## Mastermodule

### bio110 - Practical Biology Experiments for Science Education

<b>Module label</b>	Practical Biology Experiments for Science Education
<b>Modulkürzel</b>	bio110
<b>Credit points</b>	6.0 KP
<b>Workload</b>	180 h
<b>Verwendbarkeit des Moduls</b>	<ul style="list-style-type: none"> <li>• Dual-Subject Bachelor's Programme Biology (Bachelor) &gt; Aufbaumodule</li> <li>• Master of Education Programme (Gymnasium) Biology (Master of Education) &gt; Mastermodule</li> <li>• Master of Education Programme (Special Needs Education) Biology (Master of Education) &gt; Mastermodule</li> </ul>
<b>Zuständige Personen</b>	<ul style="list-style-type: none"> <li>• Rathje, Wiebke (module responsibility)</li> <li>• Hößle, Corinna (Module counselling)</li> <li>• Rathje, Wiebke (Module counselling)</li> <li>• Rathje, Wiebke (Prüfungsberechtigt)</li> <li>• Plewka, Isabelle (Prüfungsberechtigt)</li> <li>• Wübßen, Anja (Prüfungsberechtigt)</li> </ul>
<b>Prerequisites</b>	Voraussetzung an der Teilnahme ist der erfolgreiche Abschluss des Moduls bio100.
<b>Skills to be acquired in this module</b>	<p>Die Studierenden erwerben folgende Kompetenzen: Studierende</p> <ul style="list-style-type: none"> <li>• lernen basale Arbeits- und Erkenntnismethoden der Biologie unter besonderer Berücksichtigung der Zoologie und Botanik kennen und wenden diese bei der Planung von Lernarrangements an</li> <li>• verfügen insbesondere über Kenntnisse und Fähigkeiten im hypothesengeleiteten Experimentieren, im kriteriengeleiteten Vergleichen, beim Nutzen von Modellen sowie im Handhaben von schulrelevanten Geräten</li> <li>• verfügen über grundlegende Kenntnisse allgemeiner Experimentiermethoden</li> <li>• können Unterrichtskonzepte und -medien fachgerecht gestalten und inhaltlich bewerten.</li> <li>• kennen Möglichkeiten zur Gestaltung von Lernarrangements insbesondere unter Berücksichtigung heterogener Lernvoraussetzungen</li> <li>• verfügen über grundlegende Kenntnisse zu potentiellen Lernschwierigkeiten und zu der Vielfalt von Schülervorstellungen in den behandelten Themengebieten unter Inklusionsbedingungen sowie über Grundlagen Standard- und kompetenzorientierten Vermittlungsprozesse in heterogenen Lerngruppen</li> <li>• können auf der Grundlagen ihrer fachbezogenen Expertise hinsichtlich Planung und Gestaltung eines inklusiven Unterrichts mit sonderpädagogisch qualifizierten Lehrkräften gemeinsame fachliche Lernangebote entwickeln.</li> <li>• können digitale Lernmittel in ihren Lernarrangements integrieren und sie zur Differenzierung und individuellen Förderung im Unterricht einsetzen.</li> <li>• sind in der Lage, Entwicklungen im Bereich Digitalisierung aus fachlicher und fachdidaktischer Sicht angemessen zu rezipieren sowie Möglichkeiten und Grenzen der Digitalisierung kritisch zu reflektieren. Sie können die daraus gewonnenen Erkenntnisse in fachdidaktischen Kontexten nutzen sowie in die Weiterentwicklung unterrichtlicher und curricularer Konzepte einbringen. Sie sind sensibilisiert für die Chancen digitaler Lernmedien hinsichtlich Barrierefreiheit und nutzen digitale Medien auch zur Differenzierung und individuellen Förderung im Unterricht</li> </ul>
<b>Module contents</b>	Das Modul umfasst ein Seminar und eine Übung. Im Rahmen der praktischen Übung lernen die Studierenden klassische und innovative Schulversuche zur Botanik und Zoologie kennen. Sie werden aufgefordert die Versuche unter Einbezug digitaler Werkzeuge eigenständig vorzubereiten, durchzuführen und zu reflektieren. Die Studierenden erlernen dabei basale biologische Arbeits- und Erkenntnismethoden und entwickeln Lernarrangements zum

hypothesengeleiteten Experimentieren.

Im Seminar entwickeln und verschriftlichen die Studierenden unter dem Einbezug sonderpädagogischer Fallbeispiele Unterrichtskonzepte für heterogene sowie inklusive Lerngruppen und diskutieren diese gemeinsam. Die Studierenden üben sich so in der Entwicklung von inklusiven Lernarrangements, deren Ziel es ist, naturwissenschaftliche Arbeits- und Denkweisen in heterogenen Lerngruppen zu fördern.

