

Basismodule

mat990 - Mathematics for Economists

Module label	Mathematics for Economists
Modulkürzel	mat990
Credit points	6.0 KP
Workload	180 h
Verwendbarkeit des Moduls	• Bachelor's Programme Business Administration and Law (Bachelor) > Basiscurriculum Wirtschaftswissenschaften • Bachelor's Programme Business Informatics (Bachelor) > Aufbaucurriculum-Wahlbereich Mathematik • Bachelor's Programme Economics and Business Administration (Bachelor) > Basismodule • Bachelor's Programme Sustainability Economics (Bachelor) > Grundlagen-/Basiscurriculum • Dual-Subject Bachelor's Programme Economics and Business Administration (Bachelor) > Basismodule
Zuständige Personen	• Lehrenden, Die im Modul (Prüfungsberechtigt) • Modulverantwortlichen, Die (Prüfungsberechtigt) • May, Angelika (module responsibility)
Prerequisites	
Skills to be acquired in this module	Students internalize basic mathematical concepts and methods from analysis and matrix calculation and their applications in economics. Professional competence The students: • are proficient in the mathematical fundamentals relevant to economics • master methods for solving equations and inequalities • master differential calculus for one and two variables and can integrate • are able to reliably determine local and global extreme points for functions of one and two variables. Methodological competence The students: • analyse formal contexts • understand the formal mathematical language • structure problems from the economic sciences and justify their solutions. Social competence The students: • construct solutions to given problems in groups • accept criticism and see it as an aid. Self-competence The students: • reflect their actions in establishing solutions • deepen the presented mathematical concepts in exercises and add them to their actions.
Module contents	Basics in real Arithmetic, Rules for Matrix Arithmetic Linear equations, linear inequalities and systems of those, quadratic equations, financial mathematics (interest rates and present values, pension calculation) Calculus for functions of one variable: derivation rules for power functions, exp and ln, indefinite integral, applications of integral calculus (density function, ordinary differential equations), single-variable optimization (stationary points, extreme-value theorem, local and global extreme points),

		Approximation methods (linear approximation, Taylor series with Lagrange remainder) Functions of two variables (partial derivatives, total differential), Tools for comparative statics : (elasticity of substitution, homogeneous and homothetic functions), multivariable optimization tasks (local and global extremes, extremes under constraints)

wir011 - Introduction to Business Administration

Module label	Introduction to Business Administration		
Modulkürzel	wir011		
Credit points	6.0 KP		
Workload	180 h		
Verwendbarkeit des Moduls	• Bachelor's Programme Business Administration and Law (Bachelor) > Basiscurriculum Wirtschaftswissenschaften • Bachelor's Programme Business Informatics (Bachelor) > Basiscurriculum • Bachelor's Programme Comparative and European Law (Bachelor) > Module • Bachelor's Programme Economics and Business Administration (Bachelor) > Basismodule • Bachelor's Programme Mathematics (Bachelor) > Nebenfachmodule • Bachelor's Programme Sustainability Economics (Bachelor) > Grundlagen-/Basiscurriculum • Dual-Subject Bachelor's Programme Economics and Business Administration (Bachelor) > Basismodule		
Zuständige Personen	• Hoppmann, Jörn (module responsibility) • Lehrenden, Die im Modul (Prüfungsberechtigt)		
Prerequisites			
Skills to be acquired in this module	The goal of the course is that students are able to... - know and understand basic concepts and processes in the context of business administration - name important research streams and theoretical frameworks in the field - apply models and instruments of business administration to develop solutions for practical challenges in companies - critically question the application of common instruments and models and evaluate their advantages and disadvantages in specific decision making situation - put the newly acquired knowledge into a broader context, so it can be deepened in the further course of study and when working in a company		
Module contents	The course offers an introduction to the most important concepts, instruments, and frameworks of business administration. Toward this end, the course first introduces the core concepts and provides an overview of the history, goals, structure, and research traditions of business administration. Subsequently, students will gain insights into 11 important areas of business administration: (1) Entrepreneurship, (2) Strategic Management, (3) Logistics and Supply Chain Management, (4) Production Management, (5) Marketing and Sales, (6) Accounting and Controlling, (7) Finance and Investment, (8) Technology and Innovation Management, (9) Human Resource Management, (10) Information Management, and (10) Sustainability Management. Students deepen and apply the knowledge acquired in the lecture in tutorials. In addition, the course includes guest lectures by practitioners to clarify the practical relevance of the content.

wir021 - Double Entry Bookkeeping & Financial Statements under German Law (HGB)

Module label	Double Entry Bookkeeping & Financial Statements under German Law (HGB)			
Modulkürzel	wir021			
Credit points	6.0 KP			
Workload	180 h			
Verwendbarkeit des Moduls	• Bachelor's Programme Business Administration and Law (Bachelor) > Basiscurriculum Wirtschaftswissenschaften • Bachelor's Programme Business Informatics (Bachelor) > Aufbaucurriculum - Pflichtbereich • Bachelor's Programme Comparative and European Law (Bachelor) > Module • Bachelor's Programme Economics and Business Administration (Bachelor) > Basismodule • Bachelor's Programme Mathematics (Bachelor) > Nebenfachmodule • Bachelor's Programme Sustainability Economics (Bachelor) > Wahlpflichtbereich • Dual-Subject Bachelor's Programme Economics and Business Administration (Bachelor) > Basismodule • Master's Programme Computing Science (Master) > Module aus anderen Studiengängen			
Zuständige Personen	• Sextroh, Christoph (module responsibility) • Lehrenden, Die im Modul (Prüfungsberechtigt)			
Prerequisites	none			
Skills to be acquired in this module	Participants... 1. understand financial accounting as the basis of corporate data and bookkeeping 2. gain comprehensive knowledge of main accounting areas such as procurement, sales, HR, inventory, tax, provisions etc. 3. obtain basic knowledge about annual report process of single entities.			
Module contents	The main objective of this module is to give the students an overview of the double entry bookkeeping as well as the link between financial accounting, balance sheet and income statement. The acquisition of basis knowledge of the corporate accountancy stands in the foreground, for example, how organizations manage the bookkeeping, legal basis of the annual accounts, creating an inventory, content of accounting and income statement.			
Literatureempfehlungen	Coenenberg et al. (2014): Einführung in das Rechnungswesen (5. Aufl.), Schäffer-Poeschel, Stuttgart. Döring, U. & Buchholz, R. (2015): Buchhaltung und Jahresabschluss (14. Aufl.), Erich Schmidt, Berlin. An additional script is provided.

Zuständige Personen	• Sextroh, Christoph (module responsibility) • Lehrenden, Die im Modul (Prüfungsberechtigt)			
Prerequisites				
Skills to be acquired in this module	This course is an introduction to the use of accounting information by managers for decision-making, planning and control. It is designed to equip students with the concepts and techniques of management accounting for identifying and resolving strategic issues faced by managers in various business contexts.

wir041 - Introduction to economics

Module label	Introduction to economics
Modulkürzel	wir041
Credit points	6.0 KP
Workload	180 h
Verwendbarkeit des Moduls	• Bachelor's Programme Business Administration and Law (Bachelor) > Basiscurriculum Wirtschaftswissenschaften • Bachelor's Programme Business Informatics (Bachelor) > Akzentsetzungsbereich Wirtschaftswissenschaften • Bachelor's Programme Business Informatics (Bachelor) > Wahlbereich Informatik, Kultur und Gesellschaft • Bachelor's Programme Comparative and European Law (Bachelor) > Module • Bachelor's Programme Computing Science (Bachelor) > Wahlbereich Informatik, Kultur und Gesellschaft more... • Bachelor's Programme Economics and Business Administration (Bachelor) > Basismodule • Bachelor's Programme Mathematics (Bachelor) > Nebenfachmodule • Bachelor's Programme Sustainability Economics (Bachelor) > Grundlagen-/Basiscurriculum • Dual-Subject Bachelor's Programme Economics and Business Administration (Bachelor) > Basismodule • Master's Programme Business Informatics (Master) > Module der Wirtschafts- und Rechtswissenschaften (Master)
Zuständige Personen	• Rahmeier Seyffarth, Anelise (Module counselling) • Böhringer, Christoph (module responsibility)
Prerequisites	none
Skills to be acquired in this module	Students: acquire a basic understanding of economics - know elementary economic terms and theories - learn to analyze economic problems graphically and/or mathematically - are able to grasp both micro- and macroeconomic relationships based on theory - understand basic economic models and are able to apply them to current economic problems - place current economic and political events and debates in economic contexts - understand under which conditions market interventions by policy makers are justified from an economic perspective - are able to assess possible effects of economic policy instruments (for example: taxes, subsidies, minimum and maximum prices, etc.).
Module contents	The course introduces students to economic thinking and gives an elementary overview of the fundamental themes in economics. Key causal relationships will be verbally, analytically and graphically elucidated and underpinned with real-world examples. Main contents: - Introduction to economic thinking; - Explanation of basic concepts of economic theory; - Economic cycle and national product; - Interdependence and trade; - Functioning and efficiency of markets; - Market failures and government activity; - Firms behavior in markets with diverse structures; - Foundations of game theory.

