Mantelmodule

wir801 - Concepts of Organisation and Management

Module label: Concepts of Organisation and Management
Module code: wir801
Credit points: 6.0 KP
Workload: 180 h

Used in course of study:
- Master's Programme Business Administration, Economics and Law (Master) > Mantelmodule
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunkt "China - Wirtschaft und Sprache" (CHI) - Kernmodule
- Master's Programme Business Informatics (Master) > Module der Wirtschafts- und Rechtswissenschaften (Master)
- Master's Programme Management Consulting (Master) > Mastermodule

Contact person:
- Module responsibility: Thomas Breisig
- Authorized examiners: Die im Modul Lehrenden
- Module counseling: Peter Wengelowski, Jonathan Gilbert, Thomas Breisig

Entry requirements: keine

Skills to be acquired in this module:
Students get to know selected concepts of organisation and management. Their respective objectives, instruments and methods are discussed and their use in everyday business is critically reflected. Students learn to deal with different management concepts in a conscious and critical way, especially through case studies and discussions.

Upon completion of the module, students will:
- be familiar with the emergence, development, and content of various management concepts;
- be able to convey key findings of the various management concepts to practical issues in the field of organisation and management;
- develop skills of self-reflection (supported by the technical and didactical concepts).

Module contents:
Students receive deeper insights into concepts of organisation and management, including:
- Lean Management
- Change Management
- Quality Management
- Business Process Reengineering

The presentations and discussions within the seminars also offer possibilities to deepen and broaden these topics according to the student's interest and current developments in theory and practice, e.g. Balanced Scorecard, Learning Organisation, Organisational Culture, Worker Participation, Networks, Diversity Management, Management by Objectives.

Reader's advisory:
Walter, S. (2009), Managementkonzepte von A bis Z. Managementtheorien, Führungsstrategien, Führungstitos, Gabal, Offenbach.

Further literature will be announced during the semester according to the particular lecture/seminar content.

### Module: Economic Policy (wir802)

#### Module Details
- **Module Label**: Economic Policy
- **Module Code**: wir802
- **Credit Points**: 6.0 KP
- **Workload**: 180 h

#### Course Information
- **Used in course of study**:
  - Master's Programme Business Administration, Economics and Law (Master) > Mantelmodule
  - Master's Programme Business Administration, Economics and Law (Master) > Schwerpunkt "China - Wirtschaft und Sprache" (CHL) - Kernmodule

#### Contact Person
- **Module Responsibility**: Christoph Böhringer
- **Authorized Examiners**:
  - Die im Modul Lehrenden

#### Module Counseling
- **Anelise Rahmeier Seyffarth**
- **Emmanuel Asane-Otoo**
- **Georgina Michelle Milliot**

#### Entry Requirements
- **Skills to be acquired in this module**:
  - This course aims at giving students an understanding of reasons, goals and instruments for government policy from a micro- and macroeconomic perspective. Students first need to learn how decentralised markets can result in an efficient equilibrium and what the theoretical assumptions for this outcome are. Against this reference case it is possible to evaluate the consequences when some of the assumptions are not fulfilled in reality. Furthermore, the problems of the aggregated economy with its fundamental uncertainty are approached and the answers of economic policy to changes in variables like inflation, unemployment and economic growth will be evaluated. With successful completion of the course, students shall be able to approach questions of economic policy making by applying concise economic reasoning, graphical intuition, analytical models and historical understanding. Furthermore, students shall be enabled to follow other Economics courses at Master's level.

#### Module Contents
- **1. Welfare economics**: equilibrium and efficiency; theorems of welfare economics; discussion of model assumptions.
- **2. Macroeconomics**: on money; on the balance of payments, on long-run economic growth.
- **3. Examples for market failure from a microeconomic perspective, e.g. public goods. Deviations from the efficient outcome and discussion of government intervention.**

#### Reader's Advisory
- Varian, Hal, 'Intermediate Microeconomics', Norton & Company. (Deutsche Übersetzung: 'Grundzüge der Mikroökonomik'.)

  - Jürgen Bitzer
  - Hans-Michael Trautwein
  - Philipp Poppitz
- Module counseling
  - Jürgen Bitzer
  - Philipp Poppitz

**Entry requirements**

**Skills to be acquired in this module**
- Understanding of the interdependence of goods markets, labour markets and financial markets in the economy
- Ability to assess controversial views of the causes of output fluctuations (business cycles), inflation and unemployment
- Ability to present and evaluate different concepts of macroeconomic stabilization by way of fiscal and monetary policies
- Ability to describe and handle (simple) dynamic models of output, price-level and employment fluctuations and economic growth

**Module contents**

The lectures address the following issues:
- the development of macroeconomic thinking,
- output fluctuations, inflation and unemployment,
- statics and dynamics in macroeconomic theories,
- open economy macroeconomics,
- business cycles,
- economic growth and innovations,
- microfoundations of macroeconomics,
- policy rules.

wir806 - Information Technology Law

Module label: Information Technology Law
Module code: wir806
Credit points: 6.0 KP
Workload: 180 h

Used in course of study:
- Bachelor's Programme Business Informatics (Bachelor) > Wahlbereich Informatik, Kultur und Gesellschaft
- Master of Education Programme (Gymnasium) Computing Science (Master of Education) > Mastermodule
- Master of Education Programme (Vocational and Business Education) Computing Science (Master of Education) > Recht und Gesellschaft
- Master's Programme Business Informatics (Master) > Module der Wirtschafts- und Rechtswissenschaften (Master)
- Master's Programme Computing Science (Master) > Nicht Informatik

Contact person:
- Module responsibility: Jürgen Taeger
- Authorized examiners: Die im Modul Lehrenden
- Module counseling: Sebastian Louven

Entry requirements:
Skills to be acquired in this module:
- Upon completion of the module, students will be able to:
  - deal with all legal questions arising from the use of information and communication technology in all sectors of society,
  - identify legal issues arising from the use of information and communication technology,
  - draft solutions for these legal questions.

Module contents:
- Internet law; IT contracts law

Reader's advisory:
- Köhler, Fetzer, Recht des Internet, 8. Aufl., 2016
- Redeker, IT-Recht, 6. Aufl., 2017

### Entry Requirements:

- Skills to be acquired in this module:
  - Tax accounting law
  - Taxation procedures.

### Module Contents:

- The aim of the course is to provide students with a deep and thorough knowledge regarding:
  - Tax accounting law
  - Depreciation, subsidy regulations
  - Transfer of hidden reserves
  - Leasing
  - Provisions
  - Tax accounting law
  - Basics of tax accounting law
  - Principal values (cost of purchase/cost of manufacture, going concern value, fair market value)
  - Depreciation, subsidy regulations
  - Transfer of hidden reserves
  - Leasing
  - Provisions
  - Taxation procedures
  - Overview about general fiscal law (AO) and tax court code (FGO)
  - Tax determination and taxing procedures
  - Types of taxing
  - Deadlines and extent of balances and tax assessments corrections
  - Interest yield

### Reader's Advisory:

- Falterbaum, Hermann (aktuelle Fassung): Buchführung und Bilanz
- Rose, Gerd & Watrin, Christoph (aktuelle Fassung): Abgabenordnung; mit Finanzgerichtsordnung

It is worth mentioning, that due to the fast-changing tax law, further recommendations regarding the literature cannot be made yet, but are rather given during the course. Required are:
- A collection of the most important tax laws (e.g. NWB-publisher) in current form
- A loose-leaf collection of the tax regulations (e.g. Beck-publisher)

- Master's Programme Environmental Modelling (Master) > Mastermodule
- Master's Programme Sustainability Economics and Management (Master) > Additional Modules

Contact person:
Module responsibility: Ralf Werner Stecking
Authorized examiners: Die im Modul Lehrenden

Entry requirements:
Skills to be acquired in this module:
- With successful completion of the course, students shall:
  - be aware of and be able to evaluate advanced methods of multivariate data analysis.
  - be able to select adequate methods in relevant fields of application, like prediction, classification, and segmentation analysis.
  - be able to run computer-aided analyses and to interpret the results properly.

Module contents:
Various methods of quantitative data analysis such as:
- Linear Regression,
- Logistic Regression,
- Linear Discriminant Analysis,
- Principal Component Analysis,
- Feature selection and evaluation methods.

**Contact person**
- Module responsibility: Christine Godt  
- Authorized examiners: Die im Modul Lehrenden  
- Module counseling: Ulrich Meyerholt

**Entry requirements**
- Skills to be acquired in this module: Building on the existing knowledge of the participants, the course will deepen knowledge of European and international law, whereby emphasis will be laid on those areas in which the dividing line between state intervention (public law) and market rights (private law) has become blurred. Students will be able to analyze contemporary regulatory techniques inherent in the multilevel system of governance and to assess them from an interdisciplinary (economic and legal) perspective.