## bio120 - Science-Teaching and Learning in School-Labs

<b>Module label</b>	Science-Teaching and Learning in School-Labs	
<b>Modulkürzel</b>	bio120	
<b>Credit points</b>	3.0 KP	
<b>Workload</b>	90 h	
<b>Verwendbarkeit des Moduls</b>	<ul style="list-style-type: none"> <li>• Master of Education Programme (Gymnasium) Biology (Master of Education) &gt; Mastermodule</li> <li>• Master of Education Programme (Special Needs Education) Biology (Master of Education) &gt; Mastermodule</li> </ul>	
<b>Zuständige Personen</b>	<ul style="list-style-type: none"> <li>• Hößle, Corinna (module responsibility)</li> <li>• Hößle, Corinna (Module counselling)</li> <li>• Weusmann, Birgit (Module counselling)</li> <li>• Winkler, Holger (Module counselling)</li> <li>• Plewka, Isabelle (Module counselling)</li> <li>• Wübben, Anja (Module counselling)</li> <li>• Hößle, Corinna (Prüfungsberechtigt)</li> <li>• Weusmann, Birgit (Prüfungsberechtigt)</li> <li>• Winkler, Holger (Prüfungsberechtigt)</li> <li>• Plewka, Isabelle (Prüfungsberechtigt)</li> <li>• Wübben, Anja (Prüfungsberechtigt)</li> </ul>	
<b>Prerequisites</b>	Studierende des GHR-Lehramtes wählen aus dem Modul 120 zwei Seminare aus (Lernlabor Wattenmeer, Grüne Schule oder Streifzüge sowie Achtsamkeitsübungen stehen zur Auswahl). In jedem Seminar wird eine Leistung erbracht, die Mindeststandards erfüllen muss, aber unbenotet bleibt.	
<b>Skills to be acquired in this module</b>	<p>Die Studierenden gestalten Lehr-Lernprozesse unter Berücksichtigung fachlicher und fachdidaktischer Erkenntnisse zur Förderung von Lernprozessen. Dabei stehen wahlweise die Themen der Botanik und Ökologie (Grüne Schule) oder das Thema Ozean (Lernlabor Wattenmeer) unter Berücksichtigung aktueller Forschungserkenntnisse im Fokus des Seminars. In beiden Varianten werden Lernmaterialien in Anlehnung an das Konzept 'Bildung für nachhaltige Entwicklung' entwickelt. Die Studierenden konzipieren Aufgabenstellungen kriteriengerecht und formulieren sie adressatengerecht. Die Lerneinheiten werden im Lernlabor erprobt, Entwicklungsstände, Lernpotenziale, Lernhindernisse und Lernfortschritte werden diagnostiziert und die didaktisch-methodischen Konzepte reflektiert und adaptiert. Dabei nehmen die Studierenden eine forschende Haltung im Sinne des Ansatzes "Forschendes Lernen" ein.</p> <p>In den Seminaren im Lernlabor Wattenmeer werden digitale, barrierearme Elemente in die Unterrichtseinheiten implementiert, praktisch mit Schüler*innen getestet und aus fachlicher und fachdidaktischer Sicht reflektiert.</p>

## bio130 - Human Biology Experiments for Science Education

<b>Module label</b>	Human Biology Experiments for Science Education
<b>Modulkürzel</b>	bio130
<b>Credit points</b>	6.0 KP
<b>Workload</b>	180 h
<b>Verwendbarkeit des Moduls</b>	<ul style="list-style-type: none"><li>• Master of Education Programme (Gymnasium) Biology (Master of Education) &gt; Mastermodule</li><li>• Master of Education Programme (Hauptschule and Realschule) Biology (Master of Education) &gt; Mastermodule</li><li>• Master of Education Programme (Special Needs Education) Biology (Master of Education) &gt; Mastermodule</li></ul>
<b>Zuständige Personen</b>	<ul style="list-style-type: none"><li>• Rathje, Wiebke (module responsibility)</li><li>• Hößle, Corinna (Module counselling)</li><li>• Rathje, Wiebke (Module counselling)</li><li>• Hößle, Corinna (Prüfungsberechtigt)</li><li>• Rathje, Wiebke (Prüfungsberechtigt)</li><li>• Plewka, Isabelle (Prüfungsberechtigt)</li><li>• Wübben, Anja (Prüfungsberechtigt)</li></ul>
<b>Prerequisites</b>	Voraussetzung an der Teilnahme ist der erfolgreiche Abschluss des Moduls bio100 "Einführung in die Biologiedidaktik".
<b>Skills to be acquired in this module</b>	<p>Die Studierenden erwerben folgende Kompetenzen. Sie</p> <ul style="list-style-type: none"><li>• verfügen über ein strukturiertes Fachwissen in Bezug auf Humanbiologie</li><li>• verfügen über grundlegendes fachdidaktisches Wissen und können dieses bei der Planung von Lernarrangements unter Berücksichtigung heterogener Lernvoraussetzungen zum Thema Humanbiologie anwenden</li><li>• verfügen insbesondere über Kenntnisse und Fähigkeiten im hypothesengeleiteten Experimentieren, im kriteriengeleiteten Vergleichen, beim Nutzen von Modellen sowie im Handhaben von schulrelevanten Geräten</li><li>• verfügen über grundlegende Kenntnisse allgemeiner Experimentiermethoden</li><li>• verfügen über grundlegende Kenntnisse zu potentiellen Lernschwierigkeiten und zu der Vielfalt von Schülervorstellungen im Themenbereich Humanbiologie und Genetik</li><li>• verfügen über grundlegende Kenntnisse von fachdidaktischen Theorien, ausgewählter Ergebnisse aus der Lehr- und Lernforschung zur Kompetenzentwicklung und zu Schülervorstellungen sowie der curricularen Rahmenbedingungen und können diese reflektieren.</li><li>• können digitale Lernmittel in ihren Lernarrangements integrieren und sie zur Differenzierung und individuellen Förderung im Unterricht einsetzen.</li></ul> <ul style="list-style-type: none"><li>• sind in der Lage, Entwicklungen im Bereich Digitalisierung aus fachlicher und fachdidaktischer Sicht angemessen zu rezipieren sowie Möglichkeiten und Grenzen der Digitalisierung kritisch zu reflektieren. Sie können die daraus gewonnenen Erkenntnisse in fachdidaktischen Kontexten nutzen sowie in die Weiterentwicklung unterrichtlicher und curricularer Konzepte einbringen. Sie sind sensibilisiert für die Chancen digitaler Lernmedien hinsichtlich Barrierefreiheit und nutzen digitale Medien auch zur Differenzierung und individuellen Förderung im Unterricht</li></ul>
<b>Module contents</b>	<p>Das Modul umfasst eine Seminar und eine Übung. Im Rahmen der Veranstaltung werden die Studierenden zunächst in die fachlichen Grundlagen humanbiologischer Themen und Genetik eingeführt. Daran schließt sich die praktische Erprobung unterschiedlicher Schulversuche sowie das Arbeiten an Modellen an, die unter Berücksichtigung der Methode "Lernen an Stationen/Lernstraße" durchlaufen werden. Die Studierenden erlernen hierbei basale biologische Arbeits- Erkenntnismethoden an und entwickeln Lernarrangements zum hypothesengeleiteten Experimentieren. Im Seminar werden die Schulversuche hinsichtlich ihrer didaktischen Relevanz und Eignung reflektiert. Abschließend finden eine Vorstellung sowie eine Reflexion verschiedener fachdidaktischer Themen aus der Lehr-Lernforschung statt.</p> <p>Folgende fachbiologische und biologiedidaktischen Grundlagen sind Inhalt der Veranstaltung:</p>

