| **Skills to be acquired in this module** | The goal of the course is that students are able to...<br>- know and understand basic concepts and processes in the context of business administration<br>- name important research streams and theoretical frameworks in the field<br>- apply models and instruments of business administration to develop solutions for practical challenges in companies<br>- critically question the application of common instruments and models and evaluate their advantages and disadvantages in specific decision making situation<br>- put the newly acquired knowledge into a broader context, so it can be deepened in the further course of study and when working in a company | |
| **Module contents** | The course offers an introduction to the most important concepts, instruments, and frameworks of business administration. Toward this end, the course first introduces the core concepts and provides an overview of the history, goals, structure, and research traditions of business administration. Subsequently, students will gain insights into 11 important areas of business administration: (1) Entrepreneurship, (2) Strategic Management, (3) Logistics and Supply Chain Management, (4) Production Management, (5) Marketing and Sales, (6) Accounting and Controlling, (7) Finance and Investment, (8) Technology and Innovation Management, (9) Human Resource Management, (10) Information Management, and (10) Sustainability Management. Students deepen and apply the knowledge acquired in the lecture in tutorials. In addition, the course includes guest lectures by practitioners to clarify the practical relevance of the content. | |

| **Skills to be acquired in this module** | Students<br><br>• understand the role corporate finance plays in today's business environment,<br>• are able to make consistent investment decisions based on established financial models both under certainty and under uncertainty,<br>• are able to place these models in within the broader context of economic theory, including both neoclassical theory and principal-agent theory,<br>• are able to assess the limitations of these models,<br>• analyze firm's main sources of (long-term) financing. |
| **Module contents** | Course outline:<br>1. Introduction<br>2. Valuation and Capital Budgeting<br>3. Risk and Return<br>4. Long-Term Financing<br>This course is an introduction to corporate finance. It covers typical tools and techniques used in making investment and financing decisions, and it provides insights into their theoretical foundations. The concept of time value of money and net present value is discussed in detail, first under certainty, and then in the presence of uncertainty. We will examine the relationship between an investment's risk and its return, and discuss ways to derive risk-adjusted cost of equity capital. In addition, the course provides insights into firms' main sources of (long-term) financing.<br><br>The topics covered in this course are relevant for financial decision-making in various areas of business management, including operations management, marketing, and in particular corporate strategy. |

| **Prerequisites** | |
| **Skills to be acquired in this module** | Students obtain an overview of the most important operational functions of an industrial or service company. These are procurement, production and logistics. Students will get to know typical operational challenges and familiarize themselves with established approaches and methods for analyzing and improving procurement, production and logistics operations. |
| **Module contents** | The module comprises a lecture (course number 2.02.231) and an accompanying tutorial (course numbers 2.02.231a to 2.02.231j). The lecture is based on the text book "Grundzüge der Beschaffung, Produktion und Logistik" by Kummer, Grün und Jammernegg in the third edition of 2013 and the associated workbook, as well as partly on the text book "Operations Management: Konzepte, Methoden und Anwendungen" by Thonemann in the third edition of 2015. The purpose of the lecture is to explain the fundamental problems and their solutions theoretically. The tutorials focus on application and practice and offer time for questions. There are no formal or content-related participation or entrance requirements. |

| **Skills to be acquired in this module** | Upon completion of the module (two complementary lectures), students will be able to:<br>• understand the complex issues, challenges and fields of action in organisational Human Resource (HR) Management;<br>• analyse, interpret and manage HR issues within heterogeneous fields of stakeholders and environments;<br>• effectively analyse and apply HR instruments according to the specific practical context;<br>• develop skills to self-reflection by dealing with theoretical as well as practical issues in HR Management and are able to press their point within the scientific discussion;<br>• are able to locate a specific research question within the scientific discussion in the field of Human Resource Management and to interlink, reflect and evaluate it accordingly.<br>By attending the non-compulsory tutorials and participating in lecture discussions, students can develop their own position on the inter-linkages between theoretical approaches and practical courses of action. Students will thus be able to identify problems, analyse them critically, and develop solutions. As they have the opportunity to work in small groups within the tutorials and to participate during lecture discussions, students may also learn to handle different points of view and discuss constructively. Overall they will be prepared for the specific requirements faced in the field of HR Management. |
| **Module contents** | Students develop theoretical as well as practical insights into the backgrounds and specific characteristics of “Human Resource” Management, in particular the following:<br>- origins and theoretical basis<br>- development and framework requirements<br>- workforce planning<br>- recruitment and selection<br>- work organisation<br>- working time organisation<br>- leadership<br>- performance reviews |