wir060 - Financial Accounting

Module label	Financial Accounting			
Modulkürzel	wir060			
Credit points	6.0 KP			
Workload	180 h			
Verwendbarkeit des Moduls	• Bachelor's Programme Business Administration and Law (Bachelor) > Aufbaubereich Wirtschaftswissenschaften • Bachelor's Programme Business Informatics (Bachelor) > Akzentsetzungsbereich Wirtschaftswissenschaften • Bachelor's Programme Economics and Business Administration (Bachelor) > Aufbaumodule • Bachelor's Programme Mathematics (Bachelor) > Nebenfachmodule • Bachelor's Programme Sustainability Economics (Bachelor) > Wahlpflichtbereich • Dual-Subject Bachelor's Programme Economics and Business Administration (Bachelor) > Aufbaumodule • Master's Programme Business Informatics (Master) > Module der Wirtschafts- und Rechtswissenschaften (Master)			
Zuständige Personen	• Sextroh, Christoph (module responsibility) • Lehrenden, Die im Modul (Prüfungsberechtigt)			
Prerequisites	none			
Skills to be acquired in this module	The students • obtain knowledge on IFRS accounting in general and specific topics such as financial instruments, intangible assets and provisions; • understand the framework of IFRS; • understand the international focus and necessity of IFRS; • obtain knowledge on IFRS from both a legal and economic perspective.			
Module contents	This module is based on accounting and annual financial statement, while focusing exclusively on the international financial reporting standards (IFRS). In terms of content, the course covers subjects such as the most important concepts, tangible and intangible assets as well as liability items on the basis of the fundamental standards and case studies.			
Literatureempfehlungen	Picker et al. (2012): Applying International Financial Reporting Standards, 3rd edition. Palepu et al. (2016): Business Analysis and Valuation – IFRS Edition, 4th edition. International Financial Reporting Standards (IFRS) Lecture notes with additional references will be provided via the e-learning platform Stud.IP.

wir110 - Macroeconomic Theory

Module label	Macroeconomic Theory			
Modulkürzel	wir110			
Credit points	6.0 KP			
Workload	180 h			
Verwendbarkeit des Moduls	• Bachelor's Programme Business Administration and Law (Bachelor) > Aufbaubereich Wirtschaftswissenschaften • Bachelor's Programme Economics and Business Administration (Bachelor) > Aufbaumodule • Bachelor's Programme Sustainability Economics (Bachelor) > Grundlagen-/Basiscurriculum • Dual-Subject Bachelor's Programme Economics and Business Administration (Bachelor) > Aufbaumodule			
Zuständige Personen	• Rahmeier Seyffarth, Anelise (Module counselling) • Bitzer, Jürgen (Module counselling) • Lehrenden, Die im Modul (Prüfungsberechtigt) • Trautwein, Hans-Michael (module responsibility)			
Prerequisites	-			
Skills to be acquired in this module	At the end of the course, successful students: • understand the interdependence of market processes and economic policy in the subsystems of the economy, • avoid fallacies of composition in the nexus of microeconomics and macroeconomics, • use macroeconomics as a tool to analyse current economic and political issues, • translate economic problems into models that describe macroeconomic causalities and interdependencies by reasonable reductions of complexity, • interpret selected data in the light of macroeconomic theories.			
Module contents	The course starts with an introduction to the principles of national accounting which serve as point of departure for the presentation of basic macroeconomic models in short-term, medium-term and long-term perspectives. Short-term: Consumption, saving, investment and finance in the closed-economy IS/LM framework. Medium-term: Labour supply & demand, production and inflation in the AS/AD framework and extensions to open-economy analysis. Long-term: capital accumulation, technical progress and economic growth in different approaches. The basic models are presented in words, algebra and diagrams with the aid of case studies and other exemplary material.			
Literatureempfehlungen	Blanchard, O. & Illing, G. (2017): Makroökonomie (7. Aufl.). München: Pearson. (or English versions: Blanchard, O.: Macroeconomics, 7th ed. Pearson 2017) Trautwein, H.-M. (2014): Makroökonomik (3rd ed.). Oldenburg: Verlag für Wirtschaft, Informatik und Recht.

Präsenzzeit Modul insgesamt				56 h

wir120 - Microeconomic Theory

Module label	Microeconomic Theory			
Modulkürzel	wir120			
Credit points	6.0 KP			
Workload	180 h			
Verwendbarkeit des Moduls	• Bachelor's Programme Business Administration and Law (Bachelor) > Aufbaubereich Wirtschaftswissenschaften • Bachelor's Programme Economics and Business Administration (Bachelor) > Aufbaumodule • Bachelor's Programme Sustainability Economics (Bachelor) > Grundlagen-/Basiscurriculum • Dual-Subject Bachelor's Programme Economics and Business Administration (Bachelor) > Aufbaumodule			
Zuständige Personen	• Lehrenden, Die im Modul (Prüfungsberechtigt) • Helm, Carsten (module responsibility) • Rahmeier Seyffarth, Anelise (Module counselling) • Rüb, Daniel (Module counselling) • Lehrenden, Die im Modul (Module counselling)			
Prerequisites				
Skills to be acquired in this module	Students • understand the relevance of microeconomics as a method for analysing economic interactions and for understanding the behaviour of typical agents, • are proficient in microeconomics at an intermediate level, and can put microeconomic issues in the context of scientific discussions, • can apply microeconomic methods and critically question them, • can exchange themselves in teams about microeconomic problems, develop solutions together, and can put them forward in the scientific debate.			
Module contents	• definition und description of microeconomics • household theory (budget, preferences, utility, optimal consumption plan, demand) • theory of the firm (technology, costs, profit maximization, supply) • markets (perfect competition, monopoly, oligopoly) • market failure (external effects, public goods, asymmetric information) • game theory and behavioural economics			
Literaturempfehlungen	Varian, H. (2016), Grundzüge der Mikroökonomik, Oldenbourg Verlag, München. Pindyck, R. S. und D. L. Rubinfeld (2013): Mikroökonomie, Pearson Verlag. Stocker, F. (2013): Spaß mit Mikro: Praktische Mikroökonomik für (ver)zweifelnnde Studierende, Oldenbourg Verlag, Münschen.