- Humanbiologie: Atmung, Herz-Kreislauf, Blut, Ernährung, Verdauung, Sinnesorgane
- Genetik
- Immunbiologie
- Neurobiologie
- Sexualkunde
- Grundlagen biologisches Lernens und Lehrens
- Grundlagen biologischen Reflektierens und Kommunizierens
- Gestaltung von Lernarrangements
- Strategien zum Umgang mit biologiespezifischen digitalen Werkzeugen im Biologieunterricht
- Umgang mit Heterogenität im Biologieunterricht

Folgende biologiedidaktische Themen aus der Lehr-Lernforschung sind in Inhalt der Veranstaltung:

- Umgang mit Schülervorstellungen im Unterricht
- Arbeiten mit Modellen im Biologieunterricht
- Besonderheiten des Classroom-Management im Biologieunterricht
- Binnendifferenzierung im Biologieunterricht
- Gestaltung eines inklusiven Biologieunterrichts
- Lernförderlicher Einsatz von Fachsprache
- Gesundheitserziehung am Beispiel Ernährung und Sexualkunde
- Gestaltung von gendersensiblen Sexualkundeunterricht
- Möglichkeiten des Fächerübergreifenden und -verbindenden Unterrichts

## bio327 - Pollination and Dispersal - Methods not just for Schools

<b>Module label</b>	Pollination and Dispersal - Methods not just for Schools	
<b>Modulkürzel</b>	bio327	
<b>Credit points</b>	9.0 KP	
<b>Workload</b>	270 h	
<b>Verwendbarkeit des Moduls</b>	<ul style="list-style-type: none"> <li>• Bachelor's Programme Biology (Bachelor) &gt; Akzentsetzungsmodule</li> <li>• Bachelor's Programme Mathematics (Bachelor) &gt; Nebenfachmodule</li> <li>• Dual-Subject Bachelor's Programme Biology (Bachelor) &gt; Akzentsetzungsmodule</li> <li>• Master of Education Programme (Gymnasium) Biology (Master of Education) &gt; Mastermodule</li> </ul>	
<b>Zuständige Personen</b>	<ul style="list-style-type: none"> <li>• Albach, Dirk Carl (module responsibility)</li> <li>• von Hagen, Klaus Bernhard (Module counselling)</li> <li>• Will, Maria (Module counselling)</li> <li>• Albach, Dirk Carl (Prüfungsberechtigt)</li> <li>• von Hagen, Klaus Bernhard (Prüfungsberechtigt)</li> <li>• Will, Maria (Prüfungsberechtigt)</li> </ul>	
<b>Prerequisites</b>	bio325 Pollination and dispersal concepts bio256 Flora/fauna	
<b>Skills to be acquired in this module</b>	<p>+ biological knowledge            + knowledge of biological working methods            + abstract, logical, analytical thinking            + deepened expertise in biological specialist field            + independent learning and (research-based) working            + data presentation and evidence-based discussion (written and spoken)            + teamwork            + (scientific) communication skills            + project and time management            + knowledge of safety and environmental issues</p> <p>Extended knowledge of biodiversity and evolution of plants focusing on reproduction, dispersal, germination and establishment of plants</p>	
<b>Module contents</b>	The module introduces methods to study pollination, fertilisation, dispersal and germination in regard of adaptation to environmental factors. Experiments applicable to school lessons will be presented and especially thoroughly discussed.	
<b>Literaturempfehlungen</b>	The course does not follow a special textbook. The following German literature is recommended to students interested in the course: Dieter Heß – Die Blüte, Eugen Ulmer Verlag as well as Leins & Erbar -Blüte und Frucht, Schweizerbart'sche Verlagsbuchhandlung.