**Module contents**
- The module comprises two courses, one of which will be taught by PD Dr. Meyerholt, and the other together with Prof. Godt.
  - The first course deals with selected issues in environmental law. With the general structure of environmental law as a point of departure, the course content will be taught in a holistic manner that will also incorporate the leading decisions of the higher courts.
  - The second course takes into consideration intra-disciplinary environmental law as situated between public and private economic law, whereby special focus will be laid on the European and international dimensions.

**Skills to be acquired in this module**
Students...
- Know advanced theoretical concepts, research streams, and frameworks of in the field of Strategic Management
- Understand the links between different theories and are able to critically question them
- Can apply theories to understand and interpret organizational dynamics in daily life
- Are able to develop solutions for concrete practical challenges in companies in the context of Strategic Management based on the concepts and frameworks they have learned
- Can put the newly acquired knowledge into a broader context, so it can be deepened in the further professional life

**Module contents**
The course offers an overview of advanced concepts and frameworks in the field of Strategic Management. At the beginning, the course will provide a brief introduction into the historical development, goals, and research streams of the field. In this context, important terms, methods, and philosophical approaches of (management) research will be clarified. Subsequently, students form groups to analyze selected scientific articles with regard to their theoretical relevance and practical implications. Theoretical topics that will be covered in depth are:
1. Top Management Teams, Upper Echelons und Corporate Governance
2. Ressource- and Capability-based Approaches
4. Institutional Theory, Institutional Work/Entrepreneurship and Social Movements
5. Organizational Cognition, Identity, and Framing
6. Organizational Learning and Ambidexterity
7. Organizational networks and ecosystems

The results of the analysis will be summarized in a seminar thesis, presented in class, and discussed with the other students. The main goal of the course is to equip students with advanced concepts, which allow them to understand organizational dynamics, question established practices in firms, and develop new solutions that go beyond the application of standard instruments.

| **Entry requirements** | Upon completion of the module, students will be able to:  
• demonstrate a knowledge of the basics of insolvency law and insolvency proceedings law as well as the basics of banking law and capital market law.  
• classify insolvency law with its functions as enforcement law, restructuring law, and the right to alter a relationship in business life.  
• demonstrate a knowledge of the positions of the groups involved (creditors, debtors, the responsible bodies of legal persons) in the insolvency proceedings, including the rights and obligations of the groups involved in the process and in the run-up to the crisis, as well as the discharge of residual debt as a rehabilitation option for natural persons.  
• demonstrate a familiarity with the principles of the legitimacy verification pursuant to the general tax code, money laundering, bank secrecy, and the information requirements of credit institutions.  
• identify the functions of banking and capital market law as well as modern insolvency law.  
• use these functions in practical examples.  
• assess the progress of insolvency proceedings, including their requirements on creditors and debtors. |
| **Module contents** | The module deals with banking and capital market law as well as insolvency and insolvency proceedings law within two separate lectures.  
The main focus of the lecture in banking and capital market law is banking law. After an introduction to general banking law, the most important legal questions regarding collateralisation of loans are discussed. Additionally, the topics of the legitimacy verification pursuant to the general tax code, money laundering, bank secrecy, and the information requirements of credit institutions are discussed. Subsequently, the basic principles of securities law are discussed. Their legal basis and the economic background are analysed. Where possible, the interrelations between the various securities and the events of the financial market crisis will be discussed.  
The lecture Insolvency Law deals with the basics of debt enforcement and insolvency law. Procedures will be shown and explained.  
The first part deals with company insolvency law, the second part with consumer insolvency and residual debt relief law. |

Module counseling
- Jasper Meya

Entry requirements:
keine

Skills to be acquired in this module:
Students
- understand the importance of incentive systems for economic processes and can analyze the effects of incentive systems;
- have a firm knowledge in game theory and contract theory, and can address questions in the context of scientific discussion;
- are able to apply methods from game theory and contract theory largely independently to the analysis of situations in which agents interact strategically;
- are able to design incentive schemes – on their own and in teams – and to acquire knowledge on their own for this purpose and, to present their results, and to defend them in the scientific discourse.

Module contents:
The first part of the module covers game theory. Game theory is an important method in economics to analyze strategic interactions of agents, e.g., on markets, in organizations or in bargaining situations.
The second part of the module covers contract theory that – according to the Nobel laureate Kenneth Arrow – has been „the most important development in economics in the last forty years“. We work out the fundamentals of screenings, signaling and moral hazard and apply them to different topics, e.g., from labor economics, economic organization and management, law and economics as well as industrial economics. In both parts, there is a tutorial. Here students largely independently apply the acquired knowledge to different situations of strategic interaction in economics and present their results.

Entry requirements:
Skills to be acquired in this module:
- Students will be able
  - to describe European and international legal-economic interdependencies
  - to apply international and European legal norms and legal issues
  - to have a command of English legal terminology.

Module contents:
The module consists of two lectures which deal with changes in policies and institutions of international economic law. One lecture focuses on economic law and institutions as shaped by international law, while the other class is dedicated to EU foreign trade law. A basic knowledge of the institutions of international and EU economic law (WTO, IMF, World Bank, European Commission) is a prerequisite for attending this module. The focus lies in helping students understand the processes of internationalization and Europeanization that inform the current interactions between the different actors on the international plane (companies, states and parastatals). In this module, public and private economic law will be presented as a single unit. The international law part of the module focuses on the rationale and regulation of the major free trade agreements, including dispute settlement. Other topics to be addressed include the conflict of laws and the UN Convention (CISG). The EU law focuses on competition and foreign trade law, including procurement and taxation law.

Entry requirements

Skills to be acquired in this module
Upon completion of the module, students
- will have a sound understanding of methods used in finance to determine the value of a firm under uncertainty,
- will have a sound understanding of how investment and financing decisions are related, and how they both affect the value of the firm,
- will be able to determine intrinsic firm values based on accounting information, and they will be aware of the respective models' strengths and weaknesses.

Module contents
The course covers key concepts of modern corporate finance in theory and practice. In particular, we focus on how investment and financing decisions affect the value of the firm. Among the topics discussed are:
- Fundamental analysis and capital market efficiency.
- Cost of debt and equity capital.
- Business valuation models based on dividends, cash flows, and (abnormal) earnings.
- Capital structure and dividend policy.
- Advanced valuation issues.

Reader's advisory
- Titman / Martin: Valuation, latest edition, Boston (Mass.)
Further readings may be announced during the course.

**Entry requirements**

**Skills to be acquired in this module**
Upon completion of the module students will be able to explain the role financial institutions play in financial markets based on economic theory. They will have a sound knowledge of institutional and regulatory conditions under which financial institutions operate today, and they will be able to critically assess respective developments in the financial sector. Moreover, they will have developed a sound understanding of how banks are managed in a competitive environment.

**Module contents**
We will discuss theoretical foundations of financial intermediation in general, and of banking in particular as well as the economic, institutional, and regulatory context in which financial institutions operate today. Moreover, we will cover selected topics in the area of bank management and bank accounting.

**Skills to be acquired in this module**: The students:  
- understand the interference of intellectual property law and competition law.  
- The decision justifies the claim to property rights (or the waiver thereof).  
- decide and evaluate the legitimate exercise and abuse of intellectual property rights.

**Module contents**: The module deals with the competition order shaped by intellectual property rights. The module comprises two courses, the first of which can also be attended by the participants of the TEL 1 module. One course provides an overview of the individual property rights (in copyright, patent law, trademark law) within the framework of German, European and international law. The second course deepens the basic facts of competition law (antitrust law, UWG) and focuses on the intersections with intellectual property law.

Module counseling:
- Sebastian Louven

Entry requirements:

Skills to be acquired in this module:
Upon completion of the module, students will be able to:
- recognize simple data protection incidents.
- apply existing protection mechanisms.
- implement projects in accordance with the law.
- discuss and defend their plans in front of others.

Module contents:
The module gives an overview on data protection laws. Basic knowledge of data protection regulations (DSGVO; BDSG) and existing protection mechanisms is imparted. Within the framework of the seminar, the discussed topics will be deepened with the help of seminar papers and individual aspects will be discussed in more detail.

