## Basismodule

### bio215 - Introduction to Biology

<b>Module label</b>	Introduction to Biology			
<b>Module code</b>	bio215			
<b>Credit points</b>	9.0 KP			
<b>Workload</b>	270 h			
<b>Applicability of the module</b>	<ul style="list-style-type: none"> <li>• Bachelor's Programme Biology (Bachelor) &gt; Basismodule</li> <li>• Bachelor's Programme Mathematics (Bachelor) &gt; Nebenfachmodule</li> <li>• Dual-Subject Bachelor's Programme Biology (Bachelor) &gt; Basismodule</li> </ul>			
<b>Responsible persons</b>	<ul style="list-style-type: none"> <li>• Gerlach, Gabriele (module responsibility)</li> <li>• Zotz, Gerhard (Module counselling)</li> <li>• Sienknecht, Ulrike (Module counselling)</li> <li>• Gerlach, Gabriele (authorised to take exams)</li> <li>• Zotz, Gerhard (authorised to take exams)</li> <li>• Köppl, Christine (authorised to take exams)</li> <li>• Sienknecht, Ulrike (authorised to take exams)</li> <li>• Käfer, Simon (authorised to take exams)</li> </ul>			
<b>Prerequisites</b>				
<b>Skills to be acquired in this module</b>	<p>++ biological knowledge                  ++ biologically relevant knowledge in the natural sciences and mathematics                  ++ interdisciplinary knowledge &amp; thinking                  ++ abstract, logical, analytical thinking</p> <p>Qualifications that the module provides</p> <ul style="list-style-type: none"> <li>• The theoretical basics of the different disciplines of biology are acquired</li> <li>• The overview gained enables the students to start their individual study planning, which fits their inclinations and abilities</li> <li>• for the professional field of school teachers: consideration of living nature on different system levels (organism, population, ecosystem, biosphere) and with regard to its evolutionary history. Content specifically relevant to this career field are plant morphology and physiology, animal morphology and physiology, neurobiology, behavioural biology, genetics, molecular biology, developmental biology, evolution and biodiversity (systematics), ecology, biogeography, sustainable use of nature, human biology and immunobiology.</li> </ul>			
<b>Module contents</b>	Lecture conveys knowledge in - evolution, ecology and biodiversity (WiSe) - animal physiology and developmental biology (SoSe)			
<b>Recommended reading</b>	Campbell et al. "Biologie", Pearson Sadava et al. "Purves, Biologie", Springer			
<b>Links</b>				
<b>Language of instruction</b>	German			
<b>Duration (semesters)</b>	2 Semester			
<b>Module frequency</b>	jährlich			
<b>Module capacity</b>	300			
<b>Examination</b>	<b>Prüfungszeiten</b>	<b>Type of examination</b>		
<b>Final exam of module</b>	lecture-free periods after each series	2 written examinations (WiSe and SoSe)		
Type of course	Comment	SWS	Frequency	Workload of compulsory attendance
Lecture		12	SuSe and WiSe	168
Seminar (Gefahrstoffverordnung und Arbeitsschutz (PFLICHT für Erstsemester!))			WiSe	0
Tutorial (optional)			--	0
<b>Total module attendance time</b>				168 h

---

## bio220 - Introductory Zoology-Botany

<b>Module label</b>	Introductory Zoology-Botany
<b>Module code</b>	bio220
<b>Credit points</b>	9.0 KP
<b>Workload</b>	270 h
<b>Applicability of the module</b>	<ul style="list-style-type: none"><li>• Bachelor's Programme Biology (Bachelor) &gt; Basismodule</li><li>• Dual-Subject Bachelor's Programme Biology (Bachelor) &gt; Basismodule</li></ul>
<b>Responsible persons</b>	<ul style="list-style-type: none"><li>• Ahlrichs, Wilko (module responsibility)</li><li>• Will, Maria (module responsibility)</li><li>• Bininda-Emonds, Olaf (Module counselling)</li><li>• Zotz, Gerhard (Module counselling)</li><li>• Ahlrichs, Wilko (authorised to take exams)</li><li>• Will, Maria (authorised to take exams)</li><li>• Zotz, Gerhard (authorised to take exams)</li><li>• Bininda-Emonds, Olaf (authorised to take exams)</li><li>• Plewka, Isabelle (authorised to take exams)</li><li>• Käfer, Simon (authorised to take exams)</li></ul>
<b>Prerequisites</b>	keine
<b>Skills to be acquired in this module</b>	<p>++ biological knowledge + knowledge of biological working methods ++ biologically relevant knowledge in the natural sciences and mathematics + abstract, logical, analytical thinking + independent learning and (research-based) working + teamwork</p> <p>THEORY:</p> <ul style="list-style-type: none"><li>* To understand the fundamentals of reconstructing phylogenetic relationships</li><li>* To know the phylogenetic system and ground pattern of high-ranking ancestral animal species</li><li>* To know the cell structures, organization, and reproduction of plants and animals</li><li>* To know the morphology and anatomy of individual species</li></ul> <p>PRACTICE:</p> <ul style="list-style-type: none"><li>* To improve and verify the theoretical knowledge acquired from lectures and textbooks by studying the original</li><li>* To train visual and tactile perception by studying various species</li><li>* To learn that representations in textbooks are abstractions of a much more complex reality</li><li>* To be able to criticize representations in textbooks and models</li><li>* To acquire the knowledge of the function in living animals and plants by studying preserved specimens</li><li>* Learning how to follow preparation instructions</li><li>* Learning that the organization of individual species may be highly variable</li><li>* Preparing records or drawings from the information obtained by original specimens studied</li></ul>
<b>Module contents</b>	<p>GENERAL: Light microscopic methods are applied to study structures in plants and animals. Records in the form of descriptions and drawings.</p> <p>BOTANY: Morphological structure and reproduction of various plant organization types with a focus on the structure of plant tissue. Representation of the relationships between structure and function with regard to absorption processes, transport processes, transpiration, and photosynthesis.</p> <p>ZOOLOGY: Morphological structure of animal tissues. Biology of selected partial taxa and metazoans. Principles of phylogenetic systematics and the phylogenetic position in the animal system of the taxa dealt with.</p>

**Recommended reading**

GENERAL:: Campbell: Biologie (Spektrum Verlag) or Purves: Biologie (Spektrum Verlag), latest edition

ZOOLOGY: V. Storch: Kükenthal Zoologisches Praktikum, one of the latest editions; Optional: Ax, P. (1999-2001): Das System der Metazoa (I,II, III), Fischer Verlag.

Westheide/Rieger (1996): Spezielle Zoologie " First part: Einzeller und Wirbellose Tiere, Gustav Fischer Verlag, Stuttgart; Westheide, Wilfried; Rieger, Reinhard Spezielle Zoologie. Second part: Wirbel- oder Schädeltiere 2003, 714 S., 650 s/w Abb. Gebunden ISBN 3-8274-0900-4.

