## Background Modules

### neu210 - Neurosensory Science and Behaviour

Module label	Neurosensory Science and Behaviour
Modulkürzel	neu210
Credit points	9.0 KP
Workload	270 h ( 4 SWS Lecture (VO) "Neuroethology" and "Behavioural ecology" Total workload 180h: 56h contact/ 60h background reading/ 64h exam preparation 2 SWS Seminar (SE) "Current issues of ethology" Total workload 90h: 28h contact/ 30h literature reading/ 32h preparation of presentation )
Verwendbarkeit des Moduls	<ul style="list-style-type: none"> <li>• Master's Programme Biology (Master) &gt; Background Modules</li> <li>• Master's Programme Biology (Master) &gt; Background Modules</li> <li>• Master's Programme Neuroscience (Master) &gt; Background Modules</li> </ul>
Zuständige Personen	<ul style="list-style-type: none"> <li>• Langemann, Ulrike (module responsibility)</li> <li>• Langemann, Ulrike (Module counselling)</li> <li>• Mouritsen, Henrik (Module counselling)</li> <li>• Klump, Georg Martin (Prüfungsberechtigt)</li> <li>• Mouritsen, Henrik (Prüfungsberechtigt)</li> <li>• Langemann, Ulrike (Prüfungsberechtigt)</li> <li>• Albert, Jörg (Prüfungsberechtigt)</li> <li>• Clemens, Jan (Prüfungsberechtigt)</li> </ul>
Prerequisites	Fundamentals of Neurobiology, Behavioural Biology, Evolution, Ecology
Skills to be acquired in this module	<p>++ Neurosci. knowlg. + Expt. methods + Independent research + Scient. literature + Social skills ++ Interdiscipl. knowlg. Maths/Stats/Progr. + Data present./disc. + Scientific English Ethics</p> <p>Upon successful completion of this course, students</p> <ul style="list-style-type: none"> <li>• know the fundamentals of behavioural ecology and neuroethology</li> <li>• are able to present and critically assess scientific data and approaches</li> </ul>
Module contents	<p>The lecture "Neuroethology" provides an introduction to the mechanisms underlying the behaviour of animals. Subjects are, e.g., the mechanisms of perception, control of movement patterns, mechanisms of learning, orientation and navigation.</p> <p>The lecture "Behavioural ecology" provides an introduction to topics such as predator-prey interactions, optimal food utilization, spatial and temporal distribution of animals, social relations and group formation, mating systems and reproductive strategies, sexual selection, investment of parents in offspring, and communication.</p> <p>In the seminar "Current issues of Ethology", current original literature relating to behavioural biology is reported and discussed.</p>

## neu220 - Neurocognition and Psychopharmacology

Module label	Neurocognition and Psychopharmacology
Modulkürzel	neu220
Credit points	6.0 KP
Workload	180 h ( 3 SWS Lecture (VO) "Introd. to Cognitive Neuroscience" and "Psychopharmacol." Total workload 135h: 45h contact/ 45 background reading/ 45h exam preparation 1 SWS Supervised exercise (UE) Total workload 45h: 14h contact/ 31h paper reading )
Verwendbarkeit des Moduls	<ul style="list-style-type: none"><li>• Master's Programme Biology (Master) &gt; Background Modules</li><li>• Master's Programme Biology (Master) &gt; Background Modules</li><li>• Master's Programme Molecular Biomedicine (Master) &gt; Background Modules</li><li>• Master's Programme Neuroscience (Master) &gt; Background Modules</li></ul>
Zuständige Personen	<ul style="list-style-type: none"><li>• Thiel, Christiane Margarete (module responsibility)</li><li>• Thiel, Christiane Margarete (Module counselling)</li><li>• Thiel, Christiane Margarete (Prüfungsberechtigt)</li><li>• Gießing, Carsten (Prüfungsberechtigt)</li></ul>
Prerequisites	
Skills to be acquired in this module	<p>++ Neurosci. knowlg. + Expt. methods Independent research + Scient. literature + Social skills ++ Interdiscipl. knowlg. Maths/Stats/Progr. + Data present./disc. + Scientific English Ethics</p> <p>Upon successful completion of this course, students know the fundamentals of neurotransmission know the basic neural mechanisms underlying attention, learning, emotion, language and executive functions understand the relationship between disturbances in neurotransmitter systems, cognitive functions and psychiatric disease know the principles of drug treatment for psychiatric disorders have in-depth knowledge in selected areas of these topics are able to understand, explain and critically assess neuroscientific approaches in animals and humans are able to understand and critically assess published work in the area of cognitive neuroscience</p>
Module contents	<p>The lecture "Introduction to Cognitive Neuroscience" gives a short introduction into neuroanatomy and cognitive neuroscience methods and then covers different cognitive functions.</p> <p>Lecture topics: History of cognitive neuroscience Methods of cognitive neuroscience Attention Learning Emotion Language Executive functions.</p> <p>The supervised exercise either deepens that knowledge by exercises or discussions of recent papers/ talks on the respective topic covered during that week.</p> <p>The lecture "Psychopharmacology" illustrates the connection between neurotransmitters and behaviour and its links to psychiatric disease. The lecture contains several interactive parts to consolidate and critically evaluate the acquired knowledge.</p> <p>Lecture topics: Introduction to Terms and Definitions in Drug Research Dopaminergic and Noradrenergic System Cholinergic and Serotonergic System GABAergic and Glutamatergic System Addiction Depression Schizophrenia Anxiety Alzheimer's Disease</p>

