wir011 - Introduction to Business Administration

Module label	Introduction to Business Administration	
Modulkürzel	wir011	
Credit points	6.0 KP	
Workload	180 h	
Verwendbarkeit des Moduls	• Bachelor's Programme Business Administration and Law (Bachelor) > Basiscurriculum Wirtschaftswissenschaften • Bachelor's Programme Business Informatics (Bachelor) > Basiscurriculum • Bachelor's Programme Comparative and European Law (Bachelor) > Module • Bachelor's Programme Economics and Business Administration (Bachelor) > Basismodule • Bachelor's Programme Mathematics (Bachelor) > Nebenfachmodule • Bachelor's Programme Sustainability Economics (Bachelor) > Grundlagen-/Basiscurriculum • Dual-Subject Bachelor's Programme Economics and Business Administration (Bachelor) > Basismodule	
Zuständige Personen	• Hoppmann, Jörn (module responsibility) • Lehrenden, Die im Modul (Prüfungsberechtigt)	
Prerequisites		
Skills to be acquired in this module	The goal of the course is that students are able to... - know and understand basic concepts and processes in the context of business administration - name important research streams and theoretical frameworks in the field - apply models and instruments of business administration to develop solutions for practical challenges in companies - critically question the application of common instruments and models and evaluate their advantages and disadvantages in specific decision making situation - put the newly acquired knowledge into a broader context, so it can be deepened in the further course of study and when working in a company	
Module contents	The course offers an introduction to the most important concepts, instruments, and frameworks of business administration. Toward this end, the course first introduces the core concepts and provides an overview of the history, goals, structure, and research traditions of business administration. Subsequently, students will gain insights into 11 important areas of business administration: (1) Entrepreneurship, (2) Strategic Management, (3) Logistics and Supply Chain Management, (4) Production Management, (5) Marketing and Sales, (6) Accounting and Controlling, (7) Finance and Investment, (8) Technology and Innovation Management, (9) Human Resource Management, (10) Information Management, and (10) Sustainability Management. Students deepen and apply the knowledge acquired in the lecture in tutorials. In addition, the course includes guest lectures by practitioners to clarify the practical relevance of the content.

Skills to be acquired in this module	Participants... 1. understand financial accounting as the basis of corporate data and bookkeeping 2. gain comprehensive knowledge of main accounting areas such as procurement, sales, HR, inventory, tax, provisions etc. 3. obtain basic knowledge about annual report process of single entities.			
Module contents	The main objective of this module is to give the students an overview of the double entry bookkeeping as well as the link between financial accounting, balance sheet and income statement. The acquisition of basis knowledge of the corporate accountancy stands in the foreground, for example, how organizations manage the bookkeeping, legal basis of the annual accounts, creating an inventory, content of accounting and income statement.

Prerequisites	
Skills to be acquired in this module	Students internalize basic mathematical concepts and methods from analysis and matrix calculation and their applications in economics. Professional competence The students: • are proficient in the mathematical fundamentals relevant to economics • master methods for solving equations and inequalities • master differential calculus for one and two variables and can integrate • are able to reliably determine local and global extreme points for functions of one and two variables. Methodological competence The students: • analyse formal contexts • understand the formal mathematical language • structure problems from the economic sciences and justify their solutions. Social competence The students: • construct solutions to given problems in groups • accept criticism and see it as an aid. Self-competence The students: • reflect their actions in establishing solutions • deepen the presented mathematical concepts in exercises and add them to their actions.
Module contents	Basics in real Arithmetic, Rules for Matrix Arithmetic Linear equations, linear inequalities and systems of those, quadratic equations, financial mathematics (interest rates and present values, pension calculation) Calculus for functions of one variable: derivation rules for power functions, exp and ln, indefinite integral, applications of integral calculus (density function, ordinary differential equations), single-variable optimization (stationary points, extreme-value theorem, local and global extreme points), Approximation methods (linear approximation, Taylor series with Lagrange remainder) Functions of two variables (partial derivatives, total differential), Tools for comparative statics : (elasticity of substitution, homogeneous and homothetic functions), multivariable optimization tasks (local and global extremes,

extremes under constraints)

Prerequisites	none
Skills to be acquired in this module	Students: acquire a basic understanding of economics - know elementary economic terms and theories - learn to analyze economic problems graphically and/or mathematically - are able to grasp both micro- and macroeconomic relationships based on theory - understand basic economic models and are able to apply them to current economic problems - place current economic and political events and debates in economic contexts - understand under which conditions market interventions by policy makers are justified from an economic perspective - are able to assess possible effects of economic policy instruments (for example: taxes, subsidies, minimum and maximum prices, etc.).
Module contents	The course introduces students to economic thinking and gives an elementary overview of the fundamental themes in economics. Key causal relationships will be verbally, analytically and graphically elucidated and underpinned with real-world examples. Main contents: - Introduction to economic thinking; - Explanation of basic concepts of economic theory; - Economic cycle and national product; - Interdependence and trade; - Functioning and efficiency of markets; - Market failures and government activity; - Firms behavior in markets with diverse structures; - Foundations of game theory.