The event will highlight the new informational structures in modern society and their effects on data protection and data security. Questions concerning general personal rights, freedom of information, IT security and relevant criminal law regulations will be discussed on the basis of examples and legally provided protection mechanisms as well as the tasks of supervisory authorities will be discussed. In particular, the most important decisions on data protection will be covered in detail during the seminar.

At the seminar, students will have the opportunity to prepare in-depth seminar papers on the various topics, which will then be discussed with all participants.

Reader's advisory:
Kühling/Klar/Sackmann, Datenschutzrecht, 2018.
Further literature references will be given in the lecture.

- Hans-Michael Trautwein

**Module counseling**
- Dennis Drews

**Entry requirements**

**Skills to be acquired in this module**
- Understanding of exchange rates as strategic prices in open economies.
- Understanding of the interdependence of balance-of-payments constraints and exchange rates.
- Capability to discuss different models of exchange rate determination.
- Ability to research data and evaluate the literature on specific aspects of financial market globalization and strategies of exchange-rate policy.
- Understanding of the history of fixed-exchange-rate systems.
- Ability to relate the importance of historical experience in international monetary and financial economics.

**Module contents**
The lectures address the following issues:

- exchange rates and the balance of payments,
- open-economy macroeconomics,
- exchange rate determination,
- international financial markets,
- fixed-exchange-rate systems,
- currency crises,
- optimum currency areas and monetary integration,
- choice of exchange rate regime,
- financial market regulation.

In the seminar students will present papers on general and topical issues (theoretical models, policy strategies, case studies) in the fields of financial market globalization and exchange-rate policy.

**Reader's advisory**

---
The module "CSR" provides an overview of the debates on the social responsibility of firms. The first session will briefly introduce the historical debate on Corporate Social Responsibility and Corporate Sustainability and delineate important concepts. The following sessions will use concrete company case studies as a basis for a critical discussion of central questions in the context of corporate social responsibility and sustainability. Questions that will be discussed are, amongst others:

- How can one determine whether a firm acts in a socially and ecologically sustainable way?
- In how far is there a conflict between firm and market growth on the one hand and sustainability on the other hand?
- Which possibilities does a company have to deal with conflicts between social/ecological and economic goals?
- In how far can cooperation and partnerships between organizations help integrate social and ecological aspects in firms?

In addition to discussing these questions by drawing on company case studies, students will be introduced to the corresponding theoretical concepts and frameworks in the academic literature. Also, students will be given the opportunity to test different strategies for implementing sustainability in organizations during a simulation, which allows them to gain first-hand insights into the emerging challenges. Toward the end of the course, students will apply and deepen the knowledge they have gathered over the semester by writing a seminar thesis.

Skills to be acquired in this module
The module consists of lecture as well as seminar elements which interlink with each other on a technical and didactical level. By alternating lectures, discussions, and training elements, students get to know the theoretical basics as well as the practical relevance of the module topics. They get the chance to integrate themselves, their theoretical knowledge and practical experiences, and to exchange views with the other students and the lecturer. Different teaching and learning methods support the student’s professional, methodological, social-communicative, and personal competences, e.g. via station learning, role plays and debates, thesis discussions and case study analysis. They work within the entire group as well as small groups.

Attending the course, students
- develop a solid knowledge of this broad subject and are able to relate the various scientific and practical findings with each other and also understand them on a macro-level;
- understand the complex issues, challenges and fields of action in International Management;
- are able to analyse, interpret and manage international economic and business issues within heterogeneous (above all cultural) fields of stakeholders and environments;
- can effectively analyse and apply the strategic, structural and cultural instruments in International Management according to the specific practical context;
- develop skills of self-reflection (supported by the technical and didactical concepts) and are able to press their point within the scientific discussion;
- are able to locate a specific research question within the scientific discussion in the field of International Management and to interlink, reflect and evaluate it accordingly.

Module contents
Students gain theoretical as well as practical insights in the backgrounds and specific characteristics of International Management. A specific focus will (as a last point) be laid on international Human Resource Management as it provides notably relevant issues in international business administration.

Students deal with foundations, challenges and possible fields of action within the following topics:

- Economic internationalisation and the international firm
  - Characteristics, development and relevance
  - Terminological differentiation and attribution
  - Research and explanatory approaches
- Environment and orientation of international corporations
  - Culture and management
  - Fields and forms of strategy
  - Organisation by structure and processes
  - Responsibility and public affairs
- Relevance of and fields in international Human Resource Management
  - Requirements and organisation of the central HR areas
  - Recruitment and selection
  - Expatriation of employees
  - Intercultural management
  - Social management

The presentations and discussions also offer possibilities to deepen and broaden these topics according to the students interests and latest developments in theory and practice.
Reader's advisory

Further literature will be announced during the semester according to the particular lecture/seminar content.

Skills to be acquired in this module
Die Studierenden

- erkennen und analysieren europäische und internationale Regelungsmaterie des transnationalen Gesundheitsrechts
- kennen Anwendungsbeispiele und lösen Problemfälle
- verfügen über anwendungsbezogenes Wissen zur Lösung aktuell anstehender europäischen und transnationalen Fragestellungen.

Module contents
Das Modul besteht aus zwei aufeinander aufbauenden Teilen: Der erste Teil behandelt theoretische und praktische Fragen zur Wechselwirkung zwischen EU- Gesundheitspolitik und nationalem Gesundheitsrecht wie auch zwischen EU-Gesundheitsrecht und anderen Bereichen des EU-Rechts und stellt europäisches Gesundheitsrecht als ein sich entwickelndes, eigenständiges Gebiet dar. Der zweite Teil setzt sich mit den nationalen und internationalen Regelwerken im Bereich des Gesundheitsrechts (WHO, WTO, EU, nationales Recht und Selbstregulierung) und Fragen bezüglich globalen Handels mit Arzneimitteln auseinander. Beide Teile können entweder innerhalb einer oder in zwei Veranstaltungen behandelt werden. Insbesondere werden die folgenden Themen behandelt:
- Menschenrechte, Ethik, globales Gesundheitsrecht;
- EU und transnationale Regulierung von Arzneimitteln (Marktzugang, Good Manufacturing Practice, Good Clinical Practice, Pharmakovigilanz; gefälschte Arzneimittel);
- Regulierung von klinischer Forschung im EU- und transnationalen Recht;
- Datenschutz, Produkthaftung und Gesundheitsversorgung;
- Gesundheitsversorgung, Wettbewerbsrecht, und geistiges Eigentum.

Schwerpunkt "Führung von Unternehmen und gesellschaftliche Organisationen" (FUGO)

wir826 - Sectoral, Functional and Institutional Approaches to Marketing

Module label: Sectoral, Functional and Institutional Approaches to Marketing
Module code: wir826
Credit points: 6.0 KP
Workload: 180 h

Used in course of study:
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunkt "Führung von Unternehmen und gesellschaftliche Organisationen" (FUGO)
- Master's Programme Sustainability Economics and Management (Master) > Additional Modules

Contact person:
- Module responsibility
  - Thorsten Raabe
- Authorized examiners
  - Die im Modul Lehrenden

Entry requirements:
The students should be enabled
- to adapt the marketing concept to sectoral, functional and institutional specifics,
- to apply specific concepts and methods of marketing in a problem-oriented way and to be able to reflect their conditions and limitations,
- to develop and present your own conceptual designs in a team.

Module contents:
Marketing initially started as a producer-oriented concept and in recent years has developed as universal approach to influence market transactions. Against this background institutional, functional and sectoral fields of application inspired the formulation of sophisticated marketing approaches, like e.g. marketing of non-profit-organisations, strategic marketing, or service marketing. The course presents the specific nature of the different fields of application and relevant consequences for marketing planning. Given the recent inflation of "hyphenated conceptions" of marketing, a reasoned diagnosis as to marketing's core identity is put forth. To this end, perspectives of transfer and integration between the approaches will be developed, that measure up to state-of-the-art theoretical as well as practical demands towards marketing as a universal market-oriented way of managing businesses. This course is divided into a preparatory seminar and an educational workshop towards the end of the term. The latter unit allows case study and role play as well as the presentation student work and boosts social competences irrespective of subject matter.

