerequisites**

**Skills to be acquired in this module**
The students:
- have in-depth insights into the economic conditions of media production, distribution and exploitation.
- know the legal basis and framework conditions of media production, media presentation and mediation (e.g. copyrights, performance rights, distribution of media).
- bring together economic and legal dimensions of media work.
- know the economic and legal framework conditions of media institutions (e.g. television, radio, media mediation).

**Module contents**
This module is about making a connection of the theoretical and practical acquired aesthetic competences with the economic and legal framework conditions. In the sense of professionalisation, prospective media producers and mediators should learn to assess their own future activities under economic and legal conditions.

**Literaturempfehlungen**
- Current case law and:

wir858 - Capital market law, insolvency law

Module label: Capital market law, insolvency law

Modulkürzel: wir858

Credit points: 6.0 KP

Workload: 180 h

Verwendbarkeit des Moduls:
- Master's Programme Business Administration, Economics and Law (Master) > Basismodule
- Master's Programme Business Administration, Economics and Law (Master) > Mantelmodule (MPO2020)
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule AFT - Recht
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule RdW - Recht
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule UF - Recht
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunkt "Recht der Wirtschaft" (RdW) (MPO2020)

Zuständige Personen:
- Rott, Peter (Module responsibility)
- Lehrenden, Die im Modul (Module counselling)
- Lehrenden, Die im Modul (Prüfungsberechtigt)

Prerequisites:
Upon completion of the module, students will be able to:
- demonstrate a knowledge of the basics of insolvency law and insolvency proceedings law as well as the basics of banking law and capital market law.
- classify insolvency law with its functions as enforcement law, restructuring law, and the right to alter a relationship in business life.
- demonstrate a knowledge of the positions of the groups involved (creditors, debtors, the responsible bodies of legal persons) in the insolvency proceedings, including the rights and obligations of the groups involved in the process and in the run-up to the crisis, as well as the discharge of residual debt as a rehabilitation option for natural persons.
- demonstrate a familiarity with the principles of the legitimacy verification pursuant to the general tax code, money laundering, bank secrecy, and the information requirements of credit institutions.
- identify the functions of banking and capital market law as well as modern insolvency law.
- use these functions in practical examples.
- assess the progress of insolvency proceedings, including their requirements on creditors and debtors.

Module contents:
The module deals with banking and capital market law as well as insolvency and insolvency proceedings law within two separate lectures.

The main focus of the lecture in banking and capital market law is banking law. After an introduction to general banking law, the most important legal questions regarding collateralisation of loans are discussed. Additionally, the topics of the legitimacy verification pursuant to the general tax code, money laundering, bank secrecy, and the information requirements of credit institutions are discussed. Subsequently, the basic principles of securities law are discussed. Their legal basis and the economic background are analysed. Where possible, the interrelations between the various securities and the events of the financial market crisis will be discussed.

The lecture Insolvency Law deals with the basics of debt enforcement and insolvency law. Procedures will be shown and explained. The first part deals with company insolvency law, the second part with consumer insolvency and residual debt relief law.

Literaturempfehlungen:
Current literature references are given in the events.

Module label: Data Protection Law

Modulkürzel: wir860

Credit points: 6.0 KP

Workload: 180 h

Verwendbarkeit des Moduls:
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule
  RdW - Recht
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule
  UF - Recht
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunkt "Recht der Wirtschaft" (RdW) (MPO2020)
- Master's Programme Business Informatics (Master) > Module der Wirtschafts- und Rechtswissenschaften (Master)
- Master's Programme Computing Science (Master) > Nicht Informatik

Zuständige Personen:
- Lehrende, Die im Modul (Prüfungsberechtigt)
- Louven, Sebastian (Module counselling)
- Rott, Peter (Module responsibility)

Prerequisites:

Skills to be acquired in this module:
Upon completion of the module, students will be able to:

- recognize simple data protection incidents.
- apply existing protection mechanisms.
- implement projects in accordance with the law.
- discuss and defend their plans in front of others.

Module contents:
The module gives an overview on data protection laws. Basic knowledge of data protection regulations (DSGVO; BDSG) and existing protection mechanisms is imparted. Within the framework of the seminar, the discussed topics will be deepened with the help of seminar papers and individual aspects will be discussed in more detail.