BOTANY: Script; Kück, Wolff Botanisches Grundpraktikum, 2nd edition, Springer, 2008, UTB; Grundlagen der Botanik, UTB; Lüttge, Kluge, Bauer, Botanik, WILEY-VCH, 2010

## bio239 - Didactical Exercises and Genetics

<b>Module label</b>	Didactical Exercises and Genetics		
<b>Module code</b>	bio239		
<b>Credit points</b>	6.0 KP		
<b>Workload</b>	180 h		
<b>Applicability of the module</b>	<ul style="list-style-type: none"> <li>Dual-Subject Bachelor's Programme Biology (Bachelor) &gt; Basismodule</li> </ul>		
<b>Responsible persons</b>	<ul style="list-style-type: none"> <li>Hößle, Corinna (module responsibility)</li> <li>Weusmann, Birgit (Module counselling)</li> <li>Kapteina, Ulrich (Module counselling)</li> <li>Knapp, Edgar (Module counselling)</li> <li>Plewka, Isabelle (Module counselling)</li> <li>Claußen, Maike (Module counselling)</li> <li>Hößle, Corinna (authorised to take exams)</li> <li>Claußen, Maike (authorised to take exams)</li> <li>Weusmann, Birgit (authorised to take exams)</li> <li>Kapteina, Ulrich (authorised to take exams)</li> <li>Knapp, Edgar (authorised to take exams)</li> <li>Plewka, Isabelle (authorised to take exams)</li> </ul>		
<b>Prerequisites</b>			
<b>Skills to be acquired in this module</b>	- Die Studierenden erwerben genetische Fachkenntnisse - Entwicklung bzw. Adaptation von Lerneinheiten an Lernausgangssituation von Schülern - Erprobung dieser Lerneinheiten ohne und mit Schülern, anschließende Reflexion		
<b>Module contents</b>	<p>Teil 1: Grundlagen der Genetik: Mitose und Zellzyklus, Meiose und Rekombination, Mendelsche Vererbungslehre, chromosomale und molekulare Grundlagen der Vererbung: Replikation, Transkription, Translation, Mutation und DNA-Reparatur, Organisation des genetischen Materials und Genregulation. (Studierende mit dem Ziel "Master of Education" müssen nur den Vorlesungsteil "Genetik" belegen, der ab der 2. Semesterhälfte stattfindet.)</p> <p>Teil 2: Didaktische Übungen: In der ersten Phase begleiten Studierende Umweltpädagogen der Grünen Schule oder anderer außerschulischer Lernstandorte (Regionales Umweltbildungszentrum Oldenburg, Park der Gärten) und lernen im Selbsttest verschiedene Aktionskonzepte kennen. Diese Konzeptionen werden anschließend an ausgewählte Lerngruppen adaptiert und untereinander erprobt (Phase 2). In der dritten Phase können Studierende die Lernprozesse der Schüler selbst anregen, indem sie selbst im Teamenteaching unterrichten. In einer abschließenden Reflexion werden die Erfahrungen gesammelt und eingeordnet (Phase 4).</p>

## bio224 - Introductory Zoology (Animal Morphology and Evolution)

<b>Module label</b>	Introductory Zoology (Animal Morphology and Evolution)
<b>Module code</b>	bio224
<b>Credit points</b>	6.0 KP
<b>Workload</b>	180 h
<b>Applicability of the module</b>	<ul style="list-style-type: none"><li>• Bachelor's Programme Biology (Bachelor) &gt; Basismodule</li><li>• Dual-Subject Bachelor's Programme Biology (Bachelor) &gt; Basismodule</li></ul>
<b>Responsible persons</b>	<ul style="list-style-type: none"><li>• Ahlrichs, Wilko (module responsibility)</li><li>• Ahlrichs, Wilko (Module counselling)</li><li>• Käfer, Simon (Module counselling)</li><li>• Ahlrichs, Wilko (authorised to take exams)</li></ul>
<b>Prerequisites</b>	
<b>Skills to be acquired in this module</b>	

++ biologische Fachkenntnisse + Kenntnisse biologischer Arbeitstechniken  
++grundlegende Kenntnisse zum Aufbau und Umgang mit dem Mikroskop (Köhlern) ++grundlegende Kenntnisse zur menschlichen Wahrnehmung von Gestalt ++ grundlegende Kenntnisse zum wissenschaftlichen Zeichnen und Illustration ++ biologierelevante naturwissenschaftliche/mathematische Grundkenntnisse + Abstraktes, logisches, analytisches Denken + Selbstständiges Lernen und (forschendes) Arbeiten + Teamfähigkeit

THEORIE: - Grundlagen der Methoden der Rekonstruktion der phylogenetischen Systematik verstehen - Die Stellung der wichtigsten Tiergruppen im Phylogenetischen System der Tiere kennen. Grundmuster, insbesondere Autapomorphien von ranghohen Stammarten kennen.

Morphologie, Funktion und Evolution tierischer Zellstrukturen, Organe und Organsysteme (Epidermis, Muskelsysteme, Leibeshöhlenverhältnisse, Kreislaufsysteme, Exkretionssysteme, Nerven- und Sinnessysteme, Verdauungssysteme, Reproduktionssysteme; weiterhin Atmung, Ernährung, Fortpflanzung und Entwicklung kennen. Morphologie und Ökologie ausgesuchter Tierarten kennen.

PRAXIS: - theoretischen Kenntnisse aus Vorlesungen und Lehrbuch am Original vertiefen und überprüfen - visuelle und taktile Wahrnehmung an unterschiedlichen Arten schulen - erfahren, dass Lehrbuchdarstellungen Abstraktionen einer sehr viel komplexeren Wirklichkeit sind - in die Lage versetzt werden, Lehrbuchdarstellungen und Modelle zu kritisieren - am Präparat die Kenntnisse erwerben, die für das Verständnis der Funktion am lebenden Tier erforderlich sind - lernen, mit Präparieranleitungen zu arbeiten - lernen, dass der Bau einzelner Arten sehr variabel sein kann - sich üben in der Umsetzung des am Original Gesehenen in ein Protokoll, z.B. eine Zeichnung - einen verantwortungsvollen Umgang mit Tieren lernen - handwerkliches Geschick in der Präparation von Tieren erlernen.

---

### Module contents

ALLGEMEIN: Methode der phylogenetischen Systematik, Hierarchischer Aufbau des Lebens.

Lichtmikroskop und lichtmikroskopische Methoden zur Untersuchung tierischer Strukturen. Protokolle in der Form von Beschreibungen und Zeichnungen.

SPEZIELL: Phylogenie der Tiere (Metazoa) und Teilen der Protisten. Die phylogenetische Stellung der behandelten Taxa im System der Tiere. Grundmuster der ranghohen Stammarten der Tiere und insbesondere deren Autapomorphien. Die Evolution wichtiger Zelltypen und die Evolution der Organsysteme, insbesondere Habitus mit Gliederung, Extremitäten und Anhänge, Epidermis, Muskelsysteme, Leibeshöhlen und Kreislaufsysteme, Exkretionssysteme, Nerven- und Sinnessysteme, Verdauungssysteme, Reproduktionssysteme; weiterhin Fortpflanzung und Entwicklung, Nahrungsbeschaffung, Nahrungsaufnahme und Verdauung. Die Morphologie und Ökologie ausgewählter Arten.

### Prerequisites

#### Skills to be acquired in this module

- ++ biological knowledge
- + knowledge of biological working methods
- ++ biologically relevant knowledge in the natural sciences and mathematics
- + abstract, logical, analytical thinking
- + deepened expertise in biological specialist field
- + independent learning and (research-based) working

### Module contents

Overview of structure, function and biosynthesis of the major classes of substances and metabolic processes, structure and function of carbohydrates, proteins and nucleic acids; biological membranes and transmembrane transport; cell structure, structure and function of organelles, protein synthesis and post-translational modification; intracellular transport processes, messenger substances and cellular communication, cell division and controlled cell death. Introduction in pathogens, cell biology of bacterial and viral infection, innate and acquired immune system.