## neu241 - Computational Neuroscience - Introduction

Module label	Computational Neuroscience - Introduction
Modulkürzel	neu241
Credit points	12.0 KP
Workload	360 h (  360 h  2 SWS Lecture Total workload 60h: 30h contact/30h individual revision of lecture contents, test preparation  1 SWS Seminar Total workload 45h: 15h contact/30h individual reading and test preparation  10.5 SWS Supervised exercise Total workload 255h: 145h contact/110h individual work on portfolio tasks (programming, interpretation of simulation results)  )
Verwendbarkeit des Moduls	<ul style="list-style-type: none"><li>• Master's Programme Neuroscience (Master) &gt; Background Modules</li></ul>
Zuständige Personen	<ul style="list-style-type: none"><li>• Kretzberg, Jutta (module responsibility)</li><li>• Kretzberg, Jutta (Module counselling)</li><li>• Kretzberg, Jutta (Prüfungsberechtigt)</li><li>• Greschner, Martin (Prüfungsberechtigt)</li><li>• Ashida, Go (Prüfungsberechtigt)</li></ul>
Prerequisites	Programming experience in Matlab (e.g. acquired by a 6 ECTS programming course)
Skills to be acquired in this module	<p>++ Neurosci. knowlg. + Scient. Literature + Social skills ++ Interdiscipl. knowlg ++ Maths/Stats/Progr. + Data present./disc.</p> <p>+ Scientific English Upon successful completion of this course, students</p> <ul style="list-style-type: none"><li>• are able to implement and apply algorithms in Matlab</li><li>• have learned to handle scientific data independently</li><li>• have acquired theoretical and practical knowledge of advanced data analysis techniques</li><li>• know about computational model approaches on different levels of abstraction</li><li>• know how to perform model simulations for single cells and small neuronal networks</li><li>• can interpret simulation results in a neuroscientific context</li></ul>
Module contents	<p>This course consists of six weeks with different topics, which are introduced in lectures, discussed in depth using selected literature in the seminar and consolidated in computer-based hands-on exercises (in Matlab). Portfolio tasks, mainly interpretation of programming results are given every day.</p> <p>Weeks 1 and 2: Spike train analysis response tuning, spike triggered average, receptive fields, linear-nonlinear model, spike correlation, linear reconstruction, classification</p> <p>Weeks 3 and 4: Neuron models Conductance-based single cell models using differential equations (passive membrane equation, integrate and fire, Hodgkin Huxley, alpha synapses)</p> <p>Weeks 5 and 6: Small network models Feed-forward and feed-back networks, lateral inhibition, central pattern generator, spike-timing dependent plasticity, multi-compartment models</p>
Literaturempfehlungen	

Skripts for each course day will be provided prior to / during the course

Copies of scientific articles for the seminar and as basis for portfolio assignments will be provided prior to the course

Recommended textbooks or other literature:  
 Dayan / Abbott: Theoretical Neuroscience: Computational and Mathematical Modeling of Neural Systems. MIT Press (More text book chapters will be suggested prior to the course).

## neu310 - Psychophysics of Hearing

<b>Module label</b>	Psychophysics of Hearing		
<b>Modulkürzel</b>	neu310		
<b>Credit points</b>	12.0 KP		
<b>Workload</b>	360 h ( 5 SWS Practical (PR) "Experiments in Hearing" Total workload 225h: 70h contact / 110h experimental work / 45h exam preparation 1 SWS Supervised exercise (UE) "Fundamentals in psychoacoustic data analysis" Total workload 45h: 15h contact / 30h practising data analysis (incl. SPSS) 2 SWS Seminar (SE) "Hearing" Total workload 90h: 30h contact / 60h background reading )		
<b>Verwendbarkeit des Moduls</b>	<ul style="list-style-type: none"> <li>• Master's Programme Biology (Master) &gt; Background Modules</li> <li>• Master's Programme Biology (Master) &gt; Background Modules</li> <li>• Master's Programme Neuroscience (Master) &gt; Background Modules</li> </ul>		
<b>Zuständige Personen</b>	<ul style="list-style-type: none"> <li>• Klump, Georg Martin (module responsibility)</li> <li>• Klump, Georg Martin (Prüfungsberechtigt)</li> <li>• Langemann, Ulrike (Prüfungsberechtigt)</li> <li>• Beutelmann, Rainer (Prüfungsberechtigt)</li> </ul>		
<b>Prerequisites</b>			
<b>Skills to be acquired in this module</b>	+ Neurosci. knowlg. ++ Expt. Methods + Social skills ++ Maths/Stats/Progr. + Data present./disc. + Scientific English  Students will learn the basics about performing a psychoacoustic experiment. Based on an experiment in which they study their own hearing, they will learn how to conduct a behavioural study in hearing and analyze the data. In addition, they will be provided with an overview of the mechanisms of auditory perception.		
<b>Module contents</b>	The modul comprises (i) a seminar "Hearing" [2 SWS] (ii) an exercise "Fundamentals in psychoacoustic data analysis" [1 SWS], and a (iii) practical course [7 SWS] including aspects of planning and conducting psychoacoustic experiments.

