Appendix 6 Degree-specific appendix - Engineering Physics

Supplement to Section 1 Scope of application

These Master's examination regulations apply to the Master's degree programme in Engineering Physics offered by the Faculty of Mathematics and Natural Sciences of the Carl von Ossietzky University of Oldenburg and the Faculty of Technology of the University of Applied Sciences Emden/Leer.

Supplement to Section 2 Learning outcomes

The Master's degree in Engineering Physics qualifies students for PhD programmes in the fields of physics and engineering sciences. More information can be found in the PhD regulations.

Supplement to Section 3 University degree

Once the student has passed the Master's examination for the international Master's degree programme in Engineering Physics, the Faculty of Mathematics and Natural Sciences of the Carl von Ossietzky University of Oldenburg and the Faculty of Technology of the University of Applied Sciences Emden/Leer award the degree of Master of Science (MSc).

Supplement to Section 5 Duration, scope and structure of the academic programme, part-time study

On 4: The Master's degree programme comprises compulsory modules (with a student workload of 36 credit points), elective modules (with a student workload of 54 credit points) and the Master's thesis module (with a student workload of 30 credit points). The modules are taught in either German or English.

On 5: It is possible to specialise in the following areas: Biomedical Physics, Acoustics, Laser & Optics or Renewable Energies. A specialization is listed on the academic transcript if at least 12 credit points were obtained from modules from the Engineering Science programme in this specialisation and at least 18 credit points were obtained from modules in this specialisation area. The student must have passed all modules.

On 7: Students in the European Wind Energy Master programme must complete modules according to §10(b).

^{*)} There may be interim provisions for this version of the regulations, which may also affect you during the course of your degree programme. For more information, please read the official version of the regulations/amendments (Section II) in the official notices at: https://www.uni-oldenburg.de/amtliche-mitteilungen/

Supplement to Section 6 Examining Board, Examination Office

On 1: The Examining Board is appointed by the "Engineering Physics Joint Committee" of the Carl von Ossietzky University of Oldenburg and the University of Applied Sciences Emden/Leer, and is approved by the Faculty of Mathematics and Natural Sciences of the Carl von Ossietzky University of Oldenburg and the Faculty of Technology of the University of Applied Sciences Emden/Leer.

The Examining Board consists of six members with voting rights, namely two professors or university lecturers from the University of Oldenburg, two professors or university lecturers from the University of Applied Sciences Emden/Leer, a staff member active in teaching, and a student following the degree programme.

Supplement to Section 7 Examiners

Employees and members of the University of Oldenburg, the University of Applied Sciences Emden/Leer or another university, who are qualified to teach the relevant examination subject or subarea of the examination subject, are appointed to perform assessments and set examinations.

Supplement to Section 9 Admission to modules and module examinations

Modules can be taken by students enrolled in the Engineering Physics Master's programme at the Carl von Ossietzky University of Oldenburg or at the University of Applied Sciences Emden/Leer as long as the grounds for exclusion in Section 20.3.3 do not apply.

Module, requiring "active participation", can only be approved as passed if the requested amount of participation was documented. "Active participation" is considered to be regular, active and well documented participation in practical meetings (practical courses, exercises, seminars, excursions) and in practical parts of lectures. This includes the solving of exercises, documentation of the done experiments, discussions during seminars, or the documentation and presentation of the lecture's contents. The efforts of the "active participation" are not graded. In the case of conflict an ombudperson is to be asked.

Supplement to Section 10 Structure and content of the modules

| Module name | Module | Credit | Teaching | Examination components | | | |
|--------------------------------------|-----------------------------|--------|----------------|------------------------------|--|--|--|
| | type | points | format | | | | |
| phy631 | Compulsory | 6 | L or I or S | 1 Examination | | | |
| Advanced Metrology | | | | | | | |
| phy640 | Compulsory | 3 | S | 1 Examination and active | | | |
| Seminar Advanced Topics in | | | | participation of the seminar | | | |
| EP | | | | | | | |
| phy611 | Compulsory | 6 | L and E | 1 Examination | | | |
| Theoretical Methods | | | | | | | |
| phy681 | Compulsory | 6 | L, E, S, I | 1 Examination | | | |
| Tools and Skills in | | | | | | | |
| Engineering Sciences | | | | | | | |
| phy691 | Compulsory | 15 | Practical work | 1 Examination | | | |
| Advanced Research Project | | | | | | | |
| (Preparation for the Master's | | | | | | | |
| Thesis) | | | | | | | |
| Total | | 36 | | | | | |
| $I = I \circ (r) $ $E = E \circ (r)$ | L Internation C. Cominer(e) | | | | | | |

a) Students must complete the following compulsory modules (with a student workload of 36 credit points):

L = Lecture(s), E = Exercise(s), I = Internship, S = Seminar(s)

The following elective modules are offered in the Master's degree programme: Students must obtain 12 credit points for elective modules listed under "Advanced Physics".