- Molecular basis of genetics
- DNA replication
- Cell division Mitosis and meiosis
- Transcription
- The genetic code
- Translation
- Regulation of gene expression
- Mutation and DNA repair
- Mendelian genetics and formal genetics
- Analysis of pedigrees
- Sex chromosome-linked inheritance
- Genome organization

## bio100 - Introduction into Didactics of Biology

<b>Module label</b>	Introduction into Didactics of Biology	
<b>Module code</b>	bio100	
<b>Credit points</b>	6.0 KP	
<b>Workload</b>	180 h	
<b>Applicability of the module</b>	<ul style="list-style-type: none"> <li>• Dual-Subject Bachelor's Programme Biology (Bachelor) &gt; Aufbaumodule</li> <li>• Master of Education Programme (Special Needs Education) Biology (Master of Education) &gt; Mastermodule</li> </ul>	
<b>Responsible persons</b>	<ul style="list-style-type: none"> <li>• Hößle, Corinna (Module counselling)</li> <li>• Rathje, Wiebke (Module counselling)</li> <li>• Hößle, Corinna (module responsibility)</li> <li>• Hößle, Corinna (authorised to take exams)</li> <li>• Rathje, Wiebke (authorised to take exams)</li> <li>• Winkler, Holger (authorised to take exams)</li> <li>• Heusinger von Waldege, Kerstin (authorised to take exams)</li> <li>• Grass, Stefanie (authorised to take exams)</li> <li>• Avrillon, Nathalie (authorised to take exams)</li> </ul>	
<b>Prerequisites</b>		
<b>Skills to be acquired in this module</b>	<p>Skills taught by this module: The students will be introduced to the basics of didactics of biology. In the beginning the focus will lie on the standards of education and school-curriculums. Afterwards scientific methods, different methods of education, media, social forms and the culture of problem solving in biological classes will be reflected and realized by concrete examples out of everyday practice (micro-teaching). During the second half of the module the students will be able to conceive and reflect own concepts of teaching. Furthermore the possibilities of studying in out-of-school-facilities will be fathomed, excursions planned, realized and reflected. Importance of this module during the studies: Teaching skills for all fields of study (compulsory subject for following degrees: teaching post in primary school (Grundschule), extended elementary school (Hauptschule) and secondary school (Realschule)).</p>	
<b>Module contents</b>	<p>3. semester: seminar Introduction to curricular standards, media, methods, social forms, concepts of pupils, instruments of diagnosis, natural scientific methods, culture of exercises in biological classes. Construction of teaching that considers social matters and the environment of the pupils.</p> <p>4. semester: seminar and excursions Forms and places for teaching biology, methods and media for teaching biological contents in different spheres of activity (scientific museums, botanical and zoological gardens, regional environmental centers, the Wadden Sea national park).</p>

## bio110 - Practical Biology Experiments for Science Education

<b>Module label</b>	Practical Biology Experiments for Science Education
<b>Module code</b>	bio110
<b>Credit points</b>	6.0 KP
<b>Workload</b>	180 h
<b>Applicability of the module</b>	<ul style="list-style-type: none"><li>• Dual-Subject Bachelor's Programme Biology (Bachelor) &gt; Aufbaumodule</li><li>• Master of Education Programme (Gymnasium) Biology (Master of Education) &gt; Mastermodule</li><li>• Master of Education Programme (Special Needs Education) Biology (Master of Education) &gt; Mastermodule</li></ul>
<b>Responsible persons</b>	<ul style="list-style-type: none"><li>• Rathje, Wiebke (module responsibility)</li><li>• Höße, Corinna (Module counselling)</li><li>• Rathje, Wiebke (Module counselling)</li><li>• Rathje, Wiebke (authorised to take exams)</li><li>• Plewka, Isabelle (authorised to take exams)</li><li>• Wübben, Anja (authorised to take exams)</li></ul>
<b>Prerequisites</b>	Voraussetzung an der Teilnahme ist der erfolgreiche Abschluss des Moduls bio100.
<b>Skills to be acquired in this module</b>	<p>Die Studierenden erwerben folgende Kompetenzen: Studierende</p> <ul style="list-style-type: none"><li>• lernen basale Arbeits- und Erkenntnismethoden der Biologie unter besonderer Berücksichtigung der Zoologie und Botanik kennen und wenden diese bei der Planung von Lernarrangements an</li><li>• verfügen insbesondere über Kenntnisse und Fähigkeiten im hypothesengeleiteten Experimentieren, im kriteriengeleiteten Vergleichen, beim Nutzen von Modellen sowie im Handhaben von schulrelevanten Geräten</li><li>• verfügen über grundlegende Kenntnisse allgemeiner Experimentiermethoden</li><li>• können Unterrichtskonzepte und -medien fachgerecht gestalten und inhaltlich bewerten.</li><li>• kennen Möglichkeiten zur Gestaltung von Lernarrangements insbesondere unter Berücksichtigung heterogener Lernvoraussetzungen</li><li>• verfügen über grundlegende Kenntnisse zu potentiellen Lernschwierigkeiten und zu der Vielfalt von Schülervorstellungen in den behandelten Themengebieten unter Inklusionsbedingungen sowie über Grundlagen Standard- und kompetenzorientierten Vermittlungsprozesse in heterogenen Lerngruppen</li><li>• können auf der Grundlage ihrer fachbezogenen Expertise hinsichtlich Planung und Gestaltung eines inklusiven Unterrichts mit sonderpädagogisch qualifizierten Lehrkräften gemeinsame fachliche Lernangebote entwickeln.</li><li>• können digitale Lernmittel in ihren Lernarrangements integrieren und sie zur Differenzierung und individuellen Förderung im Unterricht einsetzen.</li><li>• sind in der Lage, Entwicklungen im Bereich Digitalisierung aus fachlicher und fachdidaktischer Sicht angemessen zu rezipieren sowie Möglichkeiten und Grenzen der Digitalisierung kritisch zu reflektieren. Sie können die daraus gewonnenen Erkenntnisse in fachdidaktischen Kontexten nutzen sowie in die Weiterentwicklung unterrichtlicher und curricularer Konzepte einbringen. Sie sind sensibilisiert für die Chancen digitaler Lernmedien hinsichtlich Barrierefreiheit und nutzen digitale Medien auch zur Differenzierung und individuellen Förderung im Unterricht</li></ul>
<b>Module contents</b>	<p>Das Modul umfasst ein Seminar und eine Übung. Im Rahmen der praktischen Übung lernen die Studierenden klassische und innovative Schulversuche zur Botanik und Zoologie kennen. Sie werden aufgefordert die Versuche unter Einbezug digitaler Werkzeuge eigenständig vorzubereiten, durchzuführen und zu reflektieren. Die Studierenden erlernen dabei basale biologische Arbeits-Erkenntnismethoden und entwickeln Lernarrangements zum hypothesengeleiteten Experimentieren.</p> <p>Im Seminar entwickeln und verschriftlichen die Studierenden unter dem Einbezug sonderpädagogischer Fallbeispiele Unterrichtskonzepte für heterogene sowie inklusive Lerngruppen und diskutieren diese gemeinsam. Die Studierenden üben sich so in der Entwicklung von inklusiven</p>

Lernarrangements, deren Ziel es ist, naturwissenschaftliche Arbeits- und Denkweisen in heterogenen Lerngruppen zu fördern.