## bio330 - Marine Ecology

<b>Module label</b>	Marine Ecology		
<b>Modulkürzel</b>	bio330		
<b>Credit points</b>	15.0 KP		
<b>Workload</b>	450 h		
<b>Verwendbarkeit des Moduls</b>	<ul style="list-style-type: none"> <li>• Bachelor's Programme Biology (Bachelor) &gt; Akzentsetzungsmodule</li> <li>• Dual-Subject Bachelor's Programme Biology (Bachelor) &gt; Akzentsetzungsmodule</li> <li>• Master of Education Programme (Gymnasium) Biology (Master of Education) &gt; Mastermodule</li> </ul>		
<b>Zuständige Personen</b>	<ul style="list-style-type: none"> <li>• Moorthi, Stefanie (Module counselling)</li> <li>• Hillebrand, Helmut (module responsibility)</li> <li>• Hillebrand, Helmut (Prüfungsberechtigt)</li> <li>• Moorthi, Stefanie (Prüfungsberechtigt)</li> </ul>		
<b>Prerequisites</b>	Abschluss der Basismodule		
<b>Skills to be acquired in this module</b>	<p>[nop] ++ biological knowledge ++ knowledge of biological working methods ++ biologically relevant knowledge in the natural sciences and mathematics + statistics &amp; scientific programming + interdisciplinary knowledge &amp; thinking ++ abstract, logical, analytical thinking ++ deepened expertise in biological specialist field ++ independent learning and (research-based) working ++ data presentation and evidence-based discussion (written and spoken) + teamwork ++ (scientific) communication skills + project and time management[/nop] Basic knowledge and practical experience in biological oceanography Apply theoretical concepts from different fields in marine ecology Analyse, present, and interpret results from the marine ecological literature and own investigations Acknowledge the importance of general ecological concepts for ecosystem management Gain experience in the application of field and lab methods in ecology</p>		
<b>Module contents</b>	<p>Lecture Biological Oceanography 2 SWS. Presence time 24 h, additional study time 66h, winter-term Abiotic environmental conditions in marine systems (light, temperature, chemical and physical proper-ties of the water, waves, tides, global distribution of water masses and currents. Pelagic communities, plankton (phyt-, zoo-, bacterio-, viroplankton), microbial loop, sedimentation, C- and N cycling, Nekton, Fisheries, El Nino, Benthic communities, estuaries. Exercise Concepts in marine ecology 6 SWS. Presence time 70 h, additional study time 200h, winter-term Practical and theoretical exercises on marine ecology, including field studies, experiments and working with case studies from the literature. The focus is on concepts here, pinpointing at general ecological frameworks. Lecture Marine Ecology 2 SWS. Presence time 24 h, additional study time 66h, winter-term Ecology of marine systems: estuaries, rocky and sediment coasts, pelagial, shelves, mangroves, seagrass meadows, coral reefs, deep sea, polar regions. The focus is on ecological specifics and interactions in the biotic communities of these systems. The second half of the lecture will focus on importance and consequences of overfishing, habitat destruction, pollution, climate change and bioinvasion on marine systems.</p>

## bio355 - Microscopical Anatomy

<b>Module label</b>	Microscopical Anatomy			
<b>Modulkürzel</b>	bio355			
<b>Credit points</b>	9.0 KP			
<b>Workload</b>	270 h			
<b>Verwendbarkeit des Moduls</b>	<ul style="list-style-type: none"> <li>• Bachelor's Programme Biology (Bachelor) &gt; Akzentsetzungsmodule</li> <li>• Bachelor's Programme Mathematics (Bachelor) &gt; Nebenfachmodule</li> <li>• Dual-Subject Bachelor's Programme Biology (Bachelor) &gt; Akzentsetzungsmodule</li> <li>• Master of Education Programme (Gymnasium) Biology (Master of Education) &gt; Mastermodule</li> </ul>			
<b>Zuständige Personen</b>	<ul style="list-style-type: none"> <li>• Ahlrichs, Wilko (module responsibility)</li> <li>• Kieneke, Alexander (Module counselling)</li> <li>• Hoppenrath, Mona (Module counselling)</li> <li>• Ahlrichs, Wilko (Prüfungsberechtigt)</li> <li>• Hoppenrath, Mona (Prüfungsberechtigt)</li> <li>• Kieneke, Alexander (Prüfungsberechtigt)</li> </ul>			
<b>Prerequisites</b>	Abschluss der Basismodule			
<b>Skills to be acquired in this module</b>	<p>           ++ biological knowledge            ++ knowledge of biological working methods            ++ biologically relevant knowledge in the natural sciences and mathematics            + interdisciplinary knowledge &amp; thinking            ++ abstract, logical, analytical thinking            ++ deepened expertise in biological specialist field            ++ independent learning and (research-based) working            ++ data presentation and evidence-based discussion (written and spoken)            + teamwork            ++ (scientific) communication skills            + project and time management            + knowledge of safety and environmental issues         </p> <p>           This course is designed for students to learn about the basic light and electron optical methods. Students will be able to work with preparative techniques for scanning electron microscopy, trans-mission electron microscopy, and light microscopy, and confocal scanning laser microscopy. Students completing this course will have learned basic principles for fixing and embedding biological materials for electron microscopy. Students will have learned how to operate a transmission electron microscope, a scanning electron microscope, several ultramicrotomes, a vacuum evaporator, a critical point dryer, and a sputter coater. Digital imaging techniques that will be learned will include print making, design and assembly of materials for publication, PowerPoint presentations, and poster design. Students will be introduced to the principles of light microscopy utilizing different optical systems and will have the opportunity to have hands-on experience with a Leica photomicroscope as well as the Leica SP5 confocal laser scanning.         </p>			
<b>Module contents</b>	<p>Microscopy of protists and micro metazoans. Students are required plan and carry out a research project that exposes them to some of the challenges and problems encountered by microscopical anatomy - and some of the techniques that are used to solve these problems. Students have to present a scientific poster, a short oral presentation and a scientific paper.</p>			
<b>Literatureempfehlungen</b>	Will be announced in the course.

