Schwerpunktmodule AFT - BWL

wir834 - Auditing

Module label: Auditing
Modulkürzel: wir834
Credit points: 6.0 KP
Workload: 180 h

Verwendbarkeit des Moduls
- Master of Education Programme (Vocational and Business Education) Economics and Business Administration (Master of Education) > Mastermodule
- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule AFT - BWL
- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule RdW - BWL

Zuständige Personen
- Sextroh, Christoph (module responsibility)
- Lehrenden, Die im Modul (Prüfungsberechtigt)

Prerequisites
- Achieving basic knowledge about audit practises
- Achieving broad knowledge about the audit profession and structuring of audit processes,
- Application of audit techniques while using case studies and focusing on certain audit areas.

Module contents
In this course, audit basic principles, audit methods and audit techniques will be presented while emphasizing on large corporates. In addition, an overview about audit processes and audit techniques in the context of the control, information and accreditation function as well as legal specifications is given. Working in groups, case studies will strengthen the achieved knowledge. In addition, the focus will be on international financial reporting standards (IFRS) and international auditing standards (IAS) for proving the financial statements as well as testing the internal risk management.

- Lehrenden, Die im Modul (Prüfungsberechtigt)

**Prerequisites**  
The course is intended for master’s students with a specialization in Accounting, Finance, Taxation (AFT).

**Skills to be acquired in this module**  
The aim of the course is to provide insights into the economics of accounting, finance, and/or taxation from the perspective of a quantitative researcher. Upon completion of the module, students will be familiar with typical quantitative models and research approaches in the respective field and will be able to develop their own research designs.

**Module contents**  
The course involves reading and discussing empirical research in accounting, finance, and/or taxation, and working with quantitative models in at least one of these areas.

**Literaturempfehlungen**  
Will be announced at the beginning of the course.

## Prerequisites

The course provides insights into the empirical analysis of firms' financing and investment decisions. We discuss theoretical foundations of long-term financing, capital structure choice, cost of capital determination, capital market efficiency, and corporate takeover decisions as well as respective empirical findings. Moreover, you will learn how to build financial models, handle financial data, and conduct financial analyses using the statistical software R.

## Module contents

The course covers key concepts of modern corporate finance in theory and practice. In particular, we focus on how investment and financing decisions affect the value of the firm. Among the topics discussed are:

- Fundamental analysis and capital market efficiency.
- Cost of debt and equity capital.
- Business valuation models based on dividends, cash flows, and (abnormal) earnings.
- Capital structure and dividend policy.
- Advanced valuation issues.

## Literature recommendations

- Titman / Martin: Valuation, latest edition, Boston (Mass.)

Further readings may be announced during the course.

- Lehrenden, Die im Modul (Prüfungsberechtigt)

Prerequisites
- none

Skills to be acquired in this module
- By the end of the course students should have answers to the following questions:
  - How are fundamental values (or "intrinsic values") estimated?
  - How are business strategies analyzed in order to understand the value they create?
  - What business activities determine value?
  - How is "value created for shareholders" identified?
  - How does one pull apart the financial statements to get at the relevant information for valuing equities?
  - How does ratio analysis help in valuation?
  - How does profitability tie into valuation?
  - What is growth? How does one analyze growth? How does one value a growth firm?
  - How does one analyze the quality of financial reports?
  - How does one deal with the accounting methods used in financial statements?
  - How is financial analysis developed for strategy and planning?
  - What determines a firm's P/E ratio? How does one calculate what the P/E should be?
  - What determines a firm's market-to-book (P/B) ratio? How does one calculate what the P/B should be?
  - How does one evaluate risk? For equity? For debt?
  - How does one evaluate an equity research report?
  - How does one trade on fundamental information?

Module contents
- With a stock market bubble and a financial crisis in our recent history, there have been increasing calls to “return to fundamentals.” This is a course on fundamental analysis. The primary emphasis is on equity (share) valuation, with a focus on developing and applying methods for valuing firms using financial statement analysis.

  The course has a very practical focus. The methods of fundamental analysis will be examined in detail and applied in cases and projects involving listed companies. Topics include models of shareholder value, a comparison of accrual accounting and discounted cash flow approaches to valuation, the analysis of profitability, growth and valuation generation in a firm, diagnosing accounting quality, forecasting earnings and cash flows, pro-forma analysis for strategy and planning, and the determination of price/earnings (P/E) and market-to-book (P/B) ratios.

  The course does not assume “market efficiency.” Rather, it develops the techniques for challenging traded prices in order to assess whether investments are appropriately priced. It adopts the philosophy that one of the risks in investing is the risk of paying too much. The course is one for the active investor.

  Most importantly, we learn how to handle accounting and financial reports in valuation. We see that valuation is really a matter of appropriate accounting for value. The course combines accounting principles and investment principles to answer the question: How do I account for value so that I can challenge stock prices with some confidence?

  The course will be taught from the perspective of designing techniques to be used in an (independent) equity research department or firm. Accordingly, the material is pertinent to the security analyst – particularly the equity analyst –
who must issue a buy, hold or sell recommendations on stocks. However, much of the material covered in the course is also relevant to the corporate financial analyst for evaluating acquisitions, restructurings and other investments, and for calculating the value generated by strategic scenarios. By the end of the course, the student should feel competent in writing a thorough, credible equity research report or investment analysis that meets the highest standards of professionalism.

The course is of interest to those contemplating careers in investment banking (particularly in equity research), security analysis, consulting, public accounting, and corporate finance. And it will also help with personal investing.

wir841 - Advanced Financial Accounting

Module label  Advanced Financial Accounting
Modulkürzel  wir841
Credit points  6.0 KP
Workload  180 h

Verwendbarkeit des Moduls
- Master of Education Programme (Vocational and Business Education) Economics and Business Administration (Master of Education) > Mastermodule
- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule AFT - BWL
- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule RdW - BWL

Zuständige Personen
- Sextroh, Christoph (module responsibility)
- Lehrenden, Die im Modul (Prüfungsberechtigt)

Prerequisites
Students have to understand the theoretical orientation and the institutional structure of financial accounting and standard setting. Many important standards, such as fair value accounting, financial instruments, reserve recognition accounting, management discussion and analysis, employee stock options, impairment tests, hedge accounting, derecognition, consolidation, and comprehensive income, will be analyzed and critically evaluated from students. This course aims to provide students with an in-depth understanding of the underlying accounting concepts and accounting standards governing the preparation of financial statements under International Financial Reporting Standards (IFRS) for external users. Furthermore, it develops students' conceptual skills and professional competence in financial accounting in compliance with the regulatory and financial framework under IFRS.

Module contents
- Accounting Under Ideal Conditions
- The Decision Usefulness Approach to Financial Reporting
- Efficient Securities Markets
- The Value Relevance of Accounting Information
- The Measurement Approach to Decision Usefulness
- Measurement Applications
- The Efficient Contracting Approach to Decision Usefulness
- An Analysis of Conflict
- Executive Compensation
- Earnings Management
- Standard Setting: Economic Issues
- Standard Setting: Political Issues

#### Zuständige Personen
- Prokop, Jörg (module responsibility)
- Lehrenden, Die im Modul (Prüfungsberechtigt)

#### Prerequisites

#### Skills to be acquired in this module
Upon completion of the module students will be able to explain the role financial institutions play in financial markets based on economic theory. They will have a sound knowledge of institutional and regulatory conditions under which financial institutions operate today, and they will be able to critically assess respective developments in the financial sector. Moreover, they will have developed a sound understanding of how banks are managed in a competitive environment.

#### Module contents
We will discuss theoretical foundations of financial intermediation in general, and of banking in particular as well as the economic, institutional, and regulatory context in which financial institutions operate today. Moreover, we will cover selected topics in the area of bank management and bank accounting.

- Dittmer, Jochen (Module counselling)
- Lehrenden, Die im Modul (Prüfungsberechtigt)

**Prerequisites**
Students are required to actively participate in the course by preparing classes, by performing follow-up coursework, and/or by giving presentations according to the rules defined by the lecturer in the first session.

**Skills to be acquired in this module**
The aim of the course is to provide insights into the state-of-the-art of academic research in selected areas of accounting and auditing, finance, and taxation. Upon completion of the module, students will be able to place typical research questions and research designs in the aforementioned areas within a broader context of academic research, and to assess selected contributions' significance.

**Module contents**
The course involves reading and discussing cornerstone journal articles as well as contemporary articles and working papers in accounting/auditing, finance, and/or taxation. Particular emphasis will be placed on the evaluation of the respective studies with respect to their research questions, the methodologies used, and their contributions to the literature.

**Literaturempfehlungen**
Will be announced at the beginning of the course.

Zuständige Personen
- Sextroh, Christoph (module responsibility)
- Lehrenden, Die im Modul (Prüfungsberechtigt)

Prerequisites
The aim of the course is to provide students with a deep knowledge of the theory and concepts in managerial accounting as it relates to practice and research. The students learn to design budgeting processes and apply operating performance measures which are in line with the firm’s goals. Moreover, the students learn to forecast profits, cash flows and other key financial indicators in order to improve business planning.

Module contents
- Theory and concept of managerial accounting
- Profit planning
- Budgeting
- Ratios and financial analysis
- Operating performance measures
- Cash flow and segment reporting
- paper discussion on current and special issues.

Zuständige Personen:
- Sextroh, Christoph (module responsibility)
- Lehrenden, Die im Modul (Prüfungsberechtigt)

Prerequisites:
none

Skills to be acquired in this module:
By the end of the course students should develop and understand the basic concepts, analytical techniques, instruments and systems to control sustainable corporate success. The students further identify the theoretical background of corporate governance and how corporate governance mechanisms work. Moreover, they develop an up-to-date and mainly practitioner-oriented profile of corporate governance and control systems. They are aware of a controller’s relevance as a corporate conscience and the meaning of controlling as a corporate service. In addition, students identify strategic, operational and department-specific characteristics of corporate control. They argue how to ensure the quality of data and the development of decision-making relevant information. Paper discussions further complement the students’ profile by highlighting current and special issues in the field of corporate governance and control. In summary, students link economic, methodological, and cultural aspects to their personal profile and assess whether an activity as a controller fits to their personal plan for future employment. They further strengthen their ability to develop sustainable solutions for comprehensive and specific economic issues.

Module contents:
In the beginning, the course provides an overview of the historic development as well as conceptions of corporate governance and control in the literature and in practice. It further embeds the role of corporate governance and control within strategic and operational corporate management. The course is further separated in different parts to ensure students’ ability to identify and understand decision-making, coordination and monitoring aspects of corporate governance and control. As such, students analyse corporate actions via the following instruments:
- SWOT-Analysis
- Porter’s Five Forces Model
- Portfolio Analysis
- Strategic Cost Management
- Linear Programming
- Break-Even Analysis
- Value Based Management
- Ratio Analysis
- Balanced Scorecard
- Variance Analysis

Prerequisites

keine

Skills to be acquired in this module

Students get to know selected concepts of organisation and management. Their respective objectives, instruments and methods are discussed and their use in everyday business is critically reflected. Students learn to deal with different management concepts in a conscious and critical way, especially through case studies and discussions.

Upon completion of the module, students will:
- be familiar with the emergence, development, and content of various management concepts;
- be able to convey key findings of the various management concepts to practical issues in the field of organisation and management;
- develop skills of self-reflection (supported by the technical and didactical concepts).

Module contents

Students receive deeper insights into concepts of organisation and management, including:
- Lean Management
- Change Management
- Quality Management
- Business Process Reengineering

The presentations and discussions within the seminars also offer possibilities to deepen and broaden these topics according to the student’s interest and current developments in theory and practice, e. g. Balanced Scorecard, Learning Organisation, Organisational Culture, Worker Participation, Networks, Diversity Management, Management by Objectives.

Literaturempfehlungen

Further literature will be announced during the semester according to the particular lecture/seminar content.

**Prerequisites**

not applicable

**Skills to be acquired in this module**

The students are familiar with the effects of digitalisation with its chances and risks in European and German private law and, in particular, consumer law. They obtain knowledge of specific areas of digitalised private law and consumer law with particular relevance for their future professional practice, are able to solve consumer law cases in a goal-oriented way, are able to find approaches for legal problems as well as recognise liability risks and how to deal with them, and are, in contract negotiations, able to recognise the requirements for regulation and to evaluate its consequences.

**Module contents**

This module conveys how new technologies impact on private law and, in particular, on consumer law. It focuses on the (modified) interpretation of existing laws but even more on the reactions of the EU and national legislators and of the judiciary to new technological developments. The module discusses, among others, distance selling law, digitalised sales law and product liability law, the law of digital content and digital services, unfair commercial practices on internet and the law of the platform economy. Finally, the module looks at enforcement.

### Verwendbarkeit des Moduls
- Master of Education Programme (Vocational and Business Education) Economics and Business Administration (Master of Education) > Mastermodule
- Master's programme Business Administration: Management and Law (Master) > Basismodule
- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule AFT - Recht
- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule RdW - Recht

### Zuständige Personen
- Dittmer, Jochen (module responsibility)

### Prerequisites

#### Skills to be acquired in this module
The aim of the course is to provide students with a deep and thorough knowledge regarding
- Tax accounting law and
- Taxation procedures.

#### Module contents
The course provides a deep insight into
- Tax accounting law
  - Basics of tax accounting law
  - Principal values (cost of purchase/cost of manufacture, going concern value, fair market value)
  - Depreciation, subsidy regulations
  - Transfer of hidden reserves
  - Leasing
  - Provisions
- Taxation procedures
  - Overview about general fiscal law (AO) and tax court code (FGO)
  - Tax determination and taxing procedures
  - Types of taxing
  - Deadlines and extent of balances and tax assessments corrections
  - Interest yield

#### Literaturempfehlungen
- Falterbaum, Hermann (aktuelle Fassung): Buchführung und Bilanz
- Rose, Gerd & Watrin, Christoph (aktuelle Fassung): Abgabenordnung; mit Finanzgerichtsordnung

It is worth mentioning, that due to the fast-changing tax law, further recommendations regarding the literature cannot be made yet, but are rather given during the course. Required are:
- A collection of the most important tax laws (e.g. NWB-publisher) in current form
- A loose-leaf collection of the tax regulations (e.g. Beck-publisher)

**Zuständige Personen**

- Stecking, Ralf Werner (module responsibility)
- Lehrenden, Die im Modul (Prüfungsberechtigt)

**Prerequisites**

With successful completion of the course, students shall:

- be aware of and be able to evaluate advanced methods of multivariate data analysis.
- be able to select adequate methods in relevant fields of application, like prediction, classification, and segmentation analysis.
- be able to run computer-aided analyses and to interpret the results properly.

**Module contents**

Various methods of quantitative data analysis such as:

- Linear Regression,
- Logistic Regression,
- Linear Discriminant Analysis,
- Principal Component Analysis,
- Feature selection and evaluation methods.

#### Skills to be acquired in this module
The students are able to:
- apply the basic econometric methods,
- follow, evaluate and interpret basic empirical studies,
- apply basic econometric methods in empirical studies,
- use the econometric software STATA.

#### Module contents
The module consists of a lecture and an exercise. In the module the basic statistical principles are recapitulated, deepens the knowledge of the multiple regression and introduce the students to the advanced topics of panel econometrics, binary dependent variables, instrumental variable estimation and time series econometrics.

- Master's Programme Business Informatics (Master) > Module der Wirtschafts- und Rechtswissenschaften (Master)
- Master's Programme Computing Science (Master) > Module aus anderen Studiengängen
- Master's Programme Sustainability Economics and Management (Master) > Basic Modules

**Zuständige Personen**
- Meyerholt, Ulrich (Module counselling)
- Godt, Christine (module responsibility)
- Lehrenden, Die im Modul (Prüfungsberechtigt)

**Prerequisites**
Building on the existing knowledge of the participants, the course will deepen knowledge of European and international law, whereby emphasis will be laid on those areas in which the dividing line between state intervention (public law) and market rights (private law) has become blurred. Students will be able to analyze contemporary regulatory techniques inherent in the multilevel system of governance and to assess them from an interdisciplinary (economic and legal) perspective.

**Module contents**
The module comprises two courses, one of which will be taught by PD Dr. Meyerholt, and the other together with Prof. Godt. The first course deals with selected issues in environmental law. With the general structure of environmental law as a point of departure, the course content will be taught in a holistic manner that will also incorporate the leading decisions of the higher courts. The second course takes into consideration intra-disciplinary environmental law as situated between public and private economic law, whereby special focus will be laid on the European and international dimensions.

- kein Abschluss European Studies in Global Perspectives > Society, Economy and Politics
- Master Applied Economics and Data Science (Master) > Economics
- Master's programme Business Administration: Management and Law (Master) > Basismodule
- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule AFT - VWL

**Zuständige Personen**
- Trautwein, Hans-Michael (module responsibility)
- Trautwein, Hans-Michael (Prüfungsberechtigt)
- Trautwein, Hans-Michael (Module counselling)

**Prerequisites**
- Understanding of exchange rates as strategic prices in open economies.
- Understanding of the interdependence of balance-of-payments constraints and exchange rates.
- Capability to discuss different models of exchange rate determination.
- Ability to research data and evaluate the literature on specific aspects of financial market globalization and strategies of exchange-rate policy.
- Understanding of the history of fixed-exchange-rate systems.
- Ability to relate the importance of historical experience in international monetary and financial economics.

**Module contents**
The lectures address the following issues:
- exchange rates and the balance of payments,
- open-economy macroeconomics,
- exchange rate determination,
- international financial markets,
- fixed-exchange-rate systems,
- currency crises,
- optimum currency areas and monetary integration,
- choice of exchange rate regime,
- financial market regulation.

In the seminar students will present papers on general and topical issues (theoretical models, policy strategies, case studies) in the fields of financial market globalization and exchange-rate policy.

**Literaturempfehlungen**
Selected chapters from:

And other specific readings for the seminar papers.