The event will highlight the new informational structures in modern society and their effects on data protection and data security. Questions concerning general personal rights, freedom of information, IT security and relevant criminal law regulations will be discussed on the basis of examples and legally provided protection mechanisms as well as the tasks of supervisory authorities will be discussed. In particular, the most important decisions on data protection will be covered in detail during the seminar.

At the seminar, students will have the opportunity to prepare in-depth seminar papers on the various topics, which will then be discussed with all participants.

Literatureempfehlungen:
Kühling/Klar/Sackmann, Datenschutzrecht, 2018.

Further literature references will be given in the lecture.

**Prerequisites**
(for WiRe empfohlen): wir815

**Skills to be acquired in this module**
- verstehen Grundlagen und Verschränkungen von Wettbewerbsrecht und Geistigem Eigentum
- analysieren und beantworten Rechtsfragen im Schnittfeld von Wettbewerb und Geistigem Eigentum
- beherrschen einschlägige Rechtsprechung und können neue Fragen entsprechend einordnen

**Module contents**
Das Modul enthält zwei Veranstaltungen (wahlweise Vorlesung mit Seminar oder zwei Vorlesungen) und richtet sich an Masterstudierende mit Interesse an Innovation und dynamischem Wettbewerb (zwischen Unternehmen, aber auch zwischen Staaten). Aufbauend auf zuvor vermittelte Grundstrukturen des Europäischen Markordnungsgesetzes, stehen Themen auf der Schnittfläche von Wettbewerb und Geistigen Eigentums (Kartell- und Lauterkeitsrecht) im Zentrum der Veranstaltung.

Lehrziele sind einerseits die akademische Durchdringung, andererseits die Einordnung und Beantwortung praktischer Fallgestaltungen. Themen generieren sich aus der betriebswirtschaftlichen Praxis (u.a. etwa Zugang zu ‘standardessentiellen Patente’; Schutzrechte als Voraussetzung von Unternehmenskooperationen) wie aus volkswirtschaftlichen Fragen (Einfluss des Schutzstandards für Geistiges Eigentum auf Innovation und Direktinvestitionen; Schutzrechte als Markzugangsbedingungen). Die Studierenden lernen, Geistiges Eigentum und Wettbewerbsrecht als zwei miteinander verschrankte Rechtsgebiete zu analysieren.

Prerequisites

Skills to be acquired in this module
With successful completion of the course, students shall:
- be aware of and be able to evaluate advanced methods of multivariate data analysis.
- be able to select adequate methods in relevant fields of application, like prediction, classification, and segmentation analysis.
- be able to run computer-aided analyses and to interpret the results properly.

Module contents
Various methods of quantitative data analysis such as:
- Linear Regression,
- Logistic Regression,
- Linear Discriminant Analysis,
- Principal Component Analysis,
- Feature selection and evaluation methods.

- Master’s Programme Business Administration, Economics and Law (Master) > Basismodule
- Master’s Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule AFT - VWL
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunkt "Volkswirtschaftslehre" (VWL) (MPO2020)

**Zuständige Personen**
- Trautwein, Hans-Michael (Module responsibility)
- Trautwein, Hans-Michael (Prüfungsberechtigt)
- Trautwein, Hans-Michael (Module counselling)

**Prerequisites**
- Understanding of exchange rates as strategic prices in open economies.
- Understanding of the interdependence of balance-of-payments constraints and exchange rates.
- Capability to discuss different models of exchange rate determination.
- Ability to research data and evaluate the literature on specific aspects of financial market globalization and strategies of exchange-rate policy.
- Understanding of the history of fixed-exchange-rate systems.
- Ability to relate the importance of historical experience in international monetary and financial economics.

**Module contents**
The lectures address the following issues:
- exchange rates and the balance of payments,
- open-economy macroeconomics,
- exchange rate determination,
- international financial markets,
- fixed-exchange-rate systems,
- currency crises,
- optimum currency areas and monetary integration,
- choice of exchange rate regime,
- financial market regulation.

In the seminar students will present papers on general and topical issues (theoretical models, policy strategies, case studies) in the fields of financial market globalization and exchange-rate policy.

**Literaturempfehlungen**
Selected chapters from:

And other specific readings for the seminar papers.