## bio360 - Marine Biodiversity

<b>Module label</b>	Marine Biodiversity
<b>Modulkürzel</b>	bio360
<b>Credit points</b>	15.0 KP
<b>Workload</b>	450 h
<b>Verwendbarkeit des Moduls</b>	<ul style="list-style-type: none"><li>• Bachelor's Programme Biology (Bachelor) &gt; Akzentsetzungsmodule</li><li>• Dual-Subject Bachelor's Programme Biology (Bachelor) &gt; Akzentsetzungsmodule</li><li>• Master of Education Programme (Gymnasium) Biology (Master of Education) &gt; Mastermodule</li></ul>
<b>Zuständige Personen</b>	<ul style="list-style-type: none"><li>• Martinez Arbizu, Pedro Miguel (module responsibility)</li><li>• Hoppenrath, Mona (Module counselling)</li><li>• Martinez Arbizu, Pedro Miguel (Prüfungsberechtigt)</li><li>• Hoppenrath, Mona (Prüfungsberechtigt)</li><li>• Wehrmann, Achim (Prüfungsberechtigt)</li></ul>
<b>Prerequisites</b>	Abschluss der Basismodule
<b>Skills to be acquired in this module</b>	<p>++ biological knowledge ++ knowledge of biological working methods + interdisciplinary knowledge &amp; thinking + abstract, logical, analytical thinking ++ deepened expertise in biological specialist field ++ independent learning and (research-based) working ++ data presentation and evidence-based discussion (written and spoken) + teamwork + (scientific) communication skills + project and time management</p> <p>By active participation the students acquire the following knowledge/abilities/qualification:</p> <ul style="list-style-type: none"><li>* Preparation and organization of sampling</li><li>* Keeping organisms – field study</li><li>* Marine deposits, development of marine sediments and their effects on the fauna</li><li>* Methods of meiofauna and macrofauna sampling, also plankton sampling</li><li>* Methods of quantitative community analysis</li><li>* Diversity comparison of various sites applying statistical methods</li><li>* Multivariate statistics for correlation of biocenoses and environmental variables</li><li>* Biocenoses of marine habitats</li><li>* Biology, morphology, systematics, behaviour and ecology of selected taxa in marine water systems</li><li>* Formulation and definition of scientific questions and selection of methods</li><li>* Habitat and biocenoses, interstitial, littoral (lotic, lenitic), diversity</li><li>* Planning behavioural experiments</li><li>* Presentation and discussion of scientific results</li><li>* Independent scientific work in groups and presentation of results</li></ul>
<b>Module contents</b>	<p>The module gives an introduction to marine biodiversity research demonstrated by various animal groups from the Wadden Sea and the North Sea including independent sampling on the coast and on the islands. The students will collect the organisms in the field or on board using sampling equipment. In the laboratory course, the biology and morphology as well as the ecology and behaviour of certain species are investigated and documented. The morphology of marine sediments and their development are further aspects of this module.</p>

## bio375 - Flora - Advanced Concepts

<b>Module label</b>	Flora - Advanced Concepts			
<b>Modulkürzel</b>	bio375			
<b>Credit points</b>	6.0 KP			
<b>Workload</b>	180 h			
<b>Verwendbarkeit des Moduls</b>	<ul style="list-style-type: none"> <li>• Bachelor's Programme Biology (Bachelor) &gt; Akzentsetzungsmodule</li> <li>• Bachelor's Programme Mathematics (Bachelor) &gt; Nebenfachmodule</li> <li>• Dual-Subject Bachelor's Programme Biology (Bachelor) &gt; Akzentsetzungsmodule</li> <li>• Master of Education Programme (Gymnasium) Biology (Master of Education) &gt; Mastermodule</li> </ul>			
<b>Zuständige Personen</b>	<ul style="list-style-type: none"> <li>• Albach, Dirk Carl (module responsibility)</li> <li>• von Hagen, Klaus Bernhard (Module counselling)</li> <li>• Will, Maria (Module counselling)</li> <li>• Albach, Dirk Carl (Prüfungsberechtigt)</li> <li>• von Hagen, Klaus Bernhard (Prüfungsberechtigt)</li> <li>• Will, Maria (Prüfungsberechtigt)</li> </ul>			
<b>Prerequisites</b>	bio256 Flora and Fauna			
<b>Skills to be acquired in this module</b>	<p>+ biological knowledge            + knowledge of biological working methods            + deepened expertise in biological specialist field            + independent learning and (research-based) working            + data presentation and evidence-based discussion (written and spoken)            + (scientific) communication skills            + knowledge of safety and environmental issues</p> <p>The module is intended to give students in-depth knowledge on plant determination and the diversity of plants. Students shall increase their knowledge on species and learn and improve their abilities in plant determination and plant conservation. Subjects and methods relevant for nature conservation are emphasized. Along with these, students shall improve their systemic thinking with relation to nature in northwestern Germany and its flora. Students learn about plants and how to group them according to their phylogeny and evolutionary adaptations, so they can pass this knowledge on to others. Competence in assessment is conveyed in the areas of diversity and nature conservation to sensitize students for a respectful treatment of nature and passing on this ability to others. Finally, we will discuss sustainable use of plants and habitats and their restoration.</p>			
<b>Module contents</b>	<p>The module comprises a lecture in the Botanical Garden, where plants will be observed and investigated. This includes algae, bryophytes, ferns, gymnosperms and various families of angiosperms. The seminar is intended to let students study in-depth additional plant families with their typical characters.</p>