wir083 - Purchasing, Operations, and Logistics Management

Module label	Purchasing, Operations, and Logistics Management			
Modulkürzel	wir083			
Credit points	6.0 KP			
Workload	180 h			
Verwendbarkeit des Moduls	• Bachelor's Programme Business Administration and Law (Bachelor) > Aufbaubereich Wirtschaftswissenschaften • Bachelor's Programme Business Informatics (Bachelor) > Aufbaucurriculum - Pflichtbereich • Bachelor's Programme Economics and Business Administration (Bachelor) > Aufbaumodule • Bachelor's Programme Sustainability Economics (Bachelor) > Wahlpflichtbereich • Dual-Subject Bachelor's Programme Economics and Business Administration (Bachelor) > Aufbaumodule • Dual-Subject Bachelor's Programme Economics and Business Administration (Bachelor) > Schwerpunkt Management und Ökonomie • Master of Education Programme (Vocational and Business Education) Economics and Business Administration (Master of Education) > Mastermodule			
Zuständige Personen	• Lehrenden, Die im Modul (Prüfungsberechtigt) • Busse, Christian (module responsibility)			
Prerequisites				
Skills to be acquired in this module	Students obtain an overview of the most important operational functions of an industrial or service company. These are procurement, production and logistics. Students will get to know typical operational challenges and familiarize themselves with established approaches and methods for analyzing and improving procurement, production and logistics operations.			
Module contents	The module comprises a lecture (course number 2.02.231) and an accompanying tutorial (course numbers 2.02.231a to 2.02.231j). The lecture is based on the text book "Grundzüge der Beschaffung, Produktion und Logistik" by Kummer, Grün und Jammerneegg in the third edition of 2013 and the associated workbook, as well as partly on the text book "Operations Management: Konzepte, Methoden und Anwendungen" by Thonemann in the third edition of 2015. The purpose of the lecture is to explain the fundamental problems and their solutions theoretically. The tutorials focus on application and practice and offer time for questions. There are no formal or content-related participation or entrance requirements.			
Literaturempfehlungen	Kummer, S., Grün, O. und Jammerneegg, W. (2013): Grundzüge der Beschaffung, Produktion und Logistik (3. Auflage), Pearson Thonemann, U. (2015): Operations Management (3. Auflage), Pearson.

wir090 - Human Resource Management

Module label	Human Resource Management
Modulkürzel	wir090
Credit points	6.0 KP
Workload	180 h
Verwendbarkeit des Moduls	• Bachelor's Programme Business Administration and Law (Bachelor) > Aufbaubereich Wirtschaftswissenschaften • Bachelor's Programme Business Informatics (Bachelor) > Akzentsetzungsbereich Wirtschaftswissenschaften • Bachelor's Programme Business Informatics (Bachelor) > Wahlbereich Informatik, Kultur und Gesellschaft • Bachelor's Programme Comparative and European Law (Bachelor) > Module • Bachelor's Programme Computing Science (Bachelor) > Wahlbereich Informatik, Kultur und Gesellschaft more... • Bachelor's Programme Economics and Business Administration (Bachelor) > Akzentsetzungsmodule • Bachelor's Programme Sustainability Economics (Bachelor) > Wahlpflichtbereich • Dual-Subject Bachelor's Programme Economics and Business Administration (Bachelor) > Aufbaumodule • Dual-Subject Bachelor's Programme Economics and Business Administration (Bachelor) > Schwerpunkt Management und Ökonomie • Master of Education Programme (Vocational and Business Education) Economics and Business Administration (Master of Education) > Mastermodule • Master's Programme Business Informatics (Master) > Module der Wirtschafts- und Rechtswissenschaften (Master)
Zuständige Personen	• Junker-Michel, Mareike (Module counselling) • Breisig, Thomas (Module counselling) • Lehrenden, Die im Modul (Prüfungsberechtigt) • Breisig, Thomas (module responsibility)
Prerequisites	keine
Skills to be acquired in this module	Upon completion of the module (two complementary lectures), students will be able to: • understand the complex issues, challenges and fields of action in organisational Human Resource (HR) Management; • analyse, interpret and manage HR issues within heterogeneous fields of stakeholders and environments; • effectively analyse and apply HR instruments according to the specific practical context; • develop skills to self-reflection by dealing with theoretical as well as practical issues in HR Management and are able to press their point within the scientific discussion; • are able to locate a specific research question within the scientific discussion in the field of Human Resource Management and to interlink, reflect and evaluate it accordingly. By attending the non-compulsory tutorials and participating in lecture discussions, students can develop their own position on the inter-linkages between theoretical approaches and practical courses of action. Students will thus be able to identify problems, analyse them critically, and develop solutions. As they have the opportunity to work in small groups within the tutorials and to participate during lecture discussions, students may also learn to handle different points of view and discuss constructively. Overall they will be prepared for the specific requirements faced in the field of HR Management.
Module contents	Students develop theoretical as well as practical insights into the backgrounds and specific characteristics of "Human Resource" Management, in particular the following: - origins and theoretical basis - development and framework requirements - workforce planning - recruitment and selection - work organisation

- working time organisation
- leadership
- performance reviews
- training and development
- compensation
- staff reduction

Zuständige Personen	• Prokop, Jörg (module responsibility) • Lehrenden, Die im Modul (Prüfungsberechtigt)
Prerequisites	
Skills to be acquired in this module	Students • understand the role corporate finance plays in today's business environment, • are able to make consistent investment decisions based on established financial models both under certainty and under uncertainty, • are able to place these models in within the broader context of economic theory, including both neoclassical theory and principal-agent theory, • are able to assess the limitations of these models, • analyze firm's main sources of (long-term) financing.
Module contents	Course outline: 1. Introduction 2. Valuation and Capital Budgeting 3. Risk and Return 4. Long-Term Financing This course is an introduction to corporate finance. It covers typical tools and techniques used in making investment and financing decisions, and it provides insights into their theoretical foundations. The concept of time value of money and net present value is discussed in detail, first under certainty, and then in the presence of uncertainty. We will examine the relationship between an investment's risk and its return, and discuss ways to derive risk-adjusted cost of equity capital. In addition, the course provides insights into firms' main sources of (long-term) financing. The topics covered in this course are relevant for financial decision-making in various areas of business management, including operations management, marketing, and in particular corporate strategy.
Literatureempfehlungen	Main textbook: Hillier, Ross, Westerfield, Jaffe & Jordan, Corporate Finance, current edition, McGraw-Hill (especially chapters 1, 2, 4-10, 14). Zuständige Personen	• Rott, Peter (module responsibility) • Lehrenden, Die im Modul (Prüfungsberechtigt)		
Prerequisites			
Skills to be acquired in this module	The students: - are familiar with the legal working methods, basic concepts of law in general and of civil law and commercial law in particular, - are familiar with the law of obligation and law of property, in particular with contract law, as well as with commercial law, which are the main fields of interest in the future professional practice, - are able to solve legal cases in a goal-oriented way, - are able to find approaches for legal problems as well as recognize liability risks and how to deal with them, - are in case of contract negotiations able to recognize the requirements for regulations and to evaluate consequences of regulation.		
Module contents	In this module students will learn the basic concepts of civil law, commercial law and company law. The main focus are the first two books and to some extent the third book of the BGB. After an introduction to the legal system and the legal sources of private law, the course will deal with the persons and objects of legal relations (legal subjects and objects). An introduction into general contract law (among others: transaction doctrine, representation, termination of obligations, arrears, defaults) follows then. Subsequently, the lecture will handle the main types of contracts of civil law, commitment and performance of transactions and ownership and possession. The focus of the commercial law will be the determination of traits of merchant, the company law, the commercial register and legal liability issues as well as cross-border trade. This is followed by an introduction into company law. Subjects of the module: Introduction into legal studies, basic principles of law, private law / public law, legal sources, general part of the civil code, law of obligations (without law of torts): contracts, type of contracts, defaults / breaches, law of terms and conditions; parts of property law. Traits of merchant, company; commercial register; Representation in commercial law (procuration, action and charging power of attorney); commercial transactions; forms and consequences of the change of the owner; commercial agents and brokers; customary law / trade terms; CISG; partnership / corporate law. The module will enable students to evaluate complex legal relationships in the economy discretely.

