### Sustainability Economics and Management (M.A.)

In the 21st century, humanity is facing huge challenges: climate crisis, destruction of habitats, loss of biodiversity, epidemics, world famine and poverty are threatening the lives and peaceful existence of today’s and future generations. To deal with these challenges and secure our future, we need leaders with a strong sense of responsibility, a solid combination of expertise in ecological and social issues, and a well-founded scientific understanding — experts in the field of sustainability.

The Master's programme Sustainability Economics and Management is designed to train these leaders. It provides them with factual knowledge as well as analytical, interdisciplinary and social skills that enable them to work in various businesses and organisations. The focus is on the critical analysis of company processes and economic structures as well as the development of sustainable solutions. Graduates should be able to actively drive a social and ecological transformation in many different ways. The University of Oldenburg is ideally placed to provide these skills because sustainability is one of its central teaching and research fields.

### Career opportunities

Graduates have a wide range of employment opportunities in various companies and organisations:

- In sustainability, environmental and communication departments
- Political or public institutions, associations, international organisations and NGOs
- Sustainability-oriented science

### Structure and contents

### Specialisations

By choosing specific combinations of supplementary modules, students can specialist in particular areas. The possible specialisation areas are:

- Energy, Climate and Development
- Sustainable Innovation, Digitalisation and Entrepreneurship
- Environmental Management, Planning and Conservation

### Stay abroad

Students can spend a semester abroad at one of our partner universities around the world with similar degree programmes. We recommend the second or third semester for this.
