Skills to be acquired in this module

+ Neurosci. knowlg.  
++ Expt. Methods  
+ Independent research  
+ Scient. Literature  
+ Social skills  
+ Interdiscipl. knowlg.  
++ Maths/Stats/Progr.  
+ Data present./disc.  
+ Scientific English  
+ Ethics

This module offers a concise introduction to the basic principles of functional magnetic resonance imaging (fMRI). Students will gain essential knowledge about experimental design, data collection and analysis. Special emphasis will be laid on the statistical background of fMRI data analysis and a hands-on introduction to SPM and FSL, two widely-used and free software packages for fMRI data analysis and results visualisation.

**Module contents**

1. Methodological basics of functional magnetic resonance imaging (fMRI)  
2. Basic principles of fMRI experimental design and data collection  
3. Statistical background of fMRI data analysis  
4. Hands-on training in fMRI data analysis and results visualisation with SPM and FSL

**Reader's advisory**

Recommended textbook(s) or other literature:

Language of instruction  
English

Duration (semesters)  
1 Semester  
annually, winter term, first half

Module capacity  
40

Module level  
---

Module type  
je nach Studiengang Pflicht oder Wahlpflicht

Lern-/Lehrform / Type of program  
Recommended previous knowledge / skills: statistics, MATLAB

Vorkenntnisse / Previous knowledge  

- Time of examination: December
- Type of examination: written exam (multiple choice) In addition, mandatory but ungraded: continuous active participation
