Prerequisites	
Skills to be acquired in this module	<p>Students</p> <ul style="list-style-type: none">• understand the role corporate finance plays in today's business environment,• are able to make consistent investment decisions based on established financial models both under certainty and under uncertainty,• are able to place these models in within the broader context of economic theory, including both neoclassical theory and principal-agent theory,• are able to assess the limitations of these models,• analyze firm's main sources of (long-term) financing.
Module contents	<p>Course outline:</p> <ol style="list-style-type: none">1. Introduction2. Valuation and Capital Budgeting3. Risk and Return4. Long-Term Financing <p>This course is an introduction to corporate finance. It covers typical tools and techniques used in making investment and financing decisions, and it provides insights into their theoretical foundations. The concept of time value of money and net present value is discussed in detail, first under certainty, and then in the presence of uncertainty. We will examine the relationship between an investment's risk and its return, and discuss ways to derive risk-adjusted cost of equity capital. In addition, the course provides insights into firms' main sources of (long-term) financing.</p> <p>The topics covered in this course are relevant for financial decision-making in various areas of business management, including operations management, marketing, and in particular corporate strategy.</p>
Reader's advisory	<p>Main textbook: Hillier, Ross, Westerfield, Jaffe & Jordan, Corporate Finance, current edition, McGraw-Hill (especially chapters 1, 2, 4-10, 14).</p> <p>Supplementary readings: Berk & DeMarzo, Corporate Finance, current edition, Boston (Mass.). Prerequisites	keine
Skills to be acquired in this module	<p>Upon completion of the module (two complementary lectures), students will be able to:</p> <ul style="list-style-type: none"> • understand the complex issues, challenges and fields of action in organisational Human Resource (HR) Management; • analyse, interpret and manage HR issues within heterogeneous fields of stakeholders and environments; • effectively analyse and apply HR instruments according to the specific practical context; • develop skills to self-reflection by dealing with theoretical as well as practical issues in HR Management and are able to press their point within the scientific discussion; • are able to locate a specific research question within the scientific discussion in the field of Human Resource Management and to interlink, reflect and evaluate it accordingly. <p>By attending the non-compulsory tutorials and participating in lecture discussions, students can develop their own position on the inter-linkages between theoretical approaches and practical courses of action. Students will thus be able to identify problems, analyse them critically, and develop solutions. As they have the opportunity to work in small groups within the tutorials and to participate during lecture discussions, students may also learn to handle different points of view and discuss constructively. Overall they will be prepared for the specific requirements faced in the field of HR Management.</p>
Module contents	<p>Students develop theoretical as well as practical insights into the backgrounds and specific characteristics of "Human Resource" Management, in particular the following:</p> <ul style="list-style-type: none"> - origins and theoretical basis - development and framework requirements - workforce planning - recruitment and selection - work organisation - working time organisation - leadership - performance reviews - training and development - compensation - staff reduction

Responsible persons	<p>Lehrenden, Die im Modul (Authorized examiners)</p> <p>Hoppmann, Jörn (Module responsibility)</p>			
Prerequisites				
Skills to be acquired in this module	<p>The goal of the course is that students are able to</p> <ul style="list-style-type: none"> - know and understand basic concepts, instruments, and theories of strategic management - analyze company strategies by applying conceptual frameworks - understand the advantages and disadvantages of common instruments and models and critically evaluate their applicability - independently develop strategic options and derive recommendations for their implementation in real-life settings 			
Module contents	<p>The course offers a comprehensive overview of the models and instruments of strategic management. The first part of the course introduces important concept and models of strategic management and discusses their application using examples from corporate practice. Central topics that are being discussed in this context are the relation between firm strategies and competitive advantage, strategy analysis, strategy formulation, strategy implementation, and strategies in the context of internationalization and innovation. In the second part of the course, students apply and deepen their knowledge by writing a thesis that analyzes the strategy of a specific company.</p>

Responsible persons	<p>Raabe, Thorsten (Module responsibility)</p> <p>Lehrenden, Die im Modul (Authorized examiners)</p>			
Prerequisites				
Skills to be acquired in this module	<p>Upon completion of the module, students will be able to:</p> <ul style="list-style-type: none"> • recognize challenges facing marketing strategy in the field of markets and societies and draw conclusions for business management • elaborate and reflect upon the theoretical and conceptual foundations of strategic marketing planning • come up with examples that exemplify the systemic connection between strategic and instrumental marketing planning • discuss core assumptions of internationalization in the context of strategy planning and critically reflect upon its implications • build market research skills in an international context using different methods • develop their own perspectives on the conceptualization and implementation of international marketing strategies and advance them in discourses 			
Module contents	The core of the module is the application of strategic planning methods in Marketing. A broadened understanding of Marketing in the areas of competitors, market agents and stakeholder orientation will be substantiated in theoretical and practical-normative view. International marketing forms an integrated part of strategic marketing planning; its basics and internal conception are formulated precisely in this course.