## neu320 - Introduction to Neurophysics

Module label	Introduction to Neurophysics
Modulkürzel	neu320
Credit points	6.0 KP
Workload	180 h ( 2 SWS Lecture total workload 90h: 28h contact / 62h background reading/exam preparation 2 SWS Supervised exercise total workload 90h: 28h contact / 62h self-conducted exercise work/literature reading )
Verwendbarkeit des Moduls	<ul style="list-style-type: none"><li>• Master's Programme Neuroscience (Master) &gt; Background Modules</li></ul>
Zuständige Personen	<ul style="list-style-type: none"><li>• Anemüller, Jörn (module responsibility)</li><li>• Anemüller, Jörn (Prüfungsberechtigt)</li><li>• Dietz, Mathias (Prüfungsberechtigt)</li></ul>
Prerequisites	recommended in semester: 3 (with Matlab prereq.: 1)
Skills to be acquired in this module	<p>++ Neurosci. knowlg. + Independent research + Scient. Literature ++ Interdiscipl. knowlg. ++ Maths/Stats/Progr. + Data present./disc.</p> <p>Students will learn to recognize the dynamics in neuronal networks as the result of an interplay of physical, chemical and biological processes. Overview over major physical measurement procedures for the quantification of structure and function in neuronal systems. Using the language of mathematics as a fundamental tool for the description of underlying biophysical processes with stochastics, linear algebra, differential equations. Information as represented on different length- and timescales: From microscopic processes to macroscopic functional models. Learning and adaptation as adjustment of a biophysical system to its environment.</p>
Module contents	<ul style="list-style-type: none"><li>• Biophysics of synaptic and neuronal transmission</li><li>• Single neuron models: Hodgkin Huxley model, integrate and fire model, firing rate model</li><li>• Biophysics of sensory systems in the auditory, visual and mechano-sensory modality</li><li>• Description of neuronal dynamics: Theory of dynamical systems, from microscopic to macroscopic activity - Principles of neuronal activity measurements: from single-cell recordings to EEG, MEG and fMRI</li><li>• Functional description of small neuronal networks: Receptive fields and their description with linear and non-linear models - The neuronal code: Spikes, spike trains, population coding, time- vs. rate-code - Decoding neuronal activity and its applications</li><li>• Simulation of artificial neural networks as a functional model, Hopfield network, Boltzmann machine, Perceptron and deep networks - Informationtheoretic approaches, stimulus statistics, entropy, mutual information</li><li>• Learning and plasticity, conditioning and reinforcement learning, Hebbian learning, long-term potentiation and long-term depression</li></ul>
Literatureempfehlungen	<ul style="list-style-type: none"><li>• Chow, Gutkin, Hansel, Meunier, Dalibard (Eds.): Methods and Models in Neurophysics (2003)</li><li>• Dayan, Abbott: Theoretical Neuroscience (2005)</li><li>• Galizia, Lledo (Eds.): Neurosciences, from molecule to behavior (2013)</li><li>• Gerstner, Kistler, Naud, Paninski: Neuronal Dynamics - From single neurons to networks and models of Cognition (2014)</li><li>• Rieke, Warland, de Ruyter van Steveninck, Bialek: Spikes - Exploring the neural code (1999)</li><li>• Schnupp, Nelken, King: Auditory Neuroscience (2010)</li></ul>

<b>Skills to be acquired in this module</b>	<p>           ++ deepened biological expertise            ++ deepened knowledge of biological working methods            + data analysis skills            ++ interdisciplinary thinking            + critical and analytical thinking            + independent searching and knowledge of scientific literature            + data presentation and discussion (E) (written and spoken)            + teamwork            + ethics and professional behaviour            + project and time management         </p> <p>Addressing students with an emphasis on molecular biology, molecular genetics, cell biology, and neurobiology</p>		
<b>Module contents</b>	<p>Lecture: To improve knowledge in molecular genetics, molecular biology and cell biology in correlation with human diseases. Exercise: Learn to transfer the theoretical knowledge to experiments. Gaining methodological knowledge in molecular genetics, cell biology and therapeutic approaches. Initial training on how to perform research projects. Subjects of the lecture and seminar: Molecular bases of neurodegenerative diseases, structure and function of DNA/RNA/proteins/membranes, cytoskeleton, cell cycle, programmed cell death, cells in the social structure. Exercises: Learning current methods of molecular biology and human genetics; high throughput technologies, introduction to cell cultivation techniques.</p>

### Module contents

This module builds up on the knowledge and methods acquired in the module neu340 Invertebrate Neuroscience.