Module label: Business and Societal Change

Module code: wir827

Credit points: 6.0 KP

Workload: 180 h

Used in course of study:
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunkt "Führung von Unternehmen und gesellschaftliche Organisationen" (FUGO)
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunkt "Unternehmensführung"
- Master's Programme Business Informatics (Master) > Module der Wirtschafts- und Rechtswissenschaften (Master)

Contact person:
- Module responsibility: Jörn Hoppmann
- Authorized examiners: Die im Modul Lehrenden

Entry requirements:
The students…
- Have an overview of the most important societal trends, such as digitization, globalization, demographic change, gender equality, income inequality, and resource depletion
- Know important theoretical approaches that help understand societal change from a firm perspective
- Are able to analyze societal trends and critically evaluate their pros and cons
- Understand the impact of societal change on businesses as well as the role of businesses as drivers of societal change
- Are able to derive recommendations for firms and policy makers based on a thorough analysis of trends

Module contents:
The course centers on the questions of how societal change affects firms and how firms, in turn, contribute to societal change. Toward this end, the first part of the course introduces several important theoretical approaches that help understand societal change from a business perspective, such as Institutional Entrepreneurship or Corporate Political Activity. In addition, students will get to know tools firms use to analyze societal trends. In the second part of the course, students will then form groups to analyze the dynamics, drivers, and consequences of important societal trends with a focus on the role of and implications for firms. Trends, which will be covered in this context, are digitization, automation, mediatization, connectivity, globalization, urbanization, individualism, democratization, social inclusion, gender equality, commercialism, privatization, materialism, income inequality, demographic change, climate change, and resource depletion. The results of the analysis will be presented in class, discussed with the other students, and summarized in a seminar thesis. The main goal of the course is to allow students to derive strategic recommendations for managers and policy makers based on a sound analysis of societal developments.

Authorized examiners | - Die im Modul Lehrenden
Entry requirements | Successful completion of the entrance examination
Skills to be acquired in this module | Upon completion of the module, students will be able to:

- apply specific competences to strategic research in marketing
- classify research strategies in marketing according to their meta-theoretical considerations
- estimate research strategies' claims to knowledge and their limitations
- formulate interdisciplinary research strategies aligning competences of empirical methods with the application of theory
- develop own conceptual sketches within teams and to present them

Module contents | How is knowledge generated within the scholarly discipline of marketing? This question confronts the field of marketing with central paradigmatic assumptions. The course begins to solve this puzzle on the basis of a historical analysis of the marketing concept's development. Different scientific standpoints in marketing theory and empirical investigation are evaluated against the light of recent developments in markets and society. The current paradigms of consumption research and marketing research's basic standing in the philosophy of science are intensely treated. This also entails reflecting on the opportunities that alternative trends, e.g. a humanistic paradigm, hold in store for marketing research. The course is divided into a preparatory seminar and an educational workshop towards the end of the term. The latter unit allows case study and role play as well as the presentation student work and boosts social competences irrespective of subject matter.

Further literature to be announced at the start of the term.

Authorized examiners
- Die im Modul Lehrenden

Entry requirements:

Skills to be acquired in this module:
The students should...

- know and understand basic concepts, instruments and theories in the context of corporate social responsibility and corporate sustainability
- be able to apply conceptual frameworks to analyze and critically question the sustainability of companies
- develop options to improve the sustainability of companies and derive recommendations for their implementation in practice

Module contents:
The module "CSR" provides an overview of the debates on the social responsibility of firms. The first session will briefly introduce the historical debate on Corporate Social Responsibility and Corporate Sustainability and delineate important concepts. The following sessions will use concrete company case studies as a basis for a critical discussion of central questions in the context of corporate social responsibility and sustainability. Questions that will be discussed are, amongst others:

- How can one determine whether a firm acts in a socially and ecologically sustainable way?
- Which factors drive and hinder the diffusion of socially and ecologically superior solutions and companies in the market?
- In how far is there a conflict between firm and market growth on the one hand and sustainability on the other hand?
- Which possibilities does a company have to deal with conflicts between social/ecological and economic goals?
- How can existing firms and value chains be transformed toward sustainability?
- What is the role of managers and boards of directors for organizational change toward sustainability?
- How does the ownership and financial structure of firms influence their strategy toward sustainability?
- In how far can cooperation and partnerships between organizations help integrate social and ecological aspects in firms?

In addition to discussing these questions by drawing on company case studies, students will be introduced to the corresponding theoretical concepts and frameworks in the academic literature. Also, students will be given the opportunity to test different strategies for implementing sustainability in organizations during a simulation, which allows them to gain first-hand insights into the emerging challenges. Toward the end of the course, students will apply and deepen the knowledge they have gathered over the semester by writing a seminar thesis.

**Entry requirements**: keine  

**Skills to be acquired in this module**  
- The module consists of lecture as well as seminar elements which interlink with each other on a technical and didactical level. By alternating lectures, discussions, and training elements, students get to know the theoretical basics as well as the practical relevance of the module topics. They get the chance to integrate themselves, their theoretical knowledge and practical experiences, and to exchange views with the other students and the lecturer. Different teaching and learning methods support the student’s professional, methodological, social-communicative, and personal competences, e.g. via station learning, role plays and debates, thesis discussions and case study analysis. They work within the entire group as well as small groups.  

Attending the course, students  
- develop a solid knowledge of this broad subject and are able to relate the various scientific and practical findings with each other and also understand them on a macro-level;  
- understand the complex issues, challenges and fields of action in International Management;  
- are able to analyse, interpret and manage international economic and business issues within heterogeneous (above all cultural) fields of stakeholders and environments;  
- can effectively analyse and apply the strategic, structural and cultural instruments in International Management according to the specific practical context;  
- develop skills of self-reflection (supported by the technical and didactical concepts) and are able to press their point within the scientific discussion;  

- are able to locate a specific research question within the scientific discussion in the field of International Management and to interlink, reflect and evaluate it accordingly.  

**Module contents**  
Students gain theoretical as well as practical insights in the backgrounds and specific characteristics of International Management. A specific focus will (as a last point) be laid on international Human Resource Management as it provides notably relevant issues in international business administration.  

Students deal with foundations, challenges and possible fields of action within the following topics:  

- Economic internationalisation and the international firm  
  - Characteristics, development and relevance  
  - Terminological differentiation and attribution  
  - Research and explanatory approaches  
- Environment and orientation of international corporations  
  - Culture and management  
  - Fields and forms of strategy  
  - Organisation by structure and processes  
  - Responsibility and public affairs  
- Relevance of and fields in international Human Resource Management  
  - Requirements and organisation of the central HR areas  
  - Recruitment and selection  
  - Expatriation of employees  
  - Intercultural management  
  - Social management  

The presentations and discussions also offer possibilities to deepen and broaden these topics according to the students interests and latest developments in theory and practice.
Further literature will be announced during the semester according to the particular lecture/seminar content.

**Entry requirements**
- Skills to be acquired in this module
  - The lecture pertaining to the module focuses on the development and critical discussion of formal analytical models for modelling and optimizing problems in operations and supply chain management. The aim is to provide students with the skills they need to analyze value-added processes in reality and not only to understand them, but ideally also improve them. The accompanying seminar, held in English, serves to deepen and critically examine the topics from the lecture. Supplementary to the lecture, the seminar deals with conceptual and empirical research and cases. Hereby, students get to know scientific discourses on practically relevant issues that are difficult to model. Furthermore, there will be ample training in scientific work, in team work and in presentations in front of large groups.

**Module contents**
- Introduction to Operations Management; Demand Forecasting; Location Planning; Process Design; Inventory Management; Production Planning; Scheduling; Supply Chain Management; Revenue Management; Behavioral Operations Management

In today’s highly dynamic business environment, innovation is the key to the success of most firms. Moreover, technological and organizational innovations represent valuable instruments for achieving progress toward sustainable development. Against this background, this module familiarizes students with the tools and processes for managing innovation and for developing overall more innovative firms. The module comprises a lecture and a seminar. In the lecture, students become acquainted with the drivers to and role of innovation; they learn about designing innovative firms and developing innovation strategies; they get to know the different sources of innovation; they familiarize themselves with the methods for choosing between alternative planned innovations; they learn how innovation is implemented; and they understand how innovation benefits are exploited. The accompanying seminar is supposed to familiarize the students with select advanced topics surrounding the management of innovation. Moreover, the students train their skills in working in teams, in working with scientific literature, in academic writing, and in presenting in front of a large audience.