- Lehrenden, Die im Modul (Module counselling)
- Lehrenden, Die im Modul (Prüfungsberechtigt)

Prerequisites
Skills to be acquired in this module
- Upon completion of the module, students will be able to:
  - demonstrate a knowledge of the basics of insolvency law and insolvency proceedings law as well as the basics of banking law and capital market law.
  - classify insolvency law with its functions as enforcement law, restructuring law, and the right to alter a relationship in business life.
  - demonstrate a knowledge of the positions of the groups involved (creditors, debtors, the responsible bodies of legal persons) in the insolvency proceedings, including the rights and obligations of the groups involved in the process and in the run-up to the crisis, as well as the discharge of residual debt as a rehabilitation option for natural persons.
  - demonstrate a familiarity with the principles of the legitimacy verification pursuant to the general tax code, money laundering, bank secrecy, and the information requirements of credit institutions.
  - identify the functions of banking and capital market law as well as modern insolvency law.
  - use these functions in practical examples.
  - assess the progress of insolvency proceedings, including their requirements on creditors and debtors.

Module contents
The module deals with banking and capital market law as well as insolvency and insolvency proceedings law within two separate lectures.

The main focus of the lecture in banking and capital market law is banking law. After an introduction to general banking law, the most important legal questions regarding collateralisation of loans are discussed. Additionally, the topics of the legitimacy verification pursuant to the general tax code, money laundering, bank secrecy, and the information requirements of credit institutions are discussed. Subsequently, the basic principles of securities law are discussed. Their legal basis and the economic background are analysed. Where possible, the interrelations between the various securities and the events of the financial market crisis will be discussed.

The lecture Insolvency Law deals with the basics of debt enforcement and insolvency law. Procedures will be shown and explained. The first part deals with company insolvency law, the second part with consumer insolvency and residual debt relief law.

Literaturempfehlungen
Current literature references are given in the events.

**Skills to be acquired in this module**
- Students understand the importance of incentive systems for economic processes and can analyze the effects of incentive systems;
- have a firm knowledge in game theory and contract theory, and can address questions in the context of scientific discussion;
- are able to apply methods from game theory and contract theory largely independently to the analysis of situations in which agents interact strategically;
- are able to design incentive schemes – on their own and in teams – and to acquire knowledge on their own for this purpose and, to present their results, and to defend them in the scientific discourse.

**Module contents**
The first part of the module covers game theory. Game theory is an important method in economics to analyze strategic interactions of agents, e.g., on markets, in organizations or in bargaining situations.
The second part of the module covers contract theory that – according to the Nobel laureate Kenneth Arrow – has been „the most important development in economics in the last forty years“. We work out the fundamentals of screenings, signaling and moral hazard and apply them to different topics, e.g., from labor economics, economic organization and management, law and economics as well as industrial economics.

In both parts, there is a tutorial. Here students largely independently apply the acquired knowledge to different situations of strategic interaction in economics and present their results.

Prerequisites

Skills to be acquired in this module

In today’s highly dynamic business environment, innovation is the key to the success of most firms. Moreover, technological and organizational innovations represent valuable instruments for achieving progress toward sustainable development. Against this background, this module familiarizes students with the tools and processes for managing innovation and for developing overall more innovative firms. The module comprises a lecture and a seminar. In the lecture, students become acquainted with the drivers to and role of innovation; they learn about designing innovative firms and developing innovation strategies; they get to know the different sources of innovation; they familiarize themselves with the methods for choosing between alternative planned innovations; they learn how innovation is implemented; and they understand how innovation benefits are exploited. The accompanying seminar is supposed to familiarize the students with select advanced topics surrounding the management of innovation. Moreover, the students train their skills in working in teams, in working with scientific literature, in academic writing, and in presenting in front of a large audience.

Module contents

Organizational change, creative destruction, ambidexterity, exploration, exploitation, absorptive capacity, sustainability transitions, innovation models, innovation networks, innovation strategy, innovation ecosystems, diffusion of innovations, organizational routines, entrepreneurship, new ventures, etc.

- Master's Programme Sustainability Economics and Management (Master) > Supplementary Modules

**Zuständige Personen**

- Lehrenden, Die im Modul (Prüfungsberechtigt)
- Hoppmann, Jörn (module responsibility)

**Prerequisites**

**Skills to be acquired in this module**

- The students should:
  - know basic definitions, trends and application areas of digitalization
  - be able to assess the economic effects of digitalization
  - understand corporate strategies and business models in the context of digital transformation
  - know how companies should design processes and structures to promote digitalization in organizations
  - have an overview of social, legal and ethical aspects of digitalization
  - evaluate digital products, services and business models using ethical and sustainable guidelines
  - independently develop proposals for the integration of ethical, social and ecological criteria in digitalization projects and processes

**Module contents**

The module "Digital Strategy and Sustainability" provides insights into the role digitalization for companies and the associated social discourse. The digital transformation leads to the emergence of new business models, markets and forms of interaction. This requires comprehensive changes in strategic orientation as well as in business processes and structures. In addition, new regulations and standards are required at the societal level in order to meet the ethical, ecological, and societal challenges posed by digitalization.

In the first part of the seminar, students are familiarized with the basics and application areas of digitalization as well as the economic, social, and ecological implications. Toward this end, important questions in the context of digital transformation will be raised and discussed drawing on company case studies. Exemplary questions that will be dealt with in this context are:

- What are the technological drivers of digitalization and what trends can be observed?
- What is the impact of digital transformation on industries and companies?
- How can companies design strategies, business models, processes and structures to address the digital transformation?
- What are the consequences of digitalization on a societal and legal level?
- How does the digital transformation affect the natural environment?
- How can social, ethical, and ecological aspects be integrated into digital products, services and business models?

In the second part of the course, students will develop digital business models in teams under the guidance of experienced coaches, taking into account economic, ecological and social/ethical criteria. The results are presented to the other students and company representatives and will be summarized in a term paper. An important part of the term paper is the critical reflection of current methods used to develop digital business models with regard to sustainability criteria.

Zuständige Personen

- Hoppmann, Jörn (module responsibility)
- Lehrenden, Die im Modul (Prüfungsberechtigt)
- Hoppmann, Jörn (Module counselling)

Prerequisites

Skills to be acquired in this module

The students should...

- know and understand basic concepts, instruments and theories in the context of corporate sustainability and corporate social responsibility
- be able to apply conceptual frameworks to analyze and critically question the sustainability of companies
- develop options to improve the sustainability of companies and derive recommendations for their implementation in practice

Module contents

The module "Strategic Sustainability Management" provides an overview of the debates on the role of firms for sustainable development from a strategic perspective. The first session will briefly introduce the historical debate on Corporate Sustainability and Corporate Social Responsibility and delineate important concepts. The following sessions will use concrete company case studies as a basis for a critical discussion of questions in the context of corporate sustainability that are of strategic importance for firms. Questions that will be discussed are, amongst others:

- How can one determine whether a firm acts in a socially and ecologically sustainable way?
- Which factors drive and hinder the diffusion of socially and ecologically superior solutions and companies in the market?
- To which extent is there a conflict between firm and market growth on the one hand and sustainability on the other hand?
- Which possibilities does a company have to deal with conflicts between social/ecological and economic goals?
- How can existing firms and value chains be transformed toward sustainability?
- What is the role of managers and boards of directors for organizational change toward sustainability?
- How does the ownership and financial structure of firms influence their strategy toward sustainability?
- In how far can cooperation and partnerships between organizations help integrate social and ecological aspects in firms?

In addition to discussing these questions by drawing on company case studies, students will be introduced to the corresponding theoretical concepts and frameworks in the academic literature. Also, students will be given the opportunity to test different strategies for implementing sustainability in organizations during a simulation, which allows them to gain first-hand insights into the emerging challenges. Toward the end of the course, students will apply and deepen the knowledge they have gathered over the semester by writing a seminar thesis.

Prerequisites
- No

Skills to be acquired in this module
- Knowledge on the basic concepts and strategies of sustainability management related to corporate practice: "Sustainability: Basic concepts, strategies, " Domestic and international challenges for business, " Business case for sustainable development, " Integrative concepts of sustainable corporations, " Sustainable strategies, " Management instruments - Discussing topics of international sustainability management with students from different scientific disciplines. - Ability to present and evaluate different concepts and instruments of international sustainability management

Module contents
This module consists of a one lecture and one seminar (2 weekly contact hours per lecture/seminar) dealing with basic concepts and strategies of sustainability management within corporations. Both, lecture and seminar give an overview of current sustainability strategies for companies and present a variety of instruments to integrate and initiate sustainable development within corporations. While the lecture focuses more on theoretical approaches and introduces basic concepts of corporate sustainability management, the seminar provides a variety of case studies and business cases to demonstrate different concepts and instruments of sustainability management. The seminar provides the possibilities for inter- and transdisciplinary exchange and discussions.

| Skills to be acquired in this module | Methods of project management  
|                                      | Introduction into the methods of qualitative empirical research  
|                                      | Introduction into approaches to time management  
|                                      | Identification of individual or team projects in sustainability management (case studies, empirical studies, marketing concepts)  
|                                      | Self organized work on individual or team projects  
|                                      | Mid-term and final presentation of project results |

| Module contents | This module consists of two seminars (2 weekly contact hours per seminar) dealing with several topics from the broad field of sustainability, economics and management during term.  
|                | The module's intention is to integrate current research activities of the University from the research areas of sustainability, economics and management into teaching activities. The Module provides students the possibility to actively participate in current research at Oldenburg University. The module's seminars each year deal with different projects and are thus designed each year by a different group of Oldenburg located researchers. This teaching concept provides the interface between theory and application of scientific theories into research practise. Thus, this module also introduces research work at universities in general. |

|                       | Depending on the topic and content of each seminar |

### Verwendbarkeit des Moduls
- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule NM-BWL
- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule RdW - BWL
- Master's Programme Sustainability Economics and Management (Master) > Supplementary Modules
- Master's Programme Water and Coastal Management (Master) > Socioeconomics

### Zuständige Personen
- Siebenhüner, Bernd (Prüfungsberechtigt)
- Sievers-Glotzbach, Stefanie (Prüfungsberechtigt)
- Wolter, Hendrik (Prüfungsberechtigt)
- Siebenhüner, Bernd (module responsibility)

### Prerequisites
- Skills to be acquired in this module
  - Learning about sustainability, economics and management in different scientific contexts.
  - Understanding the complexity of sustainability, economics and management.
  - Discussing topics of sustainability, economics and management with students from different scientific disciplines.
  - Ability to present and evaluate different concepts of sustainability, economics and management

### Module contents
- This module consists of two seminars (2 weekly contact hours per seminar) dealing with selected topics from the broad field of sustainability, economics and management. Out of a variety of several seminars the student can choose two most suitable seminars depending on individual choices. The seminars and the seminar contents vary each semester to provide topics relevant for current discussions within the broad field of sustainability, economics and management. Intentionally seminars from several research fields and faculties are offered to also combine different point of views and to bring students from different scientific backgrounds together. The seminars provide the possibilities for inter- and transdisciplinary exchange and discussions.

- Lehrenden, Die im Modul (Prüfungsberechtigt)
- Busse, Christian (Module counselling)

**Prerequisites**

**Skills to be acquired in this module**

By focusing on sustainability from an intra-, and inter-organizational perspective, this module aims to equip students with an in-depth knowledge of the sustainability-related challenges and problems within supply chain management and suggests some tools for managing the same. It further seeks to capacitate students to understand and analyze the trade-offs and conflicts of targets within sustainable supply chain management. The content is closely linked to the latest research in the field, providing a theoretical understanding (within the lecture) while using real-world case examples (within the seminar) to develop a practical understanding simultaneously. Students will be able to connect theory with practice and get a taste of real-life corporate scenarios or lay a foundation for possible master theses. Further, working in groups will help students brush up their team management skills, and the final report shall accustom them to the intricacies of scientific writing.

**Module contents**

This masters-level module focuses on how firms could practically manage sustainability in its supply chains. Two broader perspectives, as detailed below, guide the coursework:

1) The material flow perspective approaches SSCM with sustainably managing physical flows and processes within a firm’s operations and upstream (and downstream) supply chain links. Individual (lecture) sessions are built around the following topics: Introduction to Sustainability and Supply Chain Management; Introduction to Sustainable Supply Chain Management; Sustainable Product Development & Lean and Green; Workplace Health and Safety; Sustainable Transportation; Sustainable Warehousing & Sustainable Packaging; and Closed-Loop Supply Chain Management

2) The relationship perspective further adopts a more direct managerial viewpoint on inter-firm relations. Individual (lecture) sessions discuss the following topics: Stakeholder Management; Legitimacy, Decoupling & Greenwashing; Supply Chain Sustainability Risks; Sustainable Supplier Management; and Supply Chain Sustainability Dilemmas

Some of the theoretical perspectives discussed within the lecture sessions will be prepared by case studies of well-known companies such as Walmart, DHL, HP, Volkswagen, Lidl, and Apple.

**Literaturempfehlungen**

The lecture content has been developed from various research publications, rather than a textbook. Students are encouraged to read some of the original publications as amendments to the lecture. The case studies will mostly be based on professionally written cases. Scholarly publications/articles, as well as the case study documents, will be provided and discussed throughout the sessions.

- Lehrenden, Die im Modul (Prüfungsberechtigt)
- Dahiya, Satwant (Module counselling)

**Prerequisites**
Erfolgreiche Belegung des Moduls "Sustainable Supply Chain Management" (wir921)

**Skills to be acquired in this module**
The module helps students to specialize in research in the field of sustainable supply chain management by developing their substantive and theoretical expertise and by augmenting their methodological expertise. Students hone their skills in gathering, reading, understanding, and synthesizing scholarly articles using different methods. They may also practice their data collection and data analysis skills. Moreover, students further develop their academic writing, reviewing, presentation, and discussion skills.

**Module contents**
This masters-level module focuses on selected topics pertaining to the relationship perspective of sustainable supply chain management, comprising topics such as Stakeholder Management; Legitimacy, Decoupling & Greenwashing; Supply Chain Sustainability Risks; Sustainable Supplier Management; and Supply Chain Sustainability Dilemmas.

**Literaturempfehlungen**
Selected scholarly research articles will be used throughout the module.

**Prerequisites**
Erfolgreiche Belegung mindestens eines der Module „Sustainable Supply Chain Management“ (wir921), „Supply Chain Management“ (wir899), „Operations Management“ (wir896) und „Innovation Management“ (wir832)

**Skills to be acquired in this module**
Students become acquainted with emergent innovations for sustainable operations, they evaluate such innovations and (co-)design others. They learn to evaluate their actual or conjectured economic, social and/or ecologic effectiveness, drawing on the design science framework and/or theoretical discourses in the field.

**Module contents**
The module helps students to specialize on the intersection of operations and supply chain management, sustainability management, and innovation management. The specific topics align closely with the most up-to-date applied research topics.

**Literaturempfehlungen**
Selected scholarly research articles will be used throughout the module.

### Reference text

The module "Eco-Venturing" is part of the Master's programme "Sustainability Economics and Management (SEM)" and focuses on "Eco-Entrepreneurship". The module "Eco-Venturing" can be taken either individually or in combination with the two other modules of the study focus "Eco-Entrepreneurship" ("wir 920: Advanced Entrepreneurship", "wir 832: Innovation Management"). Two of the three modules must be taken in order to be recognised as a specialisation. The Eco-Venturing module is mandatory (cf. examination regulations for the Master's programme SEM, § 4, para. 4).

The module Eco-Venturing is also available for students of the Master's programme WiRe in the ManECO area and can be credited as the module Advanced Entrepreneurship (wir849 Advanced Entrepreneurship). The same applies to students of the Master's programme in Business Informatics. Here it can also be proven as wir849 Advanced Entrepreneurship.

Module contents

Solving the complex ecological and social challenges of our time requires complex scientific approaches. This is the field in which research on sustainable development operates. Due to the diversity of problems, this type of research is particularly oriented towards thinking beyond purely delimited scientific disciplines. Research on sustainable development has to interlink different fields of thought and disciplines in an interdisciplinary manner and involve social actors in research processes in a transdisciplinary sense. The complexity of such projects, however, is often a source of tension, since the plurality of forms of knowledge, opinions and objectives involved can quickly lead to a loss of clarity in what is understood by sustainable development, or even to contradictions. This can lead to dilemmas, which can challenge those involved with seemingly unsolvable problems. What exactly these dilemmas of sustainability can look like, how they arise and how they can be dealt with in the context of research projects is the focus of the scientific examination in this module.

- Master's Programme Sustainability Economics and Management (Master) > Basic Modules

Zuständige Personen
- Meyerholt, Ulrich (Module counselling)
- Godt, Christine (module responsibility)
- Lehrenden, Die im Modul (Prüfungsberechtigt)

Prerequisites
Building on the existing knowledge of the participants, the course will deepen knowledge of European and international law, whereby emphasis will be laid on those areas in which the dividing line between state intervention (public law) and market rights (private law) has become blurred. Students will be able to analyze contemporary regulatory techniques inherent in the multilevel system of governance and to assess them from an interdisciplinary (economic and legal) perspective.

Module contents
The module comprises two courses, one of which will be taught by PD Dr. Meyerholt, and the other together with Prof. Godt. The first course deals with selected issues in environmental law. With the general structure of environmental law as a point of departure, the course content will be taught in a holistic manner that will also incorporate the leading decisions of the higher courts. The second course takes into consideration intra-disciplinary environmental law as situated between public and private economic law, whereby special focus will be laid on the European and international dimensions.

**Prerequisites**
- english Sprachkenntnisse

**Skills to be acquired in this module**

Die Studierenden sollen

- verstehen internationale, europäische und nationale themenbezogene Rechtsnormen und
Rechtsfragen.
- wenden internationale, nationale und europäische themenbezogene Rechtsnormen an,
- erlernen die englische Rechtsterminologie.