<b>Prerequisites</b>	
<b>Skills to be acquired in this module</b>	+ biological knowledge + knowledge of biological working methods + independent learning and (research-based) working + knowledge of safety and environmental issues To determine species-rich taxa and to verify the results independently using relevant literature
<b>Module contents</b>	Lecture: Introduction to the variety of indigenous flora and fauna, presentation of important plant families and animal groups, studying the characteristics important for determination, introduction to systematics. Moreover, subjects are included that present ecological aspects of the taxa dealt with. Exercise: Applying literature to determine animal and plant species and to classify them systematically. Field Exercise: Excursions to the characteristic North German biotopes. The excursions focus on correct identification and classification of plants and animals according to the properties of the living organism.

<b>Prerequisites</b>				
<b>Skills to be acquired in this module</b>	<p>++ biological knowledge            ++ knowledge of biological working methods            ++ biologically relevant knowledge in the natural sciences and mathematics            + statistics &amp; scientific programming            ++ interdisciplinary knowledge &amp; thinking            ++ abstract, logical, analytical thinking            ++ deepened expertise in biological specialist field</p> <p>The field of molecular ecology examines relationships among genotypes, phenotypes and the environment to explain evolution and diversity of organisms. The lecture will introduce basics in genomics, molecular evolution and population genetics to explore properties of the genome and the organism from an evolutionary perspective. Central aspects are the adaptation of species to their environment and ecological change, speciation, the genetic basis of phenotypic change. Methods and data used in genomics and molecular ecology will be introduced during the lecture and exercises.</p>			
<b>Module contents</b>	<p>Lecture: the lecture conveys knowledge about the fields of genomics, evolution and organismic biology. Moreover laboratory methods as well as basics and background information on the analysis of genetic and genomic datasets are given.</p> <p>Excercise: Modern data sets and up to date methods in genomics and population genetics are introduced. The practical emphasizes computer based data analyses.</p>

## bio218 - Learning biological Instruction in the Nature

<b>Module label</b>	Learning biological Instruction in the Nature	
<b>Module code</b>	bio218	
<b>Credit points</b>	3.0 KP	
<b>Workload</b>	90 h	
<b>Applicability of the module</b>	<ul style="list-style-type: none"> <li>• Dual-Subject Bachelor's Programme Biology (Bachelor) &gt; Aufbaumodule</li> <li>• Dual-Subject Bachelor's Programme Biology (Bachelor) &gt; Basismodule</li> </ul>	
<b>Responsible persons</b>	<ul style="list-style-type: none"> <li>• Plewka, Isabelle (module responsibility)</li> <li>• Hößle, Corinna (Module counselling)</li> <li>• Plewka, Isabelle (Module counselling)</li> <li>• Weusmann, Birgit (authorised to take exams)</li> <li>• Plewka, Isabelle (authorised to take exams)</li> <li>• Knapp, Edgar (authorised to take exams)</li> <li>• Zietz, Anna (authorised to take exams)</li> <li>• Wölki, Dana (authorised to take exams)</li> </ul>	
<b>Prerequisites</b>		
<b>Skills to be acquired in this module</b>	<p>Development or adaptation of learning units to the specific learning situation of pupils - testing of these learning units without and with pupils, subsequent reflection</p> <p>+biological knowledge          +knowledge of biological working methods          +biologically relevant knowledge in the natural sciences and mathematics          +interdisciplinary knowledge &amp; thinking          +deepened expertise in biological specialist field          +independent learning and (research-based) working          +teamwork          ++(scientific) communication skills          +project and time management          +knowledge of safety and environmental issues</p>	
<b>Module contents</b>	<p>In the first phase, students accompany environmental educators from the Green School or other extracurricular learning locations (Regionales Umweltbildungszentrum Oldenburg, Park der Gärten) and learn about various action concepts in a self-test. These concepts are then adapted to selected learning groups and tested among themselves (phase 2). In the third phase, students can stimulate the learning processes of the pupils by team teaching. In a final reflection, the experiences are collected and classified (phase 4).</p>

## bio303 - Evolutionary History of Life: Life through the Ages

<b>Module label</b>	Evolutionary History of Life: Life through the Ages
<b>Module code</b>	bio303
<b>Credit points</b>	6.0 KP
<b>Workload</b>	180 h
<b>Applicability of the module</b>	<ul style="list-style-type: none"><li>• Dual-Subject Bachelor's Programme Biology (Bachelor) &gt; Aufbaumodule</li><li>• Master of Education Programme (Special Needs Education) Biology (Master of Education) &gt; Mastermodule</li></ul>
<b>Responsible persons</b>	<ul style="list-style-type: none"><li>• Albach, Dirk Carl (module responsibility)</li><li>• Will, Maria (Module counselling)</li><li>• Wilke, Tanja (Module counselling)</li><li>• Albach, Dirk Carl (authorised to take exams)</li><li>• Will, Maria (authorised to take exams)</li><li>• Wilke, Tanja (authorised to take exams)</li><li>• von Hagen, Klaus Bernhard (authorised to take exams)</li><li>• Plewka, Isabelle (authorised to take exams)</li><li>• Donat, Frank Henrik (authorised to take exams)</li></ul>
<b>Prerequisites</b>	
<b>Skills to be acquired in this module</b>	<ul style="list-style-type: none"><li>+ Biological expertise for species and family knowledge and independent identification of native plant species (focus on angiosperms).</li><li>+ Biological knowledge of plant morphology and characteristics relevant to plant identification</li><li>+ Understanding of concepts of evolution of biological diversity and classification systems underlying plant systematics.</li><li>+ Knowledge of biological working techniques, especially the use of magnifying glasses and stereolenses</li><li>+ Independent learning and ( research-oriented ) work</li><li>+ Knowledge of safety and environmental issues</li><li>+ Sustainable handling of nature</li></ul>
<b>Module contents</b>	<p>The module is designed to introduce students to the diversity of native flora and fauna and to animal and Plant identification. This is essential for all areas of biology that deal with plants and</p> <p>animals, indispensable. Especially for the education in the field of nature conservation</p> <p>and teaching profession this knowledge is essential. Topics and methods that are relevant for these professions are therefore emphasized. The students should get basic species knowledge and learn the working methods and skills of identification. This also involves providing a systemic basis of knowledge of Habitats in Northwest Germany. There will be a basic assessment competency in the</p> <p>biodiversity and nature conservation, in order to teach the students how to responsibly handle organisms.</p> <p>Ü1: Work with different literature for the identification of animal and plant species and their</p> <p>classification in the systematics.</p> <p>Ü2: Excursions to characteristic northern German habitats and to the botanical garden. During the excursions the emphasis is on the correct identification and classification of plants and animals according to the characteristics of the living organism.</p>

Modul für **Lehramts-Studierende** und 2FB-Studierende ohne Lehramtsorientierung **mit Studienbeginn ab WiSe 23/24**. Lehramts-Studierende und 2FB-Studierende ohne Lehramtsorientierung mit Studienbeginn vor dem WiSe 23/24 studieren das Modul bio245 (Übergangsbestimmung bis zum Sommersemester 2025; auf Antrag und mit Zustimmung des Prüfungsausschusses ist auch ein Wechsel in die aktuelle Prüfungsordnung möglich)

Examination	Prüfungszeiten	Type of examination		
<b>Final exam of module</b>	Written exams at the end of each part (flora and fauna)	1 written exam (botany 50 %), 1 written exam (zoology 50 %). The exam in botany consists in one half of a test of theoretical knowledge (theory part) and one half testing the practical skills in plant identification (practical part). In the latter, plants are identified using technical literature and, if necessary, optical aids (magnifying glass) and characterized with technical terms. In addition, there are ungraded excursion protocols. In addition, the general conditions set by the examination authorities apply, such as attendance and required ungraded performances.

