### Used in course of study
- Master's Programme Biology > Skills Modules
- Master's Programme Neuroscience > Skills Modules

### Contact person
Module responsibility
- Fabian Otto-Sobotka

Authorized examiners
- Fabian Otto-Sobotka

### Entry requirements

### Skills to be acquired in this module
- Social skills
- Interdiscipl. knowlg.
- Maths/Stats/Progr.
- Scientific English

- students learn the use of the software R in application scenarios
- students learn to actively "speak" the programming language R
- students practice statistical data analysis with R

### Module contents
The lecture gives an intuitive introduction into the use of the statistics software R. We start by introducing the basic handling of R and the syntax of its programming language. We use those to obtain the first statistical analyses from R. The next important step is to create informative graphics to represent the statistical results. Finally, we look into programming concepts that allow for more complex statistical analyses.

### Reader's advisory
- R Core Team - R: A language and environment for statistical computing (Reference Manual)

### Links

### Language of instruction
English

### Duration (semesters)
1 Semester

### Module frequency
annually , summer term

### Module capacity
24

### Reference text
Recommended previous knowledge / skills: basic statistical knowledge including regression analysis

### Modulart
je nach Studiengang Pflicht oder Wahlpflicht

### Lern-/Lehrform / Type of program
- basic statistical knowledge including regression analysis

### Examination
- Final exam of module: after the course, practical exercise