Prerequisites	
Skills to be acquired in this module	The students internalize advanced mathematical methods, know applications in economics and can provide solutions. Professional competence The students: • are proficient in the quantitative methods relevant to economics • know vector spaces and the rings • master the differential calculus for n variables • can determine extreme points with general constraints • can solve special homogeneous and inhomogeneous differential equations. Methodological competence The students: • analyse complex interrelationships • understand the formal mathematical language • structure problems from the economic sciences and find independent solutions. Social competence The students: • construct solutions to given problems in groups • accept criticism and see it as an aid. Self-competence The students: • reflect their actions in establishing solutions • deepen the presented mathematical concepts in exercises and add them to their actions.
Module contents	n-dimensional vector spaces, linear maps, matrix and vector algebra (determinant, inverse matrix, eigenvalues and eigenvectors), linear systems of equations and their economic application. Functions of n variables), tools for comparative static (chain rules, implicit differentiation along a level curve, elasticity of substitution), multivariate optimization with and without constraints (necessary and sufficient conditions), general constraints, Kuhn-Tucker conditions. Integration, Differential and ordinary differential equations with solution methods for special types.

Prerequisites	
Skills to be acquired in this module	Students • understand the role corporate finance plays in today's business environment, • are able to make consistent investment decisions based on established financial models both under certainty and under uncertainty, • are able to place these models in within the broader context of economic theory, including both neoclassical theory and principal-agent theory, • are able to assess the limitations of these models, • analyze firm's main sources of (long-term) financing.
Module contents	Course outline: 1. Introduction 2. Valuation and Capital Budgeting 3. Risk and Return 4. Long-Term Financing This course is an introduction to corporate finance. It covers typical tools and techniques used in making investment and financing decisions, and it provides insights into their theoretical foundations. The concept of time value of money and net present value is discussed in detail, first under certainty, and then in the presence of uncertainty. We will examine the relationship between an investment's risk and its return, and discuss ways to derive risk-adjusted cost of equity capital. In addition, the course provides insights into firms' main sources of (long-term) financing. The topics covered in this course are relevant for financial decision-making in various areas of business management, including operations management, marketing, and in particular corporate strategy.

Prerequisites				
Skills to be acquired in this module	Students obtain an overview of the most important operational functions of an industrial or service company. These are procurement, production and logistics. Students will get to know typical operational challenges and familiarize themselves with established approaches and methods for analyzing and improving procurement, production and logistics operations.			
Module contents	The module comprises a lecture (course number 2.02.231) and an accompanying tutorial (course numbers 2.02.231a to 2.02.231j). The lecture is based on the text book "Grundzüge der Beschaffung, Produktion und Logistik" by Kummer, Grün und Jammerneegg in the third edition of 2013 and the associated workbook, as well as partly on the text book "Operations Management: Konzepte, Methoden und Anwendungen" by Thonemann in the third edition of 2015. The purpose of the lecture is to explain the fundamental problems and their solutions theoretically. The tutorials focus on application and practice and offer time for questions. There are no formal or content-related participation or entrance requirements.

Skills to be acquired in this module	Upon completion of the module (two complementary lectures), students will be able to: • understand the complex issues, challenges and fields of action in organisational Human Resource (HR) Management; • analyse, interpret and manage HR issues within heterogeneous fields of stakeholders and environments; • effectively analyse and apply HR instruments according to the specific practical context; • develop skills to self-reflection by dealing with theoretical as well as practical issues in HR Management and are able to press their point within the scientific discussion; • are able to locate a specific research question within the scientific discussion in the field of Human Resource Management and to interlink, reflect and evaluate it accordingly. By attending the non-compulsory tutorials and participating in lecture discussions, students can develop their own position on the inter-linkages between theoretical approaches and practical courses of action. Students will thus be able to identify problems, analyse them critically, and develop solutions. As they have the opportunity to work in small groups within the tutorials and to participate during lecture discussions, students may also learn to handle different points of view and discuss constructively. Overall they will be prepared for the specific requirements faced in the field of HR Management.
Module contents	Students develop theoretical as well as practical insights into the backgrounds and specific characteristics of "Human Resource" Management, in particular the following: - origins and theoretical basis - development and framework requirements - workforce planning - recruitment and selection - work organisation - working time organisation - leadership - performance reviews