In the seminar, the knowledge on invertebrate systems and neural coding in general is deepened based on scientific literature.

In the practical exercise of the module, students can choose one topic from a range of different research questions on computation in the leech nervous system (e.g. comparison of different cell types, electrical and chemical synaptic connections, exact measurement of spike threshold, phase locking). Small groups (2-3) of students plan, perform, and analyze experiments (intracellular

recordings) or model simulations (model framework will be provided or can be self-written based on module neu241 computational neuroscience - Introduction) to tackle their topic. The portfolio consists of assignments covering the planning, analysis, interpretation, and presentation of the results with feedback given during the course on each project stage.

<b>Literaturempfehlungen</b>		Course scripts and background and seminar literature will be available in Stud.IP. Scientific literature discussed in the seminar depends on the project topics.

## psy270 - Functional MRI Data Analysis

Module label	Functional MRI Data Analysis
Modulkürzel	psy270
Credit points	9.0 KP
Workload	270 h
Verwendbarkeit des Moduls	<ul style="list-style-type: none"><li>• Master's Programme Biology (Master) &gt; Background Modules</li><li>• Master's Programme Neurocognitive Psychology (Master) &gt; Mastermodule</li><li>• Master's Programme Neuroscience (Master) &gt; Background Modules</li></ul>
Zuständige Personen	<ul style="list-style-type: none"><li>• Gießing, Carsten (module responsibility)</li><li>• Gießing, Carsten (Prüfungsberechtigt)</li></ul>
Prerequisites	Enrolment in Master's programme Neurocognitive Psychology, Neuroscience, or Biology.
Skills to be acquired in this module	<p><b>Goals of module:</b> Students will learn the basics about planning and performing a neuroimaging study. They will focus on the statistical and methodological background of functional neuroimaging data analysis and analyse a sample functional MRI data set.</p> <p><b>Competencies:</b> ++ experimental methods ++ statistics &amp; scientific programming + data presentation &amp; discussion ++ group work</p>
Module contents	<p>Theoretical knowledge on functional MRI data analysis Planning, performance and analysis of functional neuroimaging studies using MATLAB-based software Hands-on fMRI data analysis with SPM</p>
Literaturempfehlungen	<ul style="list-style-type: none"><li>• Frackowiak RSJ, Friston KJ, Frith C, Dolan R, Price CJ, Zeki S, Ashburner J, and Penny WD (2003). Human Brain Function. Language of instruction	English
Duration (semesters)	1 Semester
Module frequency	The module will be offered every summer term.
Module capacity	15 (

The remaining places are reserved for Biology and Neuroscience students.

)

#### Reference text

Since the module is primarily offered for the Master's programme Biology it has to be offered as a blocked course. Please contact us if you are interested in the module but have problems with interfering other courses.

PLEASE NOTE: We strongly recommend to take either psy170, psy270, psy280, psy220 or psy290 to gain methodological competencies (EEG, fMRI, TBS, HCI, ambulatory assessment techniques) that are needed for most practical projects and Master's theses!

<b>Type of module</b>		Wahlpflicht / Elective
<b>Module level</b>		MM (Mastermodul / Master module)
<b>Teaching/Learning method</b>		blocked course with lecture, interactive seminar and exercise parts
<b>Previous knowledge</b>		Students need to have solid statistical knowledge as taught in the Introductory Course Statistics and in Research Methods.
Examination	Prüfungszeiten	Type of examination
<b>Final exam of module</b>		Oral or written examination
	middle of summer term	Required active participation for gaining credits: 1-2 presentations participation in discussions on other presentations attendance of at least 70% in the seminars and exercises within one semester (will be checked in StudIP).
<b>Lehrveranstaltungsform</b>	Seminar	
<b>SWS</b>	1	
<b>Frequency</b>	SoSe	
<b>Workload Präsenzzeit</b>	14 h

