inf537 - Intelligent Systems

Module label: Intelligent Systems
Module code: inf537
Credit points: 6.0 KP
Workload: 180 h

Used in course of study:
- Master's Programme Business Informatics > Akzentsetzungsmodule Bereich Wirtschaftsinformatik
- Master's Programme Computing Science > Angewandte Informatik
- Master's Programme Engineering of Socio-Technical Systems > Embedded Brain Computer Interaction
- Master's Programme Engineering of Socio-Technical Systems > Human-Computer Interaction
- Master's Programme Engineering of Socio-Technical Systems > Systems Engineering

Contact person:
Module responsibility: Jürgen Sauer
Authorized examiners: Jürgen Sauer, Die im Modul Lehrenden

Entry requirements:

Skills to be acquired in this module:

Professional competence:
The students:

- name the structure of agent-based systems
- use problem-solving methods for complex problems
- characterise the application area of process planning
- evaluate the suitability of processes regarding to specific problems

Methodological competence:
The students:

- assign problem-solving methods to different problems

Social competence:
The students:

- implement selected methods in small teams

Self-competence:
The students:

- develop own solutions for given problems

Module contents:
A lot of application areas use "intelligent" problem-solving methods. These are the main focus of this lecture. They will be illustrated by examples in order to enhance the students' problem-solving abilities. These include:

- A brief introduction into AI
- Agent systems and
- Solution methods of AI like heuristics, meta-heuristics, soft computing methods.

To apply and foster the contents of the lecture, an intelligent planning system is implemented in practical exercises.

Reader's advisory:
