Skills to be acquired in this module
Upon completion of the module, students will be able to:

- recognize and provide solutions to challenges in market-oriented business management
- reflect on market-oriented business management with regard to practise, as well as related societal and ethical implications
- actively participate in scholarly marketing discourse
- build their own capacities to acquire knowledge and skills within the discipline

Module contents
The module focuses on the fundamentals of marketing in the sense of market-orientated management by linking philosophy and theoretical connections, as well as the necessary analytical and methodical knowledge with concrete case studies.

**Ansprechpartner/-in**
- Module responsibility: Jörg Prokop

**Entry requirements**
- Students
  - understand the role corporate finance plays in today’s business environment,
  - are able to make consistent investment decisions based on established financial models both under certainty and under uncertainty,
  - are able to place these models in within the broader context of economic theory, including both neoclassical theory and principal-agent theory,
  - are able to assess the limitations of these models,
  - analyze firm’s main sources of (long-term) financing.

**Skills to be acquired in this module**

**Module contents**
- **Course outline:**
  1. Introduction  
  2. Valuation and Capital Budgeting  
  3. Risk and Return  
  4. Long-Term Financing

  This course is an introduction to corporate finance. It covers typical tools and techniques used in making investment and financing decisions, and it provides insights into their theoretical foundations. The concept of time value of money and net present value is discussed in detail, first under certainty, and then in the presence of uncertainty. We will examine the relationship between an investment’s risk and its return, and discuss ways to derive risk-adjusted cost of equity capital. In addition, the course provides insights into firms’ main sources of (long-term) financing.

  The topics covered in this course are relevant for financial decision-making in various areas of business management, including operations management, marketing, and in particular corporate strategy.

Skills to be acquired in this module
Upon completion of the module (two complementary lectures), students will be able to:

- understand the complex issues, challenges and fields of action in organisational Human Resource (HR) Management;
- analyse, interpret and manage HR issues within heterogeneous fields of stakeholders and environments;
- effectively analyse and apply HR instruments according to the specific practical context;
- develop skills to self-reflection by dealing with theoretical as well as practical issues in HR Management and are able to press their point within the scientific discussion;
- are able to locate a specific research question within the scientific discussion in the field of Human Resource Management and to interlink, reflect and evaluate it accordingly.

By attending the non-compulsory tutorials and participating in lecture discussions, students can develop their own position on the inter-linkages between theoretical approaches and practical courses of action. Students will thus be able to identify problems, analyse them critically, and develop solutions. As they have the opportunity to work in small groups within the tutorials and to participate during lecture discussions, students may also learn to handle different points of view and discuss constructively. Overall they will be prepared for the specific requirements faced in the field of HR Management.

Module contents
Students develop theoretical as well as practical insights into the backgrounds and specific characteristics of “Human Resource” Management, in particular the following:
- origins and theoretical basis
- development and framework requirements
- workforce planning
- recruitment and selection
- work organisation
- working time organisation
- leadership
- performance reviews
- training and development
- compensation
- staff reduction

Literatureempfehlungen

Further literature will be announced during the semester according to the particular lecture/seminar content.

- Master's Programme Business Informatics (Master) > Module der Wirtschafts- und Rechtswissenschaften (Master)

Ansprechpartner/-in:
- Module responsibility: Jörn Hoppmann
- Prüfungsberechtigt: Die im Modul Lehrenden

Entry requirements:
The goal of the course is that students are able to:
- know and understand basic concepts, instruments, and theories of strategic management
- analyze company strategies by applying conceptual frameworks
- understand the advantages and disadvantages of common instruments and models and critically evaluate their applicability
- independently develop strategic options and derive recommendations for their implementation in real-life settings

Module contents:
The course offers a comprehensive overview of the models and instruments of strategic management. The first part of the course introduces important concepts and models of strategic management and discusses their application using examples from corporate practice. Central topics that are being discussed in this context are the relation between firm strategies and competitive advantage, strategy analysis, strategy formulation, strategy implementation, and strategies in the context of internationalization and innovation. In the second part of the course, students apply and deepen their knowledge by writing a thesis that analyzes the strategy of a specific company.