wir140 - Foundations of EU Economic Law and Principles of Labour Law

Module label	Foundations of EU Economic Law and Principles of Labour Law
Modulkürzel	wir140
Credit points	6.0 KP
Workload	180 h
Verwendbarkeit des Moduls	• Bachelor's Programme Business Administration and Law (Bachelor) > Basiscurriculum Recht • Bachelor's Programme Economics and Business Administration (Bachelor) > Akzentsetzungsmodule • Bachelor's Programme Sustainability Economics (Bachelor) > Wahlpflichtbereich • Dual-Subject Bachelor's Programme Economics and Business Administration (Bachelor) > Schwerpunkt Berufliche Bildung • Dual-Subject Bachelor's Programme Economics and Business Administration (Bachelor) > Schwerpunkt Management und Ökonomie
Zuständige Personen	• Lehrenden, Die im Modul (Prüfungsberechtigt) • Godt, Christine (module responsibility) • Brors, Christiane (module responsibility)
Prerequisites	Keine
Skills to be acquired in this module	The students will: • be able to understand the institutional framework of the EU as well as the thereto related tensions between supranationalism and intergovernmentalism, • be able to apply the legal norms inherent in the EU multilevel system of governance to selected areas of EU law, and most notably to the fundamental freedoms, • be able to resolve labour law matters in the light of contractual law, • understand how labour law is embedded in civil law, • be able to understand the relevance of labour law to society, • be able to understand the influence and framework of European labour law, • learn to understand the peculiarities of the labour law, • be able to identify the specific interests of parties to an employment contract and to find corresponding legal solutions in event of a conflict.
Module contents	The module explores the foundations of European economic law as well as the fundamentals of labour law in two (consecutive) lectures. The course 'Foundations of EU Economic Law' offers students an overview of the law of the European Union. It covers the following topics: • The historical development of the EU; • The institutional framework and principles of the EU (effect, formation, relationship with national law); • The principles of the internal market (with a special focus on the fundamental freedoms and the doctrine of negative integration); • An introduction to the regulation of selected economic policies (positive integration, e.g. product regulation, competition law) As regards the content of the second course – 'Principles of Labour Law' - the following topics will be covered: • The legal foundations of labour law, the integration of labour law into the hierarchy of norms (ordinary law, constitutional law, EU law); • Individual labour law (the establishment and termination of employment relationships, severance/termination agreements, dismissal, notice period, the Unfair Dismissal Protection Act) • Rights and obligations of employees and employers (breach of contract, pay without work, liability); • Overview of collective labour law; • Overview of labour court procedures.

Zuständige Personen	• Lehrenden, Die im Modul (Prüfungsberechtigt) • Hoppmann, Jörn (module responsibility)			
Prerequisites				
Skills to be acquired in this module	The goal of the course is that students are able to - know and understand basic concepts, instruments, and theories of strategic management - analyze company strategies by applying conceptual frameworks - understand the advantages and disadvantages of common instruments and models and critically evaluate their applicability - independently develop strategic options and derive recommendations for their implementation in real-life settings			
Module contents	The course offers a comprehensive overview of the models and instruments of strategic management. The first part of the course introduces important concept and models of strategic management and discusses their application using examples from corporate practice. Central topics that are being discussed in this context are the relation between firm strategies and competitive advantage, strategy analysis, strategy formulation, strategy implementation, and strategies in the context of internationalization and innovation. In the second part of the course, students apply and deepen their knowledge by writing a thesis that analyzes the strategy of a specific company.

Prerequisites			
Skills to be acquired in this module	Upon completion of the module, students will be able to: • recognize challenges facing marketing strategy in the field of markets and societies and draw conclusions for business management • elaborate and reflect upon the theoretical and conceptual foundations of strategic marketing planning • come up with examples that exemplify the systemic connection between strategic and instrumental marketing planning • discuss core assumptions of internationalization in the context of strategy planning and critically reflect upon its implications • build market research skills in an international context using different methods • develop their own perspectives on the conceptualization and implementation of international marketing strategies and advance them in discourses		
Module contents	The core of the module is the application of strategic planning methods in Marketing. A broadened understanding of Marketing in the areas of competitors, market agents and stakeholder orientation will be substantiated in theoretical and practical-normative view. International marketing forms an integrated part of strategic marketing planning; its basics and internal conception are formulated precisely in this course.

Verwendbarkeit des Moduls	• Bachelor's Programme Business Administration and Law (Bachelor) > Aufbaubereich Wirtschaftswissenschaften • Bachelor's Programme Economics and Business Administration (Bachelor) > Studienrichtung Betriebswirtschaftslehre • Bachelor's Programme Sustainability Economics (Bachelor) > Wahlpflichtbereich		
Zuständige Personen	• Prokop, Jörg (module responsibility) • Lehrenden, Die im Modul (Prüfungsberechtigt)		
Prerequisites	Students are required to actively participate in the course by preparing classes, by performing follow-up coursework, and/or by giving presentations according to the rules defined by the lecturer in the first session.		
Skills to be acquired in this module	Upon completion of the module students will have acquired in-depth knowledge regarding selected topics in a specific field of business studies. They will have a sound understanding of the current state of academic research, and/or of issues relevant to current business practice. In addition, they will be familiar with typical advanced methods of analysis in the respective focus area, they will be able to put these methods in the broader context of business research, and they will be able to assess these methods' strength and weaknesses.		
Module contents	The course covers in detail selected advanced topics in areas such as entrepreneurship, business management, marketing, organization, human resources, production management, sustainability management, taxation, finance, or accounting. Focus area, language of instruction, and type of examination will be announced in the first session.		
Literatureempfehlungen	Will be announced at the beginning of the course.

wir221 - Introduction in Business Taxation

Module label	Introduction in Business Taxation	
Modulkürzel	wir221	
Credit points	6.0 KP	
Workload	180 h	
Verwendbarkeit des Moduls	• Bachelor's Programme Business Administration and Law (Bachelor) > Aufbaubereich Wirtschaftswissenschaften • Bachelor's Programme Comparative and European Law (Bachelor) > Module • Bachelor's Programme Economics and Business Administration (Bachelor) > Studienrichtung Betriebswirtschaftslehre • Bachelor's Programme Economics and Business Administration (Bachelor) > Studienrichtung Recht • Bachelor's Programme Sustainability Economics (Bachelor) > Wahlpflichtbereich	
Zuständige Personen	• Dittmer, Jochen (module responsibility) • Lehrenden, Die im Modul (Prüfungsberechtigt)	
Prerequisites		
Skills to be acquired in this module	Die Studierenden: • haben dezidierte Grundkenntnisse der einkommensteuerlichen Grundlagen • klassifizieren unterschiedliche Einkunftsarten und kennen deren Bedeutung. • haben dezidierte Kenntnisse der laufenden Besteuerung der zentralen steuerlichen Rechtsformen und Fähigkeit der Konkretisierung der steuerlichen Belastungs- und Entscheidungsparameter.	
Module contents	Ausgangspunkt ist die Vermittlung der einkommen-, körperschaft- und gewerbesteuerlichen Grundlagen. Aufbauend darauf liegt der Schwerpunkt im Erwerb der zentralen Kenntnisse der Einwirkung der Ertragsteuern auf die Rechtsformwahl, GmbH/AG, Einzelunternehmen/Personengesellschaften sowie GmbH & CoKG, Betriebsaufspaltung. Zugleich wird hierbei die Abhängigkeit der Höhe steuerlichen Belastungen u.a. in Abhängigkeit von Thesaurierung/Ausschüttung und Finanzierungsstruktur dargestellt.	
Literaturempfehlungen	Literaturempfehlungen können wegen der geradezu sprichwörtlichen hohen Änderungsgeschwindigkeit des Steuerrechts derzeit noch nicht gemacht werden, sondern können lediglich parallel zur Veranstaltung gegeben werden. Benötigt werden: • eine Sammlung der wichtigsten Steuergesetze (z.B. vom NWB-Verlag) in aktueller Form • eine Loseblattsammlung der Steuerrichtlinien (z.B. vom Beck-Verlag).