		- training and development - compensation - staff reduction

Prerequisites				
Skills to be acquired in this module	Die Studierenden erwerben vertiefte Kenntnisse in einem ausgewählten Bereich der Rechtswissenschaften. Sie gewinnen fundierte Einblicke in den Stand der aktuellen Forschung und der Rechtsentwicklungen vornehmlich in den Rechtsgebieten Zivil- und Wirtschaftsrecht, Arbeitsrecht und öffentlichem Wirtschaftsrecht soweit sie für die betriebliche Praxis von Bedeutung sind. Die Studierenden sollen in die Lage versetzt werden, die Rechtsentwicklungen zu bewerten, ihre Folgen für Unternehmen einzuordnen und ggf. die erforderlichen Maßnahmen zu entwerfen.			
Module contents	Das Modul behandelt vertieft ausgewählte rechtswissenschaftliche Fragestellungen, die sich aus europäischen und nationalen Rechtsentwicklungen und aktueller Rechtsprechung ergeben. Die Themen liegen je nach Schwerpunktsetzung der verantwortlich Lehrenden beispielsweise in den Bereichen Bürgerliches Recht, (europäisches) Wirtschaftsrecht, Verbraucherschutzrecht, Arbeitsrecht, Informationstechnologierecht, Staats- und Verfassungsrecht oder Wirtschaftsverwaltungsrecht. Der Schwerpunkt, die Unterrichtssprache (Deutsch oder Englisch) und die Prüfungsform werden jeweils spätestens in der ersten Veranstaltung von den Lehrenden festgelegt.			
Literaturempfehlungen	Literaturempfehlungen sind abhängig von der jeweiligen Schwerpunktsetzung und werden zu Beginn des Moduls von den Lehrenden gegeben.

wir340 - Corporate Law

Credit points	6.0 KP				
Workload	180 h				
Verwendbarkeit des Moduls	• Bachelor's Programme Business Administration and Law (Bachelor) > Aufbaubereich Recht • Bachelor's Programme Economics and Business Administration (Bachelor) > Studienrichtung Recht

Prerequisites					
Skills to be acquired in this module	The students: • understand questions concerning corporate law and contexts • distinguish practice-oriented differences between the individual legal forms of a company. • distinguish interrelations with other fields of law				
Module contents	The key criterion for the choice of the optimal legal entity for a company is usually the "isolation" of the private assets of the shareholder, i.e. the limitation of liability to the business assets. Unlimited personal liability can be achieved not only by means of the legal form of a corporation (AG, GmbH), but also by means of the legal form of a partnership. At the beginning of the lecture those legal forms are dealt with, with which all partners personally and unrestrictedly are liable; thus, the limitation of the liability to the business assets does not take place. Here the partnership under the civil code (GbR) is to be mentioned, namely in its form as a (non-legally capable) internal GbR and as a (legally capable) external company (external GbR), and the general partnership (OHG). Subsequently, the lecture deals with the legal position of the (unlimitedly liable) general partner and the legal position of the limited partner of the limited partnership (KG). Then the mixed type of the GmbH & Co. KG, i.e. a limited partnership with a limited company (GmbH) as general partner, is presented. The lecture also gives an overview of the other partnerships, such as the silent partnership as a so-called "internal company" and the partnership company. Afterwards the association right is treated as transition to the right of the corporations. Finally, the module deals with the law of the GmbH, law of corporations and law of cooperatives. Structures and characteristics of these legal forms are discussed under consideration of current jurisdiction and legislation. Not only will the instruments of company law be presented in isolation, but - for a better understanding - particular emphasis will be placed on interrelations with other fields of law. The aim of the lecture is not so much to impart comprehensive knowledge, but to provide training in the legal "feeling", i.e. the feeling for interdependent, practical and current problems arising from a certain situation.

Prerequisites	Keine	
Skills to be acquired in this module	Die Studierenden: - erarbeiten fachwissenschaftliche Fragestellungen selbstständig und unter Verwendung wissenschaftlicher Methoden. - recherchieren selbstständig wissenschaftliche Literatur. - betten ihre Problemstellung in die wissenschaftliche Diskussion ein. - erstellen eine Gliederung ihrer Bachelorarbeit. - fertigen Bachelorarbeit an. - präsentieren und reflektieren den Fortgang und die Ergebnisse ihrer Bachelorarbeit.	
Module contents	Das Bachelorarbeitsmodul setzt sich zusammen aus einer fachwissenschaftlichen Bachelorarbeit (12 KP) und einer begleitenden Lehrveranstaltung (3 KP). Die Bachelorarbeit soll zeigen, dass die Studierenden in der Lage sind, innerhalb der vorgegebenen Frist von zehn Wochen ein fachwissenschaftliches Problem selbstständig mit Hilfe von wissenschaftlichen Methoden zu bearbeiten. Die begleitende Lehrveranstaltung kann als Seminar, als Kolloquium oder als Projekt durchgeführt werden. Im Seminar erfolgt im Plenum eine Diskussion und Rückmeldung u.a. zu Gliederung, Problemstellung und Zitierweise. Im Kolloquium stellen die Studierenden ihre Zwischenergebnisse zur Diskussion und erhalten ebenfalls Rückmeldungen z.B. bezogen auf Gliederung, Problemstellung und Literaturverzeichnis. Im Projekt erhält der einzelne Student entweder allein oder in einer Kleingruppe die Möglichkeit, seine Bachelorarbeit in den Prozessphasen Initiierung, Planung und Ausführung durch einen fach-wissenschaftlichen Austausch überwachen zu lassen. Der Projektcharakter betont Zeitmanagement und Fortschritte innerhalb der 10-wöchigen Bearbeitungszeit.	
Literaturempfehlungen	Im Zentrum stehen die für die jeweilige Bachelorarbeit relevante Fachliteratur und Quellen. Die Literatur zur Bearbeitung der spezifischen Fragestellung soll von den Studierenden selbst recherchiert werden.