#### Skills to be acquired in this module
- The module introduces to the basics of Entrepreneurship
- Upon completion of the module, students will be able to:
  - understand the challenges of launching an enterprise,
  - strategically analyse the structure of market
  - understand how employees are able to behave like an entrepreneur in established enterprises
  - develop innovative business ideas
  - shape the key factors for realizing a business idea
  - demonstrate a knowledge of the entrepreneurial process
  - demonstrate a knowledge of cost accounting (especially break-even analysis, etc.) and will be able to calculate costs by themselves
  - analyse and evaluate business models

#### Module contents
- The module combines the lecture “Strategie und Entrepreneurship” with a tutorial. It investigates the challenges of launching enterprises and entrepreneurial behaviour in large companies as well. The content of the module follows the process of an entrepreneur. It starts with business ideas, their perception, and evaluation. In addition, it deals with the most important questions of development and management of new business models. The contents of the courses include the following topics:
  - historical, institutional, and theoretical context
  - development, evaluation, and pitching ideas
  - business models
  - building entrepreneurial teams
  - entrepreneurship in large enterprises
  - resources and finance
  - management of growth

**Skills to be acquired in this module**
Upon completion of the module, students will be able to:

- explain and apply the approaches and instruments of organisational sciences;
- demonstrate a familiarity with the basic assumptions, strategies, and core themes of organisational theories and are able to compare and reflect upon them;
- know different forms of organisational design and are able to differentiate them;
- know how to identify and predict issues and developments within operational and organisational structures and processes;
- demonstrate an awareness of the relevance of organisational culture, can describe its characteristics and discuss different analytical techniques;
- describe and analyse processes of organizational change, can point out their influences on strategy, organisational culture, operational and organisational structure, and estimate the relevance of change process initiation;
- work cooperatively and self-dependant within teams and to present complex professional contents precisely and with profound arguments (if chosen to present a topic within the seminar).

Furthermore, the students are able:
- to locate a specific research question within the scientific discussion in this research area and to interlink, reflect and evaluate it accordingly
- to press their point within the scientific discussion in this research area.

**Module contents**
The module contents are arranged in the following way:

- Basic concepts and conceptual demarcation
- Objectives of an organisation
- Dimensions in formal organisation
- Organisational culture
- Organisational structure
- Operational structure and processes

These basic principles of organisation are presented and discussed within the lectures. Current economic and business developments are included. Seminars and tutorials are offered to deepen the lecture presentations and to relate them to examples and cases.

**Literature recommendations**

Further literature will be announced during the semester according to the particular lecture/seminar content.

**Skills to be acquired in this module**
The students:
- understand the goals and concepts of sustainable development;
- discuss the importance of sustainability for companies;
- know basic strategies and instruments that enable companies to achieve sustainable development;
- acquire conceptual and practical skills using case studies, in particular about which instruments can be used to prepare companies for the challenges of sustainable development.

**Module contents**
The module consists of a lecture and a seminar. While the lecture presents and explains concepts, instruments and strategies for sustainable development, the seminar focuses on the practical relevance of the various instruments, concepts and strategies and discusses these based on case studies.
- Concepts and goals of sustainable development
- Introduction to the current discussion on sustainable development
- Current sustainability instruments and strategies for companies
- Case studies

**Skills to be acquired in this module:**  
The students  
- obtain knowledge on advanced topics in IFRS such as hedge accounting, revenue recognition, provisions and financial instruments;  
- understand the role, tasks and legal basis of auditing within the economic environment;  
- understand the concept of the risk-based audit approach.

**Module contents:**  
This module aims at providing an in-depth view on complex issues of IFRS accounting, e.g., hedge accounting and accounting of financial instruments. The students will obtain employability in the audit profession by learning the legal basis and concept of the audit profession. Solving case studies will contribute to achieving the learning objectives.

http://www.uni-oldenburg.de/fiwi_bbl/

**Vorkenntnisse / Previous knowledge**

This is an intermediate course in finance. If you wish to make the most of it, you should already know how (and why) to determine net present values, and you should be familiar with the terms debt, equity, expected return, standard deviation, correlation coefficient, and with the structure of the balance sheet. If all this is completely new to you, I recommend attending the modules  
“mat990 Mathematik für Ökonomen”
“wir150 Statistik I”
“wir082 Corporate Finance”
before registering for this course.