| **Prerequisites** | - |
| **Skills to be acquired in this module** | At the end of the course, successful students: • understand the interdependence of market processes and economic policy in the subsystems of the economy, • avoid fallacies of composition in the nexus of microeconomics and macroeconomics, • use macroeconomics as a tool to analyse current economic and political issues, • translate economic problems into models that describe macroeconomic causalities and interdependencies by reasonable reductions of complexity, • interpret selected data in the light of macroeconomic theories. |
| **Module contents** | The course starts with an introduction to the principles of national accounting which serve as point of departure for the presentation of basic macroeconomic models in short-term, medium-term and long-term perspectives. Short-term: Consumption, saving, investment and finance in the closed-economy IS/LM framework. Medium-term: Labour supply & demand, production and inflation in the AS/AD framework and extensions to open-economy analysis. Long-term: capital accumulation, technical progress and economic growth in different approaches. The basic models are presented in words, algebra and diagrams with the aid of case studies and other exemplary material. |

| **Skills to be acquired in this module** | The students:<br>• understand questions concerning corporate law and contexts<br>• distinguish practice-oriented differences between the individual legal forms of a company.<br>• distinguish interrelations with other fields of law |
| **Module contents** | The key criterion for the choice of the optimal legal entity for a company is usually the "isolation" of the private assets of the shareholder, i.e. the limitation of liability to the business assets. Unlimited personal liability can be achieved not only by means of the legal form of a corporation (AG, GmbH), but also by means of the legal form of a partnership. At the beginning of the lecture those legal forms are dealt with, with which all partners personally and unrestrictedly are liable; thus, the limitation of the liability to the business assets does not take place. Here the partnership under the civil code (GbR) is to be mentioned, namely in its form as a (non-legally capable) internal GbR and as a (legally capable) external company (external GbR), and the general partnership (OHG). Subsequently, the lecture deals with the legal position of the (unlimitedly liable) general partner and the legal position of the limited partner of the limited partnership (KG). Then the mixed type of the GmbH & Co. KG, i.e. a limited partnership with a limited company (GmbH) as general partner, is presented. The lecture also gives an overview of the other partnerships, such as the silent partnership as a so-called "internal company" and the partnership company. Afterwards the association right is treated as transition to the right of the corporations. Finally, the module deals with the law of the GmbH, law of corporations and law of cooperatives. Structures and characteristics of these legal forms are discussed under consideration of current jurisdiction and legislation. Not only will the instruments of company law be presented in isolation, but - for a better understanding - particular emphasis will be placed on interrelations with other fields of law. The aim of the lecture is not so much to impart comprehensive knowledge, but to provide training in the legal "feeling", i.e. the feeling for interdependent, practical and current problems arising from a certain situation. |

| **Prerequisites** | Keine | | |
| **Skills to be acquired in this module** | Die Studierenden: - erarbeiten fachwissenschaftliche Fragestellungen selbstständig und unter Verwendung wissenschaftlicher Methoden. - recherchieren selbstständig wissenschaftliche Literatur. - betten ihre Problemstellung in die wissenschaftliche Diskussion ein. - erstellen eine Gliederung ihrer Bachelorarbeit. - fertigen Bachelorarbeit an. - präsentieren und reflektieren den Fortgang und die Ergebnisse ihrer Bachelorarbeit. | | |
| **Module contents** | Das Bachelorarbeitsmodul setzt sich zusammen aus einer fachwissenschaftlichen Bachelorarbeit (12 KP) und einer begleitenden Lehrveranstaltung (3 KP). Die Bachelorarbeit soll zeigen, dass die Studierenden in der Lage sind, innerhalb der vorgegebenen Frist von zehn Wochen ein fachwissenschaftliches Problem selbstständig mit Hilfe von wissenschaftlichen Methoden zu bearbeiten. Die begleitende Lehrveranstaltung kann als Seminar, als Kolloquium oder als Projekt durchgeführt werden. Im Seminar erfolgt im Plenum eine Diskussion und Rückmeldung u.a. zu Gliederung, Problemstellung und Zitierweise. Im Kolloquium stellen die Studierenden ihre Zwischenergebnisse zur Diskussion und erhalten ebenfalls Rückmeldungen z.B. bezogen auf Gliederung, Problemstellung und Literaturverzeichnis. Im Projekt erhält der einzelne Student entweder allein oder in einer Kleingruppe die Möglichkeit, seine Bachelorarbeit in den Prozessphasen Initiierung, Planung und Ausführung durch einen fach-wissenschaftlichen Austausch überwachen zu lassen. Der Projektcharakter betont Zeitmanagement und Fortschritte innerhalb der 10-wöchigen Bearbeitungszeit. | | |
| **Literaturempfehlungen** | Im Zentrum stehen die für die jeweilige Bachelorarbeit relevante Fachliteratur und Quellen. Die Literatur zur Bearbeitung der spezifischen Fragestellung soll von den Studierenden selbst recherchiert werden. | | |