**Zuständige Personen**

**Prerequisites**

**Skills to be acquired in this module**

Die Studierenden:
- verstehen die grundlegenden Themen der Wettbewerbs- und Regulierungsökonomik (z.B. die industriökoökonomischen Grundlagen, die Anreizproblematik und die praktische Ausgestaltung der Regulierung in verschiedenen Märkten).

**Module contents**
The module consists of two courses. Course A deals with the theory of monopoly, the theory of oligopoly, cartels and market entry and the welfare analysis of market structure. Course B deals with topics in international regulatory and competition policy, especially monopoly regulation, economies of scale vs. market power in transnational markets, aims and instruments of European regulatory and competition policy.

### Prerequisites
The students are able to:
- understand and reproduce the models of the neoclassical and endogenous growth theory,
- understand, discuss and present a current research paper in the field of economic growth.

### Module contents
The module consists of a lecture and a seminar. In the lecture, the fundamental growth models of the neoclassical and the endogenous growth theory are discussed in detail. In the seminar, the student presents a current research paper from the field of economic growth, which was published in an international refereed journal.

Zuständige Personen
Stecking, Ralf Werner (Module responsibility)

Lehrenden, Die im Modul (Prüfungsberechtigt)

Prerequisites
Skills to be acquired in this module
With successful completion of the course, students shall:
- be aware of and be able to evaluate quantitative forecasting methods.
- be able to select adequate methods in relevant fields of application, like time series and classification analysis.
- be able to run computer-aided analyses and to interpret the results properly.

Module contents
Various aspects of quantitative forecasting methods such as:
- Time series components,
- Trend and seasonal methods,
- Stationarity,
- Multivariate forecasting methods,
- Autoregressive and moving average processes,
- Box-Jenkins method.

Prerequisites

none

Skills to be acquired in this module
The students are able

- to understand sources of market failures and government failures
- understand taxing and spending activities of governments
- understand the distinction between normative and positive perspectives in the evaluation of government policy
- to apply economic methods to current issues in public economics
- present their research result in the form of written papers and oral presentations

Module contents

- The course covers key concepts of public economics, which studies how government taxing and spending activities affect the economy – economic efficiency and the distribution of income and wealth.

Lecture: After introducing the theory and methodology of public economics, we discuss a historical and theoretical overview of the public sector. We then focus on departures from efficiency (especially asymmetric information), taxation issues (including tax evasion, fiscal federalism and tax competition among independent jurisdictions), and the intertemporal issue of social security (especially pension system).

Seminar: covers current issues in public economics, e.g. reform of health care or pension system.

Prerequisites
none

Skills to be acquired in this module
This course aims at giving students an understanding of reasons, goals and instruments for climate policy, as well as implied complications due to the long term characteristics and the international dimension of climate change. Students first learn basics about the natural science of climate change and the main statements of climate research about the anthropogenic contribution to climate change. The economic interpretation of high pollution as a symptom of a market failure then leads to the treatment of policy instruments, and the understanding of economic efficiency as a prerequisite for effective climate policy. Game theoretic analysis of international negotiations and agreements provides key insights about the international dimension of the problem. By means of practical examples students then see in detail the functionality and pitfalls of selected implemented (or currently discussed) policies, e.g. the EU-ETS. With successful completion of the course, students shall be able to judge climate policy issues on an informed scientific basis (natural science and economics).

Module contents
Natural science of climate change: greenhouse effect; measures, causes and impacts of climate change. Economics of climate change: market failures (public goods, externalities); game theory of international agreements (prisoner’s dilemma, chicken game, assurance game, repeated games, continuous choice); environmental policy instruments (especially taxes, tradable permits). Climate policy in practice: EU-ETS (pitfalls: market segmentation, conditional grandfathering, lobbying); emission taxes and the EU-ETS; interaction between black and green quotas; embodied carbon tariffs.

- Wengelowski, Peter (Module counselling)
- Gilbert, Jonathan (Module counselling)
- Breisig, Thomas (Module counselling)

**Prerequisites**
- keine

**Skills to be acquired in this module**
Students get to know selected concepts of organisation and management. Their respective objectives, instruments and methods are discussed and their use in everyday business is critically reflected. Students learn to deal with different management concepts in a conscious and critical way, especially through case studies and discussions.

Upon completion of the module, students will:
- be familiar with the emergence, development, and content of various management concepts;
- be able to convey key findings of the various management concepts to practical issues in the field of organisation and management;
- develop skills of self-reflection (supported by the technical and didactical concepts).

**Module contents**
Students receive deeper insights into concepts of organisation and management, including:
- Lean Management
- Change Management
- Quality Management
- Business Process Reengineering

The presentations and discussions within the seminars also offer possibilities to deepen and broaden these topics according to the student's interest and current developments in theory and practice, e.g. Balanced Scorecard, Learning Organisation, Organisational Culture, Worker Participation, Networks, Diversity Management, Management by Objectives.

**Literaturempfehlungen**

Further literature will be announced during the semester according to the particular lecture/seminar content.

**Skills to be acquired in this module**
Students...
- Know advanced theoretical concepts, research streams, and frameworks of in the field of Strategic Management
- Understand the links between different theories and are able to critically question them
- Can apply theories to understand and interpret organizational dynamics in daily life
- Are able to develop solutions for concrete practical challenges in companies in the context of Strategic Management based on the concepts and frameworks they have learned
- Can put the newly acquired knowledge into a broader context, so it can be deepened in the further professional life

**Module contents**
The course offers an overview of advanced concepts and frameworks in the field of Strategic Management. At the beginning, the course will provide a brief introduction into the historical development, goals, and research streams of the field. In this context, important terms, methods, and philosophical approaches of (management) research will be clarified. Subsequently, students form groups to analyze selected scientific articles with regard to their theoretical relevance and practical implications. Theoretical topics that will be covered in depth are:

1. Top Management Teams, Upper Echelons und Corporate Governance
2. Resource- and Capability-based Approaches
4. Institutional Theory, Institutional Work/Entrepreneurship and Social Movements
5. Organizational Cognition, Identity, and Framing
6. Organizational Learning and Ambidexterity
7. Organizational networks and ecosystems

The results of the analysis will be summarized in a seminar thesis, presented in class, and discussed with the other students. The main goal of the course is to equip students with advanced concepts, which allow them to understand organizational dynamics, question established practices in firms, and develop new solutions that go beyond the application of standard instruments.

Godt, Christine (Module responsibility)
Lehrenden, Die im Modul (Prüfungsberechtigt)

**Prerequisites**
- Skills to be acquired in this module
  - to describe European and international legal-economic interdependencies
  - apply international and European legal norms and legal issues
  - have a command of English legal terminology.

**Module contents**
The module consists of two lectures which deal with changes in policies and institutions of international economic law. One lecture focuses on economic law and institutions as shaped by international law, while the other class is dedicated to EU foreign trade law. A basic knowledge of the institutions of international and EU economic law (WTO, IMF, World Bank, European Commission) is a prerequisite for attending this module. The focus lies in helping students understand the processes of internationalization and Europeanization that inform the current interactions between the different actors on the international plane (companies, states and parastatals). In this module, public and private economic law will be presented as a single unit. The international law part of the module focuses on the rationale and regulation of the major free trade agreements, including dispute settlement. Other topics to be addressed include the conflict of laws and the UN Convention (CISG). The EU law focuses on competition and foreign trade law, including procurement and taxation law.

This course aims at giving students an understanding of reasons, goals and instruments for government policy from a micro- and macroeconomic perspective. Students first need to learn how decentralised markets can result in an efficient equilibrium and what the theoretical assumptions for this outcome are. Against this reference case it is possible to evaluate the consequences when some of the assumptions are not fulfilled in reality. Furthermore, the problems of the aggregated economy with its fundamental uncertainty are approached and the answers of economic policy to changes in variables like inflation, unemployment and economic growth will be evaluated.

With successful completion of the course, students shall be able to approach questions of economic policy making by applying concise economic reasoning, graphical intuition, analytical models and historical understanding. Furthermore, students shall be enabled to follow other Economics courses at Master's level.

(for WiRe empfohlen): wir815

**Skills to be acquired in this module**
- Die Studierenden verstehen Grundlagen und Verschränkungen von Wettbewerbsrecht und Geistigem Eigentum
- analysieren und beantworten Rechtsfragen im Schnittfeld von Wettbewerb und Geistigem Eigentum
- beherrschen einschlägige Rechtsprechung und können neue Fragen entsprechend einordnen

**Module contents**
Das Modul enthält zwei Veranstaltungen (wahlweise Vorlesung mit Seminar oder zwei Vorlesungen) und richtet sich an Masterstudierende mit Interesse an Innovation und dynamischem Wettbewerb (zwischen Unternehmen, aber auch zwischen Staaten). Aufbauend auf zuvor vermittelte Grundstrukturen des Europäischen Marktordnungsrechts, stehen Themen auf der Schnittfläche von Wettbewerb und Geistigem Eigentum (Kartell- und Lauterkeitsrecht) im Zentrum der Veranstaltung.