**Examination**

<table>
<thead>
<tr>
<th>Final exam of module</th>

**Entry requirements**
Upon completion of the module, students will be able to:

- recognize challenges facing marketing strategy in the field of markets and societies and draw conclusions for business management
- elaborate and reflect upon the theoretical and conceptual foundations of strategic marketing planning
- come up with examples that exemplify the systemic connection between strategic and instrumental marketing planning
- discuss core assumptions of internationalization in the context of strategy planning and critically reflect upon its implications
- build market research skills in an international context using different methods
- develop their own perspectives on the conceptualization and implementation of international marketing strategies and advance them in discourses

**Module contents**
The core of the module is the application of strategic planning methods in Marketing. A broadened understanding of Marketing in the areas of competitors, market agents and stakeholder orientation will be substantiated in theoretical and practical-normative view. International marketing forms an integrated part of strategic marketing planning; its basics and internal conception are formulated precisely in this course.

wir731 - Design of teaching and learning settings in the field of business administration and economics

Module label  
Design of teaching and learning settings in the field of business administration and economics

Module code  
wir731

Credit points  
9.0 KP

Workload  
270 h

Used in course of study  
- Master of Education Programme (Vocational and Business Education) Economics and Business Administration (Master of Education) > Mastermodule

Entry requirements  
Upon completion of the module, students will:

- know and assess digital media and their usage in vocational teaching and learning settings.
- develop teaching and learning arrangements using digital media. Students analyse these arrangements critically with regard to their application in vocational teaching and learning settings.
- plan, analyse and evaluate lessons.
- decide on an issue to be explored during their school-based practice and analyse the theoretical underpinnings of this issue.
- know and assess functions and methods of evaluation, performance measurement, and performance assessment in schools.

Module contents  
This module focuses on the development, design, analysis, and evaluation of vocational teaching and learning settings. The module consists of three seminars. Current theories and developments in subject-specific pedagogy (didactics) concerning business administration and economics are applied. References are made to central concepts such as competence-orientation, learning in processes of action, and constructivist teaching approaches.

The seminar “Usage and design of digital media in vocational education and training” deals with the analysis, design, application and evaluation of digital media in vocational education and training.

The seminar “Analysis and planning of teaching and learning settings in vocational schools (preparation course school-based practice)” focuses on the analysis, planning and reflection of teaching in vocational schools. This includes the design of complex teaching and learning arrangements and of teaching and learning settings.

The seminar “Evaluation of processes of teaching and learning in vocational contexts” deals with functions, methods and instruments of school evaluation and concepts of evaluation in the teaching profession.

Reference text  
Students have to take part in the seminars actively to fulfil the requirements of the module wir731. This includes usually the regular participation in the sessions, the preparation and reworking of the content of each session (e.g. reading suggested literature, working on learning tasks), and giving presentations in different forms depending on the type of program.
The criteria of an active participation are negotiated and defined at the beginning of the seminar.

Prüfungsberechtigt
- Die im Modul Lehrenden

Entry requirements:

Skills to be acquired in this module:
- Upon completion of the module, students
  - will have a sound understanding of methods used in finance to determine the value of a firm under uncertainty,
  - will have a sound understanding of how investment and financing decisions are related, and how they both affect the value of the firm,
  - will be able to determine intrinsic firm values based on accounting information, and they will be aware of the respective models’ strengths and weaknesses.

Module contents:
The course covers key concepts of modern corporate finance in theory and practice. In particular, we focus on how investment and financing decisions affect the value of the firm. Among the topics discussed are:
- Fundamental analysis and capital market efficiency.
- Cost of debt and equity capital.
- Business valuation models based on dividends, cash flows, and (abnormal) earnings.
- Capital structure and dividend policy.
- Advanced valuation issues.

Literaturempfehlungen:
- Titman / Martin: Valuation, latest edition, Boston (Mass.)
Further readings may be announced during the course.

Entry requirements
- none

Skills to be acquired in this module
- By the end of the course students should have answers to the following questions:
  - How are fundamental values (or "intrinsic values") estimated?
  - How are business strategies analyzed in order to understand the value they create?
  - What business activities determine value?
  - How is "value created for shareholders" identified?
  - How does one pull apart the financial statements to get at the relevant information for valuing equities?
  - How does ratio analysis help in valuation?
  - How does profitability tie into valuation?
  - What is growth? How does one analyze growth? How does one value a growth firm?
  - How does one analyze the quality of financial reports?
  - How does one deal with the accounting methods used in financial statements?
  - How is financial analysis developed for strategy and planning?
  - What determines a firm's P/E ratio? How does one calculate what the P/E should be?
  - What determines a firm's market-to-book (P/B) ratio? How does one calculate what the P/B should be?
  - How does one evaluate risk? For equity? For debt?
  - How does one evaluate an equity research report?
  - How does one trade on fundamental information?

Module contents
- With a stock market bubble and a financial crisis in our recent history, there have been increasing calls to "return to fundamentals." This is a course on fundamental analysis. The primary emphasis is on equity (share) valuation, with a focus on developing and applying methods for valuing firms using financial statement analysis.