**Module contents**

- Internationale Rahmenbedingungen für den Zugang zu genetischen Ressourcen und Vorteilsausgleich
- EU-Recht und ausfüllende mitgliedstaatliche Regeln zur biologischen Forschung an und Nutzung von genetischen Ressourcen, Traditionelem Wissen und Technologietransfer
- Nationale Vorschriften der Ressourcenstaaten für das Aufsuchen genetischer Ressourcen bei wissenschaftlichen Feldstudien und kommerzieller Bioprospektion (z.B. Genehmigungspflichten; Prior Informed Consent; Mutually Agreed Terms; Due Diligence)
- Recht der verschiedenen kommerziellen, gesetzlichen und akademischen Ex-situ-Sammlungen genetischer Ressourcen (Practices of databases / Prinzipien und Praktiken der Datenbanken)
- Code of Conduct der deutschen Forschungseinrichtungen (vor allem DFG)
- Genetische Ressourcen und Geistiges Eigentum
- Good practices / Bewährte Verfahren (selected ex situ collections)
- ABS agreements ("Mutual Agreed Terms")/ Verträge
- Legislative options / Legislative Optionen

Prerequisites

Skills to be acquired in this module

- Be able to conceptually understand and apply key empirical tools used by any economist (and other professionals) in Environmental, Energy, and Transport Economics.
- Be able to perform and critically evaluate an empirical analysis.

Module contents

Econometric methods (discrete choice); Welfare analysis; Valuation; Types of data; Cost-benefit analysis.

| Skills to be acquired in this module | This course aims at giving students an understanding of reasons, goals and instruments for climate policy, as well as implied complications due to the long term characteristics and the international dimension of climate change. Students first learn basics about the natural science of climate change and the main statements of climate research about the anthropogenic contribution to climate change. The economic interpretation of high pollution as a symptom of a market failure then leads to the treatment of policy instruments, and the understanding of economic efficiency as a prerequisite for effective climate policy. Game theoretic analysis of international negotiations and agreements provides key insights about the international dimension of the problem. By means of practical examples students then see in detail the functionality and pitfalls of selected implemented (or currently discussed) policies, e.g. the EU-ETS. With successful completion of the course, students shall be able to judge climate policy issues on an informed scientific basis (natural science and economics). |
| Module contents               | Natural science of climate change: greenhouse effect; measures, causes and impacts of climate change.  
                               | Economics of climate change: market failures (public goods, externalities); game theory of international agreements (prisoner’s dilemma, chicken game, assurance game, repeated games, continuous choice); environmental policy instruments (especially taxes, tradable permits); Climate policy in practice: EU-ETS (pitfalls: market segmentation, conditional grandfathering, lobbying); emission taxes and the EU-ETS; interaction between black and green quotas; embodied carbon tariffs. |

Zuständige Personen

- Stecking, Ralf Werner (module responsibility)
- Lehrenden, Die im Modul (Prüfungsberechtigt)

Prerequisites

With successful completion of the course, students shall be able to analyze complex empirical data sets, like aggregated data, privacy constrained data, distance information, distributions, tables, symbolic or granular data. Students will also learn to handle issues of big data challenges: large number of cases or variables, unknown dependencies, redundancy, missing values, small or no variance. In this course students will learn theoretical aspects of complex data analysis, as well as practical applications for real data sets with statistical software packages.

Module contents

Principal Component Analysis, Correspondence Analysis, Cluster Analysis, Linear Discriminant Analysis, Multidimensional Scaling, CART, Symbolic Data Analysis

Prerequisites

No participant requirement

Skills to be acquired in this module

This module completes the knowledge and abilities gained in the field of Environmental Informatics and it creates a strong reference to up to date topics in the field of sustainability. The content taught in this module can directly be applied in an upcoming study and professional career.

Professional competence

The students:

- are able to classify and explain the sustainability paradigm
- are aware of the current status of sustainability reporting
- are able to define and to model material flows
- have obtained know-how in the field of corporate environmental management information systems (CEMIS)

Methodological competence

The students:

- implement CEMIS
- apply different techniques and methods to case studies
- develop new case studies in teams

Social competence

The students:

- are supposed to work in teams and therefore have to identify working packages and have to take on responsibility for the jobs assigned to them
- present and discuss their own results with the team and the other members of the course

Self-competence

The students:

- learn about their own limitations and learn to accept criticism in order to strengthen their own abilities

Module contents

This course teaches methods, approaches and techniques in the field of information processing in order to support solutions to problems that arise from
companies' impact on the environment. In particular, ICT supported approaches of production-integrated environmental protection, environmental controlling and reporting are introduced and discussed. In order to enable the integration of such approaches into environmental protection, environmental management and its systems are taught as well.

The content in detail:

- environmental management as a basis for sustainability
- sustainability and material flow management
- strategic environmental management
- eco-controlling life cycle
- characteristics and system architectures of CEMIS
- standard software systems
- environmental accounting systems

**Prerequisites**
No participant requirement

**Skills to be acquired in this module**

This course aims at examining emerging research questions in the field of corporate environmental management information systems (CEMIS). After finishing this course, the students will have extensive knowledge regarding Business Environmental Informatics. In addition, they will be aware of recent research topics and challenges as well as relevant software solutions and practical projects.

**Professional competence**
The students:
- will obtain extensive knowledge in the field of CEMIS
- know emerging research questions and challenges as well as software solutions and projects

**Methodological competence**
The students:
- find their own solutions or apply already existing approaches to new and unsolved questions in the field of CEMIS
- capture required data, analyse it and present it to their team or the whole group

**Social competence**
The students:
- are supposed to work in teams and therefore have to identify working packages and have to take on responsibility for the jobs assigned to them
- present and discuss their own results with the team and the other members of the course

**Self-competence**
The students:
- learn about their own limitations and learn to accept criticism in order to strengthen their own abilities

**Module contents**

A strong social pressure forces enterprises to question their current way of implementing their business and to include different aspects of sustainability into their strategies and operational actions. Such a rethinking of one’s business is supported by corporate environmental management information...
systems. Such systems aim at optimising the energy and resource usage, emission and waste minimisation as well as production integrated environmental protection. Of course they support the fulfillment of legal requirements such as waste management or hazardous material handling.

The module will cover:

- recent and emerging research questions and topics related to the field of CEMIS as well as Business Environmental Informatics.
- discussion and hands-on experience of standard software systems and newly established solutions.
- applying the knowledge obtained to the definition of new as well as on solving new case studies.

Zuständige Personen

Dittmer, Jochen (module responsibility)

Prerequisites

Skills to be acquired in this module

The aim of the course is to provide students with a deep and thorough knowledge regarding

- Tax accounting law
- Taxation procedures.

Module contents

The course provides a deep insight into

Tax accounting law
- Basics of tax accounting law
- Principal values (cost of purchase/cost of manufacture, going concern value, fair market value)
- Depreciation, subsidy regulations
- Transfer of hidden reserves
- Leasing
- Provisions
- Taxation procedures
- Overview about general fiscal law (AO) and tax court code (FGO)
- Tax determination and taxing procedures
- Types of taxing
- Deadlines and extent of balances and tax assessments corrections
- Interest yield

Literaturempfehlungen

- Falterbaum, Hermann (aktuelle Fassung): Buchführung und Bilanz
- Rose, Gerd & Watrin, Christoph (aktuelle Fassung): Abgabenordnung; mit Finanzgerichtsordnung

It is worth mentioning, that due to the fast-changing tax law, further recommendations regarding the literature cannot be made yet, but are rather given during the course. Required are:

- A collection of the most important tax laws (e.g. NWB-publisher) in current form
- A loose-leaf collection of the tax regulations (e.g. Beck-publisher)

-

Skills to be acquired in this module:
The aim of the course is to provide students with a deep and thorough knowledge regarding:
- Mergers & Acquisition tax
- International taxation

Module contents:
The course provides a deep insight into: Merger & acquisition tax; Taxation of sale of company shares; Admittance of a shareholder; Insertion of operations; partial operations and partner shares in corporate enterprises; Transformation of corporate enterprises into business partnerships; Merger of corporate enterprises; Separation of corporate enterprises and business partnerships; International taxation; Taxation of transnational operations in form of direct businesses, permanent establishments and corporate enterprise subsidiaries; Possibilities and limitations regarding the prevention of international double taxation; Profit deferral and problems regarding transfer prices; Problems in the prevention of international low taxation

Literatureempfehlungen:
- Brähler, Gernot (aktuelle Fassung): Umwandlungssteuerrecht: Grundlagen für Studium und Steuerberaterprüfung

Reference text:
Due to a change in the frequency in which the "Mergers & Acquisition Tax" and the "International Taxation" sections are offered starting with the winter semester 2020/21, it is recommended for the winter semester 2019/20, in addition to the module wir 807 "Taxation and Tax Law I", to study the "Mergers & Acquisition Tax" section of the module wir835 at the same time and that the examination on both sections is taken in the summer semester 2020. The course "Mergers & Acquisition Tax" will otherwise only be offered again in the summer semester 2021. From the summer semester 2021 onward it is recommended to study the part "Mergers & Acquisition Tax" of the module wir835 in the 2nd semester and the part "International Taxation" in the 3rd semester. At the end of the 3rd semester, the written exam should cover the entire content of the module.

Module: Capital market law, insolvency law

**Module label**: Capital market law, insolvency law

**Modulkürzel**: wir858

**Credit points**: 6.0 KP

**Workload**: 180 h

**Verwendbarkeit des Moduls**
- Master's programme Business Administration: Management and Law (Master) > Basismodule
- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule AFT - Recht
- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule RdW - Recht
- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule UF - Recht

**Zuständige Personen**
- Rott, Peter (module responsibility)
- Lehrenden, Die im Modul (Module counselling)
- Lehrenden, Die im Modul (Prüfungsberechtigt)

**Prerequisites**

**Skills to be acquired in this module**
- Upon completion of the module, students will be able to:
  - demonstrate a knowledge of the basics of insolvency law and insolvency proceedings law as well as the basics of banking law and capital market law.
  - classify insolvency law with its functions as enforcement law, restructuring law, and the right to alter a relationship in business life.
  - demonstrate a knowledge of the positions of the groups involved (creditors, debtors, the responsible bodies of legal persons) in the insolvency proceedings, including the rights and obligations of the groups involved in the process and in the run-up to the crisis, as well as the discharge of residual debt as a rehabilitation option for natural persons.
  - demonstrate a familiarity with the principles of the legitimacy verification pursuant to the general tax code, money laundering, bank secrecy, and the information requirements of credit institutions.
  - identify the functions of banking and capital market law as well as modern insolvency law.
  - use these functions in practical examples.
  - assess the progress of insolvency proceedings, including their requirements on creditors and debtors.

**Module contents**

The module deals with banking and capital market law as well as insolvency and insolvency proceedings law within two separate lectures.

The main focus of the lecture in banking and capital market law is banking law. After an introduction to general banking law, the most important legal questions regarding collateralisation of loans are discussed. Additionally, the topics of the legitimacy verification pursuant to the general tax code, money laundering, bank secrecy, and the information requirements of credit institutions are discussed. Subsequently, the basic principles of securities law are discussed. Their legal basis and the economic background are analysed. Where possible, the interrelations between the various securities and the events of the financial market crisis will be discussed.

The lecture Insolvency Law deals with the basics of debt enforcement and insolvency law. Procedures will be shown and explained. The first part deals with company insolvency law, the second part with consumer insolvency and residual debt relief law.

**Literaturempfehlungen**

Current literature references are given in the events.

Prerequisites

Skills to be acquired in this module

- Understanding of exchange rates as strategic prices in open economies.
- Understanding of the interdependence of balance-of-payments constraints and exchange rates.
- Capability to discuss different models of exchange rate determination.
- Ability to research data and evaluate the literature on specific aspects of financial market globalization and strategies of exchange-rate policy.
- Understanding of the history of fixed-exchange-rate systems.
- Ability to relate the importance of historical experience in international monetary and financial economics.

Module contents

The lectures address the following issues:

- exchange rates and the balance of payments,
- open-economy macroeconomics,
- exchange rate determination,
- international financial markets,
- fixed-exchange-rate systems,
- currency crises,
- optimum currency areas and monetary integration,
- choice of exchange rate regime,
- financial market regulation.

In the seminar students will present papers on general and topical issues (theoretical models, policy strategies, case studies) in the fields of financial market globalization and exchange-rate policy.

Literatureempfehlungen

Verwendbarkeit des Moduls
- Bachelor's Programme Sustainability Economics (Bachelor) > Wahlpflichtbereich
- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule AFT - Methoden
- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule UF - Methoden
- Master's Programme Mathematics (Master) > Mastermodule

Zuständige Personen
- Christiansen, Marcus (module responsibility)
- May, Angelika (module responsibility)
- Ruckdeschel, Peter (module responsibility)

Prerequisites
- Systematische Vertiefung und Erweiterung der im Bachelorstudium erlangten Kenntnisse und Fähigkeiten zur Mathematik
- Vernetzung des eigenen mathematischen Wissens durch Herstellung auch inhaltlich komplexer Bezüge zwischen den verschiedenen Bereichen der Mathematik
- Kennenlernen vertiefter Anwendungen der Mathematik, auch exemplarisch mit Projektcharakter
- Erwerb direkt berufsbezogener inhaltlicher und prozessorientierter Kompetenzen
- In dieser Vorlesung wird ein aktuelles, fortgeschrittenes Themengebiet der Angewandten Statistik behandelt. Die Studierenden erwerben damit über den üblichen Kanon statistischer Verfahren hinausgehendes Spezialwissen sowie die Fähigkeit, sich solches Wissen anzueignen und in praktischen Analysen einzusetzen.

Module contents
Es handelt sich um ein Modul, innerhalb dessen kurzfristig verschiedene, aktuelle Themen aus der Statistik angeboten werden können, immer jeweils im Rahmen der Modulvorgaben von 6KP/180h Workload mögliche solche Themen sind:
- Angewandte Statistische Methoden in der Ökologie mit R (zuletzt SoSe 2017)
- Statistisches Lernen (zuletzt SoSe 2019)

Spezifikation eines konkreten Themas spätestens im Rahmen der rollierenden Vorlesungsplanung

Beispielhaft seien hier die Inhalte zu "Statistisches Lernen" genannt:
- Prädiktionsverfahren: lineare Regression, GLM in hochdimensionalen Modellen, regularisierte Regression, Least Absolute Shrinkage and Selection Operator (LASSO), Support Vector Regression
- Klassifikationsverfahren und Clustering: lineare und quadratische Diskriminanzanalyse (LDA/QD), Support Vector Classification, Klassifikationenbäume (CART), verschiedene Clusterverfahren
- Vapnik-Chervonenkis Komplexität von Problemen
- Resampling Verfahren/Ensemble Methoden: Bagging, Boosting, Random Forests, verschiedene Kreuzvalidierungsstrategien
- Ausblick auf Ranking-Verfahren und Online-Learning

Literaturempfehlungen
natürlich spezifisch für das jeweilige Thema
hier beispielhaft für "Statistisches Lernen":

**Zuständige Personen**
- Stecking, Ralf Werner (module responsibility)
- Lehrenden, Die im Modul (Prüfungsberechtigt)

**Prerequisites**
With successful completion of the course, students shall be able to analyze complex empirical data sets, like aggregated data, privacy constrained data, distance information, distributions, tables, symbolic or granular data. Students will also learn to handle issues of big data challenges: large number of cases or variables, unknown dependencies, redundancy, missing values, small or no variance. In this course students will learn theoretical aspects of complex data analysis, as well as practical applications for real data sets with statistical software packages.

**Module contents**
Principal Component Analysis, Correspondence Analysis, Cluster Analysis, Linear Discriminant Analysis, Multidimensional Scaling, CART, Symbolic Data Analysis

Skills to be acquired in this module
Students...
- Know advanced theoretical concepts, research streams, and frameworks of in the field of Strategic Management
- Understand the links between different theories and are able to critically question them
- Can apply theories to understand and interpret organizational dynamics in daily life
- Are able to develop solutions for concrete practical challenges in companies in the context of Strategic Management based on the concepts and frameworks they have learned
- Can put the newly acquired knowledge into a broader context, so it can be deepened in the further professional life

Module contents
The course offers an overview of advanced concepts and frameworks in the field of Strategic Management. At the beginning, the course will provide a brief introduction into the historical development, goals, and research streams of the field. In this context, important terms, methods, and philosophical approaches of (management) research will be clarified. Subsequently, students form groups to analyze selected scientific articles with regard to their theoretical relevance and practical implications. Theoretical topics that will be covered in depth are:
1. Top Management Teams, Upper Echelons and Corporate Governance
2. Resource- and Capability-based Approaches
4. Institutional Theory, Institutional Work/Entrepreneurship and Social Movements
5. Organizational Cognition, Identity, and Framing
6. Organizational Learning and Ambidexterity
7. Organizational networks and ecosystems
The results of the analysis will be summarized in a seminar thesis, presented in class, and discussed with the other students. The main goal of the course is to equip students with advanced concepts, which allow them to understand organizational dynamics, question established practices in firms, and develop new solutions that go beyond the application of standard instruments.

- Master's Programme Sustainability Economics and Management (Master) > Supplementary Modules

Zuständige Personen
- Alavi, Sascha (module responsibility)
- Lehrenden, Die im Modul (Prüfungsberechtigt)

Prerequisites
The students should be enabled
- to adapt the marketing concept to sectoral, functional and institutional specifics,
- to apply specific concepts and methods of marketing in a problem-oriented way and to be able to reflect their conditions and limitations,
- to develop and present your own conceptual designs in a team.