1. Advanced Physics

| Module name | Module | Credit | Teaching format | Examination components |
|--------------------------------|----------|--------|-----------------|------------------------|
| | type | points | | |
| phy600 | Elective | 6 | 1 L | 1 Examination |
| Photonics | | | | |
| phy601 | Elective | 6 | 1 L | 1 Examination |
| General Theory of Relativity | | | | |
| phy602 | Elective | 6 | 2 L | 1 Examination |
| High-Energy Radiation | | | | |
| Physics & Space Environment | | | | |
| phy603 Fluid | Elective | 6 | 2 L | 1 Examination |
| Dynamics | | | | |
| phy604 | Elective | 6 | 2 L | 1 Examination |
| Cosmology & | | | | |
| Accretion Disks | | | | |
| phy605 | Elective | 6 | 1 L | 1 Examination |
| Digital Signal Processing | | | | |
| phy606 | Elective | 6 | 2 L | 2 partial Examinations |
| Physics with Ultrashort Pulses | | | | |
| and Fourier Methods | | | | |
| phy679 | Elective | 6 | 1 L | 1 Examination |
| Acoustics | | | | |
| phy632 | Elective | 6 | 1 L | 1 Examination |
| Spectrophysics | | | | |
| phy633 | Elective | 6 | 1 L | 1 Examination |
| Optics | | | | |
| phy607 | Elective | 6 | 2 L | 1 Examination or |
| Selected Topics in Advanced | | | | 2 partial examinations |
| Physics | | | | |

2. Specialisation: Biomedical Physics 2.1. Engineering Science

Students must obtain at least 12 credit points from the following modules.

| Module name | Module type | Credit points | Teaching format | Examination components |
|----------------------------|----------------|------------------|-----------------|------------------------|
| bio279 | Elective | 6 | 1 L | 1 Examination |
| Foundations of Physiology | | | | |
| phy697 | Elective | 6 | 1L | 1 Examination |
| Information Processing and | | | | |
| Communication | | | | |
| phy695 | Elective | 6 | 1L | 1 Examination |
| Specialisation course: | | | | |
| Radiation Protection | | | | |
| phy696 | Elective | 6 | 1L | 1 Examination |
| Advanced Topics Speech | | | | |
| and | | | | |
| Audio Processing | | | | |

| phy685 | Elective | 6 | L, E, I, S | 1 Examination or |
|------------------------------|----------|---|------------|-----------------------|
| Advanced Engineering | | | | 2 partial examination |
| Topics in Biomedical Physics | | | | |
| & Acoustics | | | | |

2.2. Specialisation

Students must obtain at least 18 credit points from the following modules.

| Module name | Module type | Credit points | Teaching format | Examination components |
|----------------------------|----------------|------------------|-----------------|---------------------------|
| phy732 | Elective | 6 | 1 L, E, S | 1 Examination |
| Psychophysics and | | | | |
| Audiology | | | | |
| phy698 | Elective | 6 | 2 L | 1 Examination |
| Selected Topics on Medical | | | | |
| Radiation Physics & | | | | |
| Medical Radiation Physics | | | | |
| phy678 | Elective | 6 | 1 L | 1 Examination |
| Processing and Analysis of | | | | |
| Biomedical Data | | | | |
| phy635 | Elective | 6 | 2 L | 2 partial Examinations |
| Imaging Techniques/ | | | | |
| Optical Measuring | | | | |
| Techniques | | | | |
| phy686 | Elective | 6 | L, E, I, S | 1 Examination or |
| Advanced Topics in | | | | 2 partial examination |
| Biomedical Physics & | | | | |
| Acoustics | | | | |

3. Specialisation: Acoustics 3.1. Engineering Science

Students must obtain at least 12 credit points from the following modules.

| Module name | Module type | Credit points | Teaching format | Examination components |
|--|-------------|------------------|-----------------|---|
| phy730 Machine Learning | Elective | 6 | 1 L | 1 Examination |
| phy694 Machine Learning II | Elective | 6 | 1 L | 1 Examination |
| phy677 Speech Processing | Elective | 6 | 1 L | 1 Examination |
| phy685 Advanced Engineering Topics in Biomedical Physics & Acoustics | Elective | 6 | 2 L | 1 Examination or 2 partial examination |

3.2. Specialisation

Students must obtain at least 18 credit points from the following modules.

| Module name | Module type | Credit points | Teaching format | Examination components |
|---------------------------------------|----------------|------------------|-----------------|---------------------------|
| phy732 Psychophysics and Audiology | Elective | 6 | 1 L | 1 Examination |
| phy678 | Elective | 6 | 1 L | 1 Examination |

| Processing and Analysis of Biomedical Data | | | | |
|--|----------|---|-----|---|
| phy686 Advanced Topics in Biomedical Physics & Acoustics | Elective | 6 | 2 L | 1 Examination or 2 partial examination |
| phy696 Advanced Topics Speech and Audio Processing | Elective | 6 | 1 L | 1 Examination |