## bio330 - Marine Ecology

<b>Module label</b>	Marine Ecology
<b>Module code</b>	bio330
<b>Credit points</b>	15.0 KP
<b>Workload</b>	450 h
<b>Applicability of the module</b>	<ul style="list-style-type: none"><li>• Bachelor's Programme Biology (Bachelor) &gt; Akzentsetzungsmodule</li><li>• Dual-Subject Bachelor's Programme Biology (Bachelor) &gt; Akzentsetzungsmodule</li><li>• Master of Education Programme (Gymnasium) Biology (Master of Education) &gt; Mastermodule</li></ul>
<b>Responsible persons</b>	<ul style="list-style-type: none"><li>• Hillebrand, Helmut (module responsibility)</li><li>• Moorthi, Stefanie (Module counselling)</li><li>• Garcia, Sarahi Lorena (Module counselling)</li><li>• Hillebrand, Helmut (authorised to take exams)</li><li>• Moorthi, Stefanie (authorised to take exams)</li><li>• Garcia, Sarahi Lorena (authorised to take exams)</li></ul>
<b>Prerequisites</b>	
<b>Skills to be acquired in this module</b>	<p>++ biological knowledge ++ knowledge of biological working methods ++ biologically relevant knowledge in the natural sciences and mathematics + statistics &amp; scientific programming + interdisciplinary knowledge &amp; thinking ++ abstract, logical, analytical thinking ++ deepened expertise in biological specialist field ++ independent learning and (research-based) working ++ data presentation and evidence-based discussion (written and spoken) + teamwork ++ (scientific) communication skills + project and time management</p> <p>Apply theoretical concepts from different fields in marine ecology Analyse, present, and interpret results from the marine ecological literature and own investigations Acknowledge the importance of general ecological concepts for ecosystem management Gain experience in the application of field and lab methods in ecology</p>
<b>Module contents</b>	<p>Lecture/Seminar Discussions on aquatic microbiology 2 SWS: Early Earth and diversification of life, Exploring the Microbial World, Metabolic diversity of microorganisms, Carbon cycle, Ecological diversity of phototrophic bacteria, Diversity of microbial Eukarya, Photosynthesis through evolution, Diversity of Archaea, Nitrogen cycle, Microbial Symbiosis, and Fate of Microorganisms in the aquatic environments.</p> <p>Exercise Concepts in marine ecology 6 SWS. Presence time 70 h, additional study time 200h, <b>winter-term</b> Practical and theoretical exercises on marine ecology, including field studies, experiments and working with case studies from the literature. The focus is on concepts here, pinpointing at general ecological frameworks. Lecture Marine Ecology 2 SWS. Presence time 24 h, additional study time 66h, <b>winter-term</b> Ecology of marine systems: estuaries, rocky and sediment coasts, pelagial, shelves, mangroves, seagrass meadows, coral reefs, deep sea, polar regions. The focus is on ecological specifics and interactions in the biotic communities of these systems. The second half of the lecture will focus on importance and consequences of overfishing, habitat destruction, pollution, climate change and bioinvasion on marine systems.</p>

## bio355 - Microscopic Anatomy II: Preparation, Microscopy and Documentation

<b>Module label</b>	Microscopic Anatomy II: Preparation, Microscopy and Documentation			
<b>Module code</b>	bio355			
<b>Credit points</b>	9.0 KP			
<b>Workload</b>	270 h			
<b>Applicability of the module</b>	<ul style="list-style-type: none"> <li>• Bachelor's Programme Biology (Bachelor) &gt; Akzentsetzungsmodule</li> <li>• Bachelor's Programme Mathematics (Bachelor) &gt; Nebenfachmodule</li> <li>• Dual-Subject Bachelor's Programme Biology (Bachelor) &gt; Akzentsetzungsmodule</li> <li>• Master of Education Programme (Gymnasium) Biology (Master of Education) &gt; Mastermodule</li> </ul>			
<b>Responsible persons</b>	<ul style="list-style-type: none"> <li>• Ahlrichs, Wilko (module responsibility)</li> <li>• Kieneke, Alexander (Module counselling)</li> <li>• Hoppenrath, Mona (Module counselling)</li> <li>• Ahlrichs, Wilko (authorised to take exams)</li> <li>• Hoppenrath, Mona (authorised to take exams)</li> <li>• Kieneke, Alexander (authorised to take exams)</li> </ul>			
<b>Prerequisites</b>	Abschluss der Basismodule			
<b>Skills to be acquired in this module</b>	<p>           ++ biological knowledge            ++ knowledge of biological working methods            ++ biologically relevant knowledge in the natural sciences and mathematics            + interdisciplinary knowledge &amp; thinking            ++ abstract, logical, analytical thinking            ++ deepened expertise in biological specialist field            ++ independent learning and (research-based) working            ++ data presentation and evidence-based discussion (written and spoken)            + teamwork            ++ (scientific) communication skills            + project and time management            + knowledge of safety and environmental issues         </p> <p>           This course is designed for students to learn about the basic light and electron optical methods. Students will be able to work with preparative techniques for scanning electron microscopy, trans-mission electron microscopy, and light microscopy, and confocal scanning laser microscopy. Students completing this course will have learned basic principles for fixing and embedding biological materials for electron microscopy. Students will have learned how to operate a transmission electron microscope, a scanning electron microscope, several ultramicrotomes, a vacuum evaporator, a critical point dryer, and a sputter coater. Digital imaging techniques that will be learned will include print making, design and assembly of materials for publication, PowerPoint presentations, and poster design. Students will be introduced to the principles of light microscopy utilizing different optical systems and will have the opportunity to have hands-on experience with a Leica photomicroscope as well as the Leica SP5 confocal laser scanning.         </p>			
<b>Module contents</b>	<p>Microscopy of protists and micro metazoans. Students are required plan and carry out a research project that exposes them to some of the challenges and problems encountered by microscopical anatomy - and some of the techniques that are used to solve these problems. Students have to present a scientific poster, a short oral presentation and a scientific paper.</p>			
<b>Recommended reading</b>	Will be announced in the course.