Module contents
Marketing initially started as a producer-oriented concept and in recent years has developed as universal approach to influence market transactions. Against this background institutional, functional and sectoral fields of application inspired the formulation of sophisticated marketing approaches, like e.g. marketing of non-profit-organisations, strategic marketing, or service marketing. The course presents the specific nature of the different fields of application and relevant consequences for marketing planning. Given the recent inflation of “hyphenated conceptions” of marketing, a reasoned diagnosis as to marketing’s core identity is put forth. To this end, perspectives of transfer and integration between the approaches will be developed, that measure up to state-of-the-art theoretical as well as practical demands towards marketing as a universal market-oriented way of managing businesses. This course is divided into a preparatory seminar and an educational workshop towards the end of the term. The latter unit allows case study and role play as well as the presentation student work and boosts social competences irrespective of subject matter.

Prerequisites
Successful completion of the entrance examination

Skills to be acquired in this module
Upon completion of the module, students will be able to:

- apply specific competences to strategic research in marketing
- classify research strategies in marketing according to their meta-theoretical considerations
- estimate research strategies' claims to knowledge and their limitations
- formulate interdisciplinary research strategies aligning competences of empirical methods with the application of theory
- develop own conceptual sketches within teams and to present them

Module contents
How is knowledge generated within the scholarly discipline of marketing? This question confronts the field of marketing with central paradigmatic assumptions. The course begins to solve this puzzle on the basis of a historical analysis of the marketing concept's development. Different scientific standpoints in marketing theory and empirical investigation are evaluated against the light of recent developments in markets and society. The current paradigms of consumption research and marketing research's basic standing in the philosophy of science are intensely treated. This also entails reflecting on the opportunities that alternative trends, e.g. a humanistic paradigm, hold in store for marketing research. The course is divided into a preparatory seminar and an educational workshop towards the end of the term. The latter unit allows case study and role play as well as the presentation student work and boosts social competences irrespective of subject matter.

**Skills to be acquired in this module**
In today's highly dynamic business environment, innovation is the key to the success of most firms. Moreover, technological and organizational innovations represent valuable instruments for achieving progress toward sustainable development. Against this background, this module familiarizes students with the tools and processes for managing innovation and for developing overall more innovative firms. The module comprises a lecture and a seminar. In the lecture, students become acquainted with the drivers to and role of innovation; they learn about designing innovative firms and developing innovation strategies; they get to know the different sources of innovation; they familiarize themselves with the methods for choosing between alternative planned innovations; they learn how innovation is implemented; and they understand how innovation benefits are exploited. The accompanying seminar is supposed to familiarize the students with select advanced topics surrounding the management of innovation. Moreover, the students train their skills in working in teams, in working with scientific literature, in academic writing, and in presenting in front of a large audience.

**Module contents**
Organizational change, creative destruction, ambidexterity, exploration, exploitation, absorptive capacity, sustainability transitions, innovation models, innovation networks, innovation strategy, innovation ecosystems, diffusion of innovations, organizational routines, entrepreneurship, new ventures, etc.

| Skills to be acquired in this module | After participation in the seminar  
• the students know different methods and techniques of scientific work and can apply them successfully;  
• the students are able to work in a research-oriented way;  
• know the importance of theory building in the scientific process and can work independently with it;  
• the students have in-depth knowledge of the project topic dealt with in each case with reference to organization and/or personnel;  
• the students have the ability to establish a relationship between theory and practice, to critically examine it and to work out solutions;  
• are able to place a specific question in the context of the scientific discussion in the field of organization and human resources and to situate, reflect and evaluate it accordingly;  
• know the basics of empirical work and are able to independently collect qualitative/quantitative data, evaluate them, present the results and discuss them critically;  
• are able to present their own research results, to document their findings in a scientific report according to the accepted rules of scientific work and to represent a point of view in the scientific debate in these subject areas.  
• the students are able to find their way in complex learning situations and to work in a problem-oriented manner;  
• the students are able to carry out independent research work in a team situation together with other students. |

### Module contents

The module consists of four project courses and starts in the summer semester. Initially, the lecturers provide a (changing) framework topic from the field of management, organization and personnel (e.g. cooperation and company networks, flexibilization of working conditions, corporate health management). Topics of current research projects of the chair are also included. The individual topics within the framework question are then the subject of student participation. In concrete terms, this means that the lecturers give the students suggestions and initiate topic-finding processes, e.g. by means of metaphor-supported moderation. Work is done alternately in plenary sessions and in small groups under the supervision of the teachers. The project topics are worked on in greater depth in the small student groups.

For methodological-didactic reasons, it is essential that the module runs over two semesters. In the first semester, the theoretical-conceptual basics are worked out, main topics are explored, the basics of empirical work are taught and the course is set for the empirical element to be worked on in small groups. First (especially theoretical-conceptual) results as well as concretizations of the empirical project are presented by the students. The second semester is used to deepen the knowledge and application of empirical work, to work on the empirical part and to write a final scientific report. The results are also presented to the plenary session.
The project module is dominated by forms of active, non-receptive learning. The teachers have primarily a supporting function of information transfer, moderation, consultation and coordination.

**Skills to be acquired in this module**

The aim of the course is to provide students with a deep knowledge of the theory and concepts in managerial accounting as it relates to practice and research. The students learn to design budgeting processes and apply operating performance measures which are in line with the firm’s goals. Moreover, the students learn to forecast profits, cash flows and other key financial indicators in order to improve business planning.

**Module contents**

- Theory and concept of managerial accounting
- Profit planning
- Budgeting
- Ratios and financial analysis
- Operating performance measures
- Cash flow and segment reporting
- paper discussion on current and special issues.

**Präsenzzeit Modul insgesamt**

56 h
Students get to know central theories of organisation and human resources (HR). They are empowered to apply theories in order to explain practical phenomena and to solve practical problems. The ability to put on different "theory glasses" while observing and analysing various organisational and HR practices is fostered. Students learn to deal with different theories in a conscious and critical way, especially through case studies, group work and discussions.

Upon completion of the module, students will:
- be able to explain various classic and modern theories of organisation and human resource theories, differentiate them and reflect them critically;
- be able to apply the theoretical and abstract ways of thinking and perception so as to transfer them on operational decisions;
- develop skills of self-reflection (supported by the technical and didactical concepts).

Students receive deeper insights into classical and modern theories of organisation and human resource, including:
- Weber's theory of bureaucracy
- Taylor's principles of Scientific Management
- Human Relations approach
- Behavioural decision theory
- Situational approach
- Micro-political approaches
- New Institutional Economics
- Theories of motivation
- Theories of leadership

The presentations and discussions within the seminars also offer possibilities to deepen and broaden these topics according to the student's interest and latest developments in theory and practice.

Further literature will be announced during the semester according to the particular lecture/seminar content.

The students will learn the fundamentals of the topic Entrepreneurship, including the challenges of founding enterprises and entrepreneurial action in established companies.

**Module contents**
This module deals with the development of business ideas and its realization in business models as well as its perception and evaluation. The content of the lecture further includes issues relating to team-building, resources, and finance, as well as establishing a business plan, the question of the appropriate legal form of an organization, and the specific challenges in the growth stage. Particular aspects will be amplified by guest lecturers from companies.

### Skills to be acquired in this module
By the end of the course students should develop and understand the basic concepts, analytical techniques, instruments and systems to control sustainable corporate success. The students further identify the theoretical background of corporate governance and how corporate governance mechanisms work. Moreover, they develop an up-to-date and mainly practitioner-oriented profile of corporate governance and control systems. They are aware of a controller's relevance as a corporate conscience and the meaning of controlling as a corporate service. In addition, students identify strategic, operational and department-specific characteristics of corporate control. They argue how to ensure the quality of data and the development of decision-making relevant information. Paper discussions further complement the students' profile by highlighting current and special issues in the field of corporate governance and control. In summary, students link economic, methodological, and cultural aspects to their personal profile and assess whether an activity as a controller fits to their personal plan for future employment. They further strengthen their ability to develop sustainable solutions for comprehensive and specific economic issues.

### Module contents
In the beginning, the course provides an overview of the historic development as well as conceptions of corporate governance and control in the literature and in practice. It further embeds the role of corporate governance and control within strategic and operational corporate management. The course is further separated in different parts to ensure students’ ability to identify and understand decision-making, coordination and monitoring aspects of corporate governance and control. As such, students analyse corporate actions via the following instruments:
- SWOT-Analysis
- Porter’s Five Forces Model
- Portfolio Analysis
- Strategic Cost Management
- Linear Programming
- Break-Even Analysis
- Value Based Management
- Ratio Analysis
- Balanced Scorecard
- Variance Analysis

**Prerequisites**
keine

**Skills to be acquired in this module**
The module consists of lecture as well as seminar elements which interlink with each other on a technical and didactical level. By alternating lectures, discussions, and training elements, students get to know the theoretical basics as well as the practical relevance of the module topics. They get the chance to integrate themselves, their theoretical knowledge and practical experiences, and to exchange views with the other students and the lecturer. Different teaching and learning methods support the student’s professional, methodological, social-communicative, and personal competences, e. g. via station learning, role plays and debates, thesis discussions and case study analysis. They work within the entire group as well as small groups.

Attending the course, students
- develop a solid knowledge of this broad subject and are able to relate the various scientific and practical findings with each other and also understand them on a macro-level;
- understand the complex issues, challenges and fields of action in International Management;
- are able to analyse, interpret and manage international economic and business issues within heterogeneous (above all cultural) fields of stakeholders and environments;
- can effectively analyse and apply the strategic, structural and cultural instruments in International Management according to the specific practical context;
- develop skills of self-reflection (supported by the technical and didactical concepts) and are able to press their point within the scientific discussion;

- are able to locate a specific research question within the scientific discussion in the field of International Management and to interlink, reflect and evaluate it accordingly.

**Module contents**
Students gain theoretical as well as practical insights in the backgrounds and specific characteristics of International Management. A specific focus will (as a last point) be laid on international Human Resource Management as it provides notably relevant issues in international business administration.

Students deal with foundations, challenges and possible fields of action within the following topics:

- Economic internationalisation and the international firm
  - Characteristics, development and relevance
  - Terminological differentiation and attribution
  - Research and explanatory approaches
- Environment and orientation of international corporations
  - Culture and management
  - Fields and forms of strategy
  - Organisation by structure and processes
  - Responsibility and public affairs
- Relevance of and fields in international Human Resource Management
  - Requirements and organisation of the central HR areas
  - Recruitment and selection
  - Expatriation of employees
  - Intercultural management
  - Social management

The presentations and discussions also offer possibilities to deepen and
broaden these topics according to the students interests and latest developments in theory and practice.

56 h
wir886 - Digital Transformation: Strategies and Sustainability

Module label: Digital Transformation: Strategies and Sustainability

Modulkürzel: wir886

Credit points: 6.0 KP

Workload: 180 h

Verwendbarkeit des Moduls:
- Master Applied Economics and Data Science (Master) > Specialization
- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule NM-BWL
- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule RdW - BWL
- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule UF - BWL
- Master's Programme Sustainability Economics and Management (Master) > Supplementary Modules

Zuständige Personen:
- Lehrenden, Die im Modul (Prüfungsberechtigt)
- Hoppmann, Jörn (module responsibility)

Prerequisites:
Skills to be acquired in this module:
The students should:
- know basic definitions, trends and application areas of digitalization
- be able to assess the economic effects of digitalization
- understand corporate strategies and business models in the context of digital transformation
- know how companies should design processes and structures to promote digitalization in organizations
- have an overview of social, legal and ethical aspects of digitalization
- assess the environmental impact of digitalization
- evaluate digital products, services and business models using ethical and sustainable guidelines
- independently develop proposals for the integration of ethical, social and ecological criteria in digitalization projects and processes

Module contents:
The module "Digital Strategy and Sustainability" provides insights into the role digitalization for companies and the associated social discourse. The digital transformation leads to the emergence of new business models, markets and forms of interaction. This requires comprehensive changes in strategic orientation as well as in business processes and structures. In addition, new regulations and standards are required at the societal level in order to meet the ethical, ecological, and societal challenges posed by digitalization.

In the first part of the seminar, students are familiarized with the basics and application areas of digitalization as well as the economic, ecological, and social implications. Toward this end, important questions in the context of digital transformation will be raised and discussed drawing on company case studies. Exemplary questions that will be dealt with in this context are:
- What are the technological drivers of digitalization and what trends can be observed?
- What is the impact of digital transformation on industries and companies?
- How can companies design strategies, business models, processes and structures to address the digital transformation?
- What are the consequences of digitalization on a societal and legal level?
- How does the digital transformation affect the natural environment?
- How can social, ethical, and ecological aspects be integrated into digital products, services and business models?

In the second part of the course, students will develop digital business models in teams under the guidance of experienced coaches, taking into account economic, ecological and social/ethical criteria. The results are presented to the other students and company representatives and will be summarized in a term paper. An important part of the term paper is the critical reflection of current methods used to develop digital business models with regard to sustainability criteria.

**Prerequisites**
Skills to be acquired in this module

In der zum Modul gehörigen Vorlesung werden vor allem formalanalytische Modelle erarbeitet, mit denen Probleme in Wertschöpfungsketten beschrieben und im Rahmen der Modellannahmen optimiert werden können. Hiermit sollen die Studierenden eine Kompetenz zur unternehmensübergreifenden Analyse der gesamten Wertschöpfungskette (Supply Chain) erwerben, mit Hilfe derer sie diese nicht nur verstehen, sondern idealerweise auch verbessern können. Im begleitenden Seminar werden mithilfe von in Gruppen verfassten Hausarbeiten aktuelle Fragestellungen und Diskussionen im Supply Chain Management aufgearbeitet und bewertet. Das Seminar baut ergänzend zur Vorlesung auf konzeptioneller und empirischer Forschung auf. Hiermit lernen die Studierenden wissenschaftliche Diskurse zu praktisch relevanten und nur schwer modellierbaren Herausforderungen des Supply Chain Managements kennen. Ferner werden die Fähigkeiten zum wissenschaftlichen Arbeiten, zur Teamarbeit und zum Präsentieren vor großen Gruppen trainiert.

**Module contents**
Die Vorlesung behandelt voraussichtlich folgende Themen: Grundlagen der Supply Chain, Strategischer Fit, Netzwerk- und Standortplanung, Bestandsmanagement, Produkt- und Prozessdesign, Supply-Chain-Koordination, Vertragsdesign, Transport in der Supply Chain, Nachhaltiges Supply Chain Management

### Skills to be acquired in this module
- The main target of the "Eco-Venturing" module is to develop entrepreneurial skills for the development and implementation of environmental innovations and sustainable business ideas. These include:  
  - the ability to identify new solution needs in the context of sustainable development and the sustainable development goals set by the United Nations,  
  - Knowledge and skills for the entrepreneurial development and implementation of innovative solutions,  
  - Knowledge and skills for systematically combining economic (Eco-nomical) and ecological (Eco-logical) objectives and  
  - the ability to strategically develop "green" business areas and markets.  
- The entrepreneurial development and implementation of environmental innovations can relate both to the establishment of new companies and organisations and to the development of new solutions and business ideas within the framework of established companies and organisations (corporate venturing).

### Module contents
- The main focus of the Eco-Venturing module is the development of new or established business start-up concepts. Under of guidance of their lecturer, participants will work together with selected regional business partners who are economically successful and contribute to the protection of the environment and the climate, to promote such start-up concepts. What these concepts have in common is that they address the issue of sustainability.

### Reference text
- The module "Eco-Venturing" is part of the Master's programme "Sustainability Economics and Management (SEM)" and focuses on "Eco-Entrepreneurship". The module "Eco-Venturing" can be taken either individually or in combination with the two other modules of the study focus "Eco-Entrepreneurship" ("wir 920: Advanced Entrepreneurship", "wir 832: Innovation Management"). Two of the three modules must be taken in order to be recognised as a specialisation. The Eco-Venturing module is mandatory (cf. examination regulations for the Master's programme SEM, § 4, para. 4).  
- The module Eco-Venturing is also available for students of the Master's programme WiRe in the ManECo area and can be credited as the module Advanced Entrepreneurship (wir849 Advanced Entrepreneurship). The same applies to students of the Master's programme in Business Informatics. Here it can also be proven as wir849 Advanced Entrepreneurship

(for WiRe empfohlen): wir815

Skills to be acquired in this module
- Die Studierenden verstehen Grundlagen und Verschränkungen von Wettbewerbsrecht und Geistigem Eigentum
- analysieren und beantworten Rechtsfragen im Schnittfeld von Wettbewerb und Geistigem Eigentum
- beherrschen einschlägige Rechtsprechung und können neue Fragen entsprechend einordnen

Module contents
Das Modul enthält zwei Veranstaltungen (wahlweise Vorlesung mit Seminar oder zwei Vorlesungen) und richtet sich an Masterstudierende mit Interesse an Innovation und dynamischem Wettbewerb (zwischen Unternehmen, aber auch zwischen Staaten). Aufbauend auf zuvor vermittelte Grundstrukturen des Europäischen Marktordnungsrechts, stehen Themen auf der Schnittfläche von Wettbewerb und Geistigen Eigentums (Kartell- und Lauterkeitsrecht) im Zentrum der Veranstaltung.

Lehrziele sind einerseits die akademische Durchdringung, andererseits die Einordnung und Beantwortung praktischer Fallgestaltungen. Themen generieren sich aus der betriebswirtschaftlichen Praxis (u.a. etwa Zugang zu 'standardessentiellen Patente'; Schutzrechte als Voraussetzung von Unternehmenskooperationen) wie aus volkswirtschaftlichen Fragen (Einfluss des Schutzstandards für Geistiges Eigentum auf Innovation und Direktinvestitionen; Schutzrechte als Marktzugangsbedingungen). Die Studierenden lernen, Geistiges Eigentum und Wettbewerbsrecht als zwei miteinander verschränkte Rechtsgebiete zu analysieren.