<b>Prerequisites</b>	Abschluss der Basismodule		
<b>Skills to be acquired in this module</b>	++ deepened biological expertise ++ deepened knowledge of biological working methods + scientific/mathematical basic knowledge relevant for biology + critical and analytical thinking ++ data presentation and discussion in German (written and spoken) + teamwork		
<b>Module contents</b>	The lecture covers the molecular and cellular basis of neurobiology, the electrical properties of nerve cells, the organization and development of the nervous system and the function of the motor system. In the seminar, topics related to the lectures of the week are covered in more depth. In the exercises, the theoretical knowledge from the lectures will be tested in small experiments.

## bio440 - Microfauna, Mircoflora & Protista of limnic and marine habitats

<b>Module label</b>	Microfauna, Mircoflora & Protista of limnic and marine habitats
<b>Modulkürzel</b>	bio440
<b>Credit points</b>	6.0 KP
<b>Workload</b>	180 h
<b>Verwendbarkeit des Moduls</b>	<ul style="list-style-type: none"><li>• Bachelor's Programme Biology (Bachelor) &gt; Akzentsetzungsmodule</li><li>• Dual-Subject Bachelor's Programme Biology (Bachelor) &gt; Akzentsetzungsmodule</li><li>• Master of Education Programme (Gymnasium) Biology (Master of Education) &gt; Mastermodule</li></ul>
<b>Zuständige Personen</b>	<ul style="list-style-type: none"><li>• Ahlrichs, Wilko (module responsibility)</li><li>• Kieneke, Alexander (Module counselling)</li><li>• Hoppenrath, Mona (Module counselling)</li><li>• Ahlrichs, Wilko (Prüfungsberechtigt)</li><li>• Kieneke, Alexander (Prüfungsberechtigt)</li><li>• Hoppenrath, Mona (Prüfungsberechtigt)</li></ul>
<b>Prerequisites</b>	Abschluss der Basismodule
<b>Skills to be acquired in this module</b>	<p>++ biological knowledge ++ knowledge of biological working methods ++ biologically relevant knowledge in the natural sciences and mathematics + statistics &amp; scientific programming ++ interdisciplinary knowledge &amp; thinking + abstract, logical, analytical thinking ++ deepened expertise in biological specialist field ++ independent learning and (research-based) working ++ data presentation and evidence-based discussion (written and spoken) + teamwork ++ (scientific) communication skills + project and time management</p> <p>The objectives of the module are the teaching and learning of methods in the field of taxonomy, systematics, morphology, ecology, and evolution. Competencies for finding, identifying, preparing, micro-copying, illustrating, describing, and publishing species are taught. It learns how a scientific collection is created and managed. Another goal is the teaching of basics of molecular systematics and barcoding.</p> <p>The focus is on taxa of the microfauna and protists of limnic and marine habitats.</p> <p>The goal is the knowledge of biotic and abiotic properties of aquatic habitats, their formation and biodiversity. The students should learn to hypothesize structural adaptations of organisms to aquatic habitats.</p>
<b>Module contents</b>	<p>We study microfauna and protists of limnic and marine habitats. Microfauna refers to microscopic animals. They live together with protists in aquatic habitats in high diversity.</p> <p>Animals of the microfauna and protists usually belong to groups that developed early in evolution. The study of communities of these groups gives a unique insight into the evolution of animals and protists.</p> <p>The microfauna and the protists are little studied compared to other groups of animals and offer great potential. But they must be examined under the optical microscope. This requires special techniques and knowledge. Fortunately, through digital techniques, the investigation and publications have been greatly simplified.</p> <p>We will make excursions to ponds, lakes, rivers, bogs, sea beaches, etc. It teaches where, when, and how to find species of microfauna and protists. The collected organisms are determined, prepared, microscopied, photographed, drawn, and digitally illustrated.</p> <p>Art descriptions are produced. Attention is paid to the correct application of nomenclature rules. We show how a scientific collection is built and managed. For this purpose, basic knowledge in SQL database technology is taught. Dichotomous, synoptic, and digital identification keys are presented and developed.</p> <p>In addition to the classical morphological methods, it will be shown how species for molecular barcoding and phylogenetic analyses are investigated. The students will create art portraits. The results are communicated in the form of posters, short lectures, and scientific publications.</p>
<b>Literatureempfehlungen</b>	Will be announced in the course.