## bio360 - Marine Biodiversity

<b>Module label</b>	Marine Biodiversity
<b>Module code</b>	bio360
<b>Credit points</b>	15.0 KP
<b>Workload</b>	450 h
<b>Applicability of the module</b>	<ul style="list-style-type: none"><li>• Bachelor's Programme Biology (Bachelor) &gt; Akzentsetzungsmodule</li><li>• Dual-Subject Bachelor's Programme Biology (Bachelor) &gt; Akzentsetzungsmodule</li><li>• Master of Education Programme (Gymnasium) Biology (Master of Education) &gt; Mastermodule</li></ul>
<b>Responsible persons</b>	<ul style="list-style-type: none"><li>• Martinez Arbizu, Pedro Miguel (module responsibility)</li><li>• Hoppenrath, Mona (Module counselling)</li><li>• Martinez Arbizu, Pedro Miguel (authorised to take exams)</li><li>• Hoppenrath, Mona (authorised to take exams)</li><li>• Wehrmann, Achim (authorised to take exams)</li></ul>
<b>Prerequisites</b>	Abschluss der Basismodule
<b>Skills to be acquired in this module</b>	<p>++ biological knowledge ++ knowledge of biological working methods + interdisciplinary knowledge &amp; thinking + abstract, logical, analytical thinking ++ deepened expertise in biological specialist field ++ independent learning and (research-based) working ++ data presentation and evidence-based discussion (written and spoken) + teamwork + (scientific) communication skills + project and time management</p> <p>By active participation the students acquire the following knowledge/abilities/qualification:</p> <ul style="list-style-type: none"><li>* Preparation and organization of sampling</li><li>* Keeping organisms – field study</li><li>* Marine deposits, development of marine sediments and their effects on the fauna</li><li>* Methods of meiofauna and macrofauna sampling, also plankton sampling</li><li>* Methods of quantitative community analysis</li><li>* Diversity comparison of various sites applying statistical methods</li><li>* Multivariate statistics for correlation of biocenoses and environmental variables</li><li>* Biocenoses of marine habitats</li><li>* Biology, morphology, systematics, behaviour and ecology of selected taxa in marine water systems</li><li>* Formulation and definition of scientific questions and selection of methods</li><li>* Habitat and biocenoses, interstitial, littoral (lotic, lenitic), diversity</li><li>* Planning behavioural experiments</li><li>* Presentation and discussion of scientific results</li><li>* Independent scientific work in groups and presentation of results</li></ul>
<b>Module contents</b>	<p>The module gives an introduction to marine biodiversity research demonstrated by various animal groups from the Wadden Sea and the North Sea including independent sampling on the coast and on the islands. The students will collect the organisms in the field or on board using sampling equipment. In the laboratory course, the biology and morphology as well as the ecology and behaviour of certain species are investigated and documented. The morphology of marine sediments and their development are further aspects of this module.</p>

## bio375 - Flora - Advanced Concepts

<b>Module label</b>	Flora - Advanced Concepts			
<b>Module code</b>	bio375			
<b>Credit points</b>	6.0 KP			
<b>Workload</b>	180 h			
<b>Applicability of the module</b>	<ul style="list-style-type: none"> <li>• Bachelor's Programme Biology (Bachelor) &gt; Akzentsetzungsmodule</li> <li>• Bachelor's Programme Mathematics (Bachelor) &gt; Nebenfachmodule</li> <li>• Dual-Subject Bachelor's Programme Biology (Bachelor) &gt; Akzentsetzungsmodule</li> <li>• Master of Education Programme (Gymnasium) Biology (Master of Education) &gt; Mastermodule</li> </ul>			
<b>Responsible persons</b>	<ul style="list-style-type: none"> <li>• Albach, Dirk Carl (module responsibility)</li> <li>• von Hagen, Klaus Bernhard (Module counselling)</li> <li>• Will, Maria (Module counselling)</li> <li>• Albach, Dirk Carl (authorised to take exams)</li> <li>• von Hagen, Klaus Bernhard (authorised to take exams)</li> <li>• Will, Maria (authorised to take exams)</li> </ul>			
<b>Prerequisites</b>	bio256 Flora and Fauna			
<b>Skills to be acquired in this module</b>	<p>+ biological knowledge            + knowledge of biological working methods            + deepened expertise in biological specialist field            + independent learning and (research-based) working            + data presentation and evidence-based discussion (written and spoken)            + (scientific) communication skills            + knowledge of safety and environmental issues</p> <p>The module is intended to give students in-depth knowledge on plant determination and the diversity of plants. Students shall increase their knowledge on species and learn and improve their abilities in plant determination and plant conservation. Subjects and methods relevant for nature conservation are emphasized. Along with these, students shall improve their systemic thinking with relation to nature in northwestern Germany and its flora. Students learn about plants and how to group them according to their phylogeny and evolutionary adaptations, so they can pass this knowledge on to others. Competence in assessment is conveyed in the areas of diversity and nature conservation to sensitize students for a respectful treatment of nature and passing on this ability to others. Finally, we will discuss sustainable use of plants and habitats and their restoration.</p>			
<b>Module contents</b>	<p>The module comprises a lecture in the Botanical Garden, where plants will be observed and investigated. This includes algae, bryophytes, ferns, gymnosperms and various families of angiosperms. The seminar is intended to let students study in-depth additional plant families with their typical characters.</p>

## bio405 - Introduction to Neurobiology I

<b>Module label</b>	Introduction to Neurobiology I			
<b>Module code</b>	bio405			
<b>Credit points</b>	12.0 KP			
<b>Workload</b>	360 h			
<b>Applicability of the module</b>	<ul style="list-style-type: none"> <li>• Bachelor's Programme Biology (Bachelor) &gt; Akzentsetzungsmodule</li> <li>• Bachelor's Programme Mathematics (Bachelor) &gt; Nebenfachmodule</li> <li>• Dual-Subject Bachelor's Programme Biology (Bachelor) &gt; Akzentsetzungsmodule</li> <li>• Master of Education Programme (Gymnasium) Biology (Master of Education) &gt; Mastermodule</li> </ul>			
<b>Responsible persons</b>	<ul style="list-style-type: none"> <li>• Greschner, Martin (module responsibility)</li> <li>• Koch, Karl-Wilhelm (Module counselling)</li> <li>• Janssen-Bienhold, Ulrike (Module counselling)</li> <li>• Köppl, Christine (authorised to take exams)</li> <li>• Janssen-Bienhold, Ulrike (authorised to take exams)</li> <li>• Greschner, Martin (authorised to take exams)</li> <li>• Koch, Karl-Wilhelm (authorised to take exams)</li> <li>• Dömer, Patrick (authorised to take exams)</li> </ul>			
<b>Prerequisites</b>	Abschluss der Basismodule			
<b>Skills to be acquired in this module</b>	++ deepened biological expertise ++ deepened knowledge of biological working methods + scientific/mathematical basic knowledge relevant for biology + critical and analytical thinking ++ data presentation and discussion in German (written and spoken) + teamwork			
<b>Module contents</b>	The lecture covers the molecular and cellular basis of neurobiology, the electrical properties of nerve cells, the organization and development of the nervous system and the function of the motor system. In the seminar, topics related to the lectures of the week are covered in more depth. In the exercises, the theoretical knowledge from the lectures will be tested in small experiments.