Prerequisites				
Skills to be acquired in this module	The course provides insights into the empirical analysis of firms' financing and investment decisions. We discuss theoretical foundations of long-term financing, capital structure choice, cost of capital determination, capital market efficiency, and corporate takeover decisions as well as respective empirical findings. Moreover, you will learn how to build financial models, handle financial data, and conduct financial analyses using the statistical software R."			
Module contents	The course covers key concepts of modern corporate finance in theory and practice. In particular, we focus on how investment and financing decisions affect the value of the firm. Among the topics discussed are: • Fundamental analysis and capital market efficiency. • Cost of debt and equity capital. • Business valuation models based on dividends, cash flows, and (abnormal) earnings. • Capital structure and dividend policy. • Advanced valuation issues.

Responsible persons	<p>Lehrenden, Die im Modul (Authorized examiners)</p> <p>Prokop, Jörg (Module responsibility)</p>
Prerequisites	none
Skills to be acquired in this module	<p>By the end of the course students should have answers to the following questions:</p> <ul style="list-style-type: none"> • How are fundamental values (or "intrinsic values") estimated? • How are business strategies analyzed in order to understand the value they create? • What business activities determine value? • How is "value created for shareholders" identified? • How does one pull apart the financial statements to get at the relevant information for valuing equities? • What is the relevance of cash-flows? Of dividends? Of earnings? Of book values? • How does ratio analysis help in valuation? • How does profitability tie into valuation? • What is growth? How does one analyze growth? How does one value a growth firm? • How does one analyze the quality of financial reports? • How does one deal with the accounting methods used in financial statements? • How is financial analysis developed for strategy and planning? • What determines a firm's P/E ratio? How does one calculate what the P/E should be? • What determines a firm's market-to-book (P/B) ratio? How does one calculate what the P/B should be? • How does one evaluate risk? For equity? For debt? • How does one evaluate an equity research report? • How does one trade on fundamental information?
Module contents	<p>With a stock market bubble and a financial crisis in our recent history, there have been increasing calls to "return to fundamentals." This is a course on fundamental analysis. The primary emphasis is on equity (share) valuation, with a focus on developing and applying methods for valuing firms using financial statement analysis.</p> <p>The course has a very practical focus. The methods of fundamental analysis will be examined in detail and applied in cases and projects involving listed companies. Topics include models of shareholder value, a comparison of accrual accounting and discounted cash flow approaches to valuation, the analysis of profitability, growth and valuation generation in a firm, diagnosing accounting quality, forecasting earnings and cash flows, pro-forma analysis for strategy and planning, and the determination of price/earnings (P/E) and market-to-book (P/B) ratios.</p> <p>The course does not assume "market efficiency". Rather, it develops the techniques for challenging traded prices in order to assess whether investments are appropriately priced. It adopts the philosophy that one of the risks in investing is the risk of paying too much. The course is one for the active investor.</p> <p>Most importantly, we learn how to handle accounting and financial reports in valuation. We see that valuation is really a matter of appropriate accounting for value. The course combines accounting principles and investment principles to answer the question: How do I account for value so that I can challenge stock prices with some confidence?</p> <p>The course will be taught from the perspective of designing techniques to be used in an (independent) equity research department or firm. Accordingly, the material is pertinent to the security analyst – particularly the equity analyst – who must issue a buy, hold or sell recommendations on stocks. However, much of the material covered in the course is also relevant to the corporate financial analyst for evaluating acquisitions, restructurings and other investments, and for calculating the value generated by strategic scenarios. By the end of the course, the student should feel competent in writing a thorough, credible equity research report or investment analysis that meets the highest standards of professionalism.</p> <p>The course is of interest to those contemplating careers in investment banking (particularly in equity research), security analysis, consulting, public accounting, and corporate finance. And it will also help with personal investing.</p>

wir851 - Corporate Governance and Control

Module label	Corporate Governance and Control			
Module code	wir851			
Credit points	6.0 KP			
Workload	180 h			
Applicability of the module	<ul style="list-style-type: none"> • Master of Education Programme (Vocational and Business Education) Economics and Business Administration (Master of Education) > Mastermodule • Master's Programme Business Administration, Economics and Law (Master) > Schwerpunkt "Unternehmensführung" (MPO2020) 			
Responsible persons	<p>Lehrenden, Die im Modul (Authorized examiners)</p> <p>Hombach, Katharina (Module responsibility)</p>			
Prerequisites	none			
Skills to be acquired in this module	<p>By the end of the course students should develop and understand the basic concepts, analytical techniques, instruments and systems to control sustainable corporate success. The students further identify the theoretical background of corporate governance and how corporate governance mechanisms work. Moreover, they develop an up-to-date and mainly practitioner-oriented profile of corporate governance and control systems. They are aware of a controller's relevance as a corporate conscience and the meaning of controlling as a corporate service. In addition, students identify strategic, operational and department-specific characteristics of corporate control. They argue how to ensure the quality of data and the development of decision-making relevant information. Paper discussions further complement the students' profile by highlighting current and special issues in the field of corporate governance and control. In summary, students link economic, methodological, and cultural aspects to their personal profile and assess whether an activity as a controller fits to their personal plan for future employment. They further strengthen their ability to develop sustainable solutions for comprehensive and specific economic issues.</p>			
Module contents	<p>In the beginning, the course provides an overview of the historic development as well as conceptions of corporate governance and control in the literature and in practice. It further embeds the role of corporate governance and control within strategic and operational corporate management. The course is further separated in different parts to ensure students' ability to identify and understand decision-making, coordination and monitoring aspects of corporate governance and control. As such, students analyse corporate actions via the following instruments:</p> <ul style="list-style-type: none"> • SWOT-Analysis • Porter's Five Forces Model • Portfolio Analysis • Strategic Cost Management • Linear Programming • Break-Even Analysis • Value Based Management • Ratio Analysis • Balanced Scorecard • Variance Analysis