**Verwendbarkeit des Moduls**
- Master's programme Business Administration: Management and Law (Master) > Basismodule
- Master's programme Business Administration: Management and Law (Master) > Kernmodule CHI
- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule RdW - Recht
- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule UF - Recht

**Zuständige Personen**
- Godt, Christine (module responsibility)
- Lehrenden, Die im Modul (Prüfungsberechtigt)

**Prerequisites**
Students will be able
- to describe European and international legal-economic interdependencies
- apply international and European legal norms and legal issues
- have a command of English legal terminology.

**Module contents**
The module consists of two lectures which deal with changes in policies and institutions of international economic law. One lecture focuses on economic law and institutions as shaped by international law, while the other class is dedicated to EU foreign trade law. A basic knowledge of the institutions of international and EU economic law (WTO, IMF, World Bank, European Commission) is a prerequisite for attending this module. The focus lies in helping students understand the processes of internationalization and Europeanization that inform the current interactions between the different actors on the international plane (companies, states and parastatals). In this module, public and private economic law will be presented as a single unit. The international law part of the module focuses on the rationale and regulation of the major free trade agreements, including dispute settlement. Other topics to be addressed include the conflict of laws and the UN Convention (CISG). The EU law focuses on competition and foreign trade law, including procurement and taxation law.

Module: Digitalisation and Law - Deepening

**Module label:** Digitalisation and Law - Deepening

**Modulkürzel:** wir816

**Credit points:** 6.0 KP

**Workload:** 180 h

**Verwendbarkeit des Moduls:**
- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule RdW - Recht
- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule UF - Recht

**Zuständige Personen:**
- Wendland, Matthias (module responsibility)
- Lehrenden, Die im Modul (Prüfungsberechtigt)

**Prerequisites:**
Basic knowledge, B.A. with law parts

**Skills to be acquired in this module:**
- Participants will understand how digitization affects society and the law. They will learn from selected examples how the law is adapting to digitalization and where the law reaches its limits.
- The module is theory-, method- and application-oriented.
- The module is interdisciplinary: social science, technological and economic issues are integrated into the module alongside legal content.
- Students develop the ability to see law in its social, economic and technological context. They learn to analyze the interactions of law with digitalization.

**Module contents:**
- Fundamentals: Digitization as a technological and a cultural development.
- Characteristics of digitization
- Challenge of law through digitization
- Limits of law in the digitized world: selected areas of law as examples

**Literature recommendations:**
- Volker Boehme-Neßler, Digitising Democracy. Heidelberg 2020
- Walter Frenz (Hrsg.), Handbuch Industrie 4.0, Heidelberg/Berlin 2020

Prerequisites

Skills to be acquired in this module

Upon completion of the module, students will be able to:

- demonstrate a knowledge of the basics of insolvency law and insolvency proceedings law as well as the basics of banking law and capital market law.
- classify insolvency law with its functions as enforcement law, restructuring law, and the right to alter a relationship in business life.
- demonstrate a knowledge of the positions of the groups involved (creditors, debtors, the responsible bodies of legal persons) in the insolvency proceedings, including the rights and obligations of the groups involved in the process and in the run-up to the crisis, as well as the discharge of residual debt as a rehabilitation option for natural persons.
- demonstrate a familiarity with the principles of the legitimacy verification pursuant to the general tax code, money laundering, bank secrecy, and the information requirements of credit institutions.
- identify the functions of banking and capital market law as well as modern insolvency law.
- use these functions in practical examples.
- assess the progress of insolvency proceedings, including their requirements on creditors and debtors.

Module contents

The module deals with banking and capital market law as well as insolvency and insolvency proceedings law within two separate lectures.

The main focus of the lecture in banking and capital market law is banking law. After an introduction to general banking law, the most important legal questions regarding collateralisation of loans are discussed. Additionally, the topics of the legitimacy verification pursuant to the general tax code, money laundering, bank secrecy, and the information requirements of credit institutions are discussed. Subsequently, the basic principles of securities law are discussed. Their legal basis and the economic background are analysed. Where possible, the interrelations between the various securities and the events of the financial market crisis will be discussed.

The lecture Insolvency Law deals with the basics of debt enforcement and insolvency law. Procedures will be shown and explained. The first part deals with company insolvency law, the second part with consumer insolvency and residual debt relief law.

Literaturempfehlungen

Current literature references are given in the events.

### Prerequisites
Upon completion of the module, students will be able to:
- recognize simple data protection incidents.
- apply existing protection mechanisms.
- implement projects in accordance with the law.
- discuss and defend their plans in front of others.

### Module contents
The module gives an overview on data protection laws. Basic knowledge of data protection regulations (DSGVO; BDSG) and existing protection mechanisms is imparted. Within the framework of the seminar, the discussed topics will be deepened with the help of seminar papers and individual aspects will be discussed in more detail. The event will highlight the new informational structures in modern society and their effects on data protection and data security. Questions concerning general personal rights, freedom of information, IT security and relevant criminal law regulations will be discussed on the basis of examples and legally provided protection mechanisms as well as the tasks of supervisory authorities will be discussed. In particular, the most important decisions on data protection will be covered in detail during the seminar. At the seminar, students will have the opportunity to prepare in-depth seminar papers on the various topics, which will then be discussed with all participants.

### Literature recommendations

#### Prerequisites
- **Skills to be acquired in this module**
  - verstehen die Rechtsgenese und Rechtsdurchsetzung im Europäischen Mehrebenensystem,
  - analysieren und beantworten Rechtsfragen im Europäischen Binnenmarktrecht,
  - beherrschen englische Rechtsterminologie.

#### Module contents

In dem Modul werden aktuelle Themen des Europäischen Wirtschaftsrechts auf Masterniveau angegangen. Lehrziel ist die Erfassung und die Analyse sich stellender Probleme auf den verschrankten Rechtsebenen Europas. Die Studierenden lernen, die Texte systematisch zusammenzustellen und Antworten auf Fragestellungen aus Kontext und Grundprinzipien zu entwickeln. Damit bereiten sich die Studierenden auf die Berufspraxis im sich vertiefenden Binnenmarkt mit seinen Außenbeziehungen vor. Das Modul wird vorzugsweise in englischer Sprache gehalten.

**Skills to be acquired in this module**
With successful completion of the course, students shall:
- be aware of and be able to evaluate quantitative forecasting methods.
- be able to select adequate methods in relevant fields of application, like time series and classification analysis.
- be able to run computer-aided analyses and to interpret the results properly.

**Module contents**
Various aspects of quantitative forecasting methods such as:
- Time series components,
- Trend and seasonal methods,
- Stationarity,
- Multivariate forecasting methods,
- Autoregressive and moving average processes,
- Box-Jenkins method.

Verwendbarkeit des Moduls

- Bachelor's Programme Sustainability Economics (Bachelor) > Wahlpflichtbereich
- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule AFT - Methoden
- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule UF - Methoden
- Master's Programme Mathematics (Master) > Mastermodule

Zuständige Personen

- Christiansen, Marcus (module responsibility)
- May, Angelika (module responsibility)
- Ruckdeschel, Peter (module responsibility)

Prerequisites

Skills to be acquired in this module

- Systematische Vertiefung und Erweiterung der im Bachelorstudium erlangten Kenntnisse und Fähigkeiten zur Mathematik
- Vernetzung des eigenen mathematischen Wissens durch Herstellung auch inhaltlich komplexer Bezüge zwischen den verschiedenen Bereichen der Mathematik
- Kennenlernen vertiefter Anwendungen der Mathematik, auch exemplarisch mit Projektcharakter
- Erwerb direkt berufsbezogener inhaltlicher und prozessorientierter Kompetenzen
- In dieser Vorlesung wird ein aktuelles, fortgeschrittenes Themengebiet der Angewandten Statistik behandelt. Die Studierenden erwerben damit über den üblichen Kanon statistischer Verfahren hinausgehendes Spezialwissen sowie die Fähigkeit, sich solches Wissen anzueignen und in praktischen Analysen einzusetzen.

Module contents

Es handelt sich um ein Modul, innerhalb dessen kurzfristig verschiedene, aktuelle Themen aus der Statistik angeboten werden können, immer jeweils im Rahmen der Modulvorgaben von 6KP/180h Workload mögliche solche Themen sind

- Angewandte Statistische Methoden in der Ökologie mit R (zuletzt SoSe 2017)
- Statistisches Lernen (zuletzt SoSe 2019)

Spezifikation eines konkreten Themas spätestens im Rahmen der rollierenden Vorlesungsplanung

Beispielhaft seien hier die Inhalte zu "Statistisches Lernen" genannt:

- Prädiktionsverfahren: lineare Regression, GLM in hochdimensionalen Modellen, regularisierte Regression, Least Absolute Shrinkage and Selection Operator (LASSO), Support Vector Regression
- Klassifikationsverfahren und Clustering: lineare und quadratische Diskriminanzanalyse (LDA/QD), Support Vector Classification, Klassifikationsbäume (CART), verschiedene Clusterverfahren
- Vapnik-Chervonenkis Komplexität von Problemen
- Resampling Verfahren/Ensemble Methoden: Bagging, Boosting, Random Forests, verschiedene Kreuzvalidierungsstrategien
- Ausblick auf Ranking-Verfahren und Online-Learning

Literaturempfehlungen

natürlich spezifisch für das jeweilige Thema
hier beispielhaft für "Statistisches Lernen":

**Prerequisites**

**Skills to be acquired in this module**

With successful completion of the course, students shall be able to analyze complex empirical data sets, like aggregated data, privacy constrained data, distance information, distributions, tables, symbolic or granular data. Students will also learn to handle issues of big data challenges: large number of cases or variables, unknown dependencies, redundancy, missing values, small or no variance. In this course students will learn theoretical aspects of complex data analysis, as well as practical applications for real data sets with statistical software packages.

Skills to be acquired in this module

Students...
- Know advanced theoretical concepts, research streams, and frameworks of in the field of Strategic Management
- Understand the links between different theories and are able to critically question them
- Can apply theories to understand and interpret organizational dynamics in daily life
- Are able to develop solutions for concrete practical challenges in companies in the context of Strategic Management based on the concepts and frameworks they have learned
- Can put the newly acquired knowledge into a broader context, so it can be deepened in the further professional life

Module contents

The course offers an overview of advanced concepts and frameworks in the field of Strategic Management. At the beginning, the course will provide a brief introduction into the historical development, goals, and research streams of the field. In this context, important terms, methods, and philosophical approaches of (management) research will be clarified. Subsequently, students form groups to analyze selected scientific articles with regard to their theoretical relevance and practical implications. Theoretical topics that will be covered in depth are:

1. Top Management Teams, Upper Echelons und Corporate Governance
2. Resource- and Capability-based Approaches
4. Institutional Theory, Institutional Work/Entrepreneurship and Social Movements
5. Organizational Cognition, Identity, and Framing
6. Organizational Learning and Ambidexterity
7. Organizational networks and ecosystems

The results of the analysis will be summarized in a seminar thesis, presented in class, and discussed with the other students. The main goal of the course is to equip students with advanced concepts, which allow them to understand organizational dynamics, question established practices in firms, and develop new solutions that go beyond the application of standard instruments.

- Master's Programme Sustainability Economics and Management (Master) > Supplementary Modules

**Zuständige Personen**
- Alavi, Sascha (module responsibility)
- Lehrenden, Die im Modul (Prüfungsberechtigt)

**Prerequisites**

**Skills to be acquired in this module**
- The students should be enabled
  - to adapt the marketing concept to sectoral, functional and institutional specifics,
  - to apply specific concepts and methods of marketing in a problem-oriented way and to be able to reflect their conditions and limitations,
  - to develop and present your own conceptual designs in a team.

**Module contents**

Marketing initially started as a producer-oriented concept and in recent years has developed as universal approach to influence market transactions. Against this background institutional, functional and sectoral fields of application inspired the formulation of sophisticated marketing approaches, like e.g. marketing of non-profit organisations, strategic marketing, or service marketing. The course presents the specific nature of the different fields of application and relevant consequences for marketing planning. Given the recent inflation of “hyphenated conceptions” of marketing, a reasoned diagnosis as to marketing’s core identity is put forth. To this end, perspectives of transfer and integration between the approaches will be developed, that measure up to state-of-the-art theoretical as well as practical demands towards marketing as a universal market-oriented way of managing businesses. This course is divided into a preparatory seminar and an educational workshop towards the end of the term. The latter unit allows case study and role play as well as the presentation student work and boosts social competences irrespective of subject matter.

Prerequisites
Successful completion of the entrance examination

Skills to be acquired in this module
Upon completion of the module, students will be able to:
- apply specific competences to strategic research in marketing
- classify research strategies in marketing according to their meta-theoretical considerations
- estimate research strategies' claims to knowledge and their limitations
- formulate interdisciplinary research strategies aligning competences of empirical methods with the application of theory
- develop own conceptual sketches within teams and to present them

Module contents
How is knowledge generated within the scholarly discipline of marketing? This question confronts the field of marketing with central paradigmatic assumptions. The course begins to solve this puzzle on the basis of a historical analysis of the marketing concept's development. Different scientific standpoints in marketing theory and empirical investigation are evaluated against the light of recent developments in markets and society. The current paradigms of consumption research and marketing research's basic standing in the philosophy of science are intensely treated. This also entails reflecting on the opportunities that alternative trends, e.g. a humanistic paradigm, hold in store for marketing research. The course is divided into a preparatory seminar and an educational workshop towards the end of the term. The latter unit allows case study and role play as well as the presentation student work and boosts social competences irrespective of subject matter.

**Prerequisites**
Skills to be acquired in this module
In today's highly dynamic business environment, innovation is the key to the success of most firms. Moreover, technological and organizational innovations represent valuable instruments for achieving progress toward sustainable development. Against this background, this module familiarizes students with the tools and processes for managing innovation and for developing overall more innovative firms. The module comprises a lecture and a seminar. In the lecture, students become acquainted with the drivers to and role of innovation; they learn about designing innovative firms and developing innovation strategies; they get to know the different sources of innovation; they familiarize themselves with the methods for choosing between alternative planned innovations; they learn how innovation is implemented; and they understand how innovation benefits are exploited. The accompanying seminar is supposed to familiarize the students with selected advanced topics surrounding the management of innovation. Moreover, the students train their skills in working in teams, in working with scientific literature, in academic writing, and in presenting in front of a large audience.

**Module contents**
Organizational change, creative destruction, ambidexterity, exploration, exploitation, absorptive capacity, sustainability transitions, innovation models, innovation networks, innovation strategy, innovation ecosystems, diffusion of innovations, organizational routines, entrepreneurship, new ventures, etc.

Prerequisites
The course is intended for master’s students with a specialization in Accounting, Finance, Taxation (AFT).

Skills to be acquired in this module
The aim of the course is to provide insights into the economics of accounting, finance, and/or taxation from the perspective of a quantitative researcher. Upon completion of the module, students will be familiar with typical quantitative models and research approaches in the respective field and will be able to develop their own research designs.

Module contents
The course involves reading and discussing empirical research in accounting, finance, and/or taxation, and working with quantitative models in at least one of these areas.

Literaturempfehlungen
Will be announced at the beginning of the course.

**Skills to be acquired in this module**
By the end of the course students should have answers to the following questions:
- How are fundamental values (or "intrinsic values") estimated?
- How are business strategies analyzed in order to understand the value they create?
- What business activities determine value?
- How is "value created for shareholders" identified?
- How does one pull apart the financial statements to get at the relevant information for valuing equities?
- How does ratio analysis help in valuation?
- How does profitability tie into valuation?
- What is growth? How does one analyze growth? How does one value a growth firm?
- How does one analyze the quality of financial reports?
- How does one deal with the accounting methods used in financial statements?
- How is financial analysis developed for strategy and planning?
- What determines a firm's P/E ratio? How does one calculate what the P/E should be?
- What determines a firm's market-to-book (P/B) ratio? How does one calculate what the P/B should be?
- How does one evaluate risk? For equity? For debt?
- How does one evaluate an equity research report?
- How does one trade on fundamental information?

**Module contents**
With a stock market bubble and a financial crisis in our recent history, there have been increasing calls to "return to fundamentals." This is a course on fundamental analysis. The primary emphasis is on equity (share) valuation, with a focus on developing and applying methods for valuing firms using financial statement analysis.

The course has a very practical focus. The methods of fundamental analysis will be examined in detail and applied in cases and projects involving listed companies. Topics include models of shareholder value, a comparison of accrual accounting and discounted cash flow approaches to valuation, the analysis of profitability, growth and valuation generation in a firm, diagnosing accounting quality, forecasting earnings and cash flows, pro-forma analysis for strategy and planning, and the determination of price/earnings (P/E) and market-to-book (P/B) ratios.

The course does not assume "market efficiency." Rather, it develops the techniques for challenging traded prices in order to assess whether investments are appropriately priced. It adopts the philosophy that one of the risks in investing is the risk of paying too much. The course is one for the active investor.

Most importantly, we learn how to handle accounting and financial reports in valuation. We see that valuation is really a matter of appropriate accounting for value. The course combines accounting principles and investment principles to answer the question: How do I account for value so that I can challenge stock prices with some confidence?

The course will be taught from the perspective of designing techniques to be used in an (independent) equity research department or firm. Accordingly, the material is pertinent to the security analyst – particularly the equity analyst –
who must issue a buy, hold or sell recommendations on stocks. However, much of the material covered in the course is also relevant to the corporate financial analyst for evaluating acquisitions, restructurings and other investments, and for calculating the value generated by strategic scenarios. By the end of the course, the student should feel competent in writing a thorough, credible equity research report or investment analysis that meets the highest standards of professionalism.

The course is of interest to those contemplating careers in investment banking (particularly in equity research), security analysis, consulting, public accounting, and corporate finance. And it will also help with personal investing.