Skills to be acquired in this module

- Organizational change, creative destruction, ambidexterity, exploration, exploitation, absorptive capacity, sustainability transitions, innovation models, innovation networks, innovation strategy, innovation ecosystems, diffusion of innovations, organizational routines, entrepreneurship, new ventures, etc.

wir886 - Digital Transformation: Strategies and Sustainability

Module label  Digital Transformation: Strategies and Sustainability
Module code  wir886
Credit points  6.0 KP
Workload  180 h
  
  4 SWS (56h)

Used in course of study  
  • Master's Programme Business Administration, Economics and Law (Master) > Schwerpunkt "Führung von Unternehmen und gesellschaftliche Organisationen" (FUGO)
  • Master's Programme Business Administration, Economics and Law (Master) > Schwerpunkt "Unternehmensführung"

Contact person  Module responsibility
  • Jörn Hoppmann
Authorized examiners
  • Die im Modul Lehrenden

Entry requirements  The students should:
  • know basic definitions, trends and application areas of digitalization
  • be able to assess the economic effects of digitalization
  • understand corporate strategies and business models in the context of digital transformation
  • know how companies should design processes and structures to promote digitalization in organizations
  • have an overview of social, legal and ethical aspects of digitalization
  • assess the environmental impact of digitalization
  • evaluate digital products, services and business models using ethical and sustainable guidelines
  • independently develop proposals for the integration of ethical, social and ecological criteria in digitalization projects and processes

Module contents  The module "Digital Strategy and Sustainability" provides insights into the role digitalization for companies and the associated social discourse. The digital transformation leads to the emergence of new business models, markets and forms of interaction. This requires comprehensive changes in strategic orientation as well as in business processes and structures. In addition, new regulations and standards are required at the societal level in order to meet the ethical, ecological, and societal challenges posed by digitization.

In the first part of the seminar, students are familiarized with the basics and application areas of digitalization as well as the economic, social, and ecological implications. Toward this end, important questions in the context of digital transformation will be raised and discussed drawing on company case studies. Exemplary questions that will be dealt with in this context are:
  • What are the technological drivers of digitalization and what trends can be observed?
  • What is the impact of digital transformation on industries and companies?
  • How can companies design strategies, business models, processes and structures to address the digital transformation?
  • What are the consequences of digitalization on a societal and legal level?
  • How does the digital transformation affect the natural environment?
  • How can social, ethical, and ecological aspects be integrated into digital products, services and business models?

In the second part of the course, students will develop digital business models in teams under the guidance of experienced coaches, taking into account economic, ecological and social/ethical criteria. The results are presented to the other students and company representatives and will be summarized in a term paper. An important part of the term paper is the critical reflection of current methods used to develop digital business models with regard to sustainability criteria.

Entry requirements:
Skills to be acquired in this module:
- Achieving basic knowledge about audit practises
- Achieving broad knowledge about the audit profession and structuring of audit processes
- Achieving competences in evaluating the possibilities and limits of audit techniques
- Application of audit techniques while using case studies and focusing on certain audit areas.

Module contents:
In this course, audit basic principles, audit methods and audit techniques will be presented while emphasizing on large corporates. In addition, an overview about audit processes and audit techniques in the context of the control, information and accreditation function as well as legal specifications is given. Working in groups, case studies will strengthen the achieved knowledge. In addition, the focus will be on international financial reporting standards (IFRS) and international auditing standards (IAS) for proving the financial statements as well as testing the internal risk management.

Skills to be acquired in this module

The aim of the course is to provide students with a deep and thorough knowledge regarding • Mergers & Acquisition tax and • International taxation

Module contents
The course provides a deep insight into Merger & acquisition tax • Taxation of sale of company shares • Admittance of a shareholder • Insertion of operations, partial operations and partner shares in corporate enterprises • Transformation of corporate enterprises into business partnerships • Merger of corporate enterprises • Separation of corporate enterprises and business partnerships International taxation • Taxation of transnational operations in form of direct businesses, permanent establishments and corporate enterprise subsidiaries • Possibilities and limitations regarding the prevention of international double taxation • Profit deferral and problems regarding transfer prices • Problems in the prevention of international low taxation

Reader's advisory

- Brähler, Gernot (aktuelle Fassung): Umwandlungssteuerrecht: Grundlagen für Studium und Steuerberaterprüfung • Schaumburg, Harald (aktuelle Fassung): Internationales Steuerrecht: Außensteuerrecht, Doppelbesteuerungsrecht It is worth mentioning, that due to the fast-changing tax law, further recommendations regarding the literature cannot be made yet, but are rather given during the course. Required are: • a collection of the most important tax laws (e.g. NWB-publisher) in current form. • a loose-leaf collection of the tax regulations (e.g. Beck-publisher)

- Reference text: Due to a change in the frequency in which the "Mergers & Acquisition Tax" and the "International Taxation" sections are offered starting with the winter semester 2020/21, it is recommended for the winter semester 2019/20, in addition to the module wir 807 "Taxation and Tax Law I", to study the "Mergers & Acquisition Tax" section of the module wir835 at the same time and that the examination on both sections is taken in the summer semester 2020. The course "Mergers & Acquisition Tax" will otherwise only be offered again in the summer semester 2021. From the summer semester 2021 onward it is recommended to study the part "Mergers & Acquisition Tax" of the module wir835 in the 2nd semester and the part "International Taxation" in the 3rd semester. At the end of the 3rd semester, the written exam should cover the entire content of the module.

wir839 - Financial Statement Analysis

Module label: Financial Statement Analysis

Module code: wir839

Credit points: 6.0 KP

Workload: 180 h

Used in course of study:
- Master of Education Programme (Vocational and Business Education) Economics and Business Administration (Master of Education) > Mastermodule
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunkt "Auditing, Finance, Taxation" (AFT)
- Master's Programme Sustainability Economics and Management (Master) > Additional Modules

Contact person:
- Module responsibility: Bernd Siebenhüner
- Authorized examiners: Die im Modul Lehrenden

Entry requirements:
- none

Skills to be acquired in this module:
- By the end of the course students should have answers to the following questions:
  - How are fundamental values (or "intrinsic values") estimated?
  - How are business strategies analyzed in order to understand the value they create?
  - What business activities determine value?
  - How is "value created for shareholders" identified?
  - How does ratio analysis help in valuation?
  - How does profitability tie into valuation?
  - What is growth? How does one analyze growth? How does one analyze a growth firm?
  - How does one deal with the accounting methods used in financial statements?
  - How is financial analysis developed for strategy and planning?
  - What determines a firm's P/E ratio? How does one calculate what the P/E should be?
  - What determines a firm's market-to-book (P/B) ratio? How does one calculate what the P/B should be?
  - How does one evaluate risk? For equity? For debt?
  - How does one evaluate an equity research report?
  - How does one trade on fundamental information?

Module contents:
- With a stock market bubble and a financial crisis in our recent history, there have been increasing calls to “return to fundamentals.” This is a course on fundamental analysis. The primary emphasis is on equity (share) valuation, with a focus on developing and applying methods for valuing firms using financial statement analysis.
- The course has a very practical focus. The methods of fundamental analysis will be examined in detail and applied in cases and projects involving listed companies. Topics include models of shareholder value, a comparison of accrual accounting and discounted cash flow approaches to valuation, the analysis of profitability, growth and valuation generation in a firm, diagnosing accounting quality, forecasting earnings and cash flows, pro-forma analysis for strategy and planning, and the determination of price-earnings (P/E) and market-to-book (P/B) ratios.
- The course does not assume "market efficiency". Rather, it develops the techniques for challenging traded prices in order to assess whether investments are appropriately priced. It adopts the philosophy that one of the risks in investing is the risk of paying too much. The course is one for the active investor.
- Most importantly, we learn how to handle accounting and financial reports in valuation. We see that valuation is really a matter of appropriate accounting for value. The course combines accounting principles and investment principles to answer the question: How do I account for value so that I can challenge stock prices with some confidence?
- The course will be taught from the perspective of designing techniques to be used in an (independent) equity research department or firm. Accordingly, the material is pertinent to the security analyst – particularly the equity analyst – who must issue a buy, hold or sell recommendations on stocks. However, much of the material covered in the course is also relevant to the corporate financial analyst for evaluating acquisitions, restructurings and other investments, and for calculating the value generated by strategic scenarios. By the end of the course, the student should feel competent in writing a thorough, credible equity research report or investment analysis that meets the highest standards of professionalism.
- The course is of interest to those contemplating careers in investment banking (particularly in equity research), security analysis, consulting, public accounting, and corporate finance. And it will also help with personal investing.

Skills to be acquired in this module:
Students have to understand the theoretical orientation and the institutional structure of financial accounting and standard setting. Many important standards, such as fair value accounting, financial instruments, reserve recognition accounting, management discussion and analysis, employee stock options, impairment tests, hedge accounting, derecognition, consolidation, and comprehensive income, will be analyzed and critically evaluated from students.

This course aims to provide students with an in-depth understanding of the underlying accounting concepts and accounting standards governing the preparation of financial statements under International Financial Reporting Standards (IFRS) for external users. Furthermore it develop students' conceptual skills and professional competence in financial accounting in compliance with the regulatory and financial framework under IFRS.