## bio450 - Posters, Pictures, Presentations and Papers

<b>Module label</b>	Posters, Pictures, Presentations and Papers	
<b>Modulkürzel</b>	bio450	
<b>Credit points</b>	9.0 KP	
<b>Workload</b>	270 h	
<b>Verwendbarkeit des Moduls</b>	<ul style="list-style-type: none"> <li>• Bachelor's Programme Biology (Bachelor) &gt; Akzentsetzungsmodule</li> <li>• Dual-Subject Bachelor's Programme Biology (Bachelor) &gt; Akzentsetzungsmodule</li> <li>• Master of Education Programme (Gymnasium) Biology (Master of Education) &gt; Mastermodule</li> </ul>	
<b>Zuständige Personen</b>	<ul style="list-style-type: none"> <li>• Bininda-Emonds, Olaf (module responsibility)</li> <li>• Ahlrichs, Wilko (Module counselling)</li> <li>• Bininda-Emonds, Olaf (Prüfungsberechtigt)</li> <li>• Ahlrichs, Wilko (Prüfungsberechtigt)</li> </ul>	
<b>Prerequisites</b>	Abschluss der Basismodule	
<b>Skills to be acquired in this module</b>	<p>+ interdisciplinary knowledge &amp; thinking            + abstract, logical, analytical thinking            + deepened expertise in biological specialist field            ++ independent learning and (research-based) working            ++ data presentation and evidence-based discussion (written and spoken)            ++ (scientific) communication skills            + project and time management</p> <p>Practical experience with four forms of scientific presentation: papers, presentations, scientific drawings, and posters. The students will learn / gain:            1) the logical and structural form of a scientific paper (or protocol or thesis) so as to communicate their results more effectively; 2) the distillation of the key information out of a project and its focused presentation in a lecture or poster; 3) experience with constructive criticism in a group setting as well as the critical assessment of scientific studies; 4) experience with scientific English; and 5) the art of scientific drawing, including the making of high-quality photo montages for papers or posters through microphotography and digital editing.</p>	
<b>Module contents</b>	<p>Theoretical part: General tips regarding the logical and structural form of a scientific paper, presentation, or posters, including how to avoid making the most common mis-takes.</p> <p>Practical part: Critical analysis of selected papers from the (evolutionary biological) literature. Writing of a scientific paper using pre-given results. Construction and presentation of a lecture and poster in front of the group based on a recent paper from the literature. Through the feedback obtained in this process, improvements will be made in both cases. Microscopic photography of selected zoological specimens that will then be transferred to / drawn on transparent paper before being rescanned for digital editing. High-quality photo montages of both the photos themselves and the drawings derived from them will be obtained through diverse software (e.g., Adobe Illustrator or InDesign).</p>	
<b>Literatureempfehlungen</b>	None. The relevant scientific literature will be distributed during the course.

## bio490 - Experimental Methods in Biology

<b>Module label</b>	Experimental Methods in Biology	
<b>Modulkürzel</b>	bio490	
<b>Credit points</b>	3.0 KP	
<b>Workload</b>	90 h	
<b>Verwendbarkeit des Moduls</b>	<ul style="list-style-type: none"> <li>• Master of Education Programme (Gymnasium) Biology (Master of Education) &gt; Mastermodule</li> </ul>	
<b>Zuständige Personen</b>	<ul style="list-style-type: none"> <li>• Nolte, Arne (module responsibility)</li> <li>• Nolte, Arne (Prüfungsberechtigt)</li> </ul>	
<b>Further responsible persons</b>	all lecturers in biology	
<b>Prerequisites</b>		
<b>Skills to be acquired in this module</b>	Students become acquainted with important methods in diverse areas of biology (e.g. biochemistry, plant physiology, animal physiology, genetics, population biology, functional ecology). Practical and theoretical skills will enrich the methodology portfolio of the teachers-to-be. At least some of the methods will be directly applicable in real-life teaching situations.	
<b>Module contents</b>	E. Methods (2 SWS)

## bio410 - Basic Concepts in Neurobiology II

<b>Module label</b>	Basic Concepts in Neurobiology II		
<b>Modulkürzel</b>	bio410		
<b>Credit points</b>	15.0 KP		
<b>Workload</b>	450 h		
<b>Verwendbarkeit des Moduls</b>	<ul style="list-style-type: none"> <li>• Master of Education Programme (Gymnasium) Biology (Master of Education) &gt; Mastermodule</li> </ul>		
<b>Zuständige Personen</b>	<ul style="list-style-type: none"> <li>• Klump, Georg Martin (Prüfungsberechtigt)</li> <li>• Langemann, Ulrike (Module counselling)</li> <li>• Thiel, Christiane Margarete (Module counselling)</li> <li>• Köppl, Christine (Module counselling)</li> </ul>		
<b>Prerequisites</b>			
<b>Skills to be acquired in this module</b>	<p>++ biological knowledge            ++ knowledge of biological working methods            + abstract, logical, analytical thinking            + deepened expertise in biological specialist field            + data presentation and evidence-based discussion (written and spoken)</p> <p>Basic knowledge and relations of sensory science, cognition, and motor functions are imparted. Transfer achievement: Presentation of personal experimental results.</p>		
<b>Module contents</b>	<p>The lecture covers the anatomy and function of simple sensory and motory systems as well as higher cognitive functions. Selected subjects are treated in more detail in the seminar. In the subsequent block practical course, this theoretical knowledge is verified under real-world conditions by simple experiments related to the subjects dealt with in the lecture including data analysis and presentation of results.</p>

