mar510 - Molecular Mechanisms and Interactions

Module label: Molecular Mechanisms and Interactions
Module code: mar510
Credit points: 12.0 KP
Workload: 360 h
Used in course of study: Master's Programme Microbiology > Mastermodule
Contact person:

- Ralf Andreas Rabus

Module responsibility

Entry requirements: none

Skills to be acquired in this module:
The students know the molecular mechanisms of metabolism, genetics and evolution. They know regulatory mechanisms on the molecular level and feedback mechanisms between organisms. They know the basics of microbial ecology and the biogeochemistry of important microbial habitats. They know molecular and chemical-analytical methods of microbiology. The have experience with the field study of microorganisms.

Module contents:
Lecture + exercises: Molecular Microbiology
Part I on DNA: structure, DNA-proteins, DNA-replication, recombination, transposition, mutation, repair, plasmids and DNA-exchange
Part II on gene expression: transcription, regulation of transcription, translation
Part III on enzymes: protein structures, basic concepts and kinetics, catalytic and regulatory strategies
Part IV on regulatory networks: diauxie and catabolite repression, oxygen regulation, chemotaxis

Lecture + exercises: Microbial Ecology
Principles of biogeochemistry, global element cycles, mineralization of organic substances, chemotaxis, aquatic habitats, terrestrial habitats, deep subsurface biosphere, syntrophy and symbiosis, microbes in earth history, methods in microbial ecology, isotope fractionation, applied microbiology, bioremediation

Broadening Lecture: Scientific writing and presentation
Presentation and analysis of structure und style of scientific publications, presentation and discussion of own written elaborations
Excursions into the field

Reader's advisory:
Molecular Microbiology:
Stryer – Biochemistry
Voet – Biochemistry
Knippers – Molekulare Genetik
Snyder – Molecular Genetics of Bacteria
Brock - Microbiology

Links:
Language of instruction: English
Duration (semesters): 1 Semester
Module frequency: jährlich
Module capacity: unlimited
Reference text: 12 CP | VL; Ü; KO; EX | 2. FS | Rabus
Modullevel: MM (Mastermodul)
Modulart: Pflicht
Lern-/Lehrform / Type of program:
Lecture + Exercises: Molecular microbiology, (2 +1 SPPW, 3 CP)
Lecture + Exercises: Microbial ecology (2 + 1 SPPW, 3 CP)
Broadening lecture: Scientific writing and presentation (2 SPPW, 3 CP)
Excursion (1 CP)
Microbiological + ICBM Colloquium (2 CP)

Vorkenntnisse / Previous knowledge:
Examination Time of examination Type of examination
Final exam of module

Two written tests about the contents of the lectures 'Molecular Microbiology' and 'Microbial Ecology'.

At least 50 % of the reachable points in written tests about the two lectures mentioned above. Active participation (Active and documented participation in practical courses (labs, exercises, seminars, field trips) and courses.