Module contents:
- Accounting Under Ideal Conditions
- The Decision Usefulness Approach to Financial Reporting
- Efficient Securities Markets
- The Value Relevance of Accounting Information
- The Measurement Approach to Decision Usefulness
- Measurement Applications
- The Efficient Contracting Approach to Decision Usefulness
- An Analysis of Conflict
- Executive Compensation
- Earnings Management
- Standard Setting: Economic Issues
- Standard Setting: Political Issues

Upon completion of the module students will be able to explain the role financial institutions play in financial markets based on economic theory. They will have a sound knowledge of institutional and regulatory conditions under which financial institutions operate today, and they will be able to critically assess respective developments in the financial sector. Moreover, they have developed a sound understanding of how banks are managed in a competitive environment.  

**Module contents**  
We will discuss theoretical foundations of financial intermediation in general, and of banking in particular as well as the economic, institutional, and regulatory context in which financial institutions operate today. Moreover, we will cover selected topics in the area of bank management and bank accounting.

**Entry requirements**

Students are required to actively participate in the course by preparing classes, by performing follow-up coursework, and/or by giving presentations according to the rules defined by the lecturer in the first session.

**Skills to be acquired in this module**

The aim of the course is to provide insights into the state-of-the-art of academic research in selected areas of accounting and auditing, finance, and taxation. Upon completion of the module, students will be able to place typical research questions and research designs in the aforementioned areas within a broader context of academic research, and to assess selected contributions' significance.

**Module contents**

The course involves reading and discussing cornerstone journal articles as well as contemporary articles and working papers in accounting/auditing, finance, and/or taxation. Particular emphasis will be placed on the evaluation of the respective studies with respect to their research questions, the methodologies used, and their contributions to the literature.

**Reader's advisory**

Will be announced at the beginning of the course.

  - Die im Modul Lehrenden

Entry requirements: none

Skills to be acquired in this module:
By the end of the course students should develop and understand the basic concepts, analytical techniques, instruments and systems to control sustainable corporate success. The students further identify the theoretical background of corporate governance and how corporate governance mechanisms work. Moreover, they develop an up-to-date and mainly practitioner-oriented profile of corporate governance and control systems. They are aware of a controller’s relevance as a corporate conscience and the meaning of controlling as a corporate service. In addition, students identify strategic, operational and department-specific characteristics of corporate control. They argue how to ensure the quality of data and the development of decision-making relevant information. Paper discussions further complement the students’ profile by highlighting current and special issues in the field of corporate governance and control. In summary, students link economic, methodological, and cultural aspects to their personal profile and assess whether an activity as a controller fits to their personal plan for future employment. They further strengthen their ability to develop sustainable solutions for comprehensive and specific economic issues.

Module contents:
In the beginning, the course provides an overview of the historic development as well as conceptions of corporate governance and control in the literature and in practice. It further embeds the role of corporate governance and control within strategic and operational corporate management. The course is further separated in different parts to ensure students’ ability to identify and understand decision-making, coordination and monitoring aspects of corporate governance and control. As such, students analyse corporate actions via the following instruments:
- SWOT-Analysis
- Porter’s Five Forces Model
- Portfolio Analysis
- Strategic Cost Management
- Linear Programming
- Break-Even Analysis
- Value Based Management
- Ratio Analysis
- Balanced Scorecard
- Variance Analysis

| Entry requirements                       | Students will be able  
  - to describe European and international legal-economic interdependencies  
  - apply international and European legal norms and legal issues  
  - have a command of English legal terminology. |
| Module contents                          | The module consists of two lectures which deal with changes in policies and institutions of international economic law. One lecture focuses on economic law and institutions as shaped by international law, while the other class is dedicated to EU foreign trade law. A basic knowledge of the institutions of international and EU economic law (WTO, IMF, World Bank, European Commission) is a prerequisite for attending this module. The focus lies in helping students understand the processes of internationalization and Europeanization that inform the current interactions between the different actors on the international plane (companies, states and parastatals). In this module, public and private economic law will be presented as a single unit.  
  The international law part of the module focuses on the rationale and regulation of the major free trade agreements, including dispute settlement. Other topics to be addressed include the conflict of laws and the UN Convention (CISG). The EU law focuses on competition and foreign trade law, including procurement and taxation law. |

**Entry requirements**

**Skills to be acquired in this module**
- Have an overview of the most important societal trends, such as digitization, globalization, demographic change, gender equality, income inequality, and resource depletion
- Know important theoretical approaches that help understand societal change from a firm perspective
- Are able to analyze societal trends and critically evaluate their pros and cons
- Understand the impact of societal change on businesses as well as the role of businesses as drivers of societal change
- Are able to derive recommendations for firms and policy makers based on a thorough analysis of trends

**Module contents**
The course centers on the questions of how societal change affects firms and how firms, in turn, contribute to societal change. Toward this end, the first part of the course introduces several important theoretical approaches that help understand societal change from a business perspective, such as Institutional Entrepreneurship or Corporate Political Activity. In addition, students will get to know tools firms use to analyze societal trends. In the second part of the course, students will then form groups to analyze the dynamics, drivers, and consequences of important societal trends with a focus on the role of and implications for firms. Trends, which will be covered in this context, are digitization, automation, mediatization, connectivity, globalization, urbanization, individualism, democratization, social inclusion, gender equality, commercialism, privatization, materialism, income inequality, demographic change, climate change, and resource depletion.

The results of the analysis will be presented in class, discussed with the other students, and summarized in a seminar thesis. The main goal of the course is to allow students to derive strategic recommendations for managers and policy makers based on a thorough analysis of trends.

**Entry requirements**

- Students get to know central theories of organisation and human resources (HR). They are empowered to apply theories in order to explain practical phenomena and to solve practical problems. The ability to put on different "theory glasses" while observing and analysing various organisational and HR practices is fostered. Students learn to deal with different theories in a conscious and critical way, especially through case studies, group work and discussions.

- Upon completion of the module, students will:
  - be able to explain various classic and modern theories of organisation and human resource theories, differentiate them and reflect them critically;
  - be able to apply the theoretical and abstract ways of thinking and perception so as to transfer them on operational decisions;
  - develop skills of self-reflection (supported by the technical and didactical concepts).

**Module contents**

- Students receive deeper insights into classical and modern theories of organisation and human resource, including:
  - Weber's theory of bureaucracy
  - Taylor's principles of Scientific Management
  - Human Relations approach
  - Behavioural decision theory
  - Situational approach
  - Micro-political approaches
  - New Institutional Economics
  - Theories of motivation
  - Theories of leadership

- The presentations and discussions within the seminars also offer possibilities to deepen and broaden these topics according to the student's interest and latest developments in theory and practice.

**Reader's advisory**

Further literature will be announced during the semester according to the particular lecture/seminar content.

<td>Ziel des Moduls ist, den Studierenden interdisziplinäre Perspektiven auf die Beratung (Themen, Personen, Qualifikation) im besonderen Fokus der Begleitung von Gründungsvorhaben näher zu bringen. Das Modul „Gründungsberatung“ bietet Studierenden die Möglichkeit, sich sowohl wissenschaftlich als auch anwendungsorientiert mit den Besonderheiten und (zukünftigen) Professionalisierungserfordernissen der Beratung von Gründern/Gründerinnen zu beschäftigen. Zugleich erhalten Sie Einblicke in die Grünerszene. Über die Einbindung eines Gründungsteams als Fallstudienleiter eröffnet sich den Studierenden die Gelegenheit, ihr Beratungskonzept unter realen Bedingungen zu entwickeln, zu testen und zu evaluieren.</td>

wir851 - Corporate Governance and Control

Module label: Corporate Governance and Control
Module code: wir851
Credit points: 6.0 KP
Workload: 180 h

Used in course of study:
- Master of Education Programme (Vocational and Business Education) Economics and Business Administration (Master of Education) > Mastermodule
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunkt "Auditing, Finance, Taxation" (AFT)
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunkt "Unternehmensführung"

Contact person:
Module responsibility: Bernd Siebenhüner
Authorized examiners: Die im Modul Lehrenden

Entry requirements:
none

Skills to be acquired in this module:
By the end of the course students should develop and understand the basic concepts, analytical techniques, instruments and systems to control sustainable corporate success. The students further identify the theoretical background of corporate governance and how corporate governance mechanisms work. Moreover, they develop an up-to-date and mainly practitioner-oriented profile of corporate governance and control systems. They are aware of a controller’s relevance as a corporate conscience and the meaning of controlling as a corporate service. In addition, students identify strategic, operational and department-specific characteristics of corporate control. They argue how to ensure the quality of data and the development of decision-making relevant information. Paper discussions further complement the students' profile by highlighting current and special issues in the field of corporate governance and control. In summary, students link economic, methodological, and cultural aspects to their personal profile and assess whether an activity as a controller fits to their personal plan for future employment. They further strengthen their ability to develop sustainable solutions for comprehensive and specific economic issues.