## bio417 - Introduction to Systems Neurobiology - Theory and Practice

<b>Module label</b>	Introduction to Systems Neurobiology - Theory and Practice			
<b>Modulkürzel</b>	bio417			
<b>Credit points</b>	12.0 KP			
<b>Workload</b>	360 h			
<b>Verwendbarkeit des Moduls</b>	<ul style="list-style-type: none"> <li>• Bachelor's Programme Biology (Bachelor) &gt; Akzentsetzungsmodule</li> <li>• Dual-Subject Bachelor's Programme Biology (Bachelor) &gt; Akzentsetzungsmodule</li> <li>• Master of Education Programme (Gymnasium) Biology (Master of Education) &gt; Mastermodule</li> </ul>			
<b>Zuständige Personen</b>	<ul style="list-style-type: none"> <li>• Greschner, Martin (module responsibility)</li> <li>• Beutelmann, Rainer (Module counselling)</li> <li>• Thiel, Christiane Margarete (Module counselling)</li> <li>• Köppl, Christine (Module counselling)</li> <li>• Langemann, Ulrike (Module counselling)</li> <li>• Rosemann, Stephanie (Module counselling)</li> <li>• Greschner, Martin (Prüfungsberechtigt)</li> <li>• Rosemann, Stephanie (Prüfungsberechtigt)</li> <li>• Beutelmann, Rainer (Prüfungsberechtigt)</li> <li>• Thiel, Christiane Margarete (Prüfungsberechtigt)</li> <li>• Köppl, Christine (Prüfungsberechtigt)</li> <li>• Langemann, Ulrike (Prüfungsberechtigt)</li> </ul>			
<b>Prerequisites</b>	Abschluss der Basismodule			
<b>Skills to be acquired in this module</b>	++ deepened biological expertise ++ deepened knowledge of biological working methods ++ data analysis skills ++ data presentation and discussion in German and English (written and spoken) + teamwork + scientific/mathematical basic knowledge relevant for biology + critical and analytical thinking			
<b>Module contents</b>	<p>The lecture covers the basics of systemic neuroscience with a focus on processing in sensory systems, the plasticity of the nervous system and the mechanisms underlying cognitive processing. In the seminar, topics related to the lectures of the week are covered in more depth.</p> <p>The exercise immediately follows the lecture and the seminar. By experimenting with each other, the students deepen their knowledge in the fields of cognitive neuroscience and hearing science. The students analyze their own data (incl. statistics) and present these in a written report.</p>

## bio376 - Flora - Advanced Methods

<b>Module label</b>	Flora - Advanced Methods	
<b>Modulkürzel</b>	bio376	
<b>Credit points</b>	6.0 KP	
<b>Workload</b>	180 h	
<b>Verwendbarkeit des Moduls</b>	<ul style="list-style-type: none"> <li>• Bachelor's Programme Biology (Bachelor) &gt; Akzentsetzungsmodule</li> <li>• Bachelor's Programme Mathematics (Bachelor) &gt; Nebenfachmodule</li> <li>• Dual-Subject Bachelor's Programme Biology (Bachelor) &gt; Akzentsetzungsmodule</li> <li>• Master of Education Programme (Gymnasium) Biology (Master of Education) &gt; Mastermodule</li> </ul>	
<b>Zuständige Personen</b>	<ul style="list-style-type: none"> <li>• Albach, Dirk Carl (module responsibility)</li> <li>• von Hagen, Klaus Bernhard (Module counselling)</li> <li>• Will, Maria (Module counselling)</li> <li>• Albach, Dirk Carl (Prüfungsberechtigt)</li> <li>• von Hagen, Klaus Bernhard (Prüfungsberechtigt)</li> <li>• Will, Maria (Prüfungsberechtigt)</li> </ul>	
<b>Prerequisites</b>	bio256 Flora and Fauna bio375 Flora - Advanced concepts	
<b>Skills to be acquired in this module</b>	<p>+ biological knowledge            + knowledge of biological working methods            + deepened expertise in biological specialist field            + independent learning and (research-based) working            + data presentation and evidence-based discussion (written and spoken)            + (scientific) communication skills            + knowledge of safety and environmental issues</p> <p>The module is intended to give students in-depth knowledge on plant determination and the diversity of plants. Students shall increase their knowledge on species and learn and improve their abilities in plant determination and plant conservation. Subjects and methods relevant for nature conservation are emphasized. Along with these, students shall improve their systemic thinking with relation to nature in northwestern Germany and its flora. Students learn about plants and how to group them according to their phylogeny and evolutionary adaptations, so they can pass this knowledge on to others. Competence in assessment is conveyed in the areas of diversity and nature conservation to sensitize students for a respectful treatment of nature and passing on this ability to others. Finally, we will discuss sustainable use of plants and habitats and their restoration.</p>	
<b>Module contents</b>	The exercises will be used to apply the abilities to plant species in the vicinity of Oldenburg and to practice methods in mapping and surveying plant species.