Studienrichtung Volkswirtschaftslehre

wir250 - International Economics

Module label	International Economics			
Modulkürzel	wir250			
Credit points	6.0 KP			
Workload	180 h			
Verwendbarkeit des Moduls	• Bachelor's Programme Economics and Business Administration (Bachelor) > Studienrichtung Volkswirtschaftslehre • Bachelor's Programme Sustainability Economics (Bachelor) > Vertiefungsmodule			
Zuständige Personen	• Trautwein, Hans-Michael (module responsibility) • Rahmeier Seyffarth, Anelise (Module counselling) • Lehrenden, Die im Modul (Prüfungsberechtigt)			
Prerequisites	Keine			
Skills to be acquired in this module	At the end of the course, successful students: • understand the interdependence of markets in the world economy, • translate economic problems into models that describe macroeconomic causalities and interdependencies by reasonable reductions of complexity, in particular with regard to international trade, capital flows and migration as well as development and underdevelopment in different parts of the world economy, • derive analytical statements about trade and capital flows from balance of payments and exchange rate data, • know the historical backgrounds and assess the dynamic instabilities of current exchange rate regimes.			
Module contents	The course combines a series of lectures and a seminar, both of which are offered in English language. The lectures cover the following topics: • globalization • international trade, inter- & intrasectoral • transnational production & factor mobility • balances of payments & exchange rates • macromodelling of the open economy • economic underdevelopment and strategies of sustainable development Relevant models are presented in words, algebra and diagrams with the aid of case studies and other exemplary material. The seminar is organized as a two-days workshop towards the end of the semester, with an introductory kick-off meeting in the second week of the term. In the workshop, students present and discuss papers on current issues in international economics. Course materials are uploaded on the Stud.IP website of the module.			
Literaturempfehlungen	Krugman, P., Obstfeld, M. & Melitz, M. (2017): International Economics – Theory and Policy (11th. ed.). Boston: Addison-Wesley. Lists of recommended additional reading on selected current issues are provided at short notice.

wir270 - Resource and Energy Economics

Module label	Resource and Energy Economics	
Modulkürzel	wir270	
Credit points	6.0 KP	
Workload	180 h	
Verwendbarkeit des Moduls	• Bachelor's Programme Economics and Business Administration (Bachelor) > Studienrichtung Ökologie und Nachhaltigkeit • Bachelor's Programme Economics and Business Administration (Bachelor) > Studienrichtung Volkswirtschaftslehre • Bachelor's Programme Sustainability Economics (Bachelor) > Vertiefungsmodule • Master's Programme Computing Science (Master) > Module aus anderen Studiengängen	
Zuständige Personen	• Böhringer, Christoph (module responsibility) • Asane-Otoo, Emmanuel (module responsibility) • Lehrenden, Die im Modul (Prüfungsberechtigt) • Asane-Otoo, Emmanuel (Module counselling)	
Prerequisites	Keine	
Skills to be acquired in this module	Die Studierenden sind in der Lage: • Ressourcen- und energieökonomische Standardmodelle nachzuvollziehen, • Standardmodelle in Hinblick auf weitergehende Fragestellungen anzupassen bzw. zu erweitern, • die Funktionsweise von Ressourcen- und Energiemärkten zu verstehen, • reale Vorgänge auf Ressourcen- und Energiemärkten anhand der Kriterien Effizienz, Verteilung und Nachhaltigkeit zu bewerten, • die institutionell-regulatorischen Rahmenbedingungen von Ressourcen- und Energiemärkten anhand der Kriterien Effizienz, Verteilung und Nachhaltigkeit zu bewerten.	
Module contents	Behandelt werden die Themenlinien nicht regenerierbare Ressourcen (effiziente Nutzung, intertemporale Gerechtigkeit, intertemporales Marktgleichgewicht); regenerierbare Ressourcen (effiziente Nutzung im steady state, Marktgleichgewicht); Nachhaltigkeit; Grundlagen der Energiewirtschaft; Energienachfrage; Energie und Umwelt; Energieressourcen; Märkte für Primärenergieträger; Strommarkt und Regulierung. Dabei stehen die volkswirtschaftlichen Aspekte im Zentrum, wobei notwendigerweise auch grundlegende technische und betriebswirtschaftliche Aspekte vermittelt werden.

wir300 - Public Finance

Module label	Public Finance	
Modulkürzel	wir300	
Credit points	6.0 KP	
Workload	180 h	
Verwendbarkeit des Moduls	• Bachelor's Programme Economics and Business Administration (Bachelor) > Studienrichtung Volkswirtschaftslehre • Bachelor's Programme Sustainability Economics (Bachelor) > Vertiefungsmodule	
Zuständige Personen	• Helm, Carsten (module responsibility) • Lehrenden, Die im Modul (Prüfungsberechtigt) • Lehrenden, Die im Modul (Module counselling)	
Prerequisites	keine	
Skills to be acquired in this module	Students • understand government action and its analysis using methods from public finance, • have basic knowledge in public finance, and can put questions of public finance in the context of scientific discussions • describe the operations of markets and government intervention, • apply methods from public finance to the analysis and evaluation of fiscal policies - alone and in small groups - and question them critically; • can present their results in the form of written contributions and oral presentations, and can defend them in the scientific debate.	
Module contents	The lecture part addresses the topics: • normative theory of government activity, • positive theory of government activity, • sustainability of public debt, • public revenues, • the welfare state, • demographic change and sustainability of pension systems. The seminar deals with topical issues in public finance.	
Literatureempfehlungen	Wigger, B. (2006), Grundzüge der Finanzwissenschaft, Springer, Berlin. Blankart, C. B. (2011), Öffentliche Finanzen in der Demokratie, Vahlen; München. Rosen, H. S. & T. Gayer (2010); Public Finance. Mcgraw-Hill Higher Education.

Module label	Business Informatics I
Modulkürzel	inf600
Credit points	6.0 KP
Workload	180 h
Verwendbarkeit des Moduls	• Bachelor's Programme Business Informatics (Bachelor) > Basiscurriculum • Bachelor's Programme Computing Science (Bachelor) > Akzentsetzungsbereich - Wahlbereich Informatik • Bachelor's Programme Economics and Business Administration (Bachelor) > Studienrichtung Wirtschaftsinformatik • Bachelor's Programme Sustainability Economics (Bachelor) > Wahlpflichtbereich • Master of Education Programme (Gymnasium) Computing Science (Master of Education) > Wahlpflichtmodule (Angewandte Informatik) • Master of Education Programme (Hauptschule and Realschule) Computing Science (Master of Education) > Mastermodule • Master of Education Programme (Vocational and Business Education) Computing Science (Master of Education) > Pflichtbereich
Zuständige Personen	• Sauer, Jürgen (module responsibility) • Lehrenden, Die im Modul (Prüfungsberechtigt)
Prerequisites	No participant requirements
Skills to be acquired in this module	Business informatics regards itself as an interdisciplinary subject. It connects business administration with computer science. Business informatics also includes information technologies as well as technical subjects and research topics. It is more than just an intersection of research fields and offers e.g. special methods to coordinate corporate strategies and information processing. The module introduces the entire scope of the field of business informatics. Professional competence The students: • describe the key aspects of business informatics • differentiate business informatics as an interdisciplinary subject from other subjects • characterise the functionality of essential application systems and management structures, from the strategical to the tactical and operative level. • consider and evaluate case studies and layout options for the conception, development, implementation, usage and maintenance of operational sociotechnical applications systems Methodological competence The students: • model technical and sociotechnical processes using suitable tools • analyse business processes and the demands on their modification and their technical assistance • abstract from complex systems in a suitable way to improve the manageability of models Social competence The students: • present their solutions in front of other groups • discuss their outcomes Self-competence The students: • develop solutions for case studies in groups • construct an argument based on acquired knowledge

Module contents

The main topics of business informatics are the presentation and evaluation of configuration options to conceptualise, develop, implement, use and maintain operational sociotechnical application systems. The lecture focusses on information systems of the networked company. Technical, economic, organisational, and psychosocial aspects are considered. The understanding of these relations will be trained by means of case studies taken from Laudon et al. (cf. suggested reading).

The lecture gives an overview of the following business informatics fields:

- Information systems, (object of BI)
- Application systems
- E-Commerce and E-Business
- Ethical, social and political aspects
- Business process integration
- Knowledge management
- Support of decision making
- Reorganisation of companies
- Economic evaluation For a better understanding of each subject, it is recommended to take specific modules later in the course of studies.

Prerequisites	No participant requirements

Skills to be acquired in this module

The module provides the fundamentals and tasks of information management to create an IT strategy. Tasks are especially considered from a strategic perspective and brought closer by methodological skills for each task.