Module contents:
In the beginning, the course provides an overview of the historic development as well as conceptions of corporate governance and control in the literature and in practice. It further embeds the role of corporate governance and control within strategic and operational corporate management. The course is further separated in different parts to ensure students' ability to identify and understand decision-making, coordination and monitoring aspects of corporate governance and control. As such, students analyse corporate actions via the following instruments:
- SWOT-Analysis
- Porter’s Five Forces Model
- Portfolio Analysis
- Strategic Cost Management
- Linear Programming
- Break-Even Analysis
- Value Based Management
- Ratio Analysis
- Balanced Scorecard
- Variance Analysis

**Total time of attendance for the module**

56 h
The module consists of lecture as well as seminar elements which interlink with each other on a technical and didactical level. By alternating lectures, discussions, and training elements, students get to know the theoretical basics as well as the practical relevance of the module topics. They get the chance to integrate themselves, their theoretical knowledge and practical experiences, and to exchange views with the other students and the lecturer. Different teaching and learning methods support the student’s professional, methodological, social-communicative, and personal competences, e. g. via station learning, role plays and debates, thesis discussions and case study analysis. They work within the entire group as well as small groups.

Attending the course, students
- develop a solid knowledge of this broad subject and are able to relate the various scientific and practical findings with each other and also understand them on a macro-level;
- understand the complex issues, challenges and fields of action in International Management;
- are able to analyse, interpret and manage international economic and business issues within heterogeneous (above all cultural) fields of stakeholders and environments;
- can effectively analyse and apply the strategic, structural and cultural instruments in International Management according to the specific practical context;
- develop skills of self-reflection (supported by the technical and didactical concepts) and are able to press their point within the scientific discussion;
- are able to locate a specific research question within the scientific discussion in the field of International Management and to interlink, reflect and evaluate it accordingly.

The presentations and discussions also offer possibilities to deepen and broaden these topics according to the students interests and latest developments in theory and practice.

<tr>
<td></td>
<td>• to press their point within the scientific discussion in this research area.</td>
</tr>
<tr>
<td>Module contents</td>
<td>The module consists of two project parts, one per semester, and starts with each summer term. In the beginning, the lecturers present (varying) guiding topics from the field of management, organisation, and human resources (e.g. cooperation and business networks, the flexibilisation of work conditions, workplace health management). Topics from the chair’s current research projects are further integrated. The topics are further specialised by small student groups who work together on them. This means that the lecturers provide suggestions and support (e.g. via different moderation methods) so as to initiate the student’s decisions on their project’s specific topic. Students work in plenary as well as small groups. The specific project topics are further cemented within each of the student’s project group. For methodological and didactical reasons, it is necessary to stretch the module over two semesters. In the first semester (summer term), students work on the theoretical and conceptual basics, solidify their research topics, and prepare for the empirical project work. The students present their first (in particular theoretical) results as well as their empirical planning and design. During the second semester (winter term), students work intensively on the empirical research part and complete the project by finishing their scientific report. They present their findings within the whole plenary group. Active (non-receptive) forms of learning are dominating this module. The lecturers are primarily acting in the role of moderators, coaches, coordinators and providers for information.</td>

**Entry requirements**
Skills to be acquired in this module
The students should:
- know basic definitions, trends and application areas of digitalization
- be able to assess the economic effects of digitalization
- understand corporate strategies and business models in the context of digital transformation
- know how companies should design processes and structures to promote digitalization in organizations
- have an overview of social, legal and ethical aspects of digitalization
- assess the environmental impact of digitalization
- evaluate digital products, services and business models using ethical and sustainable guidelines
- independently develop proposals for the integration of ethical, social and ecological criteria in digitalization projects and processes

**Module contents**
The module "Digital Strategy and Sustainability" provides insights into the role digitalization for companies and the associated social discourse. The digital transformation leads to the emergence of new business models, markets and forms of interaction. This requires comprehensive changes in strategic orientation as well as in business processes and structures. In addition, new regulations and standards are required at the societal level in order to meet the ethical, ecological, and societal challenges posed by digitization.

In the first part of the seminar, students are familiarized with the basics and application areas of digitalization as well as the economic, social, and ecological implications. Toward this end, important questions in the context of digital transformation will be raised and discussed drawing on company case studies. Exemplary questions that will be dealt with in this context are:
- What are the technological drivers of digitalization and what trends can be observed?
- What is the impact of digital transformation on industries and companies?
- How can companies design strategies, business models, processes and structures to address the digital transformation?
- What are the consequences of digitalization on a societal and legal level?
- How does the digital transformation affect the natural environment?
- How can social, ethical, and ecological aspects be integrated into digital products, services and business models?

In the second part of the course, students will develop digital business models in teams under the guidance of experienced coaches, taking into account economic, ecological and social/ethical criteria. The results are presented to the other students and company representatives and will be summarized in a term paper. An important part of the term paper is the critical reflection of current methods used to develop digital business models with regard to sustainability criteria.

**Entry requirements**

**Skills to be acquired in this module**
- Understanding of exchange rates as strategic prices in open economies.
- Understanding of the interdependence of balance-of-payments constraints and exchange rates.
- Capability to discuss different models of exchange rate determination.
- Ability to research data and evaluate the literature on specific aspects of financial market globalization and strategies of exchange-rate policy.
- Understanding of the history of fixed-exchange-rate systems.
- Ability to relate the importance of historical experience in international monetary and financial economics.

**Module contents**
The lectures address the following issues:

- exchange rates and the balance of payments,
- open-economy macroeconomics,
- exchange rate determination,
- international financial markets,
- fixed-exchange-rate systems,
- currency crises,
- optimum currency areas and monetary integration,
- choice of exchange rate regime,
- financial market regulation.

In the seminar students will present papers on general and topical issues (theoretical models, policy strategies, case studies) in the fields of financial market globalization and exchange-rate policy.

### Module Information

**Module label**: Regulatory and Competition Policy  
**Module code**: wir824  
**Credit points**: 6.0 KP  
**Workload**: 180 h

**Used in course of study**  
- kein Abschluss European Studies in Global Perspectives > Society, Economy and Politics
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunkt "Transnational Economics and Law" (TEL)
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunkt "Volkswirtschaftslehre" (VWL)

**Contact person**  
Module responsibility  
» Christoph Böhringer

**Entry requirements**

**Skills to be acquired in this module**  
Die Studierenden:

- verstehen die grundlegenden Themen der Wettbewerbs- und Regulierungsökonomik (z.B. die industriegöömischen Grundlagen, die Anreizproblematik und die praktische Ausgestaltung der Regulierung in verschiedenen Märkten).

**Module contents**
The module consists of two courses. Course A deals with the theory of monopoly, the theory of oligopoly, cartels and market entry and the welfare analysis of market structure. Course B deals with topics in international regulatory and competition policy, especially monopoly regulation, economies of scale vs. market power in transnational markets, aims and instruments of European regulatory and competition policy.

**Contact person**

- Ralf Werner Stecking

**Entry requirements**

- With successful completion of the course, students shall:
  - be aware of and be able to evaluate quantitative forecasting methods.
  - be able to select adequate methods in relevant fields of application, like time series and classification analysis.
  - be able to run computer-aided analyses and to interpret the results properly.

**Module contents**

- Various aspects of quantitative forecasting methods such as:
  - Time series components,
  - Trend and seasonal methods,
  - Stationarity,
  - Multivariate forecasting methods,
  - Autoregressive and moving average processes,
  - Box-Jenkins method.

wir878 - Public Economics

Module label: Public Economics
Module code: wir878
Credit points: 6.0 KP
Workload: 180 h

Used in course of study:
- Master's Programme Business Administration, Economics and Law (Master) > Schwerpunkt "Volkswirtschaftslehre" (VWL)
- Master's Programme Sustainability Economics and Management (Master) > Additional Modules
- Master's Programme Water and Coastal Management (Master) > Socioeconomics

Contact person:
- Module responsibility: Carsten Helm
- Authorized examiners: Die im Modul Lehrenden
- Module counseling: Jasper Meya

Entry requirements:
- none

Skills to be acquired in this module:
- The students are able
  - to understand sources of market failures and government failures
  - understand taxing and spending activities of governments
  - understand the distinction between normative and positive perspectives in the evaluation of government policy
  - to apply economic methods to current issues in public economics
  - present their research result in the form of written papers and oral presentations

Module contents:
- The course covers key concepts of public economics, which studies how government taxing and spending activities affect the economy – economic efficiency and the distribution of income and wealth.

