inf663 - Application Area Maritime

Module label: Application Area Maritime
Module code: inf663
Credit points: 6.0 KP
Workload: 180 h

Used in course of study: Master's Programme Computing Science > Angewandte Informatik

Contact person: Axel Hahn, Die im Modul Lehrenden

Entry requirements:

Skills to be acquired in this module:

Professional competences:
The students gain knowledge about ship handling and navigation and learn to understand maritime transportation as a system of systems with systems on board for stability, propulsion and steering as well as bridge resource management. They understand the latter as a major contribution to organize navigation as a hierarchical team concept of a safety critical sociotechnical system. The students are aware of the special technical and physical challenges of navigation.

Methodological competences:
The students can apply system engineering methods to describe, analyse and design maritime systems. By looking on maritime transportation the gain transferable knowledge on other cyber physical systems. Students learned to how systems can deal with harsh environmental conditions in a resilient way.

Social competences:
Maritime transportation is a major basis of a global economy. Typically, students do not have an understanding of these transportation systems nor their technical and systemic challenges. Therefore, the student knows the concepts of maritime transportation and its role in international transportation networks after finishing this module.

Self-Competences:
Especially their competences cover an understanding as maritime transportation as a systems of system with high requirements on reliability, dependability and safety in combination with efficiency to be competitive in a global economy.

Module contents:
The module consists of a lecture and an exercise part:
- Lecture: Maritime Transportation in global and local supply chains, Base concepts of ship handling and navigation, maritime system dynamics, bridge resource management, eNAvigation and high automation systems.
- Seminar: Covering aspects of maritime transportation

Reader's advisory:
Bernhard Berking, Werner Huth (Herausgeber), Handbuch Nautik 1: Navigatorische Schiffsführung, Seehafen Verlag, 2010

Language of instruction: English
Duration (semesters): 1 Semester
Module frequency: Once a year
Module capacity: unlimited
Modulelevel: AS (Akzentsetzung / Accentuation)
Modulart: Pflicht o. Wahlpflicht / compulsory or optional

Vorkenntnisse / Previous knowledge:

Examination:

Final exam of module:

At the end of the lecture period: Oral exam and documentation

Course type: Lecture, Seminar

Comment: 2.00
SWS: 2.00
SuSe and WiSe: 28 h
Frequency: 28 h
Workload attendance: 56 h

Total time of attendance for the module: 56 h
