Entry requirements

Skills to be acquired in this module
Professional competence
The students:
- know hard- and software system engineering approaches and use them in practice
- make a qualified and contextual choice of hard- and software designing approaches
- characterise and consider challenges of soft- and hardware systems in education

Methodological competence
The students:
- know engineering approaches and use them in new contexts
- evaluate decision making concepts and use them in different domains

Social competence
The students:
- cooperate with team members during the development process
- recognize package tasks and resume their responsibilities
- analyse team conflicts and resolve them
- document the software development process in a team
- moderate team meetings and decision making processes appropriately

Self-competence
The students:
- reflect their self-perception with regard to the implementation of software systems

Module contents
A hard- or software system for education will be designed in this practical course. The requirements analysis of hard- or software systems and the dealing with customers are the main topics of this practical course.

Reader's advisory
As announced in course