## Research Modules

### neu610 - External Research Project

Module label	External Research Project
Modulkürzel	neu610
Credit points	15.0 KP
Workload	450 h ( 240 h contact or individual lab work / 30 h data analysis / 40 h background reading / 50 h participation in seminar of host group and preparation of presentation/ 60 h preparation of written internship report / 30 science communication workshop with poster preparation and presentation) )
Verwendbarkeit des Moduls	<ul style="list-style-type: none"><li>• Master's Programme Neuroscience (Master) &gt; Research Modules</li></ul>
Zuständige Personen	<ul style="list-style-type: none"><li>• Köppl, Christine (module responsibility)</li><li>• der Neuroscience, Lehrende (Prüfungsberechtigt)</li></ul>
Further responsible persons	all MSc Neuroscience teachers, see list of examiners
Prerequisites	<p>A learning agreement signed by the student, the supervisor at the host institution, and the Oldenburg supervisor (from the list of examiners), needs to be submitted to the examination office prior to the start of lab work.</p> <p>Module can be taken multiple times (see list of choices for each semester), however, examination of individual projects by the same supervisor is limited to EITHER two research projects (neu600 and / or neu610), OR one research project (neu600 or neu610) and the master thesis (first or second supervisor)</p>
Skills to be acquired in this module	<p>+ Neurosci. knowlg.</p> <p>++ Expt. methods</p> <p>++ Independent research</p> <p>++ Scient. literature</p> <p>++ Social skills</p> <p>+ Interdiscipl. knowlg.</p> <p>++ Data present./disc.</p> <p>+ Scientific English</p> <p>+ Ethics</p> <p>Students are introduced to independent research in a specific area of neuroscience by a scientifically working group outside of the regular MSc Neuroscience faculty at the University of Oldenburg (usually a university, research institute, clinics or scientifically working company in Germany or abroad)</p> <p>Students perform individual research projects to learn:</p> <ul style="list-style-type: none"><li>• planning and organization of a research project in a group outside of University of Oldenburg</li><li>• formulate a scientific hypothesis</li><li>• planning, performing and analyzing experiments and / or simulations</li><li>• working with scientific background literature on the specific context of the project</li><li>• oral presentation and discussion of backgrounds and results in the lab seminar</li><li>• write a scientific report</li><li>• prepare and present a scientific poster</li></ul>

---

## Module contents

The External Research Module is carried out under the guidance and supervision of an experienced researcher who is not part of the regular Neuroscience faculty at the University of Oldenburg. It comprises approximately 7 (minimum 5) weeks of experimental or theoretical work, individually or in small groups, and, usually, participation in a regular group seminar during that time.

After completion of the lab work, students will continue to be advised during the writing phase of the project report by the external supervisor and / or by a local Neuroscience faculty member.

The timing of projects is by individual arrangement with the supervisor.

Participation in the Stud.IP workshop on science communication (<https://elearning.uni-oldenburg.de/dispatch.php/course/overview?cid=6fc0dbbf a53d7b3f5e3680f52ac7d0f7>) and a poster presentation at the biology & neuroscience student poster symposium is not mandatory but highly recommended.

<b>Literatureempfehlungen</b>	Provided by external and / or local supervisor, depending on the project

## neu600 - Neuroscience Research Project

<b>Module label</b>	Neuroscience Research Project
<b>Modulkürzel</b>	neu600
<b>Credit points</b>	15.0 KP
<b>Workload</b>	<p>450 h (</p> <p>2 SWS Seminar (SE) 28 h contact / 62 h reading and presentation preparation</p> <p>8 SWS Research Internship (IFP) 120 h contact / 120 h independent lab work / 30 h data analysis / 60 h preparation of written internship report / 30 h science communication workshop with poster preparation and presentation)</p> <p>)</p>
<b>Verwendbarkeit des Moduls</b>	<ul style="list-style-type: none"> <li>• Master's Programme Neuroscience (Master) &gt; Research Modules</li> </ul>
<b>Zuständige Personen</b>	<ul style="list-style-type: none"> <li>• Kretzberg, Jutta (module responsibility)</li> <li>• der Neuroscience, Lehrende (Prüfungsberechtigt)</li> <li>• Bräuer, Anja (Prüfungsberechtigt)</li> <li>• Debener, Stefan (Prüfungsberechtigt)</li> <li>• Herrmann, Christoph Siegfried (Prüfungsberechtigt)</li> <li>• Kranczioch-Debener, Cornelia (Prüfungsberechtigt)</li> <li>• Özyurt, Jale Nur (Prüfungsberechtigt)</li> <li>• Puschmann, Sebastian (Prüfungsberechtigt)</li> <li>• Milenkovic, Ivan (Prüfungsberechtigt)</li> <li>• Sörös, Peter (Prüfungsberechtigt)</li> <li>• Lücke, Jörg (Prüfungsberechtigt)</li> <li>• Ruigendijk, Esther (Prüfungsberechtigt)</li> </ul>
<b>Further responsible persons</b>	all MSc Neuroscience teachers, see list of examiners
<b>Prerequisites</b>	<p>Depending on project choice, please check Stud.IP and ask the supervisor. Module can be taken multiple times, however, supervision of individual projects is limited to 45 ECTS for the same combination of student and supervisor (1 research module + Master thesis OR up to 3 research modules, including external research projects)</p>
<b>Skills to be acquired in this module</b>	<p>+ Neurosci. knowlg.</p> <p>++ Expt. Methods</p> <p>++ Independent research</p> <p>++ Scient. Literature</p> <p>+ Social skills</p> <p>+ Interdiscipl. knowlg.</p> <p>+ Maths/Stats/Progr.</p> <p>+ Data present./disc.</p> <p>+ Scientific English</p> <p>+ Ethics</p> <p>Students perform individual research projects to learn:</p> <ul style="list-style-type: none"> <li>• planning and organization of a research project in a group outside of University of Oldenburg</li> <li>• formulate a scientific hypothesis</li> <li>• planning, performing and analyzing experiments and / or simulations</li> <li>• working with scientific background literature on the specific context of the project</li> <li>• oral presentation and discussion of backgrounds and results in the lab seminar</li> </ul>

- write a scientific report
- prepare and present a scientific poster

Module may serve as preparation for a Master's thesis.