## bio440 - Microscopic Anatomy I: Microfauna and Protista of Aquatic Habitats

<b>Module label</b>	Microscopic Anatomy I: Microfauna and Protista of Aquatic Habitats
<b>Module code</b>	bio440
<b>Credit points</b>	6.0 KP
<b>Workload</b>	180 h
<b>Applicability of the module</b>	<ul style="list-style-type: none"><li>• Bachelor's Programme Biology (Bachelor) &gt; Akzentsetzungsmodule</li><li>• Dual-Subject Bachelor's Programme Biology (Bachelor) &gt; Akzentsetzungsmodule</li><li>• Master of Education Programme (Gymnasium) Biology (Master of Education) &gt; Mastermodule</li></ul>
<b>Responsible persons</b>	<ul style="list-style-type: none"><li>• Ahlrichs, Wilko (module responsibility)</li><li>• Kieneke, Alexander (Module counselling)</li><li>• Hoppenrath, Mona (Module counselling)</li><li>• Ahlrichs, Wilko (authorised to take exams)</li><li>• Kieneke, Alexander (authorised to take exams)</li><li>• Hoppenrath, Mona (authorised to take exams)</li></ul>
<b>Prerequisites</b>	Abschluss der Basismodule
<b>Skills to be acquired in this module</b>	<p>++ biological knowledge ++ knowledge of biological working methods ++ biologically relevant knowledge in the natural sciences and mathematics + statistics &amp; scientific programming ++ interdisciplinary knowledge &amp; thinking + abstract, logical, analytical thinking ++ deepened expertise in biological specialist field ++ independent learning and (research-based) working ++ data presentation and evidence-based discussion (written and spoken) + teamwork ++ (scientific) communication skills + project and time management</p> <p>The objectives of the module are the teaching and learning of methods in the field of taxonomy, systematics, morphology, ecology, and evolution. Competencies for finding, identifying, preparing, micro-copying, illustrating, describing, and publishing species are taught. It learns how a scientific collection is created and managed. Another goal is the teaching of basics of molecular systematics and barcoding.</p> <p>The focus is on taxa of the microfauna and protists of limnic and marine habitats.</p> <p>The goal is the knowledge of biotic and abiotic properties of aquatic habitats, their formation and biodiversity. The students should learn to hypothesize structural adaptations of organisms to aquatic habitats.</p>
<b>Module contents</b>	<p>We study microfauna and protists of limnic and marine habitats. Microfauna refers to microscopic animals. They live together with protists in aquatic habitats in high diversity.</p> <p>Animals of the microfauna and protists usually belong to groups that developed early in evolution. The study of communities of these groups give a unique insight into the evolution of animals and protists.</p> <p>The microfauna and the protists are little studied compared to other groups of animals and offer great potential. But they must be examined under the optical microscope. This requires special techniques and knowledge. Fortunately, through digital techniques, the investigation and publications have been greatly simplified.</p> <p>We will make excursions to ponds, lakes, rivers, bogs, sea beaches, etc. It teaches where, when, and how to find species of microfauna and protists. The collected organisms are determined, prepared, microscopied, photographed, drawn, and digitally illustrated.</p> <p>Art descriptions are produced. Attention is paid to the correct application of nomenclature rules. We show how a scientific collection is built and managed. For this purpose, basic knowledge in SQL database technology is taught. Dichotomous, synoptic, and digital identification keys are presented and developed.</p> <p>In addition to the classical morphological methods, it will be shown how species for molecular barcoding and phylogenetic analyses are investigated. The students will create art portraits. The results are communicated in the form of posters, short lectures, and scientific publications.</p>
<b>Recommended reading</b>	Will be announced in the course.

## bio450 - Posters, Pictures, Presentations and Papers

<b>Module label</b>	Posters, Pictures, Presentations and Papers	
<b>Module code</b>	bio450	
<b>Credit points</b>	9.0 KP	
<b>Workload</b>	270 h	
<b>Applicability of the module</b>	<ul style="list-style-type: none"> <li>• Bachelor's Programme Biology (Bachelor) &gt; Akzentsetzungsmodule</li> <li>• Dual-Subject Bachelor's Programme Biology (Bachelor) &gt; Akzentsetzungsmodule</li> <li>• Master of Education Programme (Gymnasium) Biology (Master of Education) &gt; Mastermodule</li> </ul>	
<b>Responsible persons</b>	<ul style="list-style-type: none"> <li>• Bininda-Emonds, Olaf (module responsibility)</li> <li>• Ahlrichs, Wilko (Module counselling)</li> <li>• Bininda-Emonds, Olaf (authorised to take exams)</li> <li>• Ahlrichs, Wilko (authorised to take exams)</li> </ul>	
<b>Prerequisites</b>	Abschluss der Basismodule	
<b>Skills to be acquired in this module</b>	<p>+ interdisciplinary knowledge &amp; thinking            + abstract, logical, analytical thinking            + deepened expertise in biological specialist field            ++ independent learning and (research-based) working            ++ data presentation and evidence-based discussion (written and spoken)            ++ (scientific) communication skills            + project and time management</p> <p>Practical experience with four forms of scientific presentation: papers, presentations, scientific drawings, and posters. The students will learn / gain: 1) the logical and structural form of a scientific paper (or protocol or thesis) so as to communicate their results more effectively; 2) the distillation of the key information out of a project and its focused presentation in a lecture or poster; 3) experience with constructive criticism in a group setting as well as the critical assessment of scientific studies; 4) experience with scientific English; and 5) the art of scientific drawing, including the making of high-quality photo montages for papers or posters through microphotography and digital editing.</p>	
<b>Module contents</b>	<p>Theoretical part: General tips regarding the logical and structural form of a scientific paper, presentation, or posters, including how to avoid making the most common mis-takes.</p> <p>Practical part: Critical analysis of selected papers from the (evolutionary biological) literature. Writing of a scientific paper using pre-given results. Construction and presentation of a lecture and poster in front of the group based on a recent paper from the literature. Through the feedback obtained in this process, improvements will be made in both cases. Microscopic photography of selected zoological specimens that will then be transferred to / drawn on transparent paper before being rescanned for digital editing. High-quality photo montages of both the photos themselves and the drawings derived from them will be obtained through diverse software (e.g., Adobe Illustrator or InDesign).</p>	
<b>Recommended reading</b>	None. The relevant scientific literature will be distributed during the course.

## bio473 - Evolutionsgeschichte des Lebens: Leben im Wandel der Erdzeitalter

<b>Module label</b>	Evolutionsgeschichte des Lebens: Leben im Wandel der Erdzeitalter			
<b>Module code</b>	bio473			
<b>Credit points</b>	6.0 KP			
<b>Workload</b>	180 h			
<b>Applicability of the module</b>	<ul style="list-style-type: none"> <li>• Bachelor's Programme Biology (Bachelor) &gt; Akzentsetzungsmodule</li> <li>• Dual-Subject Bachelor's Programme Biology (Bachelor) &gt; Akzentsetzungsmodule</li> <li>• Master of Education Programme (Gymnasium) Biology (Master of Education) &gt; Mastermodule</li> </ul>			
<b>Responsible persons</b>	<ul style="list-style-type: none"> <li>• Ahlrichs, Wilko (module responsibility)</li> <li>• Ahlrichs, Wilko (authorised to take exams)</li> </ul>			
<b>Prerequisites</b>	none If there are more applicants than places available, a letter of motivation decides on the acceptance.			
<b>Skills to be acquired in this module</b>	++biological knowledge+knowledge of biological working methods ++biologically relevant knowledge in the natural sciences and mathematics ++interdisciplinary knowledge & thinking ++abstract, logical, analytical thinking ++deepened expertise in biological specialist field +independent learning and (research-based) working +data presentation and evidence-based discussion (written and spoken) +(scientific) communication skills  Objective of the module/skills:  Understanding of continental migration (plate tectonics), the formation of mountains and oceans.  Understanding the formation of marine (coastal and deep sea), limnic and terrestrial habitats (e.g. swamp, forest, desert).  Understanding the importance of climate change through continental migration, ice ages and climate catastrophes for the evolution of organisms.  Knowledge of the phylogenetic system of important groups of organisms, their formation and evolution.  Knowledge of the five major extinction events in Earth's history and their significance.			
<b>Module contents</b>	Content of the module: Earth age, continental migration, formation of marine, limnic and terrestrial habitats, species extinction, mass extinction and their causes (climate change, ice ages) and consequences (extinction and/or renewed radiation); anatomy and morphology ("baupläne") of ancestral species; evolution important characteristic complexes (nutrition, respiration, excretion and osmoregulation, reproduction, movement); important evolutionary steps of selected animals (e.g. molluscs with cephalopods, arthropods with insects, dinosaurs with birds, mammals with humans), taxa of plants and protists in the conquest of marine, limnic and terrestrial habitats.

<b>Prerequisites</b>	Abschluss der Basismodule			
<b>Skills to be acquired in this module</b>	++ deepened biological expertise ++ deepened knowledge of biological working methods ++ data analysis skills ++ data presentation and discussion in German and English (written and spoken) + teamwork + scientific/mathematical basic knowledge relevant for biology + critical and analytical thinking			
<b>Module contents</b>	<p>The lecture covers the basics of systemic neuroscience with a focus on processing in sensory systems, the plasticity of the nervous system and the mechanisms underlying cognitive processing. In the seminar, topics related to the lectures of the week are covered in more depth.</p> <p>The exercise immediately follows the lecture and the seminar. By experimenting with each other, the students deepen their knowledge in the fields of cognitive neuroscience and hearing science. The students analyze their own data (incl. statistics) and present these in a written report.</p>

## che101 - Basic Chemistry

<b>Module label</b>	Basic Chemistry
<b>Module code</b>	che101
<b>Credit points</b>	6.0 KP
<b>Workload</b>	180 h
<b>Applicability of the module</b>	<ul style="list-style-type: none"><li>• Bachelor's Programme Biology (Bachelor) &gt; Naturwissenschaftliche Grundlagen</li><li>• Bachelor's Programme Mathematics (Bachelor) &gt; Nebenfachmodule</li><li>• Dual-Subject Bachelor's Programme Biology (Bachelor) &gt; Ergänzungsmodule</li></ul>
<b>Responsible persons</b>	<ul style="list-style-type: none"><li>• Wark, Michael (module responsibility)</li><li>• Wark, Michael (authorised to take exams)</li><li>• Bottke, Patrick (authorised to take exams)</li></ul>
<b>Prerequisites</b>	
<b>Skills to be acquired in this module</b>	Students have basic knowledge of the structure of atoms and molecules. They know the periodic table of chemical elements, the properties of important elements and their most important compounds and reactions. They are familiar with equilibria in aqueous solutions. They will be able to use equilibrium settings to solve small analytical tasks and describe these equilibria using formulas. They will be familiar with acids and bases as well as reduction and oxidation reactions. Students are familiar with selected methods for quantifying chemical compounds using spectroscopy. Students know the most important organic molecules and classes of natural substances.
<b>Module contents</b>	<p>Lecture: General and inorganic chemistry (3 SWS)</p> <p>Structure of the periodic table; basics of chemical bonding; nomenclature of chemical compounds; stoichiometric laws; chemical equilibria; fundamental material chemistry; structure of important compounds; acids and bases; reductions and oxidations; introduction to methods of spectroscopy and chromatography.</p> <p>Exercise: Exercise for the lecture General and Inorganic Chemistry (1 SWS)</p>
<b>Recommended reading</b>	<p>Zeeck: Chemie für Mediziner, Urban &amp; Schwarzenberg;</p> <p>Latscha/Katzmaier: Chemie für Biologen, Springer;</p> <p>Riedel: Anorganische Chemie, de Gruyter;</p> <p>Holleman-Wiberg: Lehrbuch der Anorganischen Chemie, de Gruyter;</p> <p>Skript zur Vorlesung</p>

<b>Prerequisites</b>	Erfolgreiche Teilnahme am Modul "che190 - Grundvorlesung Organische Chemie"
<b>Skills to be acquired in this module</b>	Den Studierenden soll der Ausbau ihrer grundlegenden Kenntnisse über die Reaktivität organisch-chemischer Substanzen in Theorie und Praxis ermöglicht werden. Hierfür werden die Studierenden in die Lage versetzt, unter sicherheits- und umweltrelevanten Gesichtspunkten fach- und ordnungsgemäß mit einfachen Chemikalien umzugehen und selbständig organisch-chemische Experimente durchzuführen. Sie erlangen darüber hinaus grundlegende Fähigkeiten zur Präsentation wissenschaftlicher Sachverhalte in schriftlicher und mündlicher Form.
<b>Module contents</b>	Mit diesem Modul bauen die Studierenden ihr Basiswissen der Organischen Chemie weiter aus und wenden es im Rahmen dieses Praktikums im Labor an. Sie erlernen dabei grundlegende Arbeitstechniken aus dem Bereich der präparativen Organischen Chemie, indem sie ausgewählte organische Reaktionen und Analysemethoden (z.B. Substitution, Eliminierung, Polymerisation, Veresterung, Verseifung, Oxidation, Reduktion, Aldolkondensation, Extraktion, Dünnschichtchromatographie) eigenhändig durchführen.

## mat980 - Mathematics for the Life Sciences

<b>Module label</b>	Mathematics for the Life Sciences				
<b>Module code</b>	mat980				
<b>Credit points</b>	6.0 KP				
<b>Workload</b>	180 h				
<b>Applicability of the module</b>	<ul style="list-style-type: none"> <li>• Bachelor's Programme Biology (Bachelor) &gt; Naturwissenschaftliche Grundlagen</li> <li>• Dual-Subject Bachelor's Programme Biology (Bachelor) &gt; Ergänzungsmodule</li> </ul>				
<b>Responsible persons</b>	<ul style="list-style-type: none"> <li>• Vertman, Boris (module responsibility)</li> <li>• Werner, Tino (Module counselling)</li> <li>• Schöpfer, Frank (Module counselling)</li> <li>• Shestakov, Ivan (Module counselling)</li> </ul>				
<b>Prerequisites</b>					
<b>Skills to be acquired in this module</b>	<p>Aufbauend auf einem mittleren Abiturwissen werden Teile des Schulstoffs wiederholt (Ableitung und Integral), ergänzt (allgemeiner Abbildungsbegriff, Folgen und Reihen) und weiterentwickelt (Taylorreihe, Differentialgleichungen). Die Mathematik wird dabei im wesentlichen ohne Beweise als Handwerkszeug präsentiert. Die Ideen hinter den Begriffen und die Bedeutung der Ergebnisse werden jedoch ausführlich erklärt. Die Studierenden sollen - ihr Schulwissen wiederholen und festigen, - die Anwendung von Mathematik in der Biologie mit zahlreichen praktischen Übungsaufgaben lernen, - ihr allgemeines Wissen mathematischer Methoden und Modelle verbreitern und üben, - die grundlegenden Formen von diskreten und kontinuierlichen, ungebremsten und gebremsten Wachstumsprozessen kennenlernen, - erfahren, wie analytisches und abstraktes Denken bei dem Studium realer Probleme helfen kann.</p>				
<b>Module contents</b>	<p>Folgen und Konvergenz: Abbildungen und Funktionen, rekursiv definierte Folgen und diskrete Wachstumsmodelle, Konvergenz, Reihen. Reelle Funktionen: Grenzwert und Stetigkeit, Exponential- und trigonometrische Funktionen, Koordinatentransformationen. Differential- und Integralrechnung: Ableitung und Integral, Mittelwertsatz, Taylorentwicklung, Newton-Verfahren, Hauptsatz, uneigentliche Integrale. Differentialgleichungen: Einfache Differentialgleichungen 1. Ordnung (linear homogen, logistisch), Richtungsfeld, stationäre Zustände und Stabilität, Anwendungen. Differentialgleichungen höherer Ordnung und Systeme (Schwingungsgleichung, Lotka-Volterra-Modell).</p>