wir083 - Purchasing, Operations, and Logistics Management

Module label	Purchasing, Operations, and Logistics Management			
Module code	wir083			
Credit points	6.0 KP			
Workload	180 h			
Applicability of the module	<ul style="list-style-type: none"> • Bachelor's Programme Business Administration and Law (Bachelor) > Aufbaubereich Wirtschaftswissenschaften • Bachelor's Programme Business Informatics (Bachelor) > Aufbaucurriculum - Pflichtbereich • Bachelor's Programme Economics and Business Administration (Bachelor) > Aufbaumodule • Bachelor's Programme Sustainability Economics (Bachelor) > Wahlpflichtbereich • Dual-Subject Bachelor's Programme Economics and Business Administration (Bachelor) > Aufbaumodule • Dual-Subject Bachelor's Programme Economics and Business Administration (Bachelor) > Schwerpunkt Management und Ökonomie • Master of Education Programme (Vocational and Business Education) Economics and Business Administration (Master of Education) > Mastermodule 			
Responsible persons	<p>Lehrenden, Die im Modul (Authorized examiners)</p> <p>Busse, Christian (Module responsibility)</p>			
Prerequisites				
Skills to be acquired in this module	Students obtain an overview of the most important operational functions of an industrial or service company. These are procurement, production and logistics. Students will get to know typical operational challenges and familiarize themselves with established approaches and methods for analyzing and improving procurement, production and logistics operations.			
Module contents	The module comprises a lecture (course number 2.02.231) and an accompanying tutorial (course numbers 2.02.231a to 2.02.231j). The lecture is based on the text book "Grundzüge der Beschaffung, Produktion und Logistik" by Kummer, Grün und Jammerneegg in the third edition of 2013 and the associated workbook, as well as partly on the text book "Operations Management: Konzepte, Methoden und Anwendungen" by Thonemann in the third edition of 2015. The purpose of the lecture is to explain the fundamental problems and their solutions theoretically. The tutorials focus on application and practice and offer time for questions. There are no formal or content-related participation or entrance requirements.			
Reader's advisory	Kummer, S., Grün, O. und Jammerneegg, W. (2013): Grundzüge der Beschaffung, Produktion und Logistik (3. Auflage), Pearson Thonemann, U. (2015): Operations Management (3. Auflage), Pearson.

Prerequisites	52 Wochen berufspraktische Tätigkeit	
Skills to be acquired in this module	Die Studierenden... • erarbeiten und beantworten eine empirische wissenschaftliche Fragestellung der Berufs- und Wirtschaftspädagogik selbstständig und unter Verwendung wissenschaftlicher Methoden. • analysieren den thematischen Hintergrund ihrer Fragestellung hinsichtlich des aktuellen Stands der Forschung und der Relevanz für die Berufs- und Wirtschaftspädagogik. • führen eigenständig eine empirische Untersuchung durch, werten diese aus und leiten begründet Handlungsempfehlungen ab. • fertigen eine Masterarbeit an.	
Module contents	Das Modul setzt sich zusammen aus einer empirischen Masterarbeit im Feld der Berufs- und Wirtschaftspädagogik (18 KP) und einer begleitenden Lehrveranstaltung in Form eines Kolloquiums (3 KP). In der Masterarbeit bearbeiten die Studierenden innerhalb einer vorgegebenen Frist von 24 Wochen selbstständig, theoriegeleitet und empirisch ein berufs- und wirtschaftspädagogisches Problem mit Hilfe von wissenschaftlichen Methoden. Im Kolloquium zur Masterarbeit stellen die Studierenden ihre Zwischenergebnisse zur Diskussion und erhalten Rückmeldung bezogen auf ihre Präsentation von Gliederung, Methodik und Untersuchungsdesign, Problemstellung und Theorie.	
Reader's advisory	Die Literatur zur Bearbeitung der spezifischen Fragestellung muss von den Studierenden selbst recherchiert werden.
