**Module responsibility**
- Christoph Siegfried Herrmann
- Die im Modul Lehrenden

**Authorized examiners**
- Die im Modul Lehrenden

**Entry requirements**

**Skills to be acquired in this module**

The lecture will be based mainly on the textbook by Atkinson & Hilgards. It will introduce the students to selected topics of Experimental Psychology which are relevant for socio-technical systems (e.g. learning & memory, perception, language, emotion). It will also cover aspects of Social Psychology, Psychological Disorders, and Individual Psychology. It thereby provides students with a background in computer science or a related discipline with fundamental skills in experimental psychology necessary for mastering the subsequent courses from psychology featured in the curriculum.

**Professional competence**
The students:

- will acquire basic knowledge in selected topics of Psychology

**Methodological competence**
The students:

- learn selected methods and theories of Psychology

**Social competence**
The students:

- will learn to work together in small groups
- will communicate scientific theories

**Self-competences**
The students:

- will learn to apply their knowledge in other, more specific Psychology courses