Lehrziele sind einerseits die akademische Durchdringung, andererseits die Einordnung und Beantwortung praktischer Fallgestaltungen. Themen generieren sich aus der betriebswirtschaftlichen Praxis (u.a. Zugang zu 'standardessentiellen Patente'; Schutzrechte als Voraussetzung von Unternehmenskooperationen) wie aus wirtschaftsrechtlichen Fragen (Einfluss des Schutzstandards für Geistiges Eigentum auf Innovation und Direktinvestitionen; Schutzrechte als Marktzugangsbedingungen). Die Studierenden lernen, Geistiges Eigentum und Wettbewerbsrecht als zwei miteinander verschrankte Rechtsgebiete zu analysieren.

**Module contents**

The module "CSR" provides an overview of the debates on the social responsibility of firms. The first session will briefly introduce the historical debate on Corporate Social Responsibility and Corporate Sustainability and delineate important concepts. The following sessions will use concrete company case studies as a basis for a critical discussion of central questions in the context of corporate social responsibility and sustainability. Questions that will be discussed are, amongst others:

- How can one determine whether a firm acts in a socially and ecologically sustainable way?
- Which factors drive and hinder the diffusion of socially and ecologically superior solutions and companies in the market?
- In how far is there a conflict between firm and market growth on the one hand and sustainability on the other hand?
- Which possibilities does a company have to deal with conflicts between social/ecological and economic goals?
- How can existing firms and value chains be transformed toward sustainability?
- What is the role of managers and boards of directors for organizational change toward sustainability?
- How does the ownership and financial structure of firms influence their strategy toward sustainability?
- In how far can cooperation and partnerships between organizations help integrate social and ecological aspects in firms?

In addition to discussing these questions by drawing on company case studies, students will be introduced to the corresponding theoretical concepts and frameworks in the academic literature. Also, students will be given the opportunity to test different strategies for implementing sustainability in organizations during a simulation, which allows them to gain first-hand insights into the emerging challenges. Toward the end of the course, students will apply and deepen the knowledge they have gathered over the semester by writing a seminar thesis.

**Reference text**  
This module is a project that students in the China focus carry out during the term that they spend at a partner university in China. The project topic is selected and researched under intensive online-supervision from Oldenburg in collaboration with colleagues at the partner universities. A kick-off meeting in Oldenburg and regular (online) consultations during and after the stay in China are required. A report in the shape of a 20+ pages study concludes the project.

- Trautwein, Hans-Michael (Prüfungsberechtigt)
- Wang, Hongrui (Prüfungsberechtigt)
- Breisig, Thomas (Module responsibility)
- Trautwein, Hans-Michael (Module responsibility)

**Prerequisites**
- Attending the module, students
  - gain first work experiences and are able to relate and reflect them on the basis of their study contents;
  - reflect and concretize their professional motivation and career choices;
  - have the competences to plan their ongoing studies (e.g. master’s thesis) as well as further master studies and their career entry;
  - have deeper knowledge in the specific professional field they chose and have tested their professional competences in practice;
  - enhance their social and methodological competences and prove them in the chosen organization;
  - are familiar with the application process and able to reflect their own procedure accordingly so as to develop strategies for work search in the future;
  - gain intercultural competences in a practical environment.

**Module contents**
- The module contents are separated into the placement itself (including the report) and the seminar.
  - Contents of the placement (including report)
    - The work placement has to have an explicit relation to the student’s fields of study. The student’s work tasks therefore have to include aspects of economics, business administration and law or sustainability economics. Duration of at least four weeks or ca. 160 working hours is compulsory for this work placement.
    - The report shall present the organization, work tasks, relations to the student’s fields of study and reflection on the student’s experiences and cognitions. It shall be of 12-15 pages in length. The certificate about the placement and its duration needs to be attached. The report is to be submitted to the “Servicestelle Praktikum”.