## Module contents

The Research Module is carried out under the guidance and supervision of a member of the Neuroscience faculty at the University of Oldenburg (see list of examiners). It comprises approximately 7 (minimum 5) weeks of experimental or theoretical work, individually or in small groups, and a regular seminar for training, reporting and feedback advice during that time. Students can choose between many options of individual projects, offered by the different groups involved in the MSc Neuroscience study program.

Research questions, methods and approaches differ between individual projects. Please refer to the list of options in Stud.IP and contact potential supervisors directly.

The timing of projects is by individual arrangement with the supervisor. Many, but not all, project options can also be scheduled during semester breaks, and / or as part-time options (lasting more than 7 weeks).

Note that, for some options, priority for admission to the project is given to students who passed a background module offered by the supervisor

Participation in the Stud.IP workshop on science communication (<https://elearning.uni-oldenburg.de/dispatch.php/course/overview?cid=6fc0dbbf a53d7b3f5e3680f52ac7d0f7>) and a poster presentation at the biology & neuroscience student poster symposium is not mandatory but highly recommended.

<b>Literatureempfehlungen</b>	Provided by the supervisor, depending on the project.

## Skills Modules

### neu710 - Neuroscientific Data Analysis in Matlab

Module label	Neuroscientific Data Analysis in Matlab
Modulkürzel	neu710
Credit points	6.0 KP
Workload	180 h (  180 h  2 SWS Lecture (VL) and Seminar (SE) Total workload 90 h: 28 h contact / 62 h individual preparation and working on assignments  2 SWS Supervised exercise (UE) Total workload 90 h: 28 h contact / 62 h individual preparation and working on assignments  )
Verwendbarkeit des Moduls	<ul style="list-style-type: none"><li>• Master's Programme Neuroscience (Master) &gt; Skills Modules</li></ul>
Zuständige Personen	<ul style="list-style-type: none"><li>• Kretzberg, Jutta (module responsibility)</li><li>• Kretzberg, Jutta (Prüfungsberechtigt)</li></ul>
Prerequisites	
Skills to be acquired in this module	<p>+ Neurosci. knowlg. + Social skills + Interdiscipl. knowlg. ++ Maths/Stats/Progr. + Scientific English +Ethics</p> <p>Upon successful completion of this course, students</p> <ul style="list-style-type: none"><li>• understand basic programming concepts.</li><li>• have good knowledge about the most important aspects of the programming language Matlab and are able to write their own programs.</li><li>• have basic knowledge in statistical testing.</li><li>• have developed and applied a programs for the analysis of electrophysiological data.</li><li>• have practiced the interpretation of data analysis results in a neuroscience context</li></ul>

---

#### Module contents

In each of the seven weeks, one or two specific topics are introduced in the lecture, practiced in the exercises and applied to electrophysiological data in a programming task:

Matlab basics: Matlab windows, work space, vectors & matrices, saving & loading, graphics, scripts, functions

- Data types: numbers, logicals, text, categorical
- Control flow: if statements, loops (for, while)
- Software development: Flow charts, testing, debugging
- Working with data: Searching & sorting, logical indexing
- Advanced data types: sparse matrices, 3D matrices, cell arrays, structures, tables
- Statistics: random numbers, probability distributions, descriptive statistics, inferential statistics
- Application data analysis: Implementation of spike train analysis methods and graphics, function handles
- Application Modelling: curve fitting, simulation of time series

With completing the seven tasks, each participant develops a toolbox of the

most common analysis methods for electrophysiological (spike and continuous) data. In addition to writing and commenting code, the programs are applied to experimental data. The tasks include questions about the interpretation of these analysis results.

Hence, the goal of this module is two-fold: Learning the programming language Matlab and analysis methods for electrophysiological data.

