Skills to be acquired in this module:
Upon completion of this course, students
have increased their proficiency in different forms of scientific presentation and communication in English, with special emphasis on neuroscience
are able to express themselves with correct sentence structure and grammar, correct use of idioms and correct pronunciation
are proficient in different contexts of scientific communication (e.g., paper, poster and informal exchange by email or phone)
are able to recognize and avoid common errors of non-native speakers.

Module contents:
Lectures cover
- characteristics of the different forms of scientific presentations
- sentence structure using the passive voice
- scientific vocabulary and terminology as contrasted to common speech
- appropriate language for communication with scientific editors and referees

Students read neuroscience texts of an advanced level and practice explaining and presenting these in both written and oral form. They also practice different contexts of scientific communication (e.g., paper, poster and informal exchange by email or phone). Emphasis is placed on individual problems in pronunciation and language use errors.