Professional competence

The students:

- name the strategic aspects of information management and identify their impact on technical and operational information management
- examine the essential questions of enterprise reorganization in connection with an information system and recognize the influence of the Internet and its services on commercial processes and information systems by an exemplary system, e.g. SAP R/3
- identify different approaches to information management (Information Ressource Management, Management approach, management approach, personal information management) and understand why determining the value of information management is necessary and how it is done
- specify the objectives of information management, differentiate and classify its tasks appropriately
- recognize the methodological characteristics of information management
- transfer the concept of architecture to the information infrastructure
- assess the importance to plan features for strategic IT-design oriented on IT-architecture
- schedule the procedures concerning the strategical situation analysis of the competition analysis, the information infrastructure and the environmental analysis with the objective to transfer them to simple problems
- name the key contents of strategical IT objectives and are aware of difficulties in determining the measurement category
- identify and learn the scope and central tasks of business process and environmental management (as excursion) and the significance for information management

Methodological competence

- The students:
- perform information management tasks using methods of Information Engineering and thereby learn how to transfer and employ the methods to other fields, e.g. economy
- learn by practice advantages and disadvantages of different methods and can use them as part of the optimized IT strategy based on the acquired knowledge.

Social competence

The students:

- construct solutions to case studies given in the group, i.e. the development of an IT strategy
- discuss the solutions on a technical level
- present the solutions to case studies as part of the exercises

Self-competences

The Students:

- accept criticism and understand it as a precondition for the further development of one's own actions

Module contents

The proportion of information technology in the investment budget of companies is rising continuously. For instance, banks spend 25% of all investments for their information systems. Information is not just a production factor, it is also an element of competition. Information is increasingly important for business. The business informatics deals with these economic tasks of information technology. Information systems in businesses and organisations are of central concern. The interdisciplinary nature of business informatics raises questions about proceedings, problems of models (modelling in a narrow sense) and the application in specific problem domains.

Contents of this module are:

- Information management principles and tasks
- IT architectures
- Infrastructure of information and communication technology
- Strategic, administrative and operative information engineering

Prerequisites	no participant requirements
Skills to be acquired in this module	Graduates of the module Informatik und Gesellschaft know the history of the development of Information technology and its impact on society and are familiar with issues of data protection. They will be able, individually or in a team, to analyze the ethical and socio-political implications of different areas and applications of computer science and develop a reasoned own position on this, in particular concerning their professional responsibilities as computer scientists. They have learned to present the results of their work convincingly and suitable for their target group using appropriate media and they are able to organize events such as workshops or small conferences for that purpose. Professional competence The students: • reflect on the ethical and societal aspects of selected areas of computer science • create and design websites • create and manage documents in a team Methodological competence The students: • explore methods of structured teamwork • organize project work • make presentations with different media Social competence The students: • develop a subject area as a team • teach a bigger audience to appreciate their knowledge • discuss their observations and opinions with others Self-competence The students: • reflect their role in a team • reflect their role as computer scientists in society
Module contents	In brief, topics like the following are covered:

- Computer Crime
- Computer Games
- Data Protection
- Electronic Democracy
- Ethics in Computer Science
- History of Information Technology
- Use of information technology at school
- Internet - integration or division of society?
- Artificial Intelligence
- Manipulation by War Games
- Open Source Software
- Robots in Society
- Trustworthy Systems

inf030 - Programming, Algorithms and Data Structures

Module label	Programming, Algorithms and Data Structures
Modulkürzel	inf030
Credit points	9.0 KP
Workload	270 h
Verwendbarkeit des Moduls	• Bachelor's Programme Business Informatics (Bachelor) > Basiscurriculum • Bachelor's Programme Computing Science (Bachelor) > Basismodule • Bachelor's Programme Economics and Business Administration (Bachelor) > Studienrichtung Wirtschaftsinformatik • Bachelor's Programme Mathematics (Bachelor) > Nebenfachmodule • Bachelor's Programme Sustainability Economics (Bachelor) > Wahlpflichtbereich • Dual-Subject Bachelor's Programme Computing Science (Bachelor) > Basismodule
Zuständige Personen	• Schönberg, Christian (module responsibility) • Lehrenden, Die im Modul (Prüfungsberechtigt)
Prerequisites	No participant requirement
Skills to be acquired in this module	Programming is one of the basic activities of computer scientists and a prerequisite for many other courses in computer science studies. The aim of the module "Programming, Data Structures and Algorithms" is to learn the basic concepts of imperative, procedural and object-oriented programming using the Java programming language and to present known, efficient algorithms and data structures for various, frequently occurring problems. After completing the module, the students should be able to independently develop imperative and simple object-oriented programmes based on Java for solving smaller problems and assess the efficiency of their programmes. They should also be able to apply important algorithms and select them based on their complexity. Professional competence The students: • describe basic concepts of imperative programming with Java • recognise imperative programming terminology and use the appropriate terms accurately in discussions • recognise basic terminology of object-oriented programming • describe what programs presented to them do • independently develop programs to solve small problems • systematically examine their own and other people's programmes for errors • use modern programme development environments to develop and test programmes • create algorithms with general design concepts (e.g. Greedy method, divide-and-conquer method) • name algorithms and data structures for solving common problems and evaluate their applicability • name problems of efficiency of algorithmic solutions of concrete problems and evaluate them • make a well-founded choice of an algorithm and a data structure for solving a concrete problem • apply the learned algorithms and data structures sensibly to given and concrete problems Methodological competence The students: • solve given problems from the point of view of imperative or object-oriented programming • transfer practical experience in programme development to new tasks Social competence The students: • communicate the structure and mode of operation of self-developed programmes to others • present solutions to small tasks in front of groups

Self-competence

The students:

- organise themselves in finding algorithmic solutions to small and medium-sized problems in computer science
- incorporate the concepts of general programme design in their actions

Module contents

In the first part, general basic concepts of programming are introduced:

- Algorithm, programming languages, computer
- development tools, development phases
- compilers
- grammars
- logic

The second part deals with basic programming concepts:

- data types
- variables
- Expressions, statements
- control structures
- Methods, parameters
- recursion
- Reference data types, arrays
- Classes, objects
- Documentation
- Testing

The third part contains an introduction to data structures and algorithms as well as a discussion of their efficiency, i.e. the computational effort or memory requirements depending on the amount of data to be processed. The module introduces known, efficient algorithms and data structures for various, frequently occurring problems. These include in particular:

- Methods for searching for keys, as well as insertion and deletion in dynamic data sets, e.g. lists, trees, AVL trees or hash methods,
- Methods for searching for text patterns,
- Methods for sorting data by key values, e.g. QuickSort and HeapSort,
- Graph-based applications, e.g. for finding shortest paths in graphs.
- The lecture part is supplemented by a comprehensive exercise part, in which in particular the taught programming contents are implemented in practical examples.

Literatureempfehlungen

Essential:

- Lecture Notes (made available either in printed form or via Stud.IP during the course of the lecture)

inf031 - Object-oriented Modelling and Programming

Module label	Object-oriented Modelling and Programming
Modulkürzel	inf031
Credit points	9.0 KP
Workload	270 h
Verwendbarkeit des Moduls	• Bachelor's Programme Business Informatics (Bachelor) > Basiscurriculum • Bachelor's Programme Computing Science (Bachelor) > Basismodule • Bachelor's Programme Economics and Business Administration (Bachelor) > Studienrichtung Wirtschaftsinformatik • Bachelor's Programme Mathematics (Bachelor) > Nebenfachmodule • Dual-Subject Bachelor's Programme Computing Science (Bachelor) > Basismodule
Zuständige Personen	• Schönberg, Christian (module responsibility) • Lehrenden, Die im Modul (Prüfungsberechtigt)
Prerequisites	useful previous knowledge: inf030 Programming, Algorithms and Data Structures
Skills to be acquired in this module	Object orientation represents the state of the art in software development today. Given problems are first transformed into an object-oriented model and then into an object-oriented program with the help of object-oriented analysis and design methods. Aim of the module "Object-Oriented Modelling and Programming" is to learn basic concepts of object-oriented modelling using UML as the modelling notation and object-oriented programming using the Java programming language. After completing the module, students should be able to independently develop object-oriented programs based on Java for solving medium-sized problems. Professional competence: The students: • know basic concepts of object-oriented modelling and UML as modelling notation • know basic concepts of object-oriented programming with Java • know the terminology of object-oriented modelling and programming and use the appropriate terms precisely in discussions • can describe what object-oriented programmes presented to them do • independently develop models and programmes for solving medium-sized problems • systematically examine their own and other people's models and programmes for errors • use modern development environments for modelling and developing programmes • know the differences between the imperative, object-oriented, functional, logical and rule-based programming paradigms Methodological competence: The students: • independently develop programmes for given problems by consistently applying the concepts of object-oriented modelling and programming • transfer practical experience in programme development to new tasks • independently develop programmes with concurrency • can independently apply known solution methods to complex problems Social competence: The students: • communicate the structure and mode of action of self-developed models and programmes to others • present independently developed solutions to groups Self-competence: The students: • organise themselves when developing programmes for small and medium-sized problems in computer science • incorporate the concepts of object-oriented programme design in their actions