The course has a very practical focus. The methods of fundamental analysis will be examined in detail and applied in cases and projects involving listed companies. Topics include models of shareholder value, a comparison of accrual accounting and discounted cash flow approaches to valuation, the analysis of profitability, growth and valuation generation in a firm, diagnosing accounting quality, forecasting earnings and cash flows, pro-forma analysis for strategy and planning, and the determination of price-earnings (P/E) and market-to-book (P/B) ratios.

The course does not assume "market efficiency". Rather, it develops the techniques for challenging traded prices in order to assess whether investments are appropriately priced. It adopts the philosophy that one of the risks in investing is the risk of paying too much. The course is one for the active investor.

Most importantly, we learn how to handle accounting and financial reports in valuation. We see that valuation is really a matter of appropriate accounting for value. The course combines accounting principles and investment principles to answer the question: How do I account for value so that I can challenge stock prices with some confidence?

The course will be taught from the perspective of designing techniques to be used in an (independent) equity research department or firm. Accordingly, the material is pertinent to the security analyst – particularly the equity analyst – who must issue a buy, hold or sell recommendations on stocks. However, much of the material covered in the course is also relevant to the corporate financial analyst for evaluating acquisitions, restructurings and other investments, and for calculating the value generated by strategic scenarios. By the end of the course, the student should feel competent in writing a thorough, credible equity research report or investment analysis that meets the highest standards of professionalism.

The course is of interest to those contemplating careers in investment banking (particularly in equity research), security analysis, consulting, public accounting, and corporate finance. And it will also help with personal investing.

Entry requirements
Students have to understand the theoretical orientation and the institutional structure of financial accounting and standard setting. Many important standards, such as fair value accounting, financial instruments, reserve recognition accounting, management discussion and analysis, employee stock options, impairment tests, hedge accounting, derecognition, consolidation, and comprehensive income, will be analyzed and critically evaluated from students. This course aims to provide students with an in-depth understanding of the underlying accounting concepts and accounting standards governing the preparation of financial statements under International Financial Reporting Standards (IFRS) for external users. Furthermore it develop students’ conceptual skills and professional competence in financial accounting in compliance with the regulatory and financial framework under IFRS.

Module contents
- Accounting Under Ideal Conditions
- The Decision Usefulness Approach to Financial Reporting
- Efficient Securities Markets
- The Value Relevance of Accounting Information
- The Measurement Approach to Decision Usefulness
- Measurement Applications
- The Efficient Contracting Approach to Decision Usefulness
- An Analysis of Conflict
- Executive Compensation
- Earnings Management
- Standard Setting: Economic Issues
- Standard Setting: Political Issues

Entry requirements
Skills to be acquired in this module
Upon completion of the module students will be able to explain the role financial institutions play in financial markets based on economic theory. They will have a sound knowledge of institutional and regulatory conditions under which financial institutions operate today, and they will be able to critically assess respective developments in the financial sector. Moreover, they will have developed a sound understanding of how banks are managed in a competitive environment.

Module contents
We will discuss theoretical foundations of financial intermediation in general, and of banking in particular as well as the economic, institutional, and regulatory context in which financial institutions operate today. Moreover, we will cover selected topics in the area of bank management and bank accounting.

**Skills to be acquired in this module**
By the end of the course students should develop and understand the basic concepts, analytical techniques, instruments and systems to control sustainable corporate success. The students further identify the theoretical background of corporate governance and how corporate governance mechanisms work. Moreover, they develop an up-to-date and mainly practitioner-oriented profile of corporate governance and control systems. They are aware of a controller’s relevance as a corporate conscience and the meaning of controlling as a corporate service. In addition, students identify strategic, operational and department-specific characteristics of corporate control. They argue how to ensure the quality of data and the development of decision-making relevant information. Paper discussions further complement the students' profile by highlighting current and special issues in the field of corporate governance and control. In summary, students link economic, methodological, and cultural aspects to their personal profile and assess whether an activity as a controller fits to their personal plan for future employment. They further strengthen their ability to develop sustainable solutions for comprehensive and specific economic issues.