## neu730 - Biosciences in the Public Eye and in our Laws

Module label	Biosciences in the Public Eye and in our Laws
Modulkürzel	neu730
Credit points	6.0 KP
Workload	180 h ( 56h contact / 84h research for presentations / 40h term paper )
Verwendbarkeit des Moduls	<ul style="list-style-type: none"><li>• Master's Programme Biology (Master) &gt; Skills Modules</li><li>• Master's Programme Biology (Master) &gt; Skills Modules</li><li>• Master's Programme Neuroscience (Master) &gt; Skills Modules</li></ul>
Zuständige Personen	<ul style="list-style-type: none"><li>• Köppl, Christine (module responsibility)</li><li>• Sienknecht, Ulrike (Module counselling)</li><li>• Köppl, Christine (Prüfungsberechtigt)</li><li>• Sienknecht, Ulrike (Prüfungsberechtigt)</li></ul>
Prerequisites	
Skills to be acquired in this module	<p>+ Expt. methods + Scient. Literature ++ Social skills ++ Interdiscipl. knowlg + Data present./disc. + Scientific English ++ Ethics</p> <p>Upon completion of this course, students</p> <ul style="list-style-type: none"><li>• know basic rules of good scientific practise</li><li>• are aware of the legal framework that is relevant to biological research, e.g. on animal welfare or genetically modified organisms</li><li>• have practised to research and summarize different viewpoints on biological research, using both scientific (peer-reviewed) and non-scientific sources</li><li>• are able to identify and critically discuss ethical conflicts in biological research, e.g., in the context of stem cell research or data manipulation</li><li>• are able to prepare and give a coherent presentation in a team</li><li>• have practised to lead a group discussion</li></ul>
Module contents	<p>In supervised exercises, students research the ethical aspects and controversial issues on several specific topics in the biosciences. Everyone participates in researching all topics. Students then take turns in summarizing and presenting each topic in small teams, and leading a critical discussion of each topic. Problem-based, independent research of the scientific background by the students is an integral part of this module.</p> <p>Example topics: Good scientific practise and fraud Neuroenhancement Artificial intelligence Animal welfare, Animal experiments Overfishing, Nature conservation State-of-the-art genetic tools and their implications Genetically modified organisms, e.g., in food production, chimeras Stem cells Humans as experimental subjects</p> <p>A bonus can be obtained through active participation during the semester. Active participation requires regular oral contributions to the group discussions, that go beyond giving your own talks. A bonus improves the exam mark by one step (0.3 or 0.4). The bonus is optional, an exam mark of 1.0 is achievable without a bonus. A bonus cannot be applied to pass a failed exam.</p>

<b>Zuständige Personen</b>	<ul style="list-style-type: none"> <li>• Winklhofer, Michael (module responsibility)</li> <li>• Winklhofer, Michael (Prüfungsberechtigt)</li> </ul>			
<b>Prerequisites</b>				
<b>Skills to be acquired in this module</b>	+ Neurosci. knowlg. ++ Maths/Stats/Progr. + Data present./disc.  The objective of the module is the acquisition of programming skills with focus on analysis of neurobiological datasets, using the programming language python. Python is available for any computer platform (PC, Mac, Linux) and is open source (for free), see <a href="https://www.python.org/">https://www.python.org/</a> .  Students will learn how to write effective scripts for data processing and visualisation, making use of pre-existing program libraries for various generic purposes (maths, statistics, plotting, image analysis).  Typical applications will be analysis of time series (e.g., electrophysiological recordings, movement data), images (e.g. immunohistochemical images, MRI slices), and spatio-temporal correlations in volume data. Students will also learn how to produce synthetic data from various noise models to assess signal-to-noise ratio in instrumental datasets.			
<b>Module contents</b>	Data types and data structures, control structures, functions, modules, file input/output Standard libraries and SciPy libraries (Matplotlib, NumPy,...), scikit-image, VPython, ...

<b>Zuständige Personen</b>	<ul style="list-style-type: none"> <li>• Köppl, Christine (module responsibility)</li> <li>• Köppl, Christine (Prüfungsberechtigt)</li> <li>• Langemann, Ulrike (Prüfungsberechtigt)</li> <li>• Nolte, Arne (Prüfungsberechtigt)</li> <li>• Heyers, Dominik (Prüfungsberechtigt)</li> <li>• Ebbers, Lena (Prüfungsberechtigt)</li> <li>• Dedek, Karin (Prüfungsberechtigt)</li> <li>• Schmaljohann, Heiko (Prüfungsberechtigt)</li> <li>• Winklhofer, Michael (Prüfungsberechtigt)</li> </ul>
<b>Prerequisites</b>	none
<b>Skills to be acquired in this module</b>	<p>++ Expt. Methods + Independent Research + Scient. Literature ++ Social skills ++ Interdiscipl. knowlg + Scientific English ++ Ethics</p> <p>Upon successful completion of this course, students</p> <ul style="list-style-type: none"> <li>• know the relevant EU legislation governing animal welfare and are able to explain its meaning in common language</li> <li>• understand and are able to critically discuss salient ethical concepts in animal experimentation, such as the three Rs and humane endpoint.</li> <li>• have basic knowledge of the biology and husbandry of laboratory animal species held at the University of Oldenburg (rodents or birds or fish)</li> <li>• are able to critically assess the needs and welfare of animals without compromising scientific integrity of the investigation</li> <li>• have practical skills in handling small rodents or birds or fish</li> <li>• have profound knowledge of anaesthesia, analgesia and basic principles of surgery.</li> <li>• have practised invasive procedures and euthanasia.</li> </ul> <p>NOTE: These objectives aim to satisfy the requirements for EU directive A „Persons carrying out animal experiments“ and EU directive D „Persons killing animals“.</p>
<b>Module contents</b>	<p>Background knowledge is taught using the third-party online platform "LAS Interactive" which concludes with a written exam that has to be passed before the practical part. Topics covered are:</p> <ul style="list-style-type: none"> <li>• Legislation, ethics and the 3Rs</li> <li>• Scientific integrity</li> <li>• Data collection "</li> <li>• Basic biology of rodents, birds and fish</li> <li>• Husbandry, and nutrition of rodents, birds and fish</li> <li>• Animal Welfare</li> <li>• Health monitoring</li> <li>• Pain and distress</li> <li>• Euthanasia</li> </ul>