Module contents

In the first part, basic concepts of object-oriented modelling and programming are taught:

- Models and modelling
- UML class diagrams
- Classes and objects
- data encapsulation
- inheritance
- Polymorphism and dynamic binding
- Exception handling
- Genericity

In the second part, important concepts and classes of the JDK class library are introduced and the classes are used in solving medium-sized problems:

- Java Collection API
- IO and Streams
- GUI applications with JavaFX
- Parallel programming with threads

In the third part, advanced solution strategies are presented and other programming paradigms are introduced and compared with the object-oriented paradigm:

- Backtracking, Branch and Bound, Greedy
- Local Search, Evolutionary Algorithms
- Functional programming (e.g. Java-Lamdas, Standard ML)
- Logical programming (e.g. Prolog)
- Rule-based programming (e.g. Drools)

The lecture part is supplemented by a comprehensive exercise part, in which in particular the taught contents are implemented in practical examples.

- Lehrenden, Die im Modul (Prüfungsberechtigt)

Prerequisites

No participant requirements

Skills to be acquired in this module

The participants of this course are aware of problems, activities and tools of data processing project management (DP-Project-Management). They are able to identify and select the corresponding tools in different project stages and are familiar with those tools. They are able to describe the business informatics fields of actions. They are competent to work in a team and organise and implement projects.

Professional competence

The students:

- characterise problems, activities and tools of the data processing project management.
- are able to identify the corresponding tools in different project stages
- use specific DP-Project-Management tools
- differentiate the business informatics field of actions

Methodological competence

The students:

- perform projects with the tools of each phase

Social competence

The students:

- work in small project-teams
- make design decisions cooperatively
- present solutions

Self-competence

The students:

- acquire DP-Project-Management methods and use them
- recognise and are responsible for working packages

Module contents

It is important to know different IT project management types and forms as well as corresponding methods and tools. This course provides basic data-processing problems, activities and methods. The course is based on M. Burghardt's book.

After an introduction, the course is divided as follows:

- Project management (Requirements Engineering, Profitability Analysis, Organisational Structure)
- Project Planning (Project Structure, Network Analysis, Project Plans)
- Project Control (Cost Evaluation, Quality Control)
- Project Completion The participants get familiar with project management tools.
- Presentations drawn from practice are intended.

Literaturempfehlungen

Zuständige Personen	• Marx Gómez, Jorge (module responsibility) • Lehrenden, Die im Modul (Prüfungsberechtigt)
Prerequisites	No participant requirement

Skills to be acquired in this module

The module provides an introduction to the "Electronic Business" (e-business). The graduates know the fundamental and current technologies, advanced concepts, applications and competitive strategies of the "Electronic-Commerce" (e-commerce). The knowledge and abilities acquired in this module are directly applicable in study and business. They are deepening the basics from the module „Wirtschaftsinformatik II“. They provide a professional e-business consulting background and the skills to design software products for this area of business in practice.

Professional competence

The students:

- name and discuss the eBusiness key challenges
- discuss the chances of the added value and the changes of commercial models by the internet
- define the concepts of e-business and e-commerce.
- discuss the change of retail trade and the transactions between companies in e-business
- name current payment systems and communication technologies
- discuss the possibilities of the internet in order to simplify the administration and the coordination of internal and external business processes
- characterise the challenges for the management caused by e-business and e-commerce
- differentiate the concepts and conceptualities of e-business
- assess applications with regard to economic points of view
- practically learn how to handle core technologies of e-business

Methodological competence

The students:

- assess the core technologies of e-business and e-commerce
- apply methods in case studies

Social competence

The students:

- develop case studies on basis of given problems in groups
- present their solutions

Self-competence

The students:

- learn about their own limitations while planning and developing e-commerce applications

Module contents

The module provides the following contents:

- the definition of the core e-business concepts and the technical conditions for the implementation
- introduction of the variations of e-commerce, especially the Business-to-Consumer (B2C) and Business-2-Business (B2B) concepts and the current research in this field
- discussion on the economic aspects of e-business based on the theory of informational added value
- technological basics of the web and current development technologies for e-commerce web applications and security mechanisms with focus on online-shops and applications (hands-on exercise topics: HTTP, JSP and SQLInjection, PHP, XML, XML-Security, data modelling, Online-Shop development and Online-Shop administration)

Prerequisites	
Skills to be acquired in this module	The students: • understand the goals and concepts of sustainable development; • discuss the importance of sustainability for companies; • know basic strategies and instruments that enable companies to achieve sustainable development; • acquire conceptual and practical skills using case studies, in particular about which instruments can be used to prepare companies for the challenges of sustainable development.
Module contents	The module consists of a lecture and a seminar. While the lecture presents and explains concepts, instruments and strategies for sustainable development, the seminar focuses on the practical relevance of the various instruments, concepts and strategies and discusses these based on case studies. • Concepts and goals of sustainable development • Introduction to the current discussion on sustainable development • Current sustainability instruments and strategies for companies • Case studies

wir221 - Introduction in Business Taxation

Module label	Introduction in Business Taxation	
Modulkürzel	wir221	
Credit points	6.0 KP	
Workload	180 h	
Verwendbarkeit des Moduls	• Bachelor's Programme Business Administration and Law (Bachelor) > Aufbaubereich Wirtschaftswissenschaften • Bachelor's Programme Comparative and European Law (Bachelor) > Module • Bachelor's Programme Economics and Business Administration (Bachelor) > Studienrichtung Betriebswirtschaftslehre • Bachelor's Programme Economics and Business Administration (Bachelor) > Studienrichtung Recht • Bachelor's Programme Sustainability Economics (Bachelor) > Wahlpflichtbereich	
Zuständige Personen	• Dittmer, Jochen (module responsibility) • Lehrenden, Die im Modul (Prüfungsberechtigt)	
Prerequisites		
Skills to be acquired in this module	Die Studierenden: • haben dezidierte Grundkenntnisse der einkommensteuerlichen Grundlagen • klassifizieren unterschiedliche Einkunftsarten und kennen deren Bedeutung. • haben dezidierte Kenntnisse der laufenden Besteuerung der zentralen steuerlichen Rechtsformen und Fähigkeit der Konkretisierung der steuerlichen Belastungs- und Entscheidungsparameter.	
Module contents	Ausgangspunkt ist die Vermittlung der einkommen-, körperschaft- und gewerbesteuerlichen Grundlagen. Aufbauend darauf liegt der Schwerpunkt im Erwerb der zentralen Kenntnisse der Einwirkung der Ertragsteuern auf die Rechtsformwahl, GmbH/AG, Einzelunternehmen/Personengesellschaften sowie GmbH & CoKG, Betriebsaufspaltung. Zugleich wird hierbei die Abhängigkeit der Höhe steuerlichen Belastungen u.a. in Abhängigkeit von Thesaurierung/Ausschüttung und Finanzierungsstruktur dargestellt.	
Literaturempfehlungen	Literaturempfehlungen können wegen der geradezu sprichwörtlichen hohen Änderungsgeschwindigkeit des Steuerrechts derzeit noch nicht gemacht werden, sondern können lediglich parallel zur Veranstaltung gegeben werden. Benötigt werden: • eine Sammlung der wichtigsten Steuergesetze (z.B. vom NWB-Verlag) in aktueller Form • eine Loseblattsammlung der Steuerrichtlinien (z.B. vom Beck-Verlag).