Lecture: After introducing the theory and methodology of public economics, we discuss a historical and theoretical overview of the public sector. We then focus on departures from efficiency (especially asymmetric information), taxation issues (including tax evasion, fiscal federalism and tax competition among independent jurisdictions), and the intertemporal issue of social security (especially pension system).

Seminar: covers current issues in public economics, e.g. reform of health care or pension system.

**Skills to be acquired in this module**

This course aims at giving students an understanding of reasons, goals and instruments for climate policy, as well as implied complications due to the long term characteristics and the international dimension of climate change. Students first learn basics about the natural science of climate change and the main statements of climate research about the anthropogenic contribution to climate change. The economic interpretation of high pollution as a symptom of a market failure then leads to the treatment of policy instruments, and the understanding of economic efficiency as a prerequisite for effective climate policy. Game theoretic analysis of international negotiations and agreements provides key insights about the international dimension of the problem. By means of practical examples students then see in detail the functionality and pitfalls of selected implemented (or currently discussed) policies, e.g. the EU-ETS. With successful completion of the course, students shall be able to judge climate policy issues on an informed scientific basis (natural science and economics).

**Module contents**

- Natural science of climate change: greenhouse effect; measures, causes and impacts of climate change.
- Economics of climate change: market failures (public goods, externalities); game theory of international agreements (prisoner’s dilemma, chicken game, assurance game, repeated games, continuous choice); environmental policy instruments (especially taxes, tradable permits).
- Climate policy in practice: EU-ETS (pitfalls: market segmentation, conditional grandfathering, lobbying); emission taxes and the EU-ETS; interaction between black and green quotas; embodied carbon tariffs.

**Skills to be acquired in this module**

- Students get to know selected concepts of organisation and management. Their respective objectives, instruments and methods are discussed and their use in everyday business is critically reflected. Students learn to deal with different management concepts in a conscious and critical way, especially through case studies and discussions.

Upon completion of the module, students will:

- be familiar with the emergence, development, and content of various management concepts;
- be able to convey key findings of the various management concepts to practical issues in the field of organisation and management;
- develop skills of self-reflection (supported by the technical and didactical concepts).

**Module contents**

- Students receive deeper insights into concepts of organisation and management, including:
  - Lean Management
  - Change Management
  - Quality Management
  - Business Process Reengineering

The presentations and discussions within the seminars also offer possibilities to deepen and broaden these topics according to the student’s interest and current developments in theory and practice, e. g. Balanced Scorecard, Learning Organisation, Organisational Culture, Worker Participation, Networks, Diversity Management, Management by Objectives.

**Reader’s advisory**

Further literature will be announced during the semester according to the particular lecture/seminar content.

- Jürgen Bitzer
- Hans-Michael Trautwein
- Philipp Poppitz

Module counseling:
- Jürgen Bitzer
- Philipp Poppitz

Entry requirements:

Skills to be acquired in this module:
- Understanding of the interdependence of goods markets, labour markets and financial markets in the economy
- Ability to assess controversial views of the causes of output fluctuations (business cycles), inflation and unemployment
- Ability to present and evaluate different concepts of macroeconomic stabilization by way of fiscal and monetary policies
- Ability to describe and handle (simple) dynamic models of output, price-level and employment fluctuations and economic growth

Module contents:
The lectures address the following issues:
- the development of macroeconomic thinking,
- output fluctuations, inflation and unemployment,
- statics and dynamics in macroeconomic theories,
- open economy macroeconomics,
- business cycles,
- economic growth and innovations,
- microfoundations of macroeconomics,
- policy rules.

Entry requirements:
Keine

Skills to be acquired in this module:
Students...
- Know advanced theoretical concepts, research streams, and frameworks of in the field of Strategic Management
- Understand the links between different theories and are able to critically question them
- Can apply theories to understand and interpret organizational dynamics in daily life
- Are able to develop solutions for concrete practical challenges in companies in the context of Strategic Management based on the concepts and frameworks they have learned
- Can put the newly acquired knowledge into a broader context, so it can be deepened in the further professional life

Module contents:
The course offers an overview of advanced concepts and frameworks in the field of Strategic Management. At the beginning, the course will provide a brief introduction into the historical development, goals, and research streams of the field. In this context, important terms, methods, and philosophical approaches of (management) research will be clarified. Subsequently, students form groups to analyze selected scientific articles with regard to their theoretical relevance and practical implications. Theoretical topics that will be covered in depth are:
1. Top Management Teams, Upper Echelons und Corporate Governance
2. Ressource- and Capability-based Approaches
4. Institutional Theory, Institutional Work/Entrepreneurship and Social Movements
5. Organizational Cognition, Identity, and Framing
6. Organizational Learning and Ambidexterity
7. Organizational networks and ecosystems
The results of the analysis will be summarized in a seminar thesis, presented in class, and discussed with the other students. The main goal of the course is to equip students with advanced concepts, which allow them to understand organizational dynamics, question established practices in firms, and develop new solutions that go beyond the application of standard instruments.

| Entry requirements           | Students will be able  
- to describe European and international legal-economic interdependencies  
- apply international and European legal norms and legal issues  
- have a command of English legal terminology. |
| Skills to be acquired in this module | The module consists of two lectures which deal with changes in policies and institutions of international economic law. One lecture focuses on economic law and institutions as shaped by international law, while the other class is dedicated to EU foreign trade law. A basic knowledge of the institutions of international and EU economic law (WTO, IMF, World Bank, European Commission) is a prerequisite for attending this module. The focus lies in helping students understand the processes of internationalization and Europeanization that inform the current interactions between the different actors on the international plane (companies, states and parastatals). In this module, public and private economic law will be presented as a single unit. The international law part of the module focuses on the rationale and regulation of the major free trade agreements, including dispute settlement. Other topics to be addressed include the conflict of laws and the UN Convention (CISG). The EU law focuses on competition and foreign trade law, including procurement and taxation law. |

| Workload attendance | 56 h |
This course aims at giving students an understanding of reasons, goals and instruments for government policy from a micro- and macroeconomic perspective. Students first need to learn how decentralised markets can result in an efficient equilibrium and what the theoretical assumptions for this outcome are. Against this reference case it is possible to evaluate the consequences when some of the assumptions are not fulfilled in reality. Furthermore, the problems of the aggregated economy with its fundamental uncertainty are approached and the answers of economic policy to changes in variables like inflation, unemployment and economic growth will be evaluated.

With successful completion of the course, students shall be able to approach questions of economic policy making by applying concise economic reasoning, graphical intuition, analytical models and historical understanding. Furthermore, students shall be enabled to follow other Economics courses at Master's level.

unlimited (nur Studierende im china Schwerpunkt während ihres Auslandssemesters)

**Reference text**

This module is a project that students in the China focus carry out during the term that they spend at a partner university in China. The project topic is selected and researched under intensive online-supervision from Oldenburg in collaboration with colleagues at the partner universities. A kick-off meeting in Oldenburg and regular (online) consultations during and after the stay in China are required. A report in the shape of a 20+ pages study concludes the project.

### Entry requirements

**Skills to be acquired in this module**
- Attending the module, students
  - gain first work experiences and are able to relate and reflect them on the basis of their study contents;
  - reflect and concretize their professional motivation and career choices;
  - have the competences to plan their ongoing studies (e.g., master’s thesis) as well as further master studies and their career entry;
  - have deeper knowledge in the specific professional field they chose and have tested their professional competences in practice;
  - enhance their social and methodological competences and prove them in the chosen organization;
  - are familiar with the application process and able to reflect their own procedure accordingly so as to develop strategies for work search in the future;
  - gain intercultural competences in a practical environment.

**Module contents**
The module contents are separated into the placement itself (including the report) and the seminar.

#### Contents of the placement (including report)
- The work placement has to have an explicit relation to the student’s fields of study. The student’s work tasks therefore have to include aspects of economics, business administration and law or sustainability economics.
- Duration of at least four weeks or ca. 160 working hours is compulsory for this work placement.
- The report shall present the organization, work tasks, relations to the student’s fields of study and reflection on the student’s experiences and cognitions. It shall be of 12-15 pages in length. The certificate about the placement and its duration needs to be attached. The report is to be submitted to the “Servicestelle Praktikum”.