Practical procedures will first be demonstrated, important aspects will then be practiced under supervision by every participant, on an animal model of their choice (rodents, birds or fish):

- Handling and external examination
- Administration of substances, blood sampling
- Euthanasia and dissection
- Transcardial perfusion
- Anaesthesia and surgery

## neu790 - Communicating Neuroscience

Module label	Communicating Neuroscience
Modulkürzel	neu790
Credit points	3.0 KP
Workload	90 h (  90 h  (28 h contact / 62 h individual reading and preparing discussion questions)  )
Verwendbarkeit des Moduls	<ul style="list-style-type: none"><li>• Master's Programme Biology (Master) &gt; Skills Modules</li><li>• Master's Programme Biology (Master) &gt; Skills Modules</li><li>• Master's Programme Neuroscience (Master) &gt; Skills Modules</li></ul>
Zuständige Personen	<ul style="list-style-type: none"><li>• Kretzberg, Jutta (module responsibility)</li><li>• Kretzberg, Jutta (Prüfungsberechtigt)</li><li>• Köppl, Christine (Prüfungsberechtigt)</li></ul>
Prerequisites	
Skills to be acquired in this module	<p>+ Neurosci. knowlg. ++ Scient. Literature ++ Social skills + Interdiscipl. knowlg. ++ Data present./disc. + Scientific English ++ Ethics</p> <p>Upon successful completion of this course, students will have thought about and discussed in depth scientific, social and ethical aspects of communication in and about neuroscience. In particular, participants practice critical reading of neuroscience literature, learn about the scientific publication process and discuss science communication to the general public.</p>
Module contents	<p>The overall goal of critical discussion of neuroscientific results in a scientific, social and ethical context requires preparation and active participation both before (Stud.IP wiki) and during the weekly sessions. Each participant is responsible for the preparation and moderation of at least one session in a group of 2-3 students. For passing the module, additional active participation is required in at least 10 of the seminar sessions. The specific papers and topics that are discussed vary, but typically cover:</p> <ul style="list-style-type: none"><li>• How to find literature?</li><li>• How to read different types of scientific papers: Classic papers, review papers, perspective papers, recent original papers?</li><li>• Publication process, Authorship and impact metrics</li><li>• Alternative publication paths and data sharing in neuroscience</li><li>• Science communication for the general public and on social media</li><li>• Face-to-face scientific communication</li></ul>
Literatureempfehlungen	<p>List of published papers, as well as online resources for preparation will be selected by the teachers and participants and announced via Stud.IP.</p> <p>Background neuroscience textbooks, e.g.:</p> <p>Galizia, Lledo 'Neuroscience – From Molecule to Behavior', 2013, Springer</p> <p>Nicholls et al. 'From Neuron to Brain', 5th edition 2012, Sinauer</p> <p>Kandel et al. 'Principles of Neural Science', 5th Edition 2013, McGraw-Hill Comp.</p>

limited time of 6 month. Learning goals:

- planning and organization of a research project
- teamwork in a research group
- formulate a scientific hypothesis
- planning, performing and analyzing experiments and / or simulations
- working with scientific background literature on the specific context of the project
- oral presentation and discussion of backgrounds and results in the lab seminar
- write a scientific report
- optional: Prepare and present a scientific poster

## Module contents

The master thesis comprises 6 months of experimental or theoretical work and thesis writing, and a regular seminar for training, reporting and feedback advice during that time. The aim, methods and results of the thesis are presented in a final oral presentation and exam (Master's colloquium).

Students can choose between many options of individual projects, offered by the different groups involved in the MSc Neuroscience study program. Research questions, methods and approaches differ between individual projects. The timing of projects is by individual arrangement with the supervisor. Note that, for some options, priority for admission to the project is given to students who passed a background and / or research module offered by the supervisor

Please refer to the Stud.IP MSc Neuroscience information community forum for information on the groups and contact potential supervisors directly.

The master thesis project is generally carried out under the guidance and supervision of a member of the Neuroscience faculty at the University of Oldenburg (see list of examiners) and additionally evaluated by a second examiner. External master thesis projects and / or evaluation by persons who are not on the list of examiners need prior approval by the examination committee.

Participation in the Stud.IP workshop on science communication (<https://elearning.uni-oldenburg.de/dispatch.php/course/overview?cid=6fc0dbbf5a53d7b3f5e3680f52ac7d0f7>) and a poster presentation at the biology & neuroscience student poster symposium is not mandatory but highly recommended.

## Literatureempfehlungen

Provided by the supervisor, depending on the project.