wir320 - Advanced Private Law

Module label	Advanced Private Law		
Modulkürzel	wir320		
Credit points	6.0 KP		
Workload	180 h		
Verwendbarkeit des Moduls	Bachelor's Programme Economics and Business Administration (Bachelor) > Studienrichtung Recht		
Zuständige Personen	- Rott, Peter (module responsibility) - Lehrenden, Die im Modul (Prüfungsberechtigt)		
Prerequisites	Basic knowledge of Private Law		
Skills to be acquired in this module	Upon completion of the module, students will: - understand the content of the concepts of property law. - understand the principles of property law. - understand the system of tort law. - know the relationship between property law and tort law in comparison to contract law.		
Module contents	The module gives the students an introduction to tort law and property law. Non-contractual liability law is the basic prerequisite for understanding business-related topics such as professional and manager liability. The subject matter of tort law is the obligation to compensation on a non-contractual basis. Furthermore, the students shall learn that for the functioning of a free market economy the allocation, the content, as well as the marketability of property rights are of central importance. Property law deals especially with the legal relations of persons to things. It arranges these relationships both according to their legal intensity as well as to their factual influence. Following contents will be discussed in the module: - History, function and basic concepts of non-contractual liability - Basic and special acts of tort (liability) in the Civil Code - Liability outside the Civil Code - Producer and product liability - Liability regardless of negligence or fault outside the Civil Code (e.g. environmental liability, liability in genetic engineering, drug, nuclear and data protection law) - Damage concept and damage calculation - Introduction to the basic concepts of property law - Acquisition and loss of property - Credit protection - Rights in rem

wir330 - Labour Law/Atypical Contracts

Module label	Labour Law/Atypical Contracts			
Modulkürzel	wir330			
Credit points	6.0 KP			
Workload	180 h			
Verwendbarkeit des Moduls	Bachelor's Programme Economics and Business Administration (Bachelor) > Studienrichtung Recht			
Zuständige Personen	- Lehrenden, Die im Modul (Prüfungsberechtigt) - Brors, Christiane (module responsibility)			
Prerequisites	keine			
Skills to be acquired in this module	The students: - understand the role of collective agreements in labour law. - understand the theoretical and methodical background of labour law - understand the specifica of atypical employment contracts			
Module contents	In the part of the lecture "labour law", the meaning and purpose of collective agreements is presented and discussed. The legal structure and effect of collective agreements and their classification in the regulatory framework of labour and employment law will be discussed. The second focus of this lecture is on the legal assessment of industrial action and its consequences for collective and individual labour law. The focus of the course is on teaching theoretical methodological knowledge to solve current practical problems. The lecture "Atypical Employment Contracts" the specifica of the temporary, part-time contract and the agency contracts are discussed. The focus of the course is on teaching theoretical methodological knowledge to solve current practical problems.			
Literaturempfehlungen	will be announced in the lecture

wir340 - Corporate Law

Module label	Corporate Law				
Modulkürzel	wir340				
Credit points	6.0 KP				
Workload	180 h				
Verwendbarkeit des Moduls	• Bachelor's Programme Business Administration and Law (Bachelor) > Aufbaubereich Recht • Bachelor's Programme Economics and Business Administration (Bachelor) > Studienrichtung Recht				
Zuständige Personen	• Rott, Peter (module responsibility) • Lehrenden, Die im Modul (Prüfungsberechtigt)				
Prerequisites					
Skills to be acquired in this module	The students: • understand questions concerning corporate law and contexts • distinguish practice-oriented differences between the individual legal forms of a company. • distinguish interrelations with other fields of law				
Module contents	The key criterion for the choice of the optimal legal entity for a company is usually the "isolation" of the private assets of the shareholder, i.e. the limitation of liability to the business assets. Unlimited personal liability can be achieved not only by means of the legal form of a corporation (AG, GmbH), but also by means of the legal form of a partnership. At the beginning of the lecture those legal forms are dealt with, with which all partners personally and unrestrictedly are liable; thus, the limitation of the liability to the business assets does not take place. Here the partnership under the civil code (GbR) is to be mentioned, namely in its form as a (non-legally capable) internal GbR and as a (legally capable) external company (external GbR), and the general partnership (OHG). Subsequently, the lecture deals with the legal position of the (unlimitedly liable) general partner and the legal position of the limited partner of the limited partnership (KG). Then the mixed type of the GmbH & Co. KG, i.e. a limited partnership with a limited company (GmbH) as general partner, is presented. The lecture also gives an overview of the other partnerships, such as the silent partnership as a so-called "internal company" and the partnership company. Afterwards the association right is treated as transition to the right of the corporations. Finally, the module deals with the law of the GmbH, law of corporations and law of cooperatives. Structures and characteristics of these legal forms are discussed under consideration of current jurisdiction and legislation. Not only will the instruments of company law be presented in isolation, but - for a better understanding - particular emphasis will be placed on interrelations with other fields of law. The aim of the lecture is not so much to impart comprehensive knowledge, but to provide training in the legal "feeling", i.e. the feeling for interdependent, practical and current problems arising from a certain situation.

Prerequisites				
Skills to be acquired in this module	Die Studierenden erwerben vertiefte Kenntnisse in einem ausgewählten Bereich der Rechtswissenschaften. Sie gewinnen fundierte Einblicke in den Stand der aktuellen Forschung und der Rechtsentwicklungen vornehmlich in den Rechtsgebieten Zivil- und Wirtschaftsrecht, Arbeitsrecht und öffentlichem Wirtschaftsrecht soweit sie für die betriebliche Praxis von Bedeutung sind. Die Studierenden sollen in die Lage versetzt werden, die Rechtsentwicklungen zu bewerten, ihre Folgen für Unternehmen einzuordnen und ggf. die erforderlichen Maßnahmen zu entwerfen.			
Module contents	Das Modul behandelt vertieft ausgewählte rechtswissenschaftliche Fragestellungen, die sich aus europäischen und nationalen Rechtsentwicklungen und aktueller Rechtsprechung ergeben. Die Themen liegen je nach Schwerpunktsetzung der verantwortlich Lehrenden beispielsweise in den Bereichen Bürgerliches Recht, (europäisches) Wirtschaftsrecht, Verbraucherschutzrecht, Arbeitsrecht, Informationstechnologierecht, Staats- und Verfassungsrecht oder Wirtschaftsverwaltungsrecht. Der Schwerpunkt, die Unterrichtssprache (Deutsch oder Englisch) und die Prüfungsform werden jeweils spätestens in der ersten Veranstaltung von den Lehrenden festgelegt.			
Literaturempfehlungen	Literaturempfehlungen sind abhängig von der jeweiligen Schwerpunktsetzung und werden zu Beginn des Moduls von den Lehrenden gegeben.

Verwendbarkeit des Moduls	• Bachelor's Programme Business Administration and Law (Bachelor) > Aufbaubereich Wirtschaftswissenschaften • Bachelor's Programme Business Informatics (Bachelor) > Aufbaucurriculum-Wahlbereich Mathematik • Bachelor's Programme Economics and Business Administration (Bachelor) > Vertiefungsbereich • Bachelor's Programme Sustainability Economics (Bachelor) > Aufbaumodule
Zuständige Personen	• May, Angelika (module responsibility) • May, Angelika (Prüfungsberechtigt)
Prerequisites	
Skills to be acquired in this module	The students internalize advanced mathematical methods, know applications in economics and can provide solutions. Professional competence The students: • are proficient in the quantitative methods relevant to economics • know vector spaces and die rings • master the differential calculus for n variables • can determine extreme points with general constraints • can solve special homogeneous and inhomogeneous differential equations. Methodological competence The students: • analyse complex interrelationships • understand the formal mathematical language • structure problems from the economic sciences and find independent solutions. Social competence The students: • construct solutions to given problems in groups • accept criticism and see it as an aid. Self-competence The students: • reflect their actions in establishing solutions • deepen the presented mathematical concepts in exercises and add them to their actions.
Module contents	n-dimensional vector spaces, linear maps, matrix and vector algebra (determinant, inverse matrix, eigenvalues and eigenvectors), linear systems of equations and their economic application. Functions of n variables), tools for comparative static (chain rules, implicit differentiation along a level curve, elasticity of substitution), multivariate optimization with and without constraints (necessary and sufficient conditions), general constraints, Kuhn-Tucker conditions. Integration, Differential and ordinary differential equations with solution methods for special types.