Students have to understand the theoretical orientation and the institutional structure of financial accounting and standard setting. Many important standards, such as fair value accounting, financial instruments, reserve recognition accounting, management discussion and analysis, employee stock options, impairment tests, hedge accounting, derecognition, consolidation, and comprehensive income, will be analyzed and critically evaluated from students. This course aims to provide students with an in-depth understanding of the underlying accounting concepts and accounting standards governing the preparation of financial statements under International Financial Reporting Standards (IFRS) for external users. Furthermore it develop students' conceptual skills and professional competence in financial accounting in compliance with the regulatory and financial framework under IFRS.

**Module contents**  
- Accounting Under Ideal Conditions  
- The Decision Usefulness Approach to Financial Reporting  
- Efficient Securities Markets  
- The Value Relevance of Accounting Information  
- The Measurement Approach to Decision Usefulness  
- Measurement Applications  
- The Efficient Contracting Approach to Decision Usefulness  
- An Analysis of Conflict  
- Executive Compensation  
- Earnings Management  
- Standard Setting: Economic Issues

Prerequisites
Skills to be acquired in this module
Upon completion of the module students will be able to explain the role financial institutions play in financial markets based on economic theory. They will have a sound knowledge of institutional and regulatory conditions under which financial institutions operate today, and they will be able to critically assess respective developments in the financial sector. Moreover, they will have developed a sound understanding of how banks are managed in a competitive environment.

Module contents
We will discuss theoretical foundations of financial intermediation in general, and of banking in particular as well as the economic, institutional, and regulatory context in which financial institutions operate today. Moreover, we will cover selected topics in the area of bank management and bank accounting.

Literaturempfehlungen
- Berger / Molyneux / Wilson (Eds.): The Oxford Handbook of Banking, latest edition, Oxford University Press

Prerequisites

Skills to be acquired in this module
The aim of the course is to provide students with a thorough knowledge of how to identify, classify, measure, and manage different types of financial business risks. In particular, we will discuss the properties and potential applications of derivatives in financial risk management. Upon completion of this module, students will have a sound understanding of the concept of risk management, and will be able to distinguish different types of financial risks and risk management approaches;
- will be able to devise hedging strategies, arbitrage strategies, and speculative strategies using financial derivatives such as futures contracts, forward contracts, options, and swaps;
- will be able to consistently apply valuation models to determine theoretical prices of financial derivatives.
- will be able to assess limitations of financial derivatives in risk management.

Module contents
The course provides insights into the theory and practice of modern financial business risk management, including:
- the concept of risk, types of financial risks, and approaches to risk measurement;
- the mechanics of financial markets, including derivatives markets;
- the properties of selected financial instruments, including financial derivatives such as forwards, futures, options, and swaps;
- tools and techniques for managing financial risks.

Prerequisites: Students are required to actively participate in the course by preparing classes, by performing follow-up coursework, and/or by giving presentations according to the rules defined by the lecturer in the first session.

Skills to be acquired in this module: The aim of the course is to provide insights into the state-of-the-art of academic research in selected areas of accounting and auditing, finance, and taxation. Upon completion of the module, students will be able to place typical research questions and research designs in the aforementioned areas within a broader context of academic research, and to assess selected contributions' significance.

Module contents: The course involves reading and discussing cornerstone journal articles as well as contemporary articles and working papers in accounting/auditing, finance, and/or taxation. Particular emphasis will be placed on the evaluation of the respective studies with respect to their research questions, the methodologies used, and their contributions to the literature.

Literaturempfehlungen: Will be announced at the beginning of the course.

**Skills to be acquired in this module**

After participation in the seminar

- the students know different methods and techniques of scientific work and can apply them successfully;
- the students are able to work in a research-oriented way;
- know the importance of theory building in the scientific process and can work independently with it;
- the students have in-depth knowledge of the project topic dealt with in each case with reference to organization and/or personnel;
- the students have the ability to establish a relationship between theory and practice, to critically examine it and to work out solutions;
- are able to place a specific question in the context of the scientific discussion in the field of organization and human resources and to situate, reflect and evaluate it accordingly;
- know the basics of empirical work and are able to independently collect qualitative/quantitative data, evaluate them, present the results and discuss them critically;
- are able to present their own research results, to document their findings in a scientific report according to the accepted rules of scientific work and to represent a point of view in the scientific debate in these subject areas.
- the students are able to find their way in complex learning situations and to work in a problem-oriented manner;
- the students are able to carry out independent research work in a team situation together with other students.

**Module contents**

The module consists of four project courses and starts in the summer semester. Initially, the lecturers provide a (changing) framework topic from the field of management, organization and personnel (e.g. cooperation and company networks, flexibilization of working conditions, corporate health management). Topics of current research projects of the chair are also included. The individual topics within the framework question are then the subject of student participation. In concrete terms, this means that the lecturers give the students suggestions and initiate topic-finding processes, e.g. by means of metaphor-supported moderation. Work is done alternately in plenary sessions and in small groups under the supervision of the teachers. The project topics are worked on in greater depth in the small student groups.

For methodological-didactic reasons, it is essential that the module runs over two semesters. In the first semester, the theoretical-conceptual basics are worked out, main topics are explored, the basics of empirical work are taught and the course is set for the empirical element to be worked on in small groups. First (especially theoretical-conceptual) results as well as concretizations of the empirical project are presented by the students. The second semester is used to deepen the knowledge and application of empirical work, to work on the empirical part and to write a final scientific report. The results are also presented to the plenary session.
The project module is dominated by forms of active, non-receptive learning. The teachers have primarily a supporting function of information transfer, moderation, consultation and coordination.

Präsenzzezeit Modul insgesamt

- 112 h
The aim of the course is to provide students with a deep knowledge of the theory and concepts in managerial accounting as it relates to practice and research. The students learn to design budgeting processes and apply operating performance measures which are in line with the firm’s goals. Moreover, the students learn to forecast profits, cash flows and other key financial indicators in order to improve business planning.

The course covers the following topics:
- Theory and concept of managerial accounting
- Profit planning
- Budgeting
- Ratios and financial analysis
- Operating performance measures
- Cash flow and segment reporting
- Paper discussion on current and special issues.

Ongoing
- SWS: 2
- Frequency: 28
- Präsenzzzeit Modul insgesamt: 56 h
wir848 - Basic theories of Organisation and Human Resources

Module label: Basic theories of Organisation and Human Resources
Modulkürzel: wir848
Credit points: 6.0 KP
Workload: 180 h

Verwendbarkeit des Moduls:
- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule RdW - BWL
- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule UF - BWL
- Master's Programme Business Informatics (Master) > Module der Wirtschafts- und Rechtswissenschaften (Master)

Zuständige Personen:
- Gilbert, Jonathan (Module counselling)
- Breisig, Thomas (Prüfungsberechtigt)
- Gilbert, Jonathan (Prüfungsberechtigt)
- Breisig, Thomas (module responsibility)

Prerequisites:
Students get to know central theories of organisation and human resources (HR). They are empowered to apply theories in order to explain practical phenomena and to solve practical problems. The ability to put on different "theory glasses " while observing and analysing various organisational and HR practices is fostered. Students learn to deal with different theories in a conscious and critical way, especially through case studies, group work and discussions.

Upon completion of the module, students will:
- be able to explain various classic and modern theories of organisation and human resource theories, differentiate them and reflect them critically ;
- be able to apply the theoretical and abstract ways of thinking and perception so as to transfer them on operational decisions;
- develop skills of self-reflection (supported by the technical and didactical concepts).

Module contents:
Students receive deeper insights into classical and modern theories of organisation and human resource, including:
- Weber's theory of bureaucracy
- Taylor's principles of Scientific Management
- Human Relations approach
- Behavioural decision theory
- Situational approach
- Micro-political approaches
- New Institutional Economics
- Theories of motivation
- Theories of leadership

The presentations and discussions within the seminars also offer possibilities to deepen and broaden these topics according to the student's interest and latest developments in theory and practice.

Literatureempfehlungen:

Further literature will be announced during the semester according to the particular lecture/seminar content.

**Skills to be acquired in this module**
The students will learn the fundamentals of the topic Entrepreneurship, including the challenges of founding enterprises and entrepreneurial action in established companies.

**Module contents**
This module deals with the development of business ideas and its realization in business models as well as its perception and evaluation. The content of the lecture further includes issues relating to team-building, resources, and finance, as well as establishing a business plan, the question of the appropriate legal form of an organization, and the specific challenges in the growth stage. Particular aspects will be amplified by guest lecturers from companies.

keine

**Skills to be acquired in this module**
The module consists of lecture as well as seminar elements which interlink with each other on a technical and didactical level. By alternating lectures, discussions, and training elements, students get to know the theoretical basics as well as the practical relevance of the module topics. They get the chance to integrate themselves, their theoretical knowledge and practical experiences, and to exchange views with the other students and the lecturer. Different teaching and learning methods support the student’s professional, methodological, social-communicative, and personal competences, e. g. via station learning, role plays and debates, thesis discussions and case study analysis. They work within the entire group as well as small groups.

Attending the course, students
- develop a solid knowledge of this broad subject and are able to relate the various scientific and practical findings with each other and also understand them on a macro-level;
- understand the complex issues, challenges and fields of action in International Management;
- are able to analyse, interpret and manage international economic and business issues within heterogeneous (above all cultural) fields of stakeholders and environments;
- can effectively analyse and apply the strategic, structural and cultural instruments in International Management according to the specific practical context;
- develop skills of self-reflection (supported by the technical and didactical concepts) and are able to press their point within the scientific discussion;
- are able to locate a specific research question within the scientific discussion in the field of International Management and to interlink, reflect and evaluate it accordingly.

**Module contents**
Students gain theoretical as well as practical insights in the backgrounds and specific characteristics of International Management. A specific focus will (as a last point) be laid on international Human Resource Management as it provides notably relevant issues in international business administration.

Students deal with foundations, challenges and possible fields of action within the following topics:

- Economic internationalisation and the international firm
  - Characteristics, development and relevance
  - Terminological differentiation and attribution
  - Research and explanatory approaches
- Environment and orientation of international corporations
  - Culture and management
  - Fields and forms of strategy
  - Organisation by structure and processes
  - Responsibility and public affairs
- Relevance of and fields in international Human Resource Management
  - Requirements and organisation of the central HR areas
  - Recruitment and selection
  - Expatriation of employees
  - Intercultural management
  - Social management

The presentations and discussions also offer possibilities to deepen and...
broaden these topics according to the students interests and latest developments in theory and practice.

- Master's Programme Sustainability Economics and Management (Master) > Supplementary Modules

Zuständige Personen

- Lehrenden, Die im Modul (Prüfungsberechtigt)
- Hoppmann, Jörn (module responsibility)

Prerequisites

Skills to be acquired in this module

- The students should:
  - know basic definitions, trends and application areas of digitalization
  - be able to assess the economic effects of digitalization
  - understand corporate strategies and business models in the context of digital transformation
  - know how companies should design processes and structures to promote digitalization in organizations
  - have an overview of social, legal and ethical aspects of digitalization
  - assess the environmental impact of digitalization
  - evaluate digital products, services and business models using ethical and sustainable guidelines
  - independently develop proposals for the integration of ethical, social and ecological criteria in digitalization projects and processes

Module contents

The module "Digital Strategy and Sustainability" provides insights into the role digitalization for companies and the associated social discourse. The digital transformation leads to the emergence of new business models, markets and forms of interaction. This requires comprehensive changes in strategic orientation as well as in business processes and structures. In addition, new regulations and standards are required at the societal level in order to meet the ethical, ecological, and societal challenges posed by digitalization.

In the first part of the seminar, students are familiarized with the basics and application areas of digitalization as well as the economic, social, and ecological implications. Toward this end, important questions in the context of digital transformation will be raised and discussed drawing on company case studies. Exemplary questions that will be dealt with in this context are:

- What are the technological drivers of digitalization and what trends can be observed?
- What is the impact of digital transformation on industries and companies?
- How can companies design strategies, business models, processes and structures to address the digital transformation?
- What are the consequences of digitalization on a societal and legal level?
- How does the digital transformation affect the natural environment?
- How can social, ethical, and ecological aspects be integrated into digital products, services and business models?

In the second part of the course, students will develop digital business models in teams under the guidance of experienced coaches, taking into account economic, ecological and social/ethical criteria. The results are presented to the other students and company representatives and will be summarized in a term paper. An important part of the term paper is the critical reflection of current methods used to develop digital business models with regard to sustainability criteria.

Zuständige Personen
- Hoppmann, Jörn (module responsibility)
- Lehrenden, Die im Modul (Prüfungsberechtigt)
- Hoppmann, Jörn (Module counselling)

Prerequisites

Skills to be acquired in this module
The students should...
- know and understand basic concepts, instruments and theories in the context of corporate sustainability and corporate social responsibility
- be able to apply conceptual frameworks to analyze and critically question the sustainability of companies
- develop options to improve the sustainability of companies and derive recommendations for their implementation in practice

Module contents
The module "Strategic Sustainability Management" provides an overview of the debates on the role of firms for sustainable development from a strategic perspective. The first session will briefly introduce the historical debate on Corporate Sustainability and Corporate Social Responsibility and delineate important concepts. The following sessions will use concrete company case studies as a basis for a critical discussion of questions in the context of corporate sustainability that are of strategic importance for firms. Questions that will be discussed are, amongst others:

- How can one determine whether a firm acts in a socially and ecologically sustainable way?
- Which factors drive and hinder the diffusion of socially and ecologically superior solutions and companies in the market?
- To which extent is there a conflict between firm and market growth on the one hand and sustainability on the other hand?
- Which possibilities does a company have to deal with conflicts between social/ecological and economic goals?
- How can existing firms and value chains be transformed toward sustainability?
- What is the role of managers and boards of directors for organizational change toward sustainability?
- How does the ownership and financial structure of firms influence their strategy toward sustainability?
- In how far can cooperation and partnerships between organizations help integrate social and ecological aspects in 53 firms?

In addition to discussing these questions by drawing on company case studies, students will be introduced to the corresponding theoretical concepts and frameworks in the academic literature. Also, students will be given the opportunity to test different strategies for implementing sustainability in organizations during a simulation, which allows them to gain first-hand insights into the emerging challenges. Toward the end of the course, students will apply and deepen the knowledge they have gathered over the semester by writing a seminar thesis.

**Prerequisites**

Skills to be acquired in this module

In der zum Modul gehörigen Vorlesung werden vor allem formalanalytische Modelle erarbeitet, mit denen Probleme in Wertschöpfungsketten beschrieben und im Rahmen der Modellannahmen optimiert werden können. Hiermit sollen die Studierenden eine Kompetenz zur unternehmensübergreifenden Analyse der gesamten Wertschöpfungskette (Supply Chain) erwerben, mit Hilfe derer sie diese nicht nur verstehen, sondern idealerweise auch verbessern können. Im begleitenden Seminar werden mithilfe von in Gruppen verfassten Hausarbeiten aktuelle Fragestellungen und Diskussionen im Supply Chain Management aufgearbeitet und bewertet. Das Seminar baut ergänzend zur Vorlesung auf konzeptioneller und empirischer Forschung auf. Hiermit lernen die Studierenden wissenschaftliche Diskurse zu praktisch relevanten und nur schwer modellierbaren Herausforderungen des Supply Chain Managements kennen. Ferner werden die Fähigkeiten zum wissenschaftlichen Arbeiten, zur Teamarbeit und zum Präsentieren vor großen Gruppen trainiert.

**Module contents**

Die Vorlesung behandelt voraussichtlich folgende Themen: Grundlagen der Supply Chain, Strategischer Fit, Netzwerk- und Standortplanung, Bestandsmanagement, Produkt- und Prozessdesign, Supply-Chain-Koordination, Vertragsdesign, Transport in der Supply Chain, Nachhaltiges Supply Chain Management

### Skills to be acquired in this module

### Module contents
This module consists of a one lecture and one seminar (2 weekly contact hours per lecture/seminar) dealing with basic concepts and strategies of sustainability management within corporations. Both, lecture and seminar give an overview of current sustainability strategies for companies and present a variety of instruments to integrate and initiate sustainable development within corporations. While the lecture focuses more on theoretical approaches and introduces basic concepts of corporate sustainability management, the seminar provides a variety of case studies and business cases to demonstrate different concepts and instruments of sustainability management. The seminar provides the possibilities for inter- and transdisciplinary exchange and discussions.

Prerequisites
No

Skills to be acquired in this module
- Methods of project management
- Introduction into the methods of qualitative empirical research
- Introduction into approaches to time management
- Identification of individual or team projects in sustainability management (case studies, empirical studies, marketing concepts)
- Self organized work on individual or team projects
- Mid-term and final presentation of project results

Module contents
This module consists of two seminars (2 weekly contact hours per seminar) dealing with several topics from the broad field of sustainability, economics and management during term.

The module's intention is to integrate current research activities of the University from the research areas of sustainability, economics and management into teaching activities. The Module provides students the possibility to actively participate in current research at Oldenburg University. The module's seminars each year deal with different projects and are thus designed each year by a different group of Oldenburg located researchers. This teaching concept provides the interface between theory and application of scientific theories into research practise. Thus, this module also introduces research work at universities in general.

- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule NM-BWL
- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule RdW - BWL
- Master's Programme Sustainability Economics and Management (Master) > Supplementary Modules
- Master's Programme Water and Coastal Management (Master) > Socioeconomics

**Zuständige Personen**

- Siebenhüner, Bernd (Prüfungsberechtigt)
- Sievers-Glotzbach, Stefanie (Prüfungsberechtigt)
- Wolter, Hendrik (Prüfungsberechtigt)
- Siebenhüner, Bernd (module responsibility)

**Prerequisites**

**Skills to be acquired in this module**

- Learning about sustainability, economics and management in different scientific contexts.
- Understanding the complexity of sustainability, economics and management.
- Discussing topics of sustainability, economics and management with students from different scientific disciplines.
- Ability to present and evaluate different concepts of sustainability, economics and management.