**Module contents**
In the beginning, the course provides an overview of the historic development as well as conceptions of corporate governance and control in the literature and in practice. It further embeds the role of corporate governance and control within strategic and operational corporate management. The course is further separated in different parts to ensure students’ ability to identify and understand decision-making, coordination and monitoring aspects of corporate governance and control. As such, students analyse corporate actions via the following instruments:
- SWOT-Analysis
- Porter’s Five Forces Model
- Portfolio Analysis
- Strategic Cost Management
- Linear Programming
- Break-Even Analysis
- Value Based Management
- Ratio Analysis
- Balanced Scorecard
- Variance Analysis

**Entry requirements**

**Skills to be acquired in this module**

Students obtain an overview of the most important operational functions of an industrial or service company. These are procurement, production and logistics. Students will get to know typical operational challenges and familiarize themselves with established approaches and methods for analyzing and improving procurement, production and logistics operations.

**Module contents**

The module comprises a lecture (course number 2.02.231) and an accompanying tutorial (course numbers 2.02.231a to 2.02.231j). The lecture is based on the textbook "Grundzüge der Beschaffung, Produktion und Logistik" by Kummer, Grün, und Jammernegg in the third edition of 2013 and the associated workbook, as well as partly on the textbook "Operations Management: Konzepte, Methoden und Anwendungen" by Thonemann in the third edition of 2015. The purpose of the lecture is to explain the fundamental problems and their solutions theoretically. The tutorials focus on application and practice and offer time for questions. There are no formal or content-related participation or entrance requirements.

wir807 - Taxation and Tax Law I

Module label: Taxation and Tax Law I
Module code: wir807
Credit points: 6.0 KP
Workload: 180 h

Used in course of study:
- Master of Education Programme (Vocational and Business Education) Economics and Business Administration (Master of Education) > Mastermodule
- Master's Programme Business Administration, Economics and Law (Master) > Mantelmodule

Ansprechpartner/-in:
Module responsibility
- Jochen Dittmer

Entry requirements:

Skills to be acquired in this module:
The aim of the course is to provide students with a deep and thorough knowledge regarding
- Tax accounting law and
- Taxation procedures.

Module contents:
The course provides a deep insight into Tax accounting law
- Basics of tax accounting law
- Principal values (cost of purchase/cost of manufacture, going concern value, fair market value)
- Depreciation, subsidy regulations
- Transfer of hidden reserves
- Leasing
- Provisions
- Taxation procedures
- Overview about general fiscal law (AO) and tax court code (FGO)
- Tax determination and taxing procedures
- Types of taxing
- Deadlines and extent of balances and tax assessments corrections
- Interest yield

Literaturempfehlungen:
- Falterbaum, Hermann (aktuelle Fassung): Buchführung und Bilanz
- Rose, Gerd & Watrin, Christoph (aktuelle Fassung): Abgabenordnung; mit Finanzgerichtsordnung

It is worth mentioning, that due to the fast-changing tax law, further recommendations regarding the literature cannot be made yet, but are rather given during the course. Required are:
- A collection of the most important tax laws (e.g. NWB-publisher) in current form
- A loose-leaf collection of the tax regulations (e.g. Beck-publisher)

Entry requirements
52 Wochen berufspraktische Tätigkeit

Skills to be acquired in this module
Die Studierenden... • erarbeiten und beantworten eine empirische wissenschaftliche Fragestellung der Berufs-
und Wirtschaftspädagogik selbstständig und unter Verwendung wissenschaftlicher Methoden. • analysieren
den thematischen Hintergrund ihrer Fragestellung hinsichtlich des aktuellen Stands der Forschung und der
Relevanz für die Berufs- und Wirtschaftspädagogik. • führen eigenständig eine empirische Untersuchung
durch, werten diese aus und leiten begründet Handlungsempfehlungen ab. • fertigen eine Masterarbeit an.

Module contents
Das Modul setzt sich zusammen aus einer empirischen Masterarbeit im Feld der Berufs- und Wirtschaftspädagogik (18 KP) und einer begleitenden Lehrveranstaltung in Form eines Kolloquiums (3 KP). In der Masterarbeit bearbeiten die Studierenden innerhalb einer vorgegebenen Frist von 24 Wochen selbstständig, theoriegeleitet und empirisch ein berufs- und wirtschaftspädagogisches Problem mit Hilfe von wissenschaftlichen Methoden. Im Kolloquium zur Masterarbeit stellen die Studierenden ihre Zwischenergebnisse zur Diskussion und erhalten Rückmeldung bezogen auf ihre Präsentation von Gliederung, Methodik und Untersuchungsdesign, Problemstellung und Theorie.

Literaturempfehlungen
Die Literatur zur Bearbeitung der spezifischen Fragestellung muss von den Studierenden selbst recherchiert
werden.
