inf494 - Current Topics in 'Modeling and Analysis of Complex Systems' I

Current Topics in 'Modeling and Analysis of Complex Systems' I

Module code inf494
Credit points 3.0 KP
Workload 90 h

- Master's Programme Computing Science > Theoretische Informatik

Module responsibility
- Sibylle Fröschle
- Die im Modul Lehrenden

Authorized examiners
- Sibylle Fröschle
- Die im Modul Lehrenden

Entry requirements
Skills to be acquired in this module

This module integrates current developments in the field in adequate study courses.

Professional competences
The students:
- define and contrast a computer science part, in which they are specialised, in detail or evaluate computer science in general
- recognise and evaluate applied techniques and methods of their subject and are aware of their limits
- identify, structure and solve problems/tasks, also in new or developing subject areas
- apply state of the art and innovative methods to solve problems, if necessary from other disciplines
- are aware of the current limits and contribute to the development of computer science research and technology
- discuss and evaluate recent computer science developments

Methodological competences
The students:
- examine tasks with technical and research literature, write an academic article and present their solutions academically
- evaluate problems/tasks, including new or developing subject areas of their discipline and apply computer science methods for solutions and research
- schedule time processes and resources

Social competences
The students:
- communicate with users and experts convincingly

Self-competences
The students:
- pursue the overall and special computer science development critically
- develop and reflect self-developed hypotheses to theories independently

Module contents
See assigned course description, e.g. „Security: Grundlagen“ oder „Security for Cyberphysical Systems“

Reader’s advisory
As announced in course