**Module contents**

This module consists of two seminars (2 weekly contact hours per seminar) dealing with selected topics from the broad field of sustainability, economics and management. Out of a variety of several seminars the student can choose two most suitable seminars depending on individual choices. The seminars and the seminar contents vary each semester to provide topics relevant for current discussions within the broad field of sustainability, economics and management. Intentionally seminars from several research fields and faculties are offered to also combine different point of views and to bring students from different scientific backgrounds together. The seminars provide the possibilities for inter- and transdisciplinary exchange and discussions.

- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule NM-BWL
- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule RdW - BWL
- Master's Programme Sustainability Economics and Management (Master) > Accentuation Modules

**Zuständige Personen**
- Busse, Christian (module responsibility)
- Lehrenden, Die im Modul (Prüfungsberechtigt)
- Busse, Christian (Module counselling)

**Prerequisites**
By focusing on sustainability from an intra-, and inter-organizational perspective, this module aims to equip students with an in-depth knowledge of the sustainability-related challenges and problems within supply chain management and suggests some tools for managing the same. It further seeks to capacitate students to understand and analyze the trade-offs and conflicts of targets within sustainable supply chain management. The content is closely linked to the latest research in the field, providing a theoretical understanding (within the lecture) while using real-world case examples (within the seminar) to develop a practical understanding simultaneously. Students will be able to connect theory with practice and get a taste of real-life corporate scenarios or lay a foundation for possible master theses. Further, working in groups will help students brush up their team management skills, and the final report shall accustom them to the intricacies of scientific writing.

**Module contents**
This masters-level module focuses on how firms could practically manage sustainability in its supply chains. Two broader perspectives, as detailed below, guide the coursework:

1. **The material flow perspective** approaches SSCM with sustainably managing physical flows and processes within a firm’s operations and upstream (and downstream) supply chain links. Individual (lecture) sessions are built around the following topics: Introduction to Sustainability and Supply Chain Management; Introduction to Sustainable Supply Chain Management; Sustainable Product Development & Lean and Green; Workplace Health and Safety; Sustainable Transportation; Sustainable Warehousing & Sustainable Packaging; and Closed-Loop Supply Chain Management

2. **The relationship perspective** further adopts a more direct managerial viewpoint on inter-firm relations. Individual (lecture) sessions discuss the following topics: Stakeholder Management; Legitimacy, Decoupling & Greenwashing; Supply Chain Sustainability Risks; Sustainable Supplier Management; and Supply Chain Sustainability Dilemmas

Some of the theoretical perspectives discussed within the lecture sessions will be prepared by case studies of well-known companies such as Walmart, DHL, HP, Volkswagen, Lidl, and Apple.

**Literaturempfehlungen**
The lecture content has been developed from various research publications, rather than a textbook. Students are encouraged to read some of the original publications as amendments to the lecture. The case studies will mostly be based on professionally written cases. Scholarly publications/articles, as well as the case study documents, will be provided and discussed throughout the sessions.

wir923 - Advanced Research Topics in Sustainable Supply Chain Management

Module label: Advanced Research Topics in Sustainable Supply Chain Management
Modulkürzel: wir923
Credit points: 6.0 KP
Workload: 180 h

Verwendbarkeit des Moduls
- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule NM-BWL
- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule RdW - BWL
- Master's Programme Sustainability Economics and Management (Master) > Supplementary Modules

Zuständige Personen
- Busse, Christian (module responsibility)
- Lehrenden, Die im Modul (Prüfungsberechtigt)
- Dahiya, Satwant (Module counselling)

Prerequisites
Erfolgreiche Belegung des Moduls "Sustainable Supply Chain Management" (wir921)

Skills to be acquired in this module
- The module helps students to specialize in research in the field of sustainable supply chain management by developing their substantive and theoretical expertise and by augmenting their methodological expertise. Students hone their skills in gathering, reading, understanding, and synthesizing scholarly articles using different methods. They may also practice their data collection and data analysis skills. Moreover, students further develop their academic writing, reviewing, presentation, and discussion skills.

Module contents
This masters-level module focuses on selected topics pertaining to the relationship perspective of sustainable supply chain management, comprising topics such as Stakeholder Management; Legitimacy, Decoupling & Greenwashing; Supply Chain Sustainability Risks; Sustainable Supplier Management; and Supply Chain Sustainability Dilemmas.

Literaturempfehlungen
Selected scholarly research articles will be used throughout the module.

#### Verwendbarkeit des Moduls
- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule NM-BWL
- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule RdW - BWL
- Master's Programme Sustainability Economics and Management (Master) > Supplementary Modules

#### Zuständige Personen
- Busse, Christian (module responsibility)
- Lehrenden, Die im Modul (Prüfungsberechtigt)
- Dahiya, Satwant (Module counselling)

#### Prerequisites

Erfolgreiche Belegung mindestens eines der Module „Sustainable Supply Chain Management“ (wir921), „Supply Chain Management“ (wir899), „Operations Management“ (wir896) und „Innovation Management“ (wir832)

#### Skills to be acquired in this module

Students become acquainted with emergent innovations for sustainable operations, they evaluate such innovations and (co-)design others. They learn to evaluate their actual or conjectured economic, social and/or ecologic effectiveness, drawing on the design science framework and/or theoretical discourses in the field.

#### Module contents

The module helps students to specialize on the intersection of operations and supply chain management, sustainability management, and innovation management. The specific topics align closely with the most up-to-date applied research topics.

#### Literaturempfehlungen

Selected scholarly research articles will be used throughout the module.

**Skills to be acquired in this module**
The main target of the "Eco-Venturing" module is to develop entrepreneurial skills for the development and implementation of environmental innovations and sustainable business ideas. These include:

- the ability to identify new solution needs in the context of sustainable development and the sustainable development goals set by the United Nations,
- Knowledge and skills for the entrepreneurial development and implementation of innovative solutions,
- Knowledge and skills for systematically combining economic (Eco-nomical) and ecological (Eco-logical) objectives and
- the ability to strategically develop "green" business areas and markets.
- The entrepreneurial development and implementation of environmental innovations can relate both to the establishment of new companies and organisations and to the development of new solutions and business ideas within the framework of established companies and organisations (corporate venturing).

**Module contents**
The main focus of the Eco-Venturing module is the development of new or established business start-up concepts. Under of guidance of their lecturer, participants will work together with selected regional business partners who are both economically successful and contribute to the protection of the environment and the climate, to promote such start-up concepts. What these concepts have in common is that they address the issue of sustainability.

**Reference text**
The module "Eco-Venturing" is part of the Master's programme "Sustainability Economics and Management (SEM)" and focuses on "Eco-Entrepreneurship". The module "Eco-Venturing" can be taken either individually or in combination with the two other modules of the study focus "Eco-Entrepreneurship" ("wir 920: Advanced Entrepreneurship"; "wir 832: Innovation Management"). Two of the three modules must be taken in order to be recognised as a specialisation. The Eco-Venturing module is mandatory (cf. examination regulations for the Master's programme SEM, § 4, para. 4).

The module Eco-Venturing is also available for students of the Master's programme WiRe in the ManECo area and can be credited as the module Advanced Entrepreneurship (wir849 Advanced Entrepreneurship). The same applies to students of the Master's programme in Business Informatics. Here it can also be proven as wir849 Advanced Entrepreneurship.

**Skills to be acquired in this module**
By the end of the course students should develop and understand the basic concepts, analytical techniques, instruments and systems to control sustainable corporate success. The students further identify the theoretical background of corporate governance and how corporate governance mechanisms work. Moreover, they develop an up-to-date and mainly practitioner-oriented profile of corporate governance and control systems. They are aware of a controller’s relevance as a corporate conscience and the meaning of controlling as a corporate service. In addition, students identify strategic, operational and department-specific characteristics of corporate control. They argue how to ensure the quality of data and the development of decision-making relevant information. Paper discussions further complement the students’ profile by highlighting current and special issues in the field of corporate governance and control. In summary, students link economic, methodological, and cultural aspects to their personal profile and assess whether an activity as a controller fits to their personal plan for future employment. They further strengthen their ability to develop sustainable solutions for comprehensive and specific economic issues.

**Module contents**
In the beginning, the course provides an overview of the historic development as well as conceptions of corporate governance and control in the literature and in practice. It further embeds the role of corporate governance and control within strategic and operational corporate management. The course is further separated in different parts to ensure students’ ability to identify and understand decision-making, coordination and monitoring aspects of corporate governance and control. As such, students analyse corporate actions via the following instruments:
- SWOT-Analysis
- Porter’s Five Forces Model
- Portfolio Analysis
- Strategic Cost Management
- Linear Programming
- Break-Even Analysis
- Value Based Management
- Ratio Analysis
- Balanced Scorecard
- Variance Analysis

### Module Contents

Solving the complex ecological and social challenges of our time requires complex scientific approaches. This is the field in which research on sustainable development operates. Due to the diversity of problems, this type of research is particularly oriented towards thinking beyond purely delimited scientific disciplines. Research on sustainable development has to interlink different fields of thought and disciplines in an interdisciplinary manner and involve social actors in research processes in a transdisciplinary sense. The complexity of such projects, however, is often a source of tension, since the plurality of forms of knowledge, opinions and objectives involved can quickly lead to a loss of clarity in what is understood by sustainable development, or even to contradictions. This can lead to dilemmas, which can challenge those involved with seemingly unsolvable problems. What exactly these dilemmas of sustainability can look like, how they arise and how they can be dealt with in the context of research projects is the focus of the scientific examination in this module.

Prerequisites

- not applicable

Skills to be acquired in this module

The students are familiar with the effects of digitalisation with its chances and risks in European and German private law and, in particular, consumer law. They obtain knowledge of specific areas of digitalised private law and consumer law with particular relevance for their future professional practice, are able to solve consumer law cases in a goal-oriented way, are able to find approaches for legal problems as well as recognise liability risks and how to deal with them, and are, in contract negotiations, able to recognise the requirements for regulation and to evaluate its consequences.

Module contents

This module conveys how new technologies impact on private law and, in particular, on consumer law. It focuses on the (modified) interpretation of existing laws but even more on the reactions of the EU and national legislators and of the judiciary to new technological developments. The module discusses, among others, distance selling law, digitalised sales law and product liability law, the law of digital content and digital services, unfair commercial practices on internet and the law of the platform economy. Finally, the module looks at enforcement.

Literaturempfehlungen

wir807 - Taxation and Tax Law I

Module label | Taxation and Tax Law I
---|---
Modulkürzel | wir807
Credit points | 6.0 KP
Workload | 180 h

**Verwendbarkeit des Moduls**
- Master of Education Programme (Vocational and Business Education) Economics and Business Administration (Master of Education) > Mastermodule
- Master's programme Business Administration: Management and Law (Master) > Basismodule
- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule AFT - Recht
- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule RdW - Recht

**Zuständige Personen**
- Dittmer, Jochen (module responsibility)

**Prerequisites**
- Skills to be acquired in this module:
  - Tax accounting law and
  - Taxation procedures.

**Module contents**
The course provides a deep insight into
- Tax accounting law
  - Basics of tax accounting law
  - Principal values (cost of purchase/cost of manufacture, going concern value, fair market value)
  - Depreciation, subsidy regulations
  - Transfer of hidden reserves
  - Leasing
  - Provisions
- Taxation procedures
  - Overview about general fiscal law (AO) and tax court code (FGO)
  - Tax determination and taxing procedures
  - Types of taxing
  - Deadlines and extent of balances and tax assessments corrections
  - Interest yield

**Literaturempfehlungen**
- Falterbaum, Hermann (aktuelle Fassung): Buchführung und Bilanz
- Rose, Gerd & Watrin, Christoph (aktuelle Fassung): Abgabenordnung; mit Finanzgerichtsordnung
- It is worth mentioning, that due to the fast-changing tax law, further recommendations regarding the literature cannot be made yet, but are rather given during the course. Required are:
  - A collection of the most important tax laws (e.g. NWB-publisher) in current form
  - A loose-leaf collection of the tax regulations (e.g. Beck-publisher)

- Master's Programme Sustainability Economics and Management (Master) > Basic Modules

**Zuständige Personen**
- Meyerholt, Ulrich (Module counselling)
- Godt, Christine (module responsibility)
- Lehrenden, Die im Modul (Prüfungsberechtigt)

**Prerequisites**
Building on the existing knowledge of the participants, the course will deepen knowledge of European and international law, whereby emphasis will be laid on those areas in which the dividing line between state intervention (public law) and market rights (private law) has become blurred. Students will be able to analyze contemporary regulatory techniques inherent in the multilevel system of governance and to assess them from an interdisciplinary (economic and legal) perspective.

**Module contents**
The module comprises two courses, one of which will be taught by PD Dr. Meyerholt, and the other together with Prof. Godt. The first course deals with selected issues in environmental law. With the general structure of environmental law as a point of departure, the course content will be taught in a holistic manner that will also incorporate the leading decisions of the higher courts. The second course takes into consideration intra-disciplinary environmental law as situated between public and private economic law, whereby special focus will be laid on the European and international dimensions.

- Chege, Victoria (Module counselling)

#### Prerequisites
- (für WiRe empfohlen): wir815

#### Skills to be acquired in this module
- Die Studierenden verstehen Grundlagen und Verschränkungen von Wettbewerbsrecht und Geistigem Eigentum
- analysieren und beantworten Rechtsfragen im Schnittfeld von Wettbewerb und Geistigem Eigentum
- beherrschen einschlägige Rechtsprechung und können neue Fragen entsprechend einordnen

#### Module contents
Das Modul enthält zwei Veranstaltungen (wahlweise Vorlesung mit Seminar oder zwei Vorlesungen) und richtet sich an Masterstudierende mit Interesse an Innovation und dynamischem Wettbewerb (zwischen Unternehmen, aber auch zwischen Staaten). Aufbauend auf zuvor vermittelte Grundstrukturen des Europäischen Markordnungsrechts, stehen Themen auf der Schnittfläche von Wettbewerb und Geistigen Eigentums (Kartell- und Lauterkeitsrecht) im Zentrum der Veranstaltung.

Lehrziele sind einerseits die akademische Durchdringung, andererseits die Einordnung und Beantwortung praktischer Fallgestaltungen. Themen generieren sich aus der betriebswirtschaftlichen Praxis (u.a. etwa Zugang zu “standardessentiellen Patente”; Schutzrechte als Voraussetzung von Unternehmenskooperationen) wie aus volkswirtschaftlichen Fragen (Einfluss des Schutzstandards für Geistiges Eigentum auf Innovation und Direktinvestitionen; Schutzrechte als Marktzugangsbedingungen).

Die Studierenden lernen, Geistiges Eigentum und Wettbewerbsrecht als zwei miteinander verschränkte Rechtsgebiete zu analysieren.

**Prerequisites**

Skills to be acquired in this module

- to describe European and international legal-economic interdependencies

- apply international and European legal norms and legal issues

- have a command of English legal terminology

**Module contents**

The module consists of two lectures which deal with changes in policies and institutions of international economic law. One lecture focuses on economic law and institutions as shaped by international law, while the other class is dedicated to EU foreign trade law. A basic knowledge of the institutions of international and EU economic law (WTO, IMF, World Bank, European Commission) is a prerequisite for attending this module. The focus lies in helping students understand the processes of internationalization and Europeanization that inform the current interactions between the different actors on the international plane (companies, states and parastatals). In this module, public and private economic law will be presented as a single unit. The international law part of the module focuses on the rationale and regulation of the major free trade agreements, including dispute settlement. Other topics to be addressed include the conflict of laws and the UN Convention (CISG). The EU law focuses on competition and foreign trade law, including procurement and taxation law.

**Zuständige Personen**
- Wendland, Matthias (module responsibility)
- Lehrenden, Die im Modul (Prüfungsberechtigt)

**Prerequisites**
Basic knowledge, B.A. with law parts

**Skills to be acquired in this module**
- Participants will understand how digitization affects society and the law. They will learn from selected examples how the law is adapting to digitalization - and where the law reaches its limits.
- The module is theory-, method- and application-oriented.
- The module is interdisciplinary: social science, technological and economic issues are integrated into the module alongside legal content.
- Students develop the ability to see law in its social, economic and technological context. They learn to analyze the interactions of law with digitalization

**Module contents**
- Fundamentals: Digitization as a technological and a cultural development.
- Characteristics of digitization
- Challenge of law through digitization
- Limits of law in the digitized world: selected areas of law as examples

wir835 - Taxation and Tax Law II

Module label: Taxation and Tax Law II
Modulkürzel: wir835
Credit points: 6.0 KP
Workload: 180 h

Verwendbarkeit des Moduls

- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule AFT - Recht
- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule RdW - Recht

Zuständige Personen

- Dittmer, Jochen (module responsibility)

Prerequisites

Skills to be acquired in this module

The aim of the course is to provide students with a deep and thorough knowledge regarding
- Mergers & Acquisition tax
- International taxation

Module contents

The course provides a deep insight into
- Merger & acquisition tax
- Taxation of sale of company shares
- Admission of a shareholder
- Insertion of operations, partial operations and partner shares in corporate enterprises
- Transformation of corporate enterprises into business partnerships
- Merger of corporate enterprises
- Separation of corporate enterprises and business partnerships
- International taxation
- Taxation of transnational operations in form of direct businesses, permanent establishments and corporate enterprise subsidiaries
- Possibilities and limitations regarding the prevention of international double taxation
- Profit deferral and problems regarding transfer prices
- Problems in the prevention of international low taxation

Reference text

Due to a change in the frequency in which the "Mergers & Acquisition Tax" and the "International Taxation" sections are offered starting with the winter semester 2020/21, it is recommended for the winter semester 2019/20, in addition to the module wir 807 "Taxation and Tax Law I", to study the "Mergers & Acquisition Tax" section of the module wir835 at the same time and that the examination on both sections is taken in the summer semester 2020. The course "Mergers & Acquisition Tax" will otherwise only be offered again in the summer semester 2021.

From the summer semester 2021 onward it is recommended to study the part "Mergers & Acquisition Tax" of the module wir835 in the 2nd semester and the part "International Taxation" in the 3rd semester. At the end of the 3rd semester, the written exam should cover the entire content of the module.

### Zuständige Personen
- Boehme-Neßler, Volker (module responsibility)
- Lehrenden, Die im Modul (Prüfungsberechtigt)

### Prerequisites
**Skills to be acquired in this module**

- The students:
  - have in-depth insights into the economic conditions of media production, distribution and exploitation.
  - know the legal basis and framework conditions of media production, media presentation and mediation (e.g. copyrights, performance rights, distribution of media).
  - bring together economic and legal dimensions of media work.
  - know the economic and legal framework conditions of media institutions (e.g. television, radio, media mediation).

### Module contents
- This module is about making a connection of the theoretical and practical acquired aesthetic competences with the economic and legal framework conditions. In the sense of professionalisation, prospective media producers and mediators should learn to assess their own future activities under economic and legal conditions.

**Zuständige Personen**
- Rott, Peter (module responsibility)
- Lehrenden, Die im Modul (Module counselling)
- Lehrenden, Die im Modul (Prüfungsberechtigt)

**Prerequisites**

**Skills to be acquired in this module**
Upon completion of the module, students will be able to:

- demonstrate a knowledge of the basics of insolvency law and insolvency proceedings law as well as the basics of banking law and capital market law.
- classify insolvency law with its functions as enforcement law, restructuring law, and the right to alter a relationship in business life.
- demonstrate a knowledge of the positions of the groups involved (creditors, debtors, the responsible bodies of legal persons) in the insolvency proceedings, including the rights and obligations of the groups involved in the process and in the run-up to the crisis, as well as the discharge of residual debt as a rehabilitation option for natural persons.
- demonstrate a familiarity with the principles of the legitimacy verification pursuant to the general tax code, money laundering, bank secrecy, and the information requirements of credit institutions.
- identify the functions of banking and capital market law as well as modern insolvency law.
- use these functions in practical examples.
- assess the progress of insolvency proceedings, including their requirements on creditors and debtors.

**Module contents**
The module deals with banking and capital market law as well as insolvency and insolvency proceedings law within two separate lectures.

The main focus of the lecture in banking and capital market law is banking law. After an introduction to general banking law, the most important legal questions regarding collateralisation of loans are discussed. Additionally, the topics of the legitimacy verification pursuant to the general tax code, money laundering, bank secrecy, and the information requirements of credit institutions are discussed. Subsequently, the basic principles of securities law are discussed. Their legal basis and the economic background are analysed. Where possible, the interrelations between the various securities and the events of the financial market crisis will be discussed.

The lecture Insolvency Law deals with the basics of debt enforcement and insolvency law. Procedures will be shown and explained. The first part deals with company insolvency law, the second part with consumer insolvency and residual debt relief law.

**Literatureempfehlungen**
Current literature references are given in the events.

**Prerequisites**
Skills to be acquired in this module
Upon completion of the module, students will be able to:

- recognize simple data protection incidents.
- apply existing protection mechanisms.
- implement projects in accordance with the law.
- discuss and defend their plans in front of others.

**Module contents**
The module gives an overview on data protection laws. Basic knowledge of data protection regulations (DSGVO; BDSG) and existing protection mechanisms is imparted. Within the framework of the seminar, the discussed topics will be deepened with the help of seminar papers and individual aspects will be discussed in more detail. The event will highlight the new informational structures in modern society and their effects on data protection and data security. Questions concerning general personal rights, freedom of information, IT security and relevant criminal law regulations will be discussed on the basis of examples and legally provided protection mechanisms as well as the tasks of supervisory authorities will be discussed. In particular, the most important decisions on data protection will be covered in detail during the seminar. At the seminar, students will have the opportunity to prepare in-depth seminar papers on the various topics, which will then be discussed with all participants.

- verstehen die Rechtsgenese und Rechtsdurchsetzung im Europäischen Mehrebenensystem,
- analysieren und beantworten Rechtsfragen im Europäischen Binnenmarktrecht,
- beherrschen englische Rechtsterminologie.

**Module contents**

In dem Modul werden aktuelle Themen des Europäischen Wirtschaftsrechts auf Masterniveau angegangen. Lehrziel ist die Erfassung und die Analyse sich stellender Probleme auf den verschrankten Rechtsebenen Europas. Die Studierenden lernen, die Texte systematisch zusammenzustellen und Antworten auf Fragestellungen aus Kontext und Grundprinzipien zu entwickeln. Damit bereiten sich die Studierenden auf die Berufspraxis im sich vertiefenden Binnenmarkt mit seinen Außenbezügen vor. Das Modul wird vorzugsweise in englischer Sprache gehalten.

### Verwendbarkeit des Moduls
- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule NM-Recht
- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule RdW - Recht
- Master's Programme Sustainability Economics and Management (Master) > Supplementary Modules

### Zuständige Personen
- Kamau, Evanson Chege (Module counselling)
- Lehrenden, Die im Modul (Prüfungsberechtigt)
- Godt, Christine (module responsibility)

### Prerequisites
- englische Sprachkenntnisse

### Skills to be acquired in this module
- Die Studierenden verstehen interationale, europäische und nationale themenbezogene Rechtsnormen und Rechtsfragen.
- wenden interationale, nationale und europäische themenbezogene Rechtsnormen an.
- erlernen die englische Rechtsterminologie.

### Module contents

Inhaltlich sind die folgenden Themengebiete für die Lehrveranstaltungen relevant:

- Internationale Rahmenbedingungen für den Zugang zu genetischen Ressourcen und Vorteilausgleich
- EU-Recht und ausfüllende mitgliedstaatliche Regeln zur biologischen Forschung an und Nutzung von genetischen Ressourcen, Traditionellem Wissen und Technologietransfer
- Nationale Vorschriften der Ressourcenstaaten für das Aufsuchen genetischer Ressourcen bei wissenschaftlichen Feldstudien und kommerzieller Bioprospektion (z.B. Genehmigungspflichten; Prior Informed Consent; Mutually Agreed Terms; Due Diligence)
- Recht der verschiedenen kommerziellen, gesetzlichen und akademischen Ex-situ-Sammlungen genetischer Ressourcen (Practices of databases / Prinzipien und Praktiken der Datenbanken)
- Code of Conduct der deutschen Forschungseinrichtungen (vor allem DFG)
- Genetische Ressourcen und Geistiges Eigentum
- Good practices / Bewährte Verfahren (selected ex situ collections)
- ABS agreements ("Mutual Agreed Terms")/ Verträge
- Legislative options / Legislative Optionen

Prerequisites
Einsetzung auf Niveau English for University Studies 4 (EUS 4) oder ein erfolgreicher Abschluss von English for University Studies 3 (EUS 3) - Comprehensive Language Skills

Skills to be acquired in this module
The 4-hour Rechts- und Wirtschaftssprache: Englisch I course helps participants develop subject-specific (i.e. economics and law) upper-intermediate English language competences in listening, speaking, reading and writing. An additional focus is the expansion of participants' vocabulary and grammar knowledge.

Module contents
The course covers a variety of topics, tasks and formats aimed at developing participants' subject-specific (i.e. economics and law) upper-intermediate English language competences in listening, speaking, reading and writing, as well as expanding their vocabulary and grammar knowledge.

Literaturempfehlungen
The course materials will be announced in class.

Skills to be acquired in this module

Students get to know selected concepts of organisation and management. Their respective objectives, instruments and methods are discussed and their use in everyday business is critically reflected. Students learn to deal with different management concepts in a conscious and critical way, especially through case studies and discussions.

Upon completion of the module, students will:
- be familiar with the emergence, development, and content of various management concepts;
- be able to convey key findings of the various management concepts to practical issues in the field of organisation and management;
- develop skills of self-reflection (supported by the technical and didactical concepts).

Module contents

Students receive deeper insights into concepts of organisation and management, including:
- Lean Management
- Change Management
- Quality Management
- Business Process Reengineering

The presentations and discussions within the seminars also offer possibilities to deepen and broaden these topics according to the student's interest and current developments in theory and practice, e.g. Balanced Scorecard, Learning Organisation, Organisational Culture, Worker Participation, Networks, Diversity Management, Management by Objectives.

Literaturempfehlungen

Further literature will be announced during the semester according to the particular lecture/seminar content.

- Master's programme Business Administration: Management and Law (Master) > Schwerpunktmodule UF - Recht

Zuständige Personen
- Godt, Christine (module responsibility)
- Chege, Victoria (Module counselling)

Prerequisites
(für WiRe empfohlen): wir815

Skills to be acquired in this module
- verstehen Grundlagen und Verschränkungen von Wettbewerbsrecht und Geistigem Eigentum
- analysieren und beantworten Rechtsfragen im Schnittfeld von Wettbewerb und Geistigem Eigentum
- beherrschen einschlägige Rechtsprechung und können neue Fragen entsprechend einordnen

Module contents
Das Modul enthält zwei Veranstaltungen (wahlweise Vorlesung mit Seminar oder zwei Vorlesungen) und richtet sich an Masterstudierende mit Interesse an Innovation und dynamischem Wettbewerb (zwischen Unternehmen, aber auch zwischen Staaten). Aufbauend auf zuvor vermittelte Grundstrukturen des Europäischen Marktordnungsrechts, stehen Themen auf der Schnittfläche von Wettbewerb und Geistigen Eigentums (Kartell- und Lauterkeitsrecht) im Zentrum der Veranstaltung.

Lehrziele sind einerseits die akademische Durchdringung, andererseits die Einordnung und Beantwortung praktischer Fallgestaltungen. Themen generieren sich aus der betriebswirtschaftlichen Praxis (u.a. etwa Zugang zu ‚standardessentiellen Patenten‘; Schutzrechte als Voraussetzung von Unternehmenskooperationen) wie aus volkswirtschaftlichen Fragen (Einfluss des Schutzstandards für Geistiges Eigentum auf Innovation und Direktinvestitionen; Schutzrechte als Marktzugangsbedingungen).

Die Studierenden lernen, Geistiges Eigentum und Wettbewerbsrecht als zwei miteinander verschrankte Rechtsgebiete zu analysieren.

</tr>
<tr>
<td>Module contents</td>
<td>The module consists of two lectures which deal with changes in policies and institutions of international economic law. One lecture focuses on economic law and institutions as shaped by international law, while the other class is dedicated to EU foreign trade law. A basic knowledge of the institutions of international and EU economic law (WTO, IMF, World Bank, European Commission) is a prerequisite for attending this module. The focus lies in helping students understand the processes of internationalization and Europeanization that inform the current interactions between the different actors on the international plane (companies, states and parastatals). In this module, public and private economic law will be presented as a single unit. The international law part of the module focuses on the rationale and regulation of the major free trade agreements, including dispute settlement. Other topics to be addressed include the conflict of laws and the UN Convention (CISG). The EU law focuses on competition and foreign trade law, including procurement and taxation law.</td>

Module label: Business and Legal Chinese I

Modulkürzel: wir863

Credit points: 6.0 KP

Workload: 180 h

Verwendbarkeit des Moduls:
- Master's programme Business Administration: Management and Law (Master) > Ergänzungsmodule - Rechts- und Wirtschaftssprache
- Master's programme Business Administration: Management and Law (Master) > Kernmodule CHI
- Master's Programme Sustainability Economics and Management (Master) > Supplementary Modules

Zuständige Personen:
- Lehrenden, Die im Modul (Prüfungsberechtigt)
- Wang, Hongrui (Module counselling)
- Trautwein, Hans-Michael (module responsibility)

Prerequisites:

Skills to be acquired in this module:
At the end of the course, successful students:
- communicate in everyday life and work environments,
- recognize and understand 200 characters and words,
- understand frequently used expressions,
- understand simple meanings in familiar contexts, clear instructions, standard questions and informations when pronounced slowly and clearly,
- pose and answer questions in familiar contexts,
- provide personal information in spoken and written form,
- write about themselves in simple meanings.

Module contents:
Thematic vocabulary concerning personal information, basics of everyday life, shopping, simple standard transactions etc.
Reading: simple dialogues and texts from everyday life
Listening: short and simple dialogues from everyday life
Speaking: short dialogues in everyday life situations
Writing: short texts on personal information, questionnaires and forms
Self-learning: work with the portfolio, individual training

Prerequisites: keine

Skills to be acquired in this module: Students
- understand the importance of incentive systems for economic processes and can analyze the effects of incentive systems;
- have a firm knowledge in game theory and contract theory, and can address questions in the context of scientific discussion;
- are able to apply methods from game theory and contract theory largely independently to the analysis of situations in which agents interact strategically;
- are able to design incentive schemes – on their own and in teams – and to acquire knowledge on their own for this purpose and, to present their results, and to defend them in the scientific discourse.

Module contents: The first part of the module covers game theory. Game theory is an important method in economics to analyze strategic interactions of agents, e.g., on markets, in organizations or in bargaining situations. The second part of the module covers contract theory that – according to the Nobel laureate Kenneth Arrow – has been „the most important development in economics in the last forty years“. We work out the fundamentals of screenings, signaling and moral hazard and apply them to different topics, e.g., from labor economics, economic organization and management, law and economics as well as industrial economics. In both parts, there is a tutorial. Here students largely independently apply the acquired knowledge to different situations of strategic interaction in economics and present their results.

**Zuständige Personen**
- Hoppmann, Jörn (module responsibility)
- Lehrenden, Die im Modul (Prüfungsberechtigt)
- Hoppmann, Jörn (Module counselling)

**Prerequisites**
- Skills to be acquired in this module
  - The students should...
  - know and understand basic concepts, instruments and theories in the context of corporate sustainability and corporate social responsibility
  - be able to apply conceptual frameworks to analyze and critically question the sustainability of companies
  - develop options to improve the sustainability of companies and derive recommendations for their implementation in practice

**Module contents**
The module "Strategic Sustainability Management" provides an overview of the debates on the role of firms for sustainable development from a strategic perspective. The first session will briefly introduce the historical debate on Corporate Sustainability and Corporate Social Responsibility and delineate important concepts. The following sessions will use concrete company case studies as a basis for a critical discussion of questions in the context of corporate sustainability that are of strategic importance for firms. Questions that will be discussed are, amongst others:

- How can one determine whether a firm acts in a socially and ecologically sustainable way?
- Which factors drive and hinder the diffusion of socially and ecologically superior solutions and companies in the market?
- To which extent is there a conflict between firm and market growth on the one hand and sustainability on the other hand?
- Which possibilities does a company have to deal with conflicts between social/ecological and economic goals?
- How can existing firms and value chains be transformed toward sustainability?
- What is the role of managers and boards of directors for organizational change toward sustainability?
- How does the ownership and financial structure of firms influence their strategy toward sustainability?
- In how far can cooperation and partnerships between organizations help integrate social and ecological aspects in 53 firms?

In addition to discussing these questions by drawing on company case studies, students will be introduced to the corresponding theoretical concepts and frameworks in the academic literature. Also, students will be given the opportunity to test different strategies for implementing sustainability in organizations during a simulation, which allows them to gain first-hand insights into the emerging challenges. Toward the end of the course, students will apply and deepen the knowledge they have gathered over the semester by writing a seminar thesis.

<td>This module is a project that students in the China focus carry out during the term that they spend at a partner university in China. The project topic is selected and researched under intensive online-supervision from Oldenburg in collaboration with colleagues at the partner universities. A kick-off meeting in Oldenburg and regular (online) consultations during and after the stay in China are required. A report in the shape of a 20+ pages study concludes the project.</td>

Da dieses Modul an verschiedenen Partnerhochschulen in China belegt werden kann und auch von den individuellen Sprachkenntnissen der Studierenden abhängt, ob Lehrangebote in chinesischer oder englischer Sprache belegt werden können, weichen die Inhalte, Literaturgrundlagen und Prüfungsformen der einzelnen Modulangebote unter Umständen stark voneinander ab. Auf Vergleichbarkeit und Kompetenzerreichung wird bei der Zuteilung der Studienplätze und Anerkennung der Leistungen geachtet.

wir871 - Work Placement (in China)

Module label  Work Placement (in China)

Modulkürzel  wir871

Credit points  6.0 KP

Workload  180 h

Verwendbarkeit des Moduls
- Master's programme Business Administration: Management and Law (Master) > Module im obligatorischen Auslandsstudium CHI

Zuständige Personen
- Wang, Hongrui (Module counselling)
- Breisig, Thomas (module responsibility)
- Trautwein, Hans-Michael (module responsibility)
- Breisig, Thomas (Prüfungsberechtigt)
- Trautwein, Hans-Michael (Prüfungsberechtigt)
- Wang, Hongrui (Prüfungsberechtigt)

Prerequisites

Skills to be acquired in this module
- Attending the module, students
  - gain first work experiences and are able to relate and reflect them on the basis of their study contents;
  - reflect and concretize their professional motivation and career choices;
  - have the competences to plan their ongoing studies (e.g. master's thesis) as well as further master studies and their career entry;
  - have deeper knowledge in the specific professional field they chose and have tested their professional competences in practice;
  - enhance their social and methodological competences and prove them in the chosen organization;
  - are familiar with the application process and able to reflect their own procedure accordingly so as to develop strategies for work search in the future;
  - gain intercultural competences in a practical environment.

Module contents
The module contents are separated into the placement itself (including the report) and the seminar.

Contents of the placement (including report)
- The work placement has to have an explicit relation to the student’s fields of study. The student’s work tasks therefore have to include aspects of economics, business administration and law or sustainability economics.
- Duration of at least four weeks or ca. 160 working hours is compulsory for this work placement.
- The report shall present the organization, work tasks, relations to the student’s fields of study and reflection on the student’s experiences and cognitions. It shall be of 12-15 pages in length. The certificate about the placement and its duration needs to be attached. The report is to be submitted to the “Servicestelle Praktikum”.