4. Specialisation: Laser and Optics 4.1. Engineering Sciences

Students must obtain at least 12 credit points from the following modules.

| Module name | Module type | Credit points | Teaching format | Examination components |
|-----------------------------|----------------|---------------|-----------------|------------------------|
| phy632 | Compulsory | 6 | 1 L | 1 Examination |
| Spectrophysics | | | | |
| phy633 | Compulsory | 6 | 1 L | 1 Examination |
| Optics | | | | |
| inf308 | Elective | 6 | 1 L, 1 E | 1 Examination |
| Micro-robotics II | | | | |
| phy608 | Elective | 6 | 1 L, 1 S | 1 Examination |
| Medical Optics | | | | |
| phy682 | Elective | 6 | 2 L | 1 Examination or |
| Advanced Engineering Topics | | | | 2 partial examination |
| in Laser and Optics | | | | • |

4.2. Specialisation

Students must obtain at least 18 credit points from the following modules.

| Module name | Module | Credit | Teaching format | Examination |
|--------------------------------|----------|--------|-----------------|-----------------------|
| | type | points | | components |
| phy637 | Elective | 6 | 1 L | 1 Examination |
| Laser Design and Beam | | | | |
| Guiding | | | | |
| phy638 | Elective | 6 | 1 L | 1 Examination |
| Laser Material processing | | | | |
| phy634 | Elective | 6 | 1 L, 1 S | 1 Examination |
| Biophotonics and Spectroscopy | | | | |
| phy639 | Elective | 6 | 1 L | 1 Examination |
| Physics with Ultrashort Pulses | | | | |
| and Intense Light | | | | |
| phy636 | Elective | 6 | 1 L or 1 I | 1 Examination |
| Fibre Technology and | | | | |
| Integrated | | | | |
| Optics | | | | |
| phy683 | Elective | 6 | 2 L | 1 Examination or |
| Advanced Topics in Laser and | | | | 2 partial examination |
| Optics | | | | |

5. Specialisation: Renewable Energies 5.1. Engineering Sciences

Students must obtain at least 12 credit points from the following modules.

| Module name | Module type | Credit points | Teaching format | Examination components |
|--------------------------------|----------------|------------------|-----------------|------------------------|
| phy641 | Elective | 6 | 2 L | 1 Examination |
| Energy Resources & Systems | | | | |
| phy642 | Elective | 6 | 2 L | 1 Examination |
| Renewable Energy | | | | |
| Technologies I for Engineering | | | | |
| Physics | | | | |
| Phy643 | Elective | 6 | L, S, E, I | 1 Examination |
| Renewable Energy | | | | |
| Technologies | | | | |

¹ The modules are offered by the partner universities.

Students must obtain at least 25 credit points from the elective modules.

Supplement to Section 11 Types of module examinations

The nature and scope of the examination components must correspond to the number of credit points for that particular module. The scope of the various types of module examinations (with a student workload of 6 credit points, as partial examinations if applicable) is as follows:

- Written examination: Between 90 and 180 minutes
- Oral examination: Between 20 and 45 minutes
- Short presentation: Between 10 and 20 pages of written analysis plus a presentation lasting between 15 and 30 minutes
- Term paper: Between 15 and 30 pages
- Internship report: Between 15 and 30 pages, □ presentation lasting between 20 and 45 minutes
- Presentation:Between 20 and 45 minutes

Supplement to Section 15 Resits of module examinations

Upon request, students may withdraw from an elective module for which they fail the module examination without stating reasons. In this case, unsuccessful attempts for the alternative elective module will be counted.

Supplement to Section 20 Admission to the Master's thesis phase

For admission to the Master's thesis phase, students must be enrolled in the corresponding Master's programme at the Carl von Ossietzky University of Oldenburg or the University of Applied Sciences Emden/Leer and meet the additional requirements stipulated in Section 20 of the examination regulations.

Supplement to Section 21 Final Master's module

On 2: The topic of the Master's thesis may be set by any professor or lecturer at the Faculty of Mathematics and Natural Sciences of the Carl von Ossietzky University of Oldenburg or at the Faculty of Technology of the University of Applied Sciences Emden/Leer who is involved in teaching the Master's programme in Engineering Physics. Subject to the approval of the Examining Board, the topic may also be set by other authorised examiners in accordance with Section 7.1, in which case the second examiner must be a professor or university lecturer at the Faculty of Mathematics and Natural Sciences of the Carl von Ossietzky University of Oldenburg or at the Faculty of Technology of the University of Applied Sciences Emden/Leer who is involved in teaching the corresponding Master's degree programme.

On 3: The approval of the Examining Board will be required if a Master's thesis is written at an organisation outside of this University or the University of Applied Sciences Emden/Leer and supervised or evaluated by an external examiner at the organisation in question.

On 4: The Master's thesis can be written in either German or English.

Supplement to Section 23 Overall result

On 3: All module results are taken into account when determining the overall mark.
